Capital Q: a guide to every feature

Where to go, what each page does, and what to do there. With step-by-step stories for investors and founders.

Screenshots taken from the live product on 2026-10-16 using fictional demo accounts. Every company, investor and person shown is made up for demonstration.

43. 7. Limits and what’s coming

1. What Capital Q is

Capital Q helps investors and founders of private companies find each other and decide with evidence. At its centre is **Q**, an AI investment analyst you can type or talk to. Investors set out what they invest in (their *mandate*). Capital Q then shows them companies that fit, explains why, keeps track of every relationship, and helps them reach a decision. Founders upload what they already have. Q reads it, builds their company profile and deck, shows them what investors will question, matches them with investors, and helps them practise and apply. Capital Q is not a marketplace or a chatbot. It keeps facts and opinions apart, says plainly when something is unknown, and never acts for you without your approval.

Three things to know before you start

1. **Q asks before it acts.** When Q prepares something that matters, like a message, an expression of interest or a meeting, you see it first and click Approve. Nothing is sent until you do.
2. **Unknown stays unknown.** If a fact is missing, Capital Q says “unknown”. It never counts a gap against a company.
3. **Private stays private.** A founder’s private documents and notes never shape what an investor sees unless the founder shares them.

2. Getting in: create an account, sign in, meet Q

Capital Q runs in any modern web browser on a computer, tablet or phone. The address is **https://capital-qweb-production.up.railway.app**.

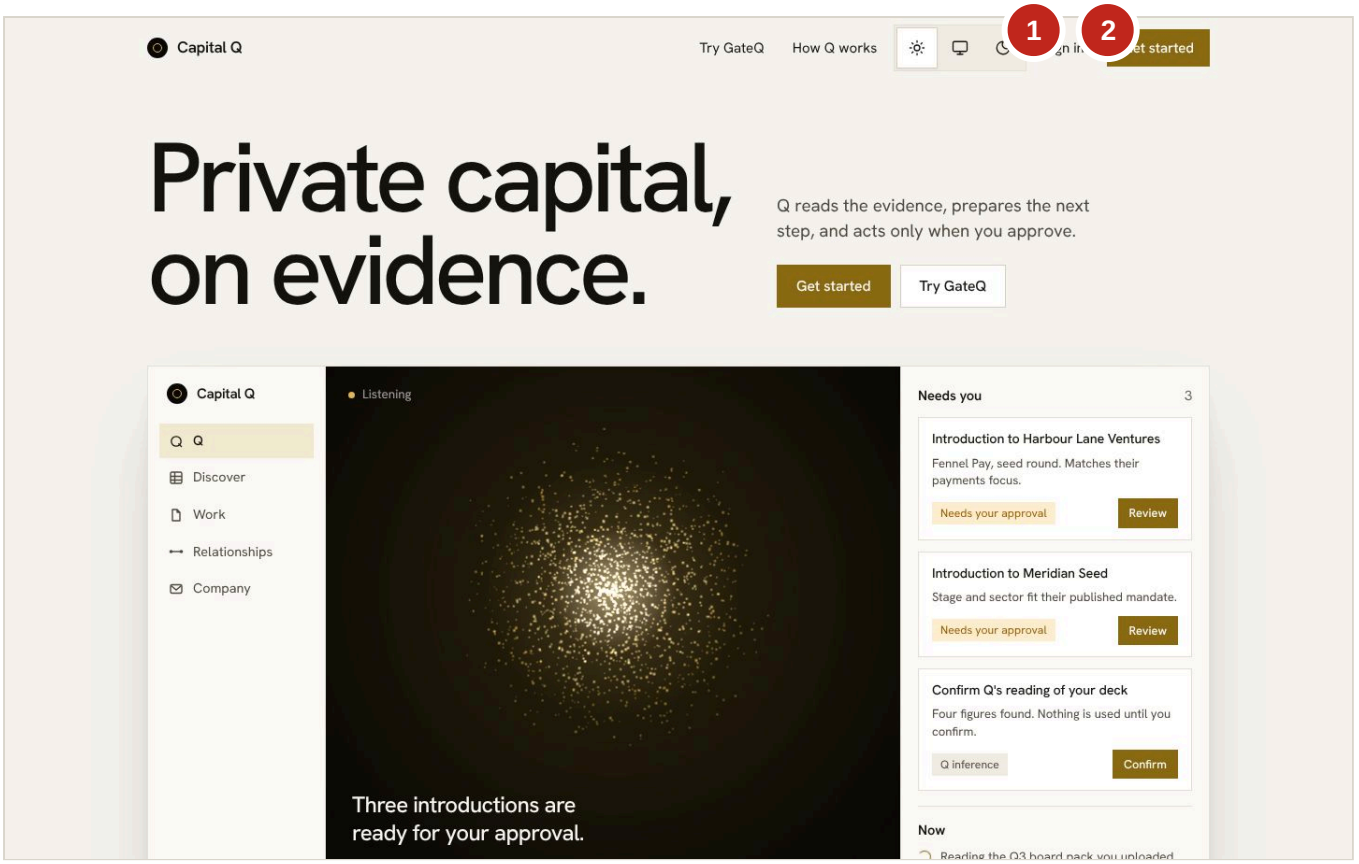

Figure 1. The public home page. Click Get started to create an account, or Sign in.

Creating a new account

1. On the home page, click **Get started**.
2. Choose what you are here to do: **Raise capital** (you set up your company as a founder) or **Invest** (you set up your mandate as an investor).
3. Type your name (what Q should call you), and your company or fund if you like.
4. Type your email address and a password of at least 8 characters, or click **Continue with Google**.
5. Click **Create account**. Capital Q emails you a link to confirm your address. Open it.
6. Q greets you and starts your set-up as a conversation (section 4.23).

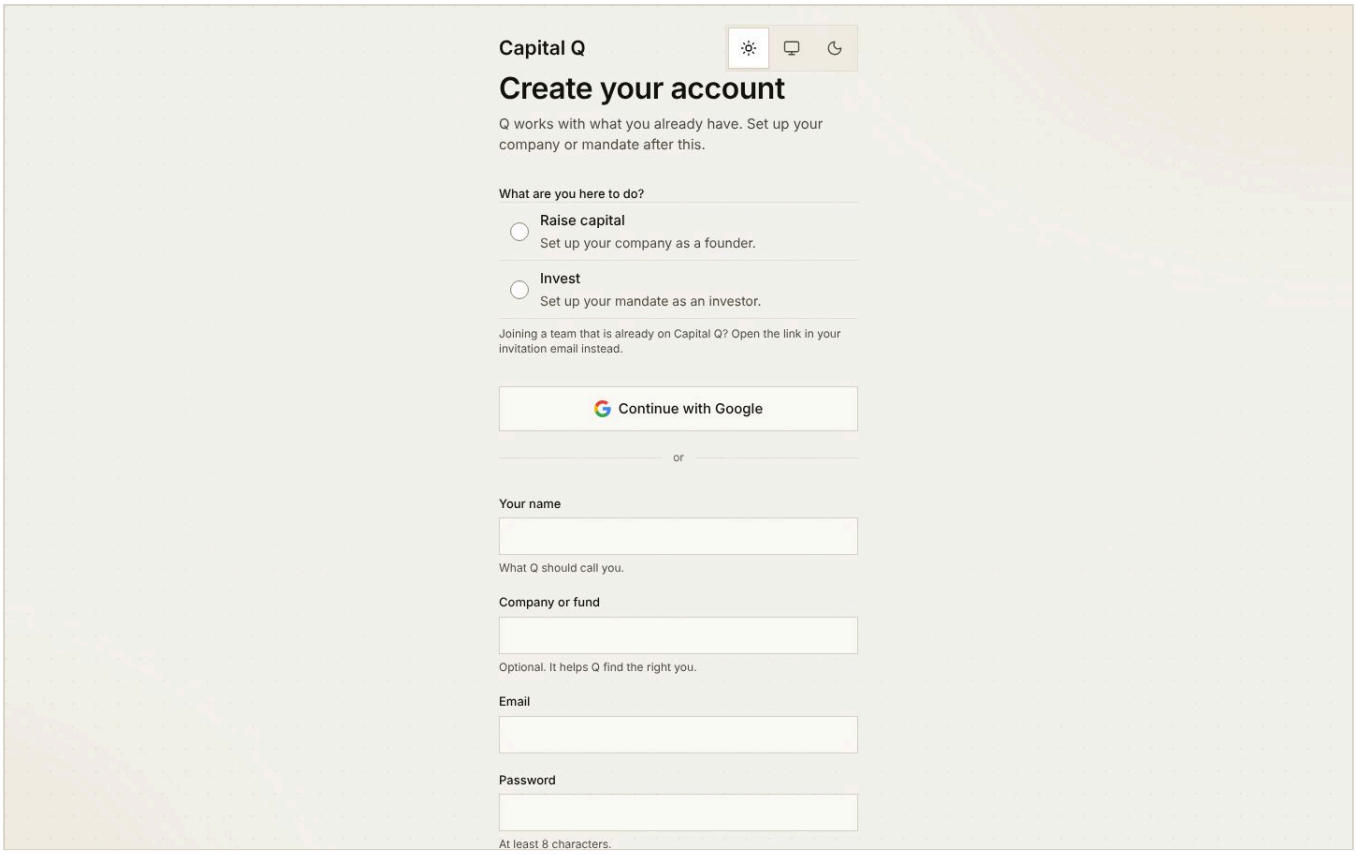

Figure 2. Create your account: choose Raise capital or Invest, then your details.

If a teammate invited you

Open the link in your invitation email. The sign-up page then says “You were invited to a team on Capital Q”, and you don’t choose Raise capital or Invest or name a company: the invitation already says where you are joining. Create your account, then accept the invitation.

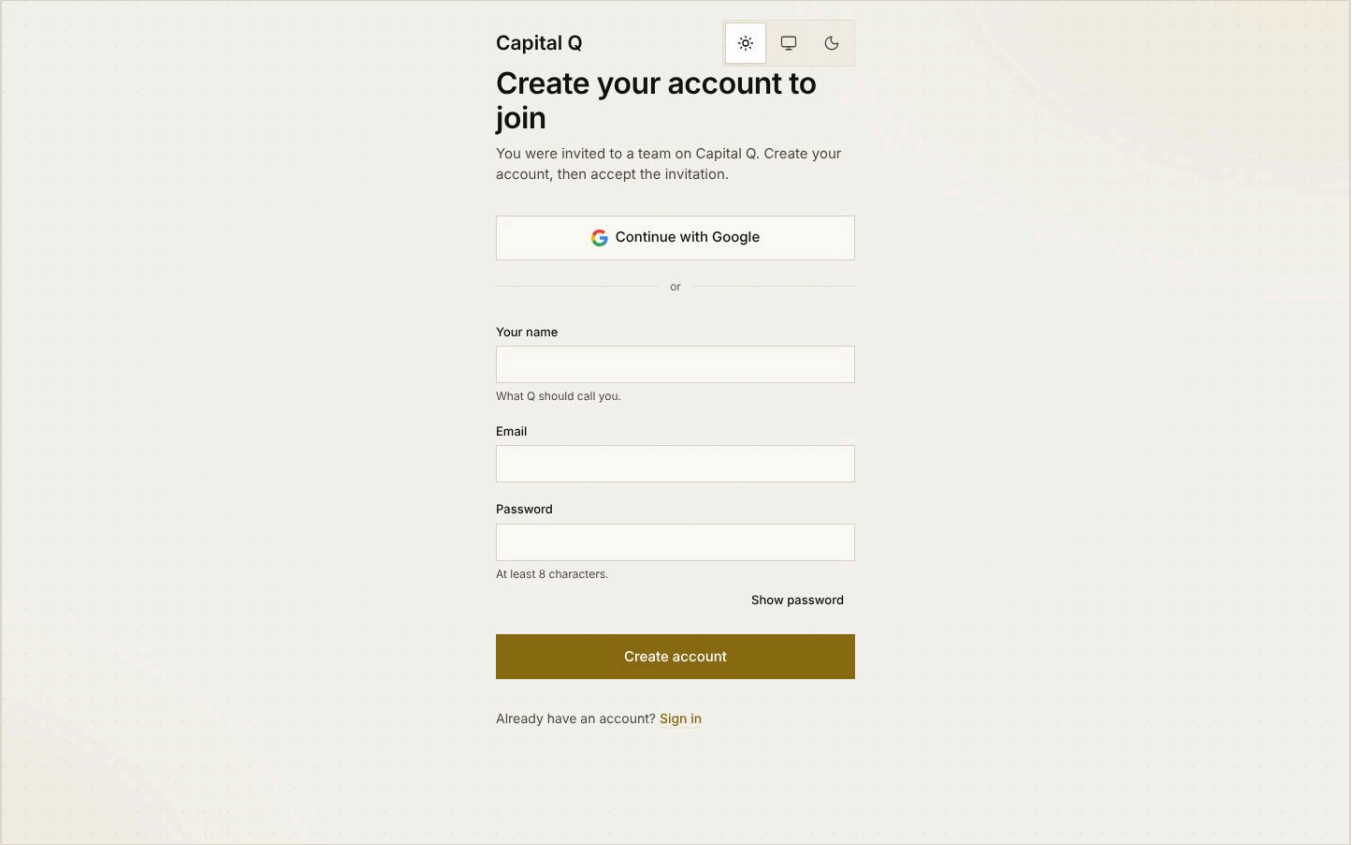

Figure 3. Create your account to join a team.

If you belong to more than one company or firm

Click your workspace name at the bottom of the sidebar (for example “Investor private · Savanna Seed Partners”) and choose **Switch company or firm**. The menu shows which one you are **acting for**. Q keeps each one’s work and memory separate.

> **Not pictured**
>
> Each demo account belongs to one workspace only, so the chooser menu is not shown.

Signing in

1. Click **Sign in** on the home page.
2. Type one of the demo email addresses below, then the shared demo password the team gives you.
3. Click **Sign in**. You land on the Q page. (You can also use Google, or ask for an emailed sign-in link.)

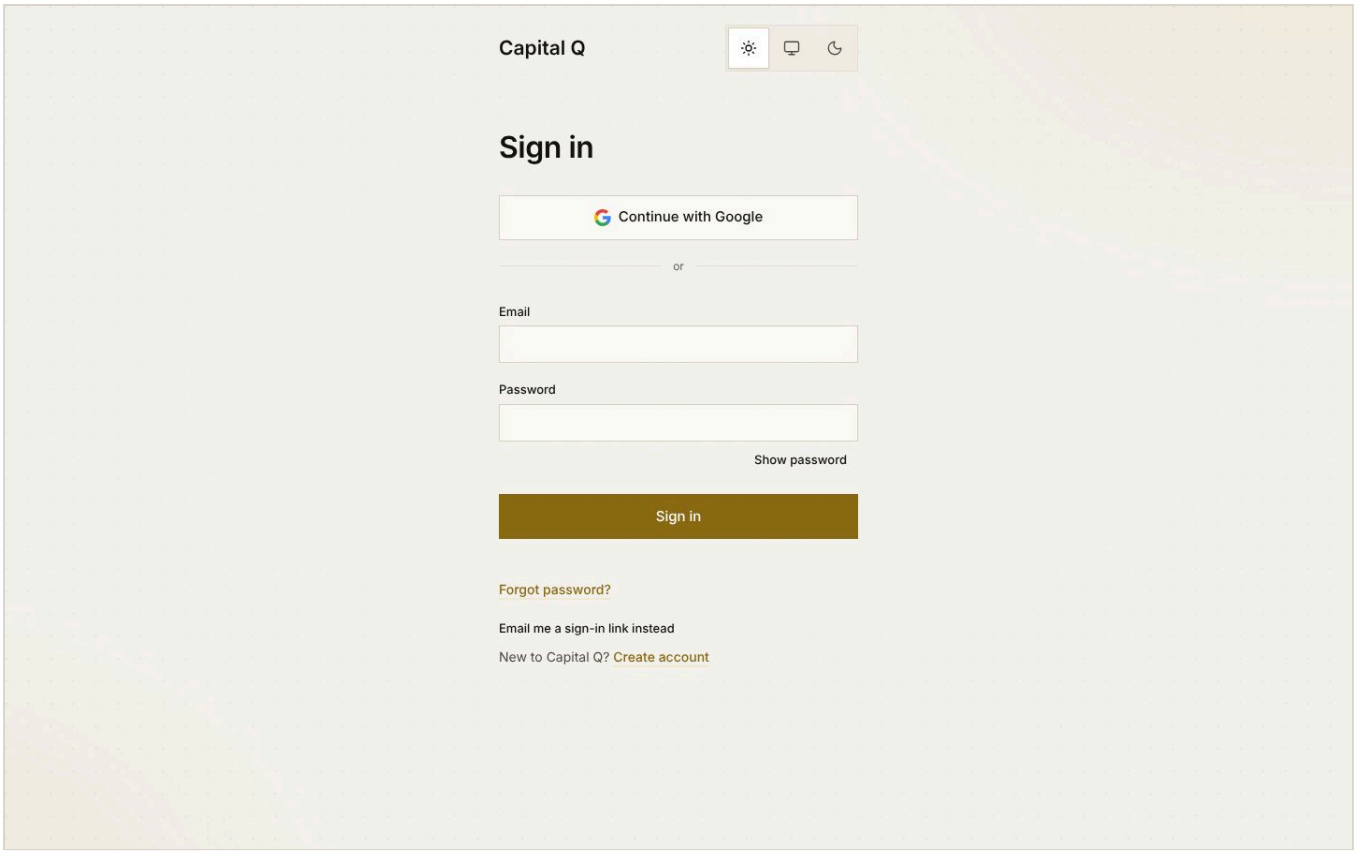

Figure 4. The sign-in page.

Who you will be	Email address	What you will see
Amara, an investor at Savanna Seed Partners	`investor.savanna-seed@fictional.capitalq.local`	A seed-stage investor with a mandate, a feed of matching companies, ten relationships, a GateQ inbox with applications, a Q diligence job on Harbourline Cargo, and a commitment to Ledgerfold.
Babatunde, founder of Harbourline Cargo	`babatunde.tunde-cargo@fictional.capitalq.local`	A Series A logistics company with an uploaded deck, a data room, a team of three, and a connection with Savanna Seed Partners.
Adaeze, founder of Ledgerfold	`founder.ledgerfold@fictional.capitalq.local`	A seed fintech that Q helped prepare. It has investor interest to answer, a deck Q prepared, and past rehearsals.

Good to know

These are shared demo accounts. Please don’t change their passwords or delete anything. To try a brand-new sign-up, use your own email address: the confirmation email has to reach a real inbox.

3. A map of the app

The sidebar on the left is how you get around. The top four items are the same for everyone. The **Workspace** and **You** groups open when you click them, and they change a little depending on whether you are an investor or a founder.

Sidebar item	Investor	Founder
Discover	A video feed of companies ranked against your mandate.	Investors who might fit you, and other founders' videos.
Explore	Browse and search every company, investor, person and pitch on Capital Q.	
Q	Your home page. Talk or type to Q. See what Q did and what needs you.	
CRM	Your *Investment Hub*, with three tabs: **Overview**, **Pipeline** (every company you are talking to) and **Capital** (your commitments and mandate).	Your *Fundraising Hub*, with the same three tabs: **Overview**, **Pipeline** (every investor you are talking to) and **Capital** (your raise, readiness and plans).
Workspace group		
GateQ	Your inbox of applications, your gate, and startup search.	Your applications to investors.
Work	Q Work: jobs Q is doing for you, and anything that needs your yes.	
Company requests	Companies that asked to connect with you.	(not shown)
Pitch & media	(not shown)	Your pitch videos.
Data room & deck	(not shown)	Your data room folders and your deck.
Documents	All your files, including the ones Q writes.	
Rehearsals	Practise a meeting with Q playing the other side.	
Q Pitch	A guided tour of Capital Q, led by Q.	Not available yet for founders.
The Q Daily	Your personal news edition.	
You group		

Profile, Usage, Settings	Your profile and Q Card, what you have used this month, and your settings, team and plan.

At the bottom of the sidebar you'll find three small buttons: the **theme** switch (light, device or dark), the **bell** for notifications, and **sign out**. The label above them shows which workspace you are in, for example "Investor private · Savanna Seed Partners".

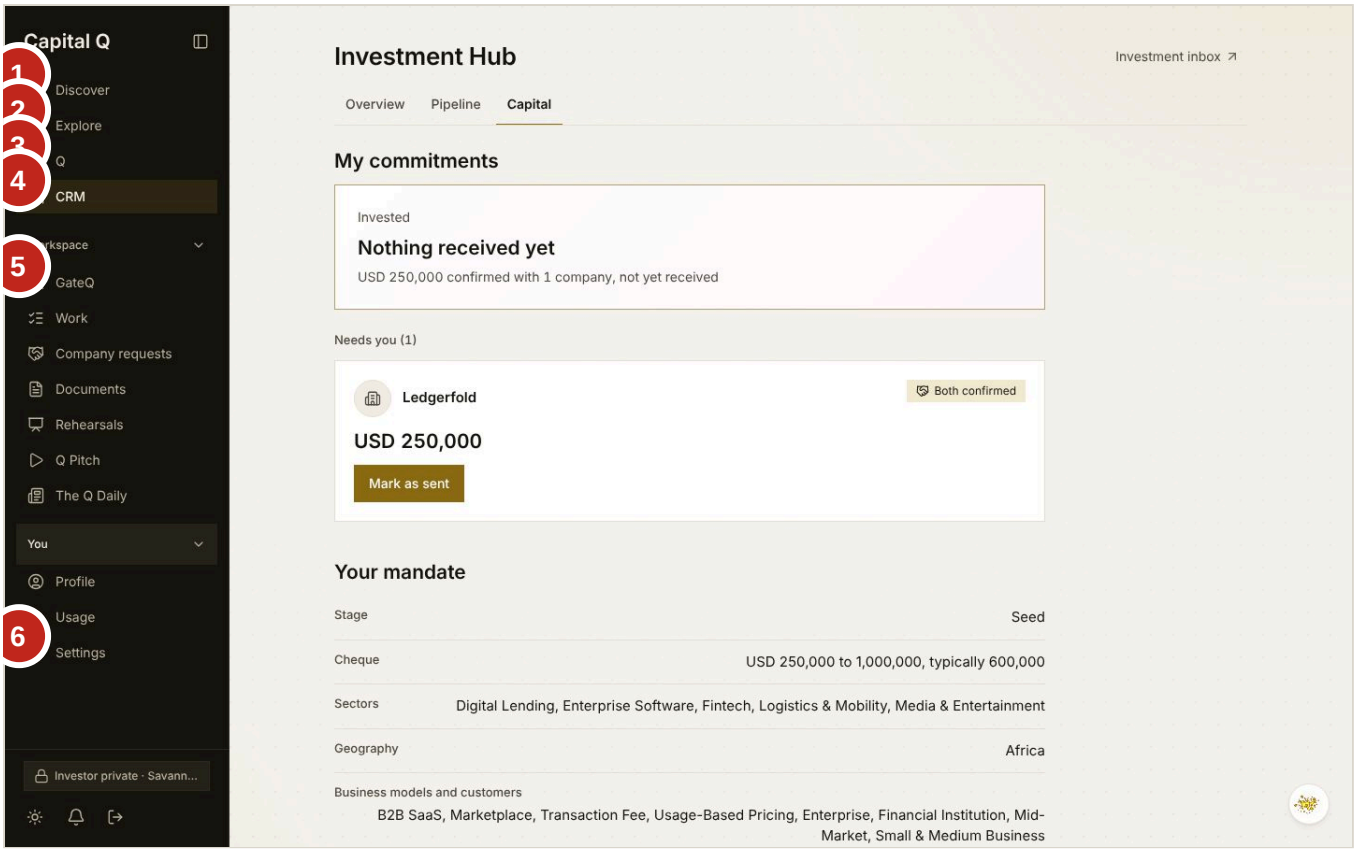

Figure 5. The investor's sidebar with both groups open.

1 Discover 2 Explore 3 Q 4 CRM 5 the Workspace group starts here 6 Settings

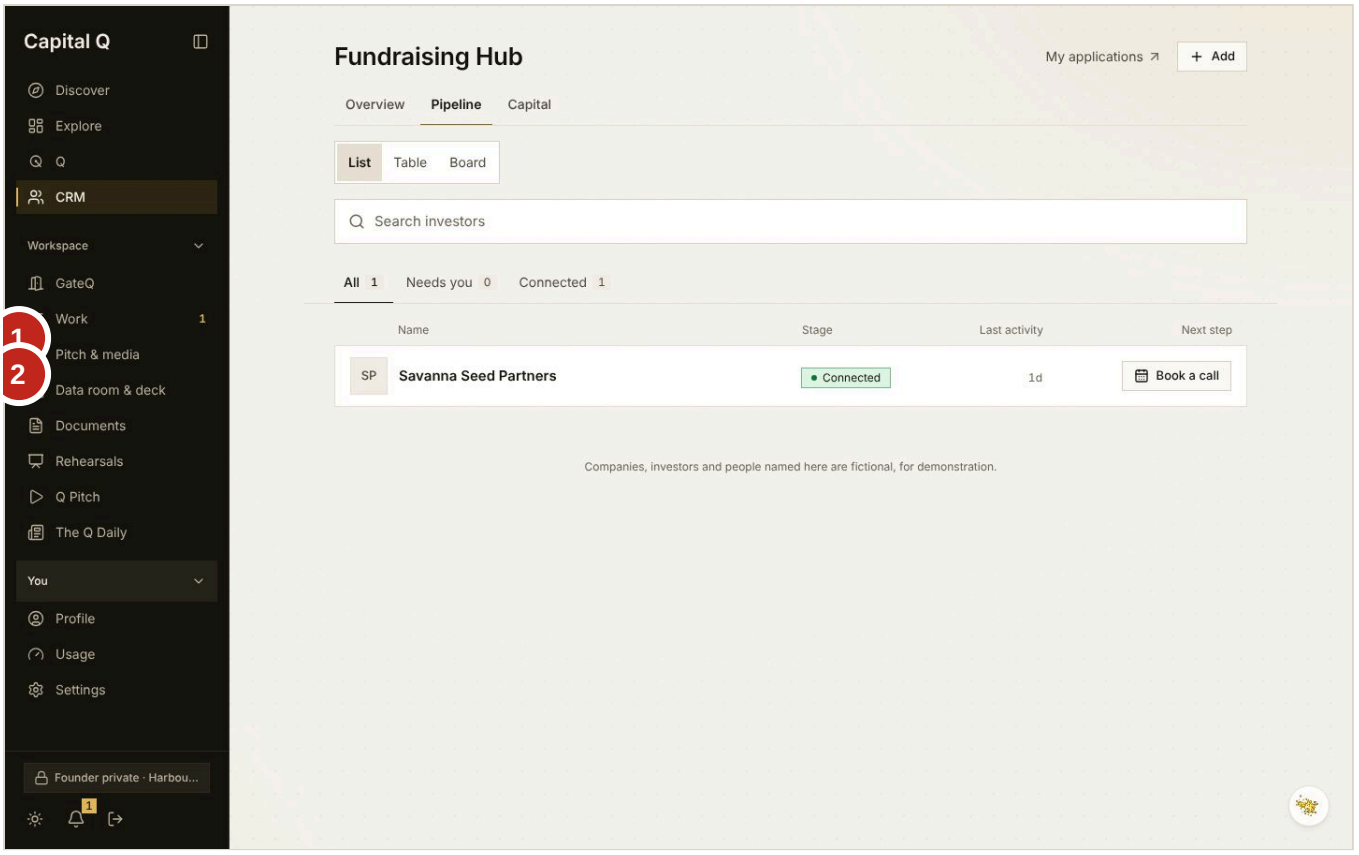

Figure 6. The founder's sidebar. Founders also get Pitch & media and Data room & deck.

On a phone, the sidebar becomes a bar at the bottom: Discover, Explore, Q, CRM and **More** (everything else). See section 4.26.

Q is on every page. Press **Control+K** (or **Cmd+K** on a Mac), or click the small Q button at the right edge of the screen, to ask Q about whatever you are looking at.

4. Every page, one by one

Each page below says what it is for, shows what you'll see, lists what you can do, and explains how Q helps there.

4.1 Q (your home page)

What it's for: this is where you start each day. Q greets you, tells you what it did since your last visit, and shows what needs you. You can type or talk to Q here.

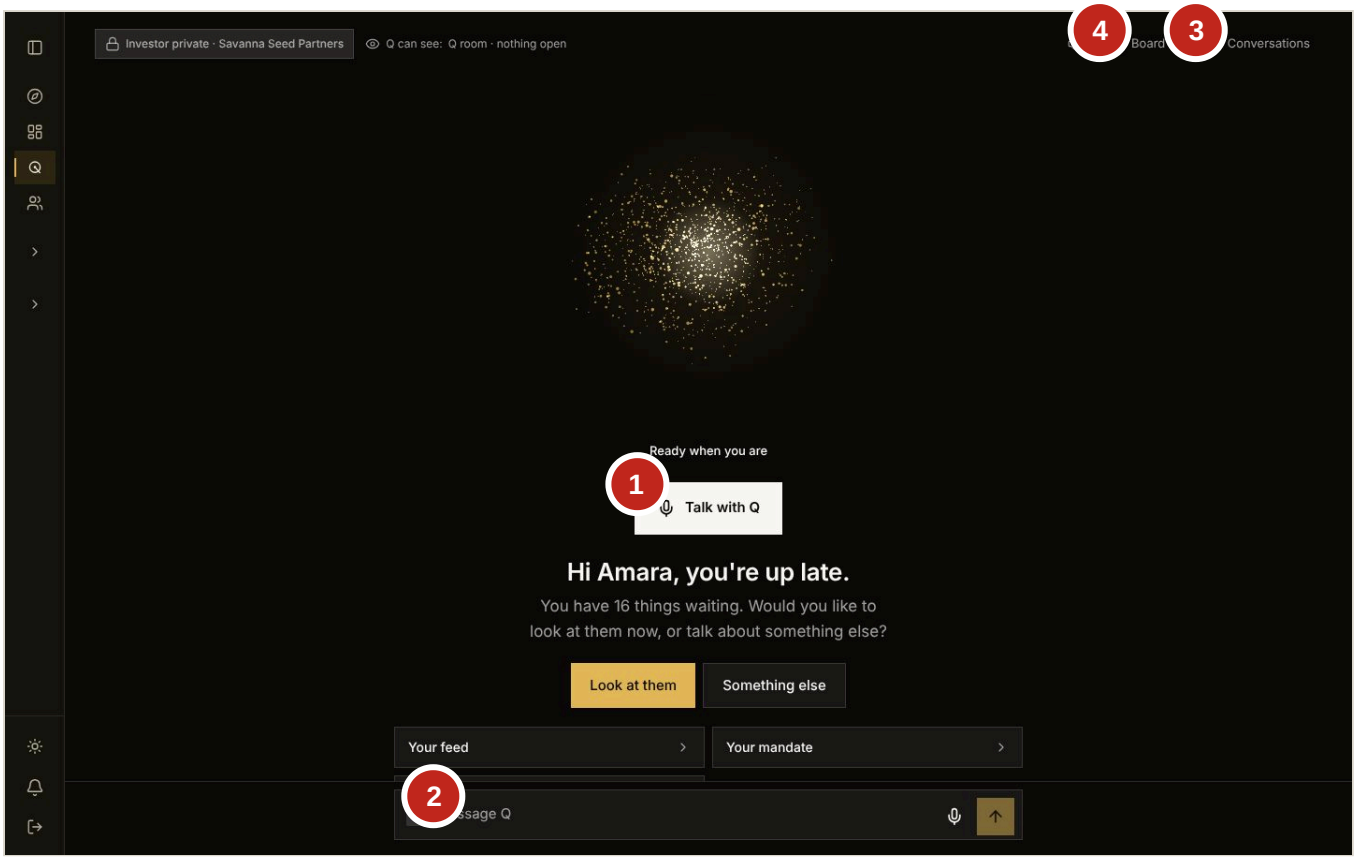

Figure 7. The Q page for an investor. The Q room is always dark, so Q's light stands out.

> 1 Talk with Q (voice) 2 type a message 3 past conversations 4 the Board, where Q pins its answers

What you can do

1. Read the greeting and the short list of what changed this week.
2. Click a suggestion such as **Your feed** or **Your mandate** to start there.
3. Type a question in **Message Q** at the bottom and press Enter. For example: "Compare Ledgerfold and Harbourline Cargo against my mandate."
4. Click **Talk with Q** to speak instead. Allow the microphone when your browser asks. Q answers out loud and shows captions.

5. Click **Conversations** to reopen an earlier chat. Click **New chat** to start fresh.
6. Click **Board** to see the cards, tables and comparisons Q has made for you.

When things are waiting for you

When you arrive and something needs you, Q says so first: “Hi Babatunde. You have 3 things waiting. Would you like to look at them now, or talk about something else?” Click **Look at them** (or say yes) and Q takes you through them one by one. Click **Something else** to set them aside for now. With nothing waiting, Q just asks what you would like to work on.

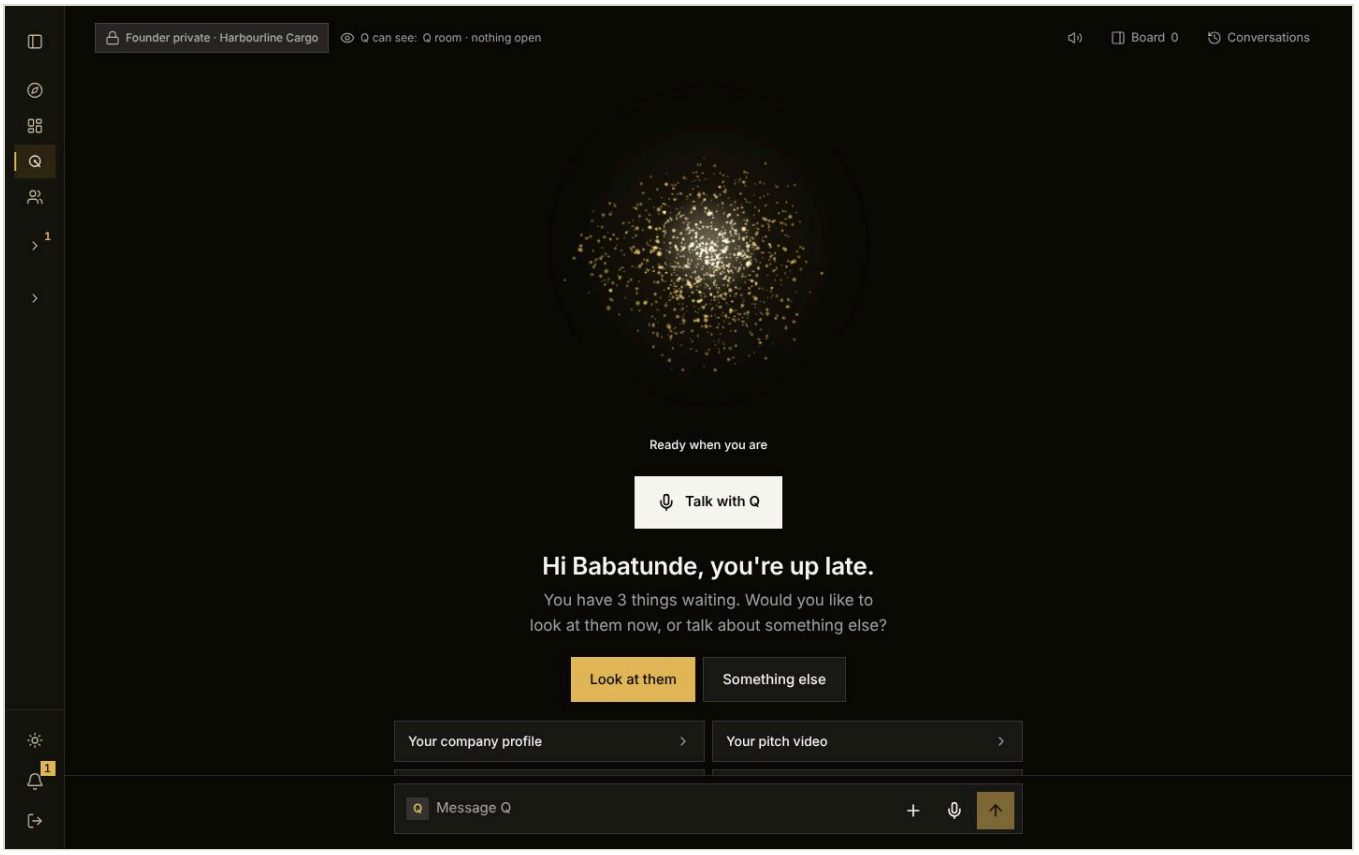

Figure 8. A founder’s Q page: the greeting with things waiting, and Q asking to learn how you like to work.

Learning your preferences. Q may ask: “May I learn how you like to work from our conversations, like how brief to be?” Click **Allow** or **Not now**. Q only learns this with your yes, and you can change it any time in **Settings → What Q remembers**.

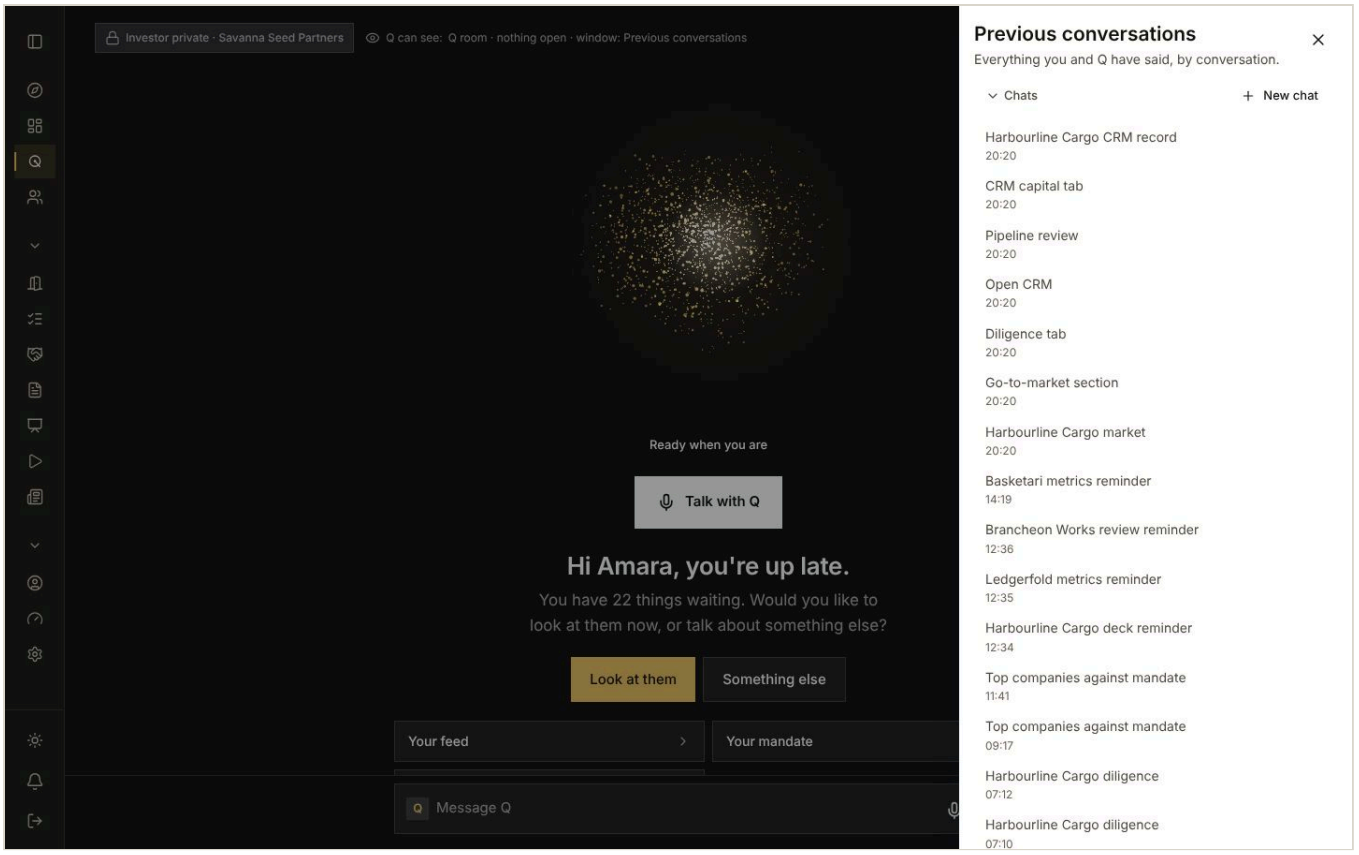

Figure 9. Previous conversations. Click any one to reopen it.

What Q's answers look like

Q answers in plain words first, then adds a card or table when a picture helps. Switch between the **Q** view (Q's light and what needs you) and the **Chat** view (the full conversation) with the buttons at the top. A **Q card** shows each company, what is known, what does not match, and what is still unknown. Each measure has its own label, such as *Good*, *Partial* or *Unknown*, so you never rely on colour alone. Q always says how many sources it used, and that a fit score is about your mandate, not the quality of the business.

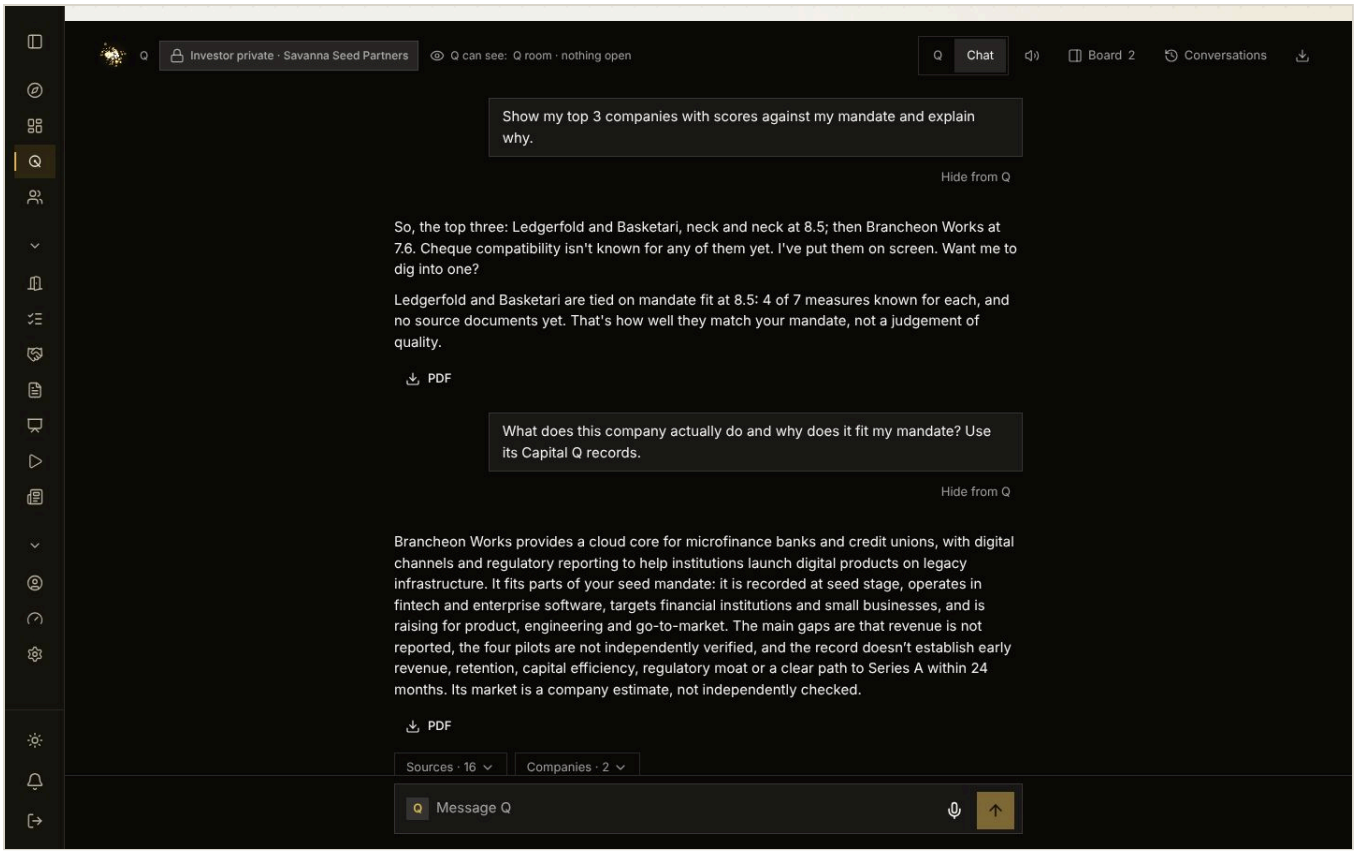

Figure 10. Q's Chat view. Every answer lists its sources. When asked for a founder's private notes, Q says plainly that they are not available to you.

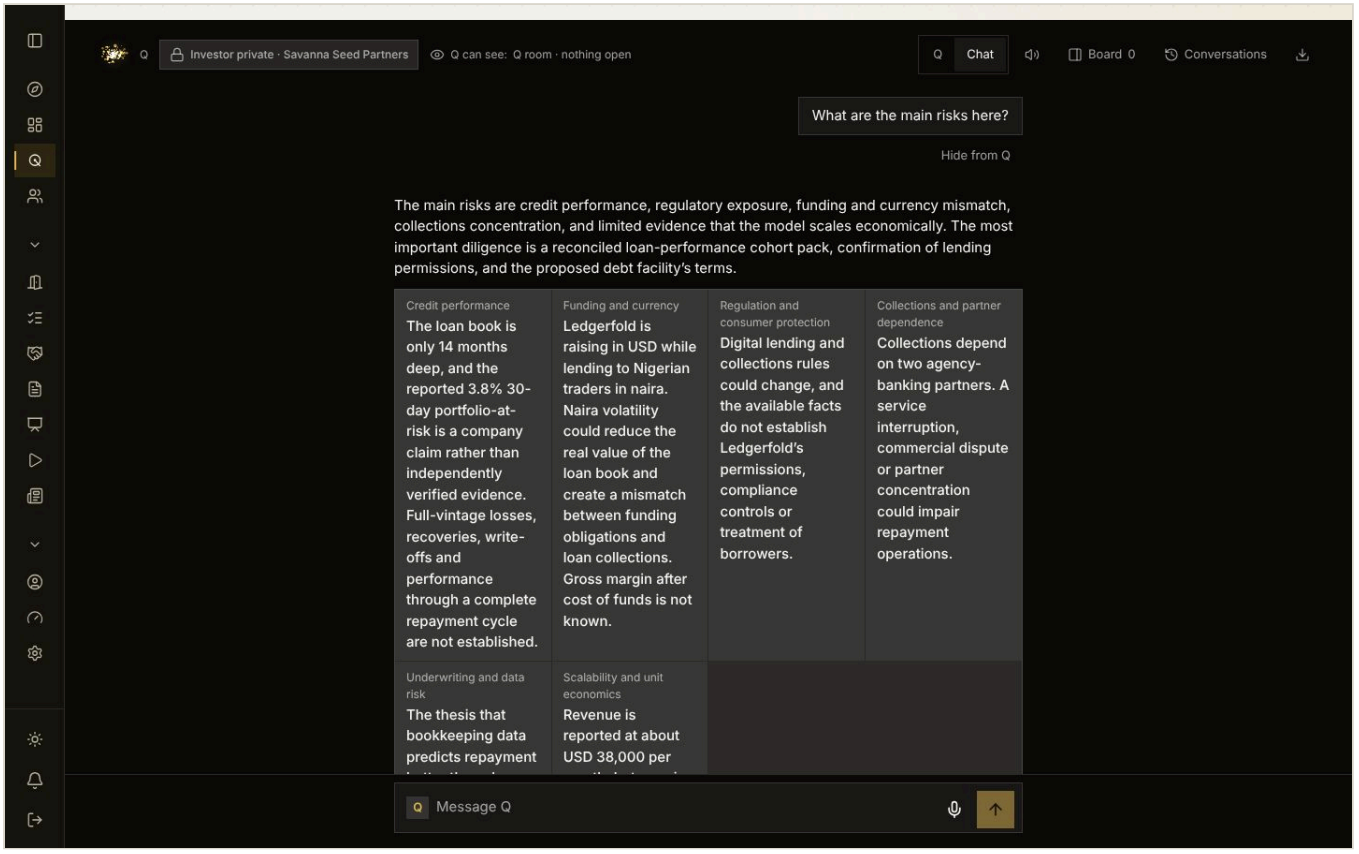

Figure 11. Q's risk assessment of one company, with the evidence behind each point.

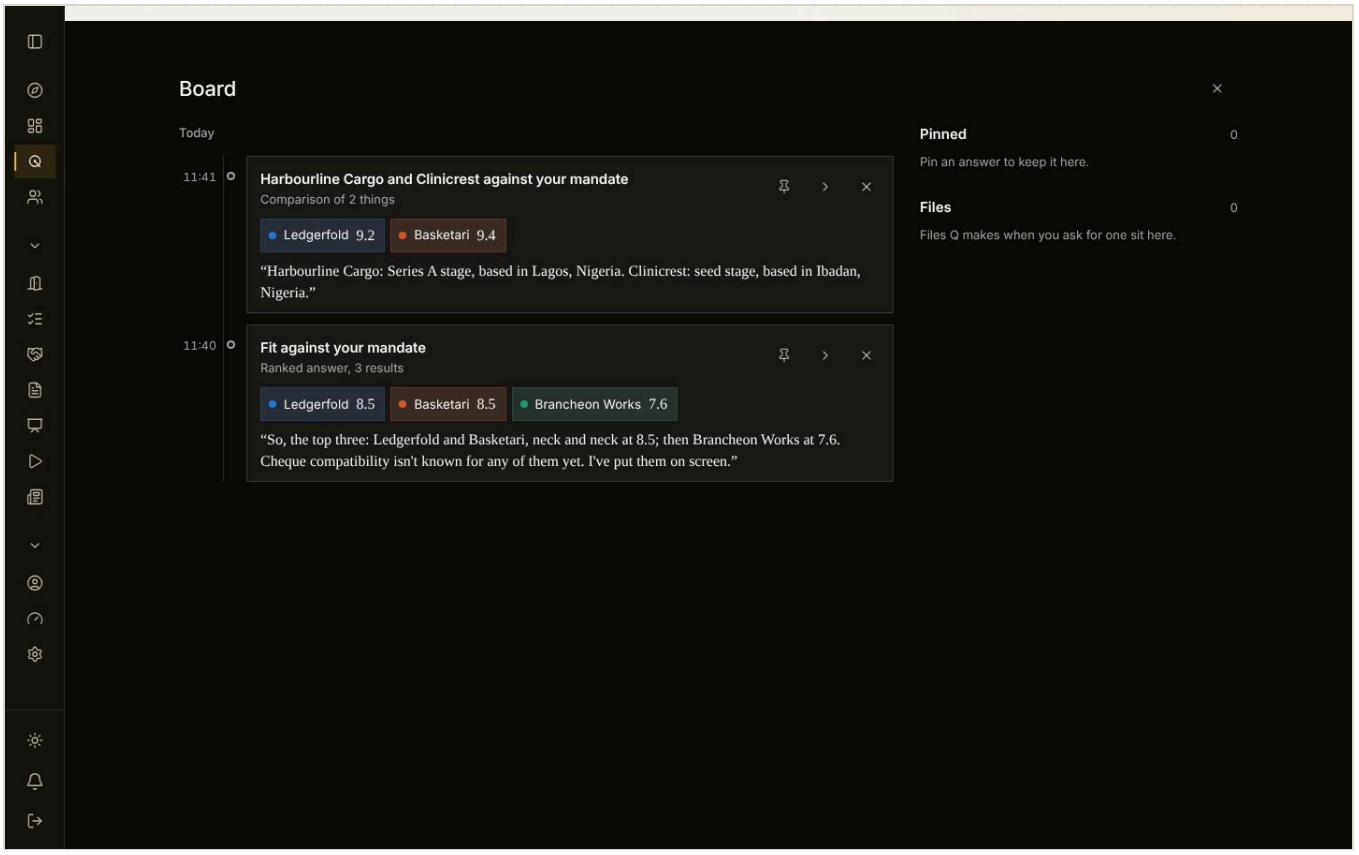

Figure 12. The Board keeps Q’s cards, such as comparisons against your mandate with a fit score for each company, so you can come back to them.

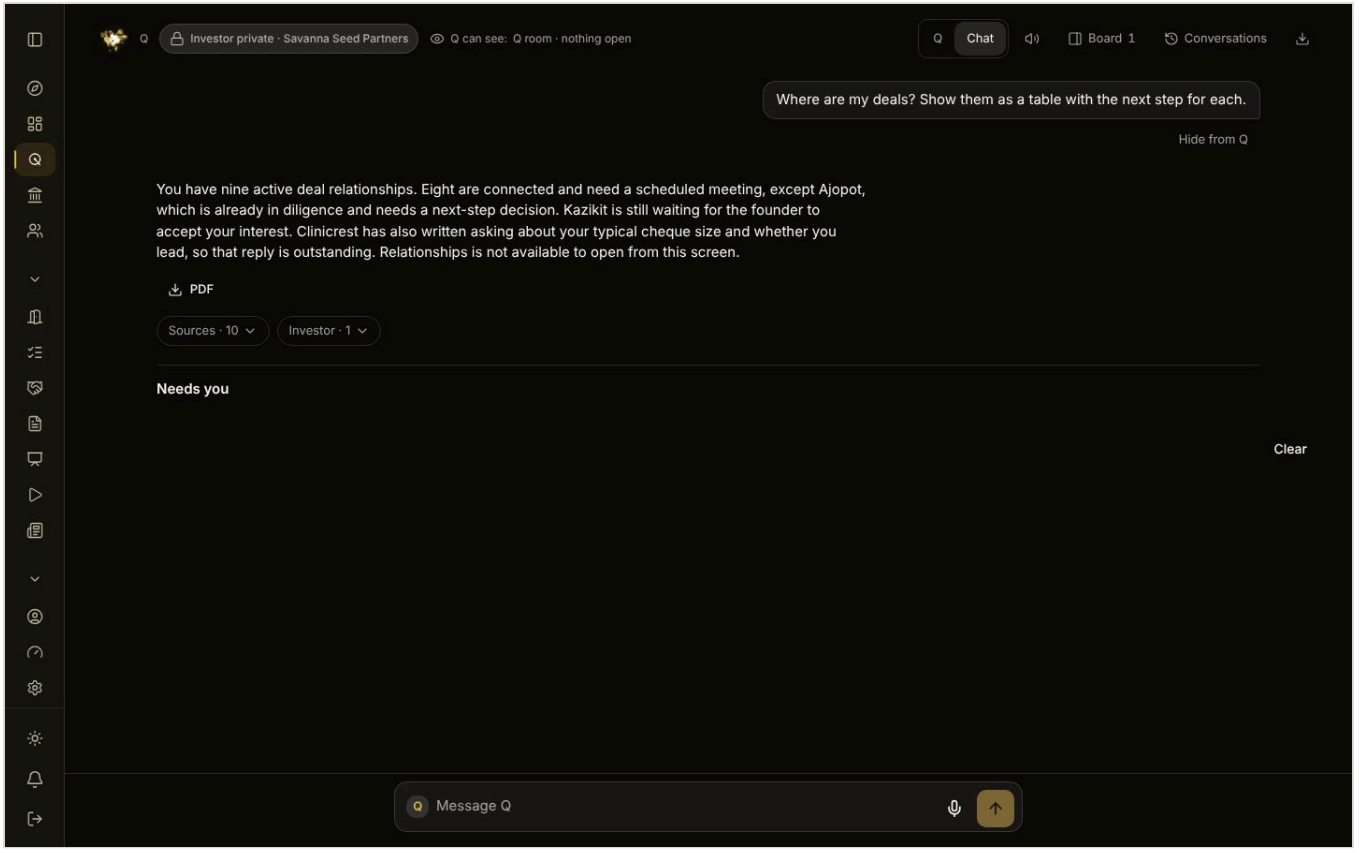

Figure 13. A fresh question: “Where are my deals?”. Q answers from your CRM records and shows its sources.

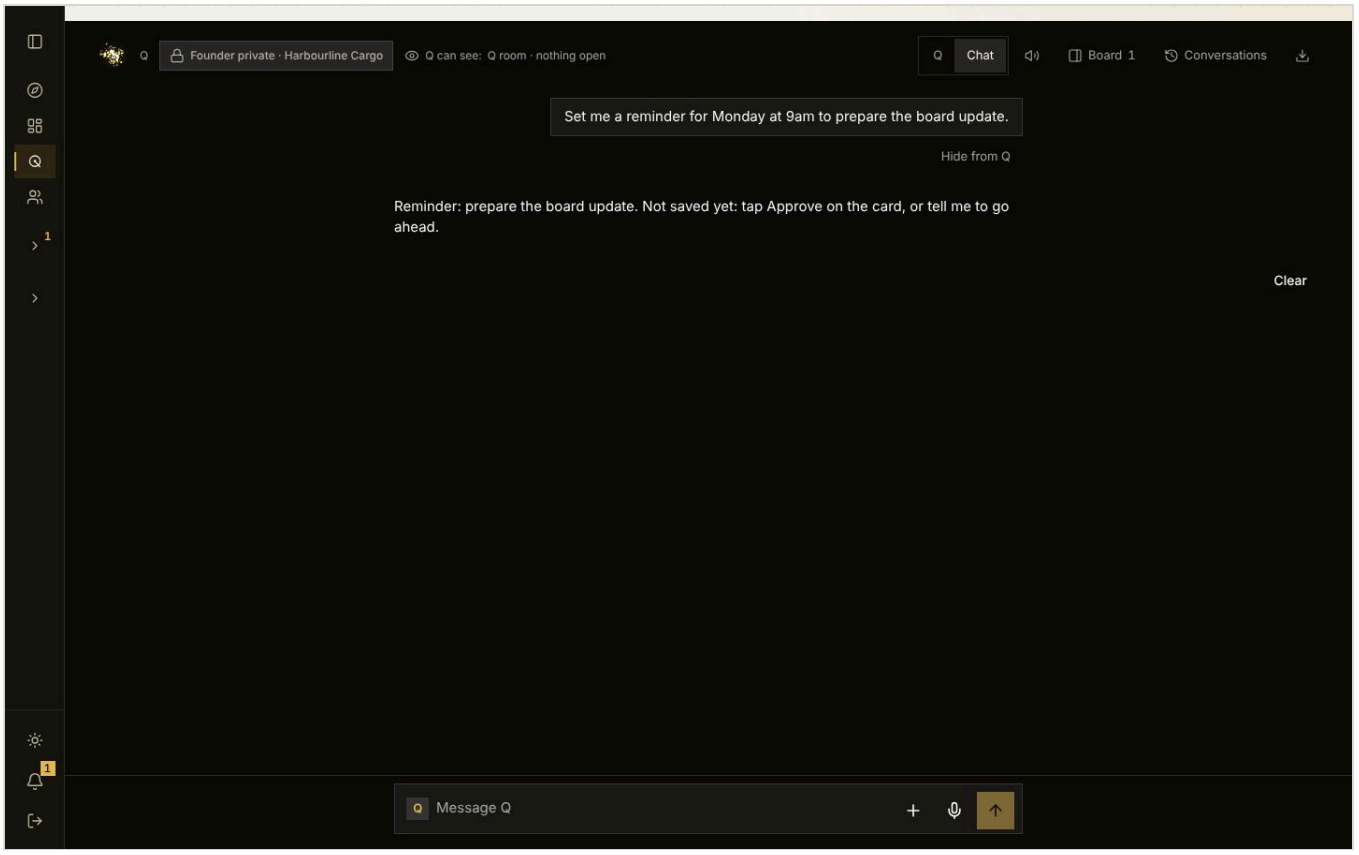

Figure 14. A founder asks Q what is missing before investors will take a first call. Q answers with a short, ordered list and its sources.

How Q helps here

Q can answer questions, compare companies, open any page for you (“open the Ledgerfold record”), click buttons on the page you are on, and prepare actions such as a message or an expression of interest. Anything that changes something for another person waits for your **Approve**.

Limits

Voice needs a microphone and a supported browser (recent Chrome, Edge or Safari). The voice screen is not pictured in this guide because starting it opens a live, paid voice session.

4.2 Discover

What it’s for (investors): a feed of short company pitch videos, ranked against your mandate. Next to each video you see the key facts and **why it’s here**. Nobody can pay to be ranked higher.

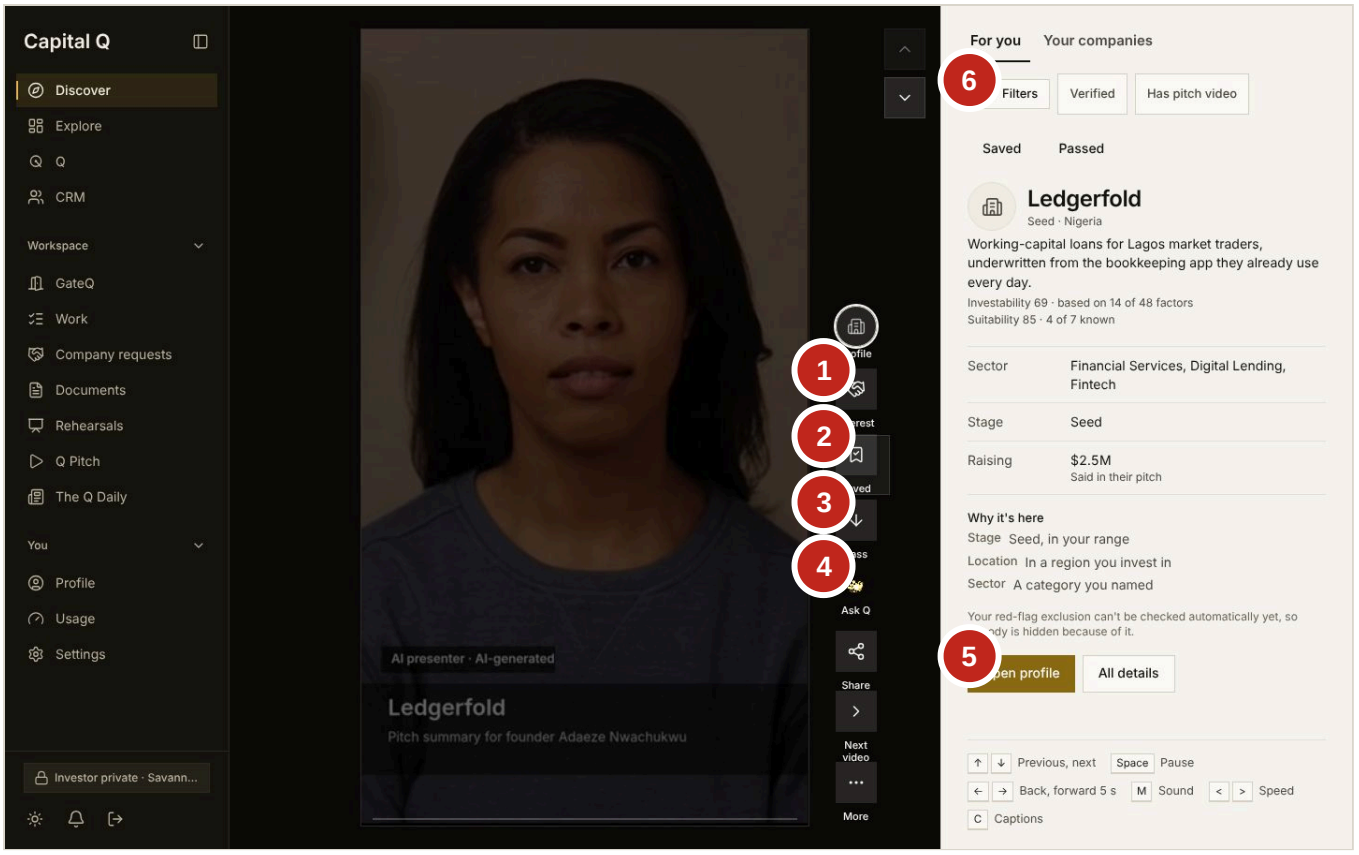

Figure 15. Discover for an investor. The video plays on the left; facts and reasons are on the right. (The screenshot browser can't play video, so you see the opening frame.)

1 Interest 2 Save 3 Pass 4 Ask Q about this company 5 Open the full profile 6 Filters

What you can do

1. Watch the pitch. Use the up and down arrows (or your keyboard's arrow keys) to move between companies. Press Space to pause.
2. Read **Why it's here** to see which parts of your mandate the company matches.
3. Click **Save** to keep it for later. The company is not told.
4. Click **Pass** to move it out of your feed. You can undo this from **Passed**.
5. Click **Interest**, read the note, then click **Express interest** to tell the founders you'd like to explore. This is not a commitment to invest.
6. Click **Open profile** to see everything about the company.
7. Use **Filters**, **Verified** and **Has pitch video** to narrow the feed. Click **Your companies** to see the companies you already have relationships with.

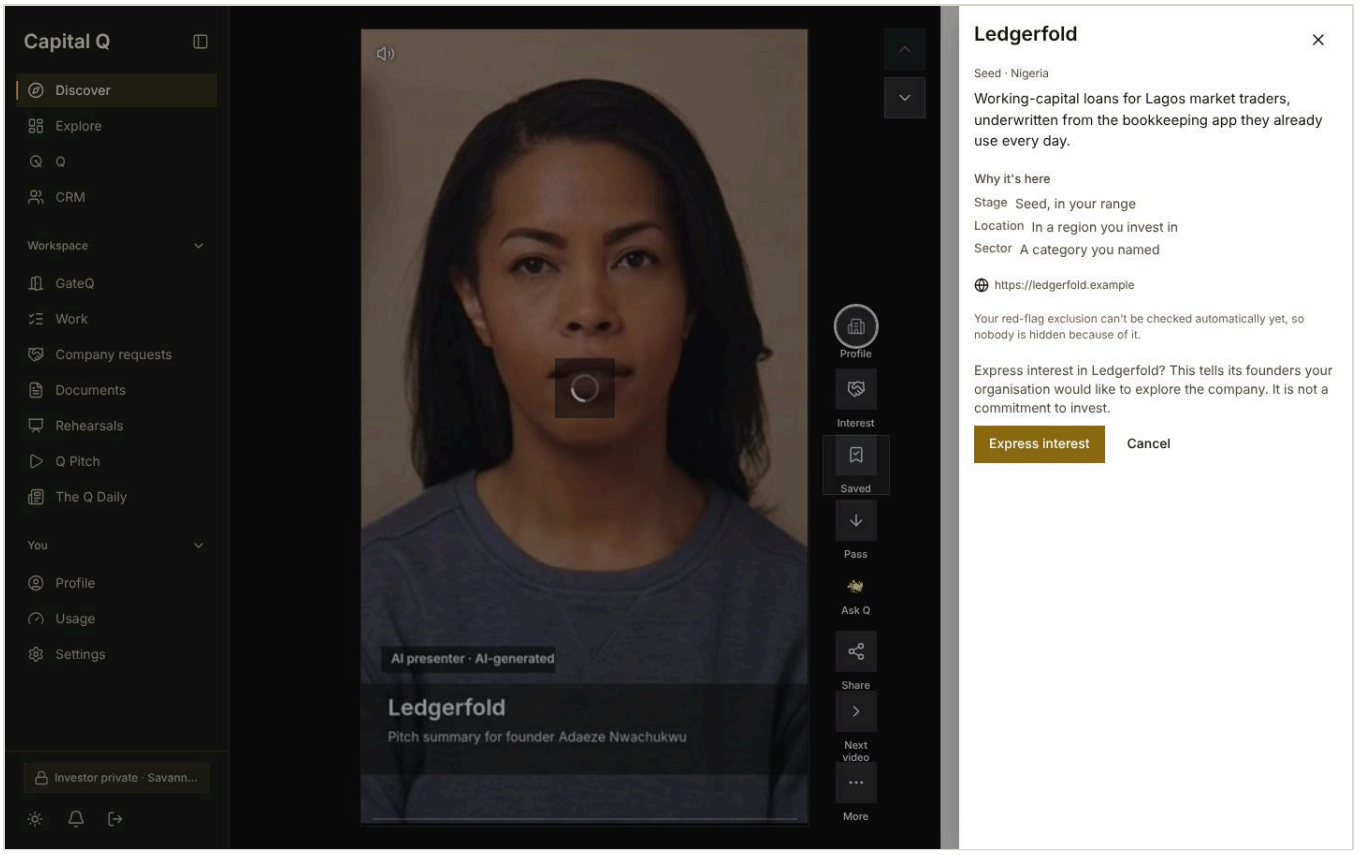

Figure 16. Express interest. Q explains what it means before you confirm.

What it’s for (founders): a list of investors who made themselves visible, checked against your company. The list is based only on what investors publish; their private mandates never shape it. A second tab, **Founders’ videos**, shows other companies’ pitches.

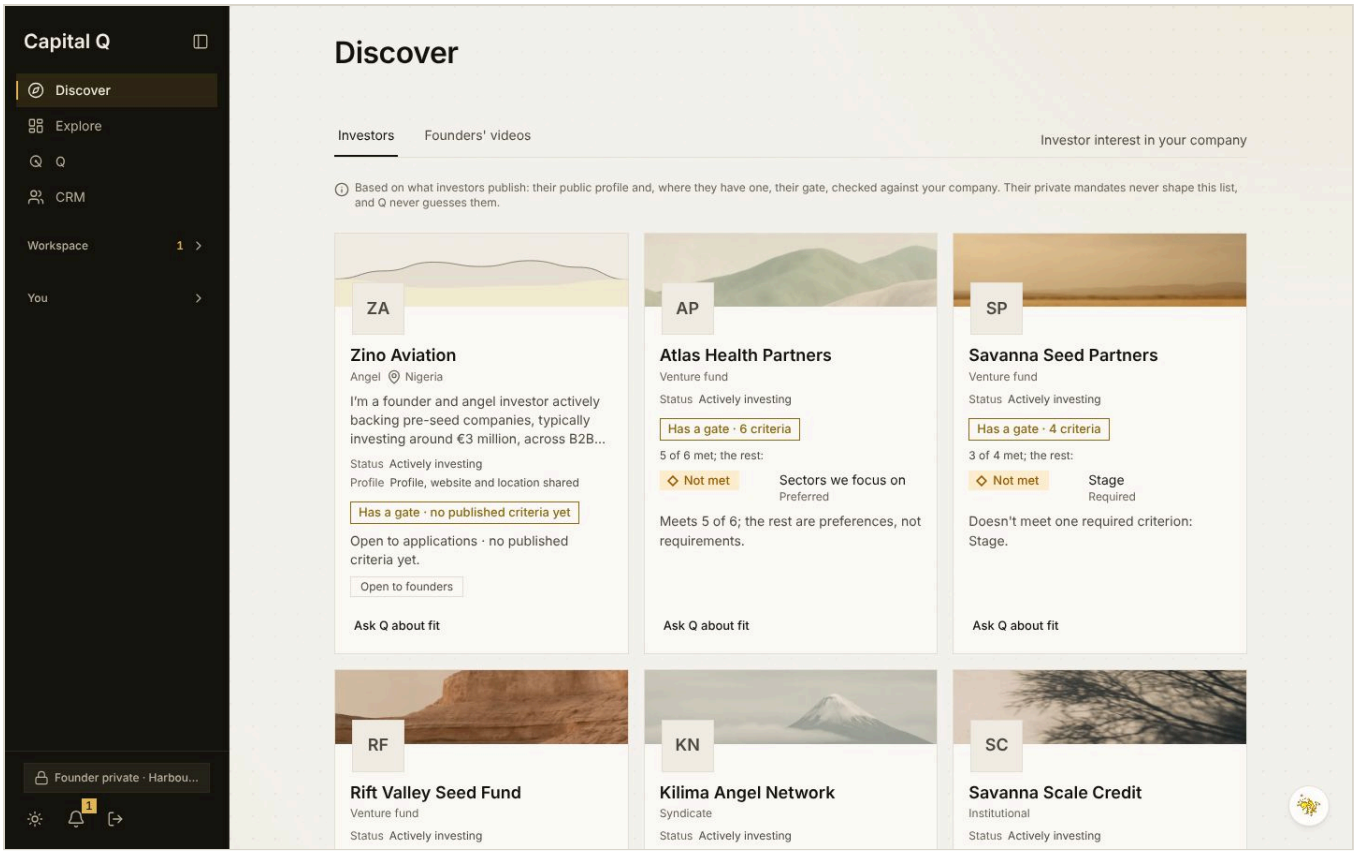

Figure 17. Discover for a founder: investors who might fit, with their type and status.

> **How Q helps here**
>
> Click **Ask Q** beside a video to get Q's view of the company against your mandate. Say "save this one" or "next company" and Q does it for you.

4.3 Saved, Passed and Compare

What it's for: the companies you saved or passed, and a side-by-side comparison of two to four of them.

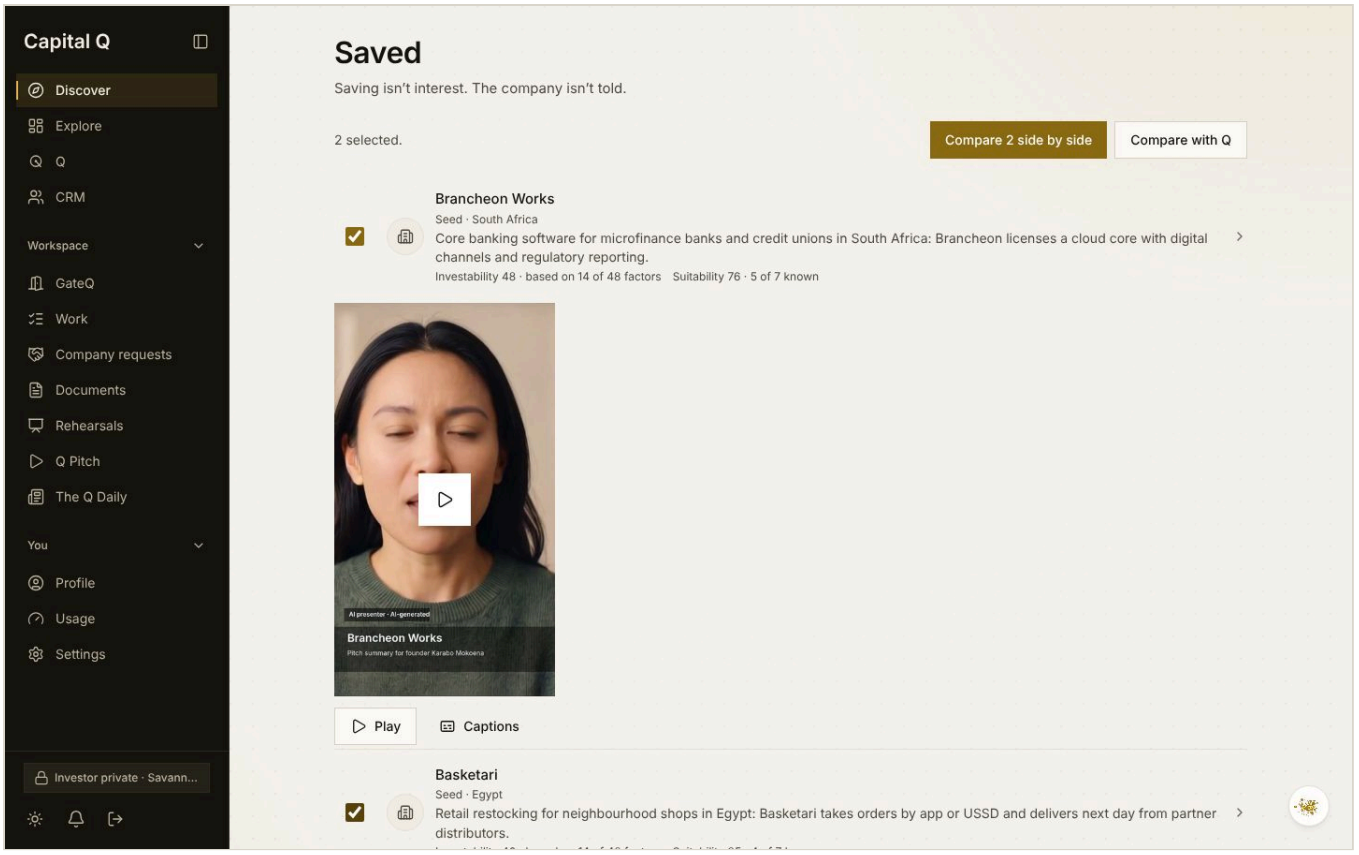

Figure 18. Saved companies. Tick two to four, then compare them.

1. In Discover, click **Saved** (or **Passed**) near the top.
2. Tick the companies you want to compare.
3. Click **Compare side by side** for a table, or **Compare with Q** for Q's written view.

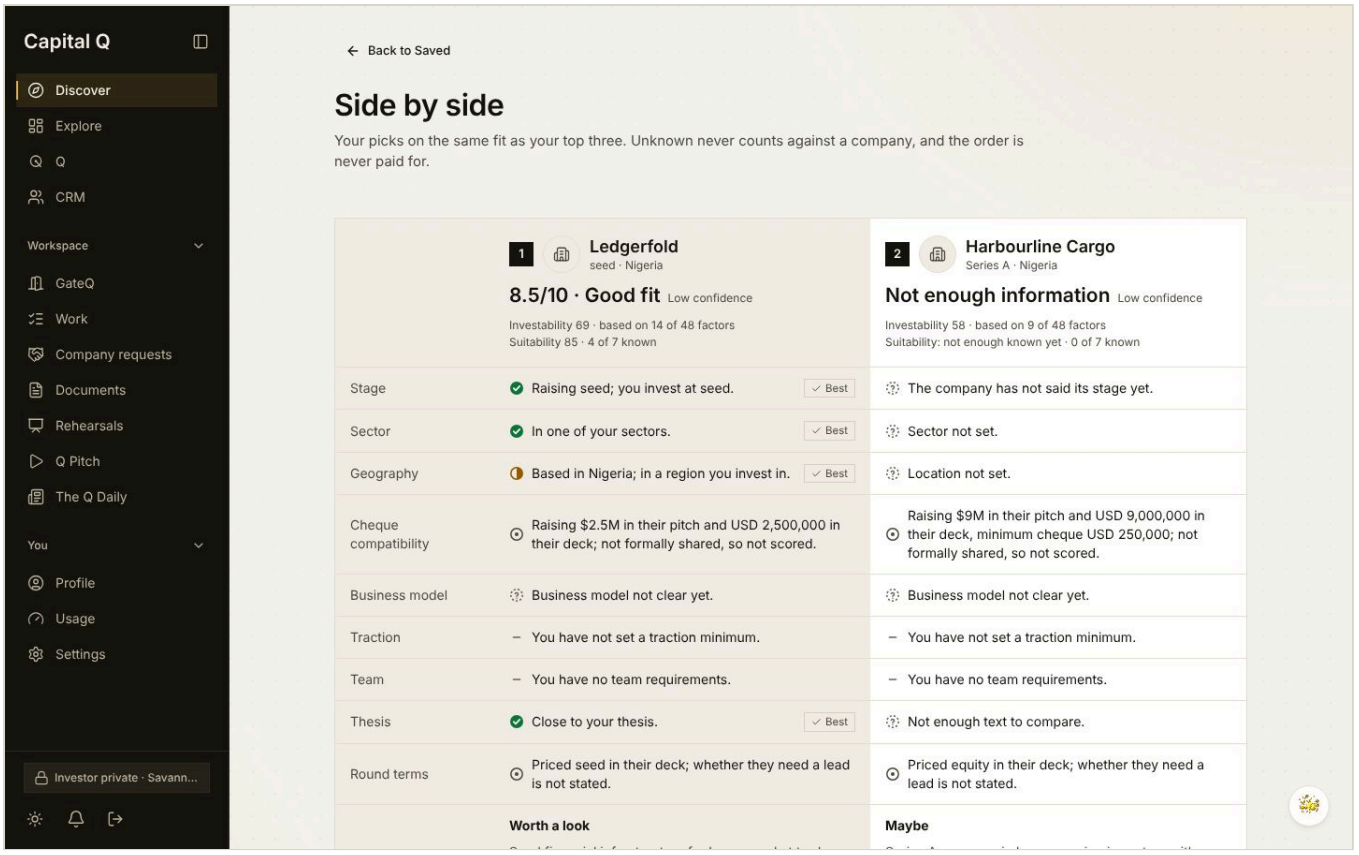

Figure 19. Side by side: each company on the same measures as your top three. Unknown never counts against a company.

4.4 Explore

What it's for: browsing everything on Capital Q, not just your matches. Pitches sit in a picture grid, like a photo feed. Each tile plays a short silent preview and shows both scores (Inv. and Suit., see section 4.24). Tabs group them by topic. Search sits at the top.

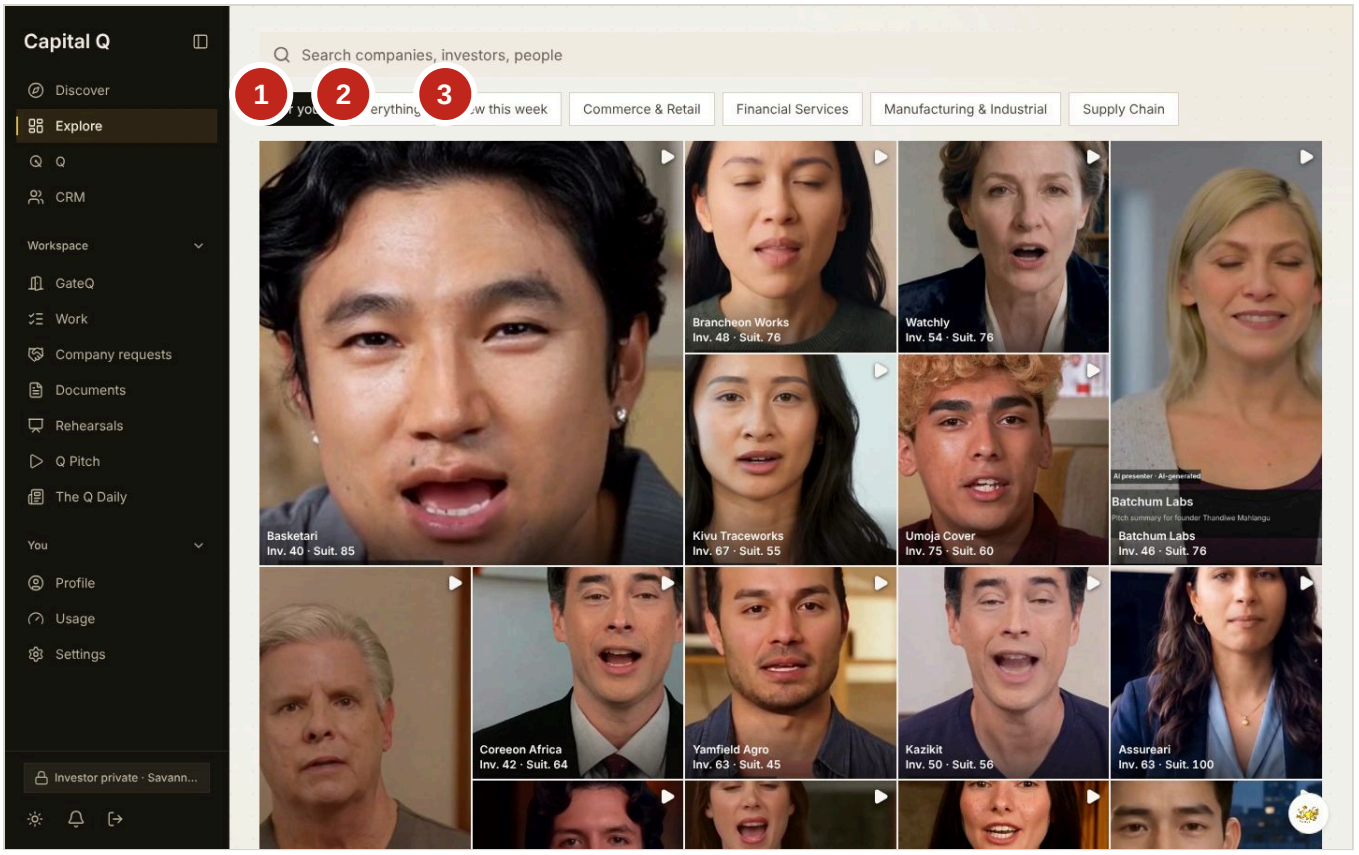

Figure 20. Explore: pitches for you, everything, new this week, and topic tabs.

1. Click a tab such as **New this week** or a sector.
2. Click a pitch to watch it and open the company.
3. Type in the search box and press Enter. Results are split into Companies, Investors, People and Pitches.

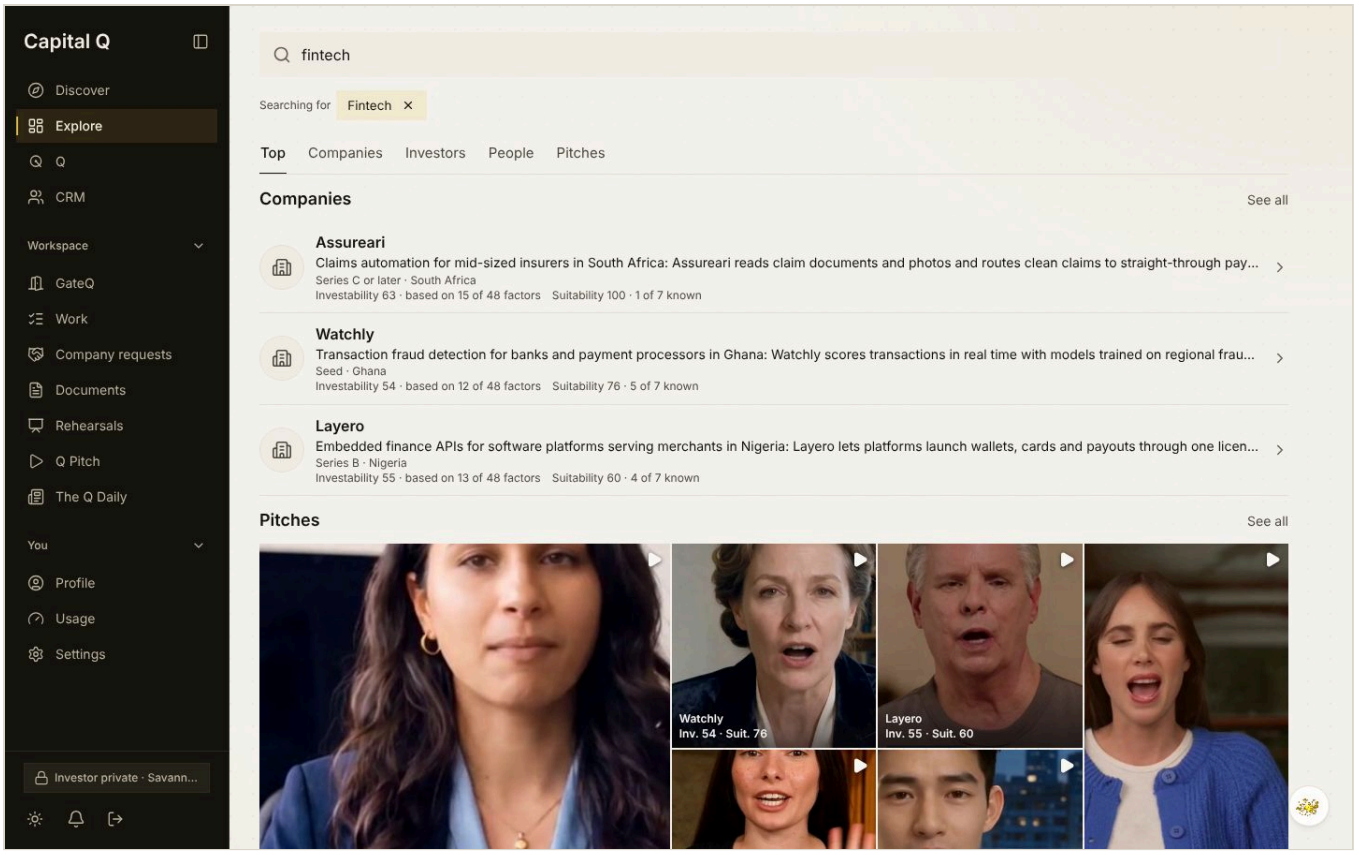

Figure 21. Searching Explore for “fintech”.

4.5 Search

What it’s for: finding a person or company by name among your relationships and Discover, or opening anyone’s Q Card by their @handle. Go to it from Explore or by typing `/search` after the web address.

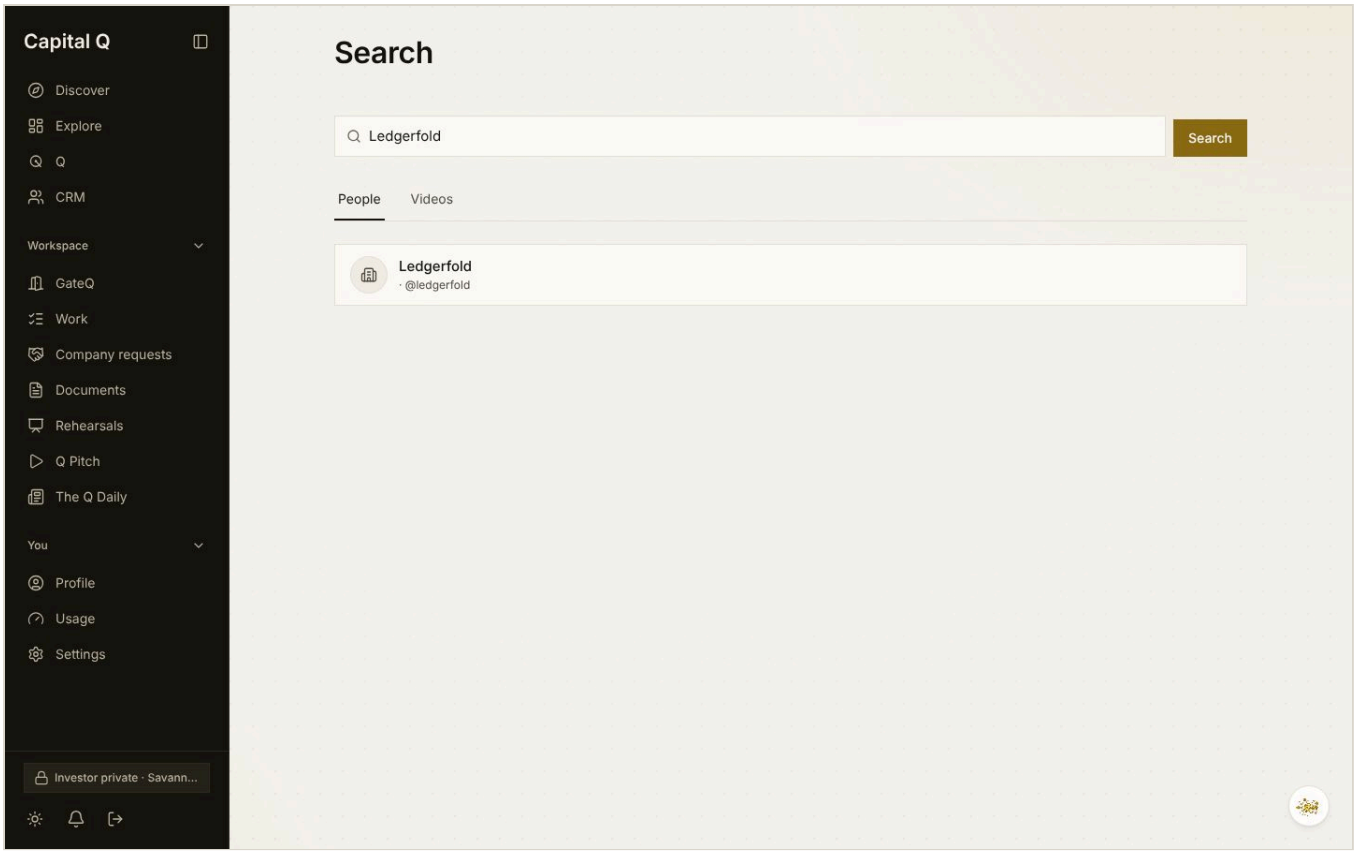

Figure 22. Search finds Ledgerfold by name and by its @handle.

4.6 A company profile

What it's for: everything Capital Q knows about one company, with the evidence behind it. Investors see its two scores and how it fits their mandate. Founders see what investors would see.

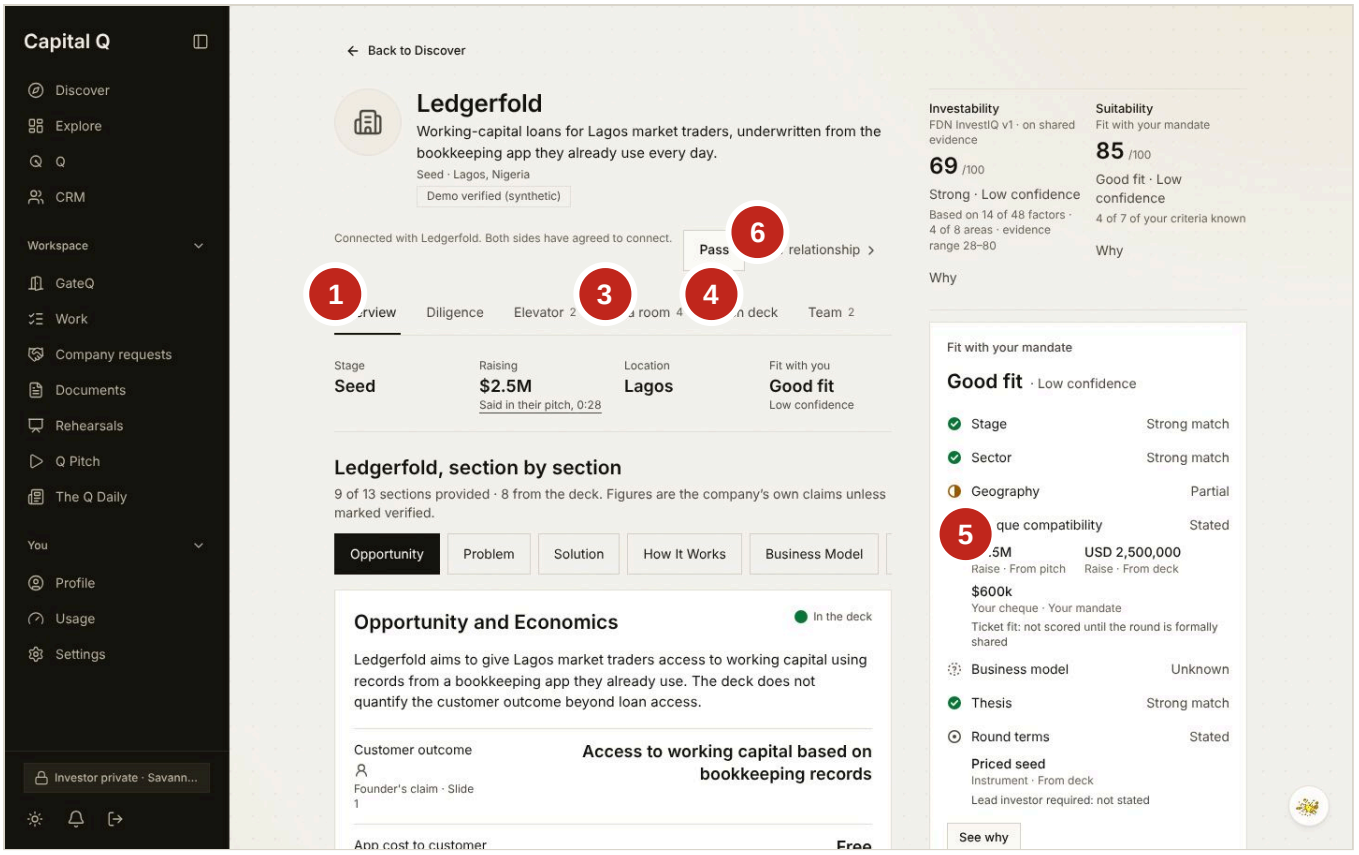

Figure 23. Ledgerfold's profile, seen by an investor: the two scores, fit with your mandate, and the tabs.

> 1 Overview (the Diligence tab is next to it) 3 Data room 4 Pitch deck 5 Team 6 jump to your CRM record

Overview: the company, section by section

The Overview reads like a pitch deck: Opportunity, Problem, Solution, How it works, Business model, Vision, Team, Go-to-market, Competition, Moats, Roadmap, Why us, why now, and the Ask. Click a section name, or use the arrows. Every line says where it came from, such as "Founder's claim · Slide 1". Anything the company hasn't given shows as **Not in the deck** or **Not provided**, never as a guess. The line above the sections counts how many are filled in.

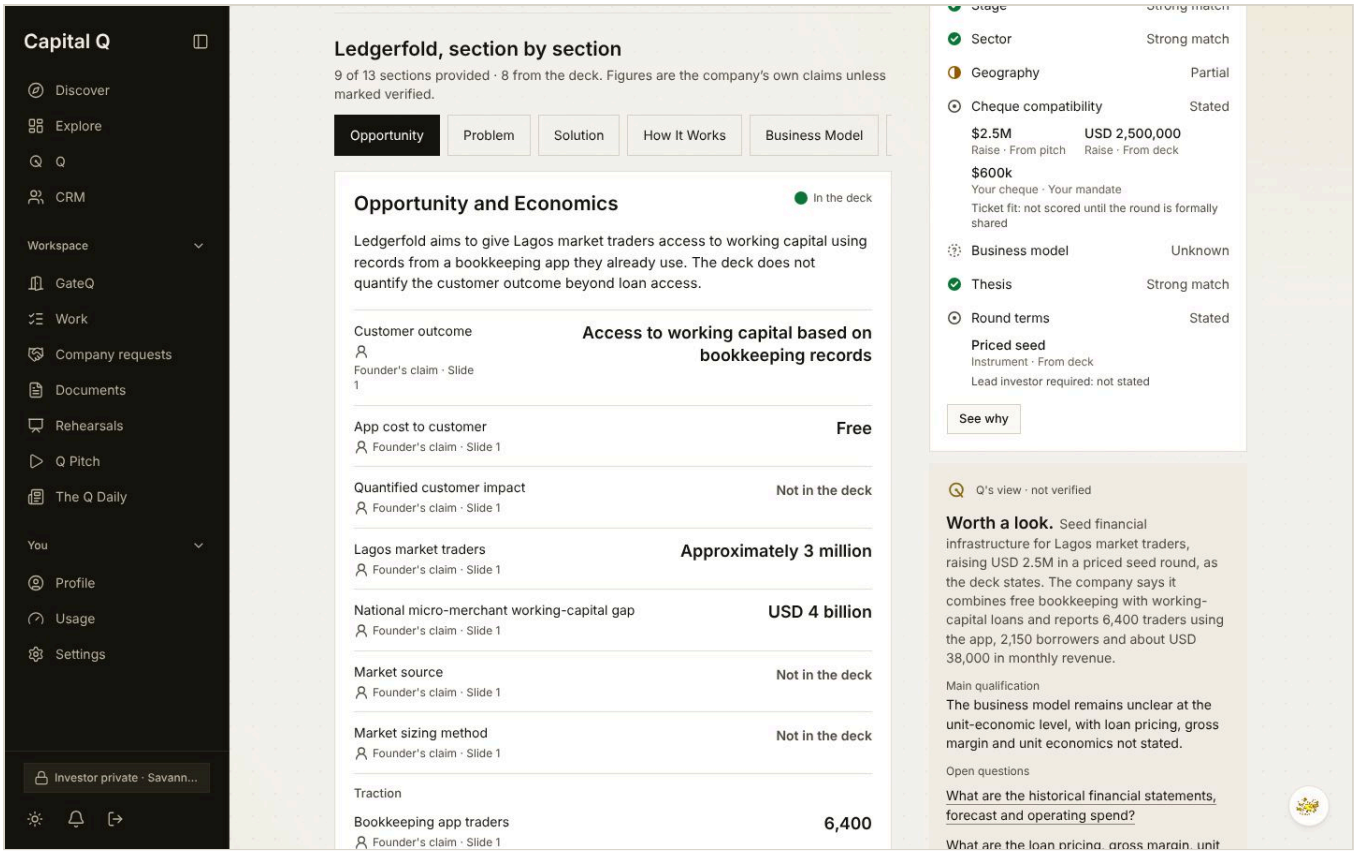

Figure 24. Overview, section by section: each fact with its source; gaps say so.

Diligence: questions, risks and evidence

The **Diligence** tab holds the investor's working view: Questions to investigate, the raise, traction, team, market, Risks and unknowns, and **What is known, and how well supported**.

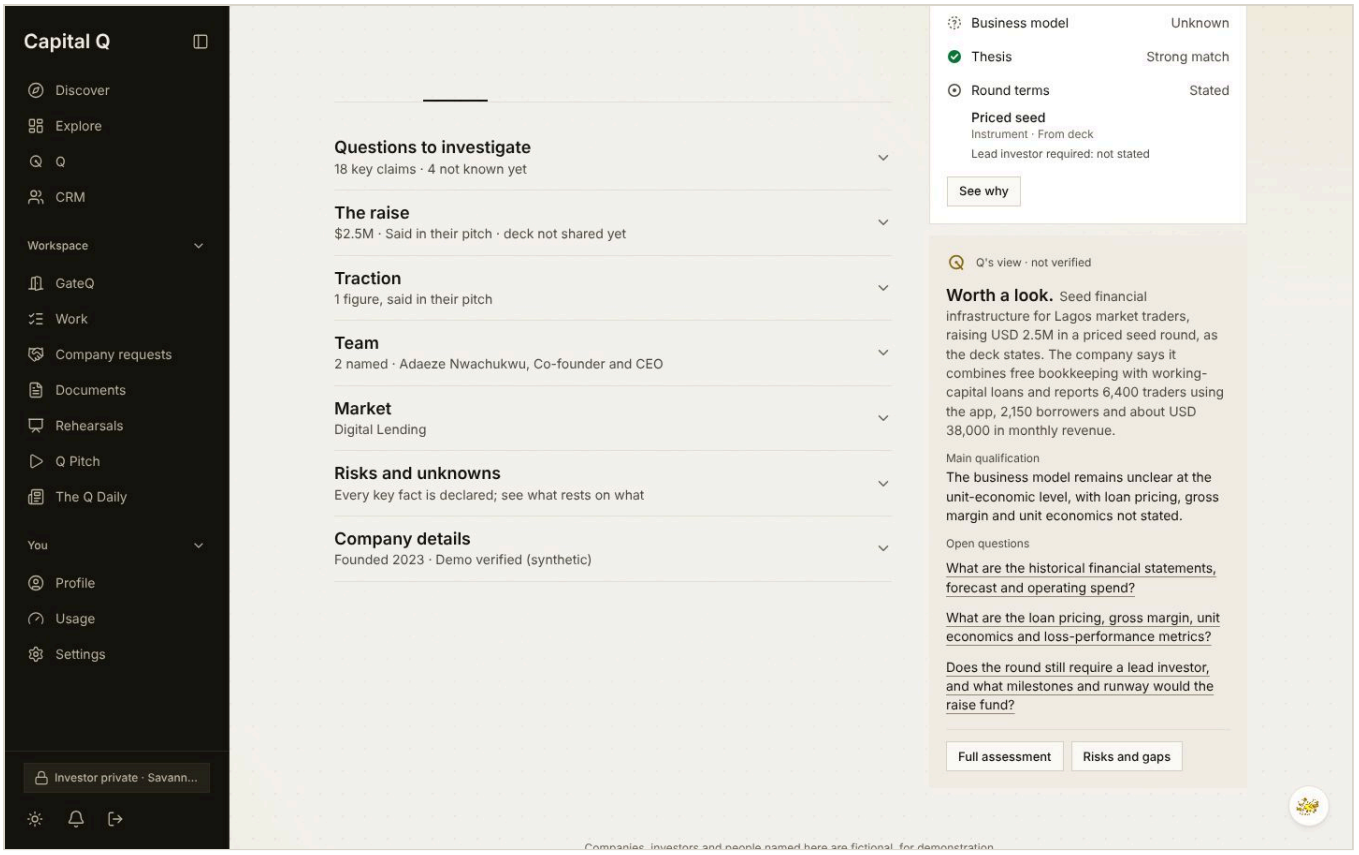

Figure 25. The Diligence tab.

What you can do

1. Read the two scores and **Fit with your mandate**. Click **Why** or **See why** for the reasons.
2. Read the Overview section by section.
3. Open **Diligence**. Click a ready-made question, such as “What are the round terms?”, to ask Q, or **Send questions** to send your questions to the founder.
4. Open the **Pitch deck** tab to flip through the deck, the **Data room** tab to open or request documents, and the **Team** tab for the founders.

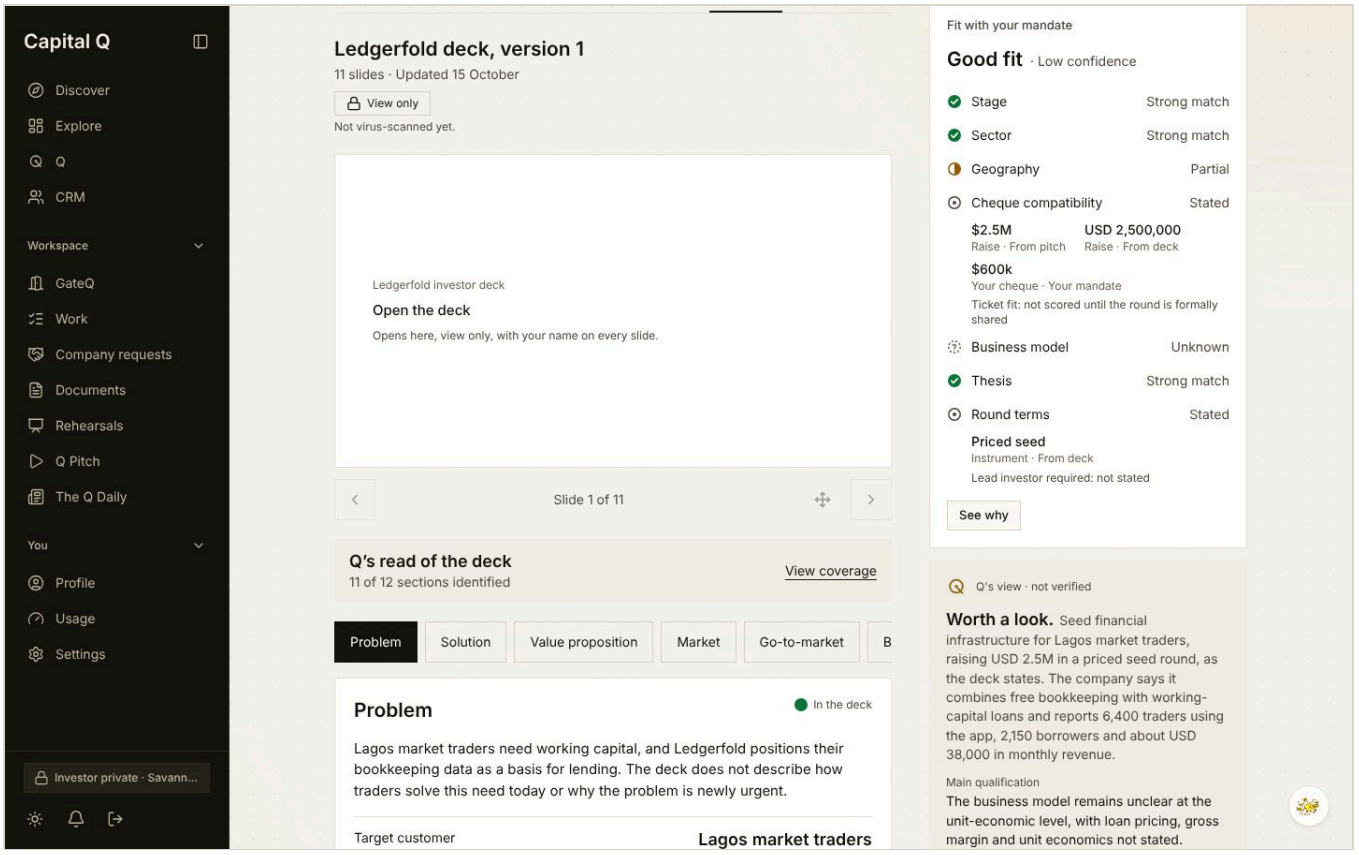

Figure 26. The Pitch deck tab.

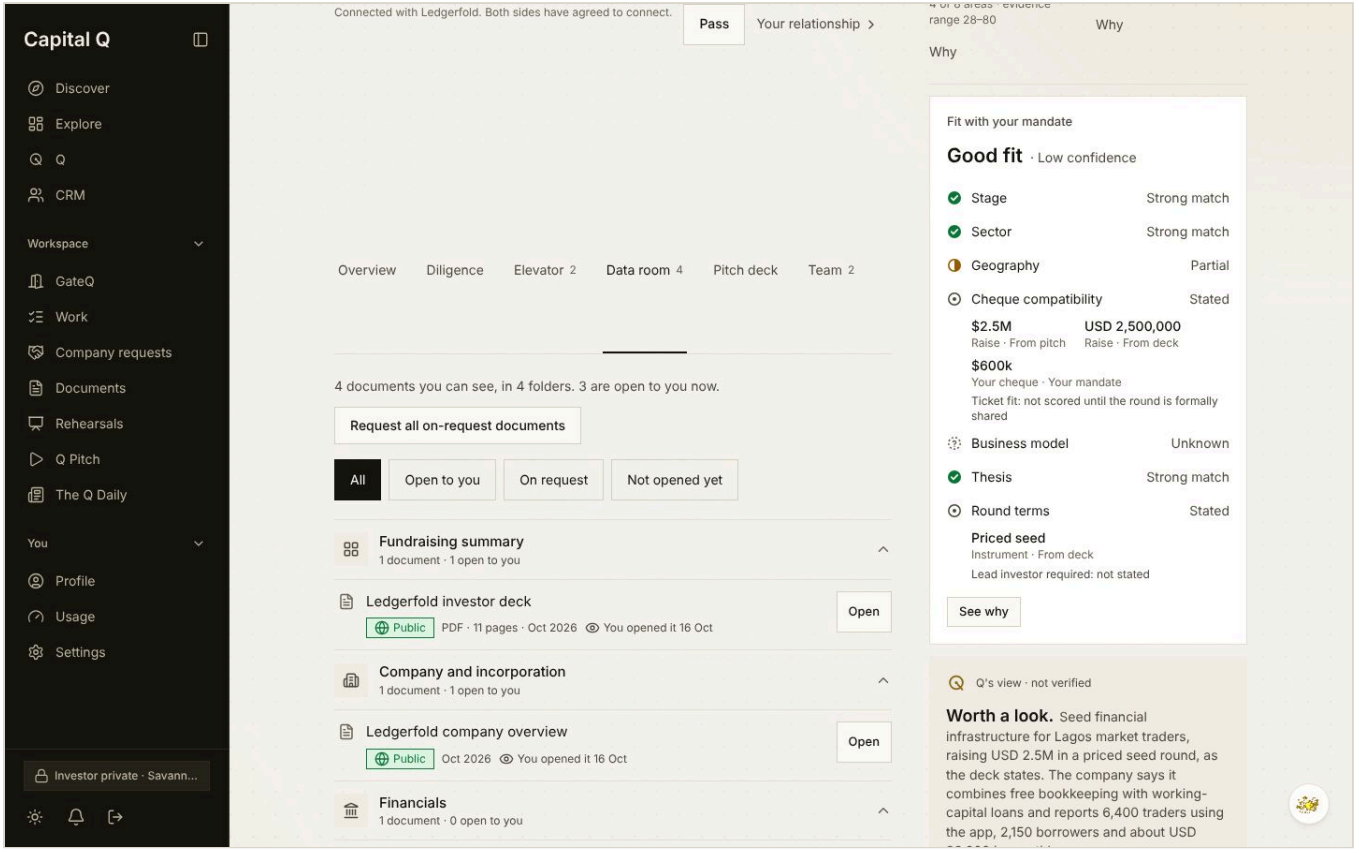

Figure 27. The Data room tab: documents open to you, and those you can request.

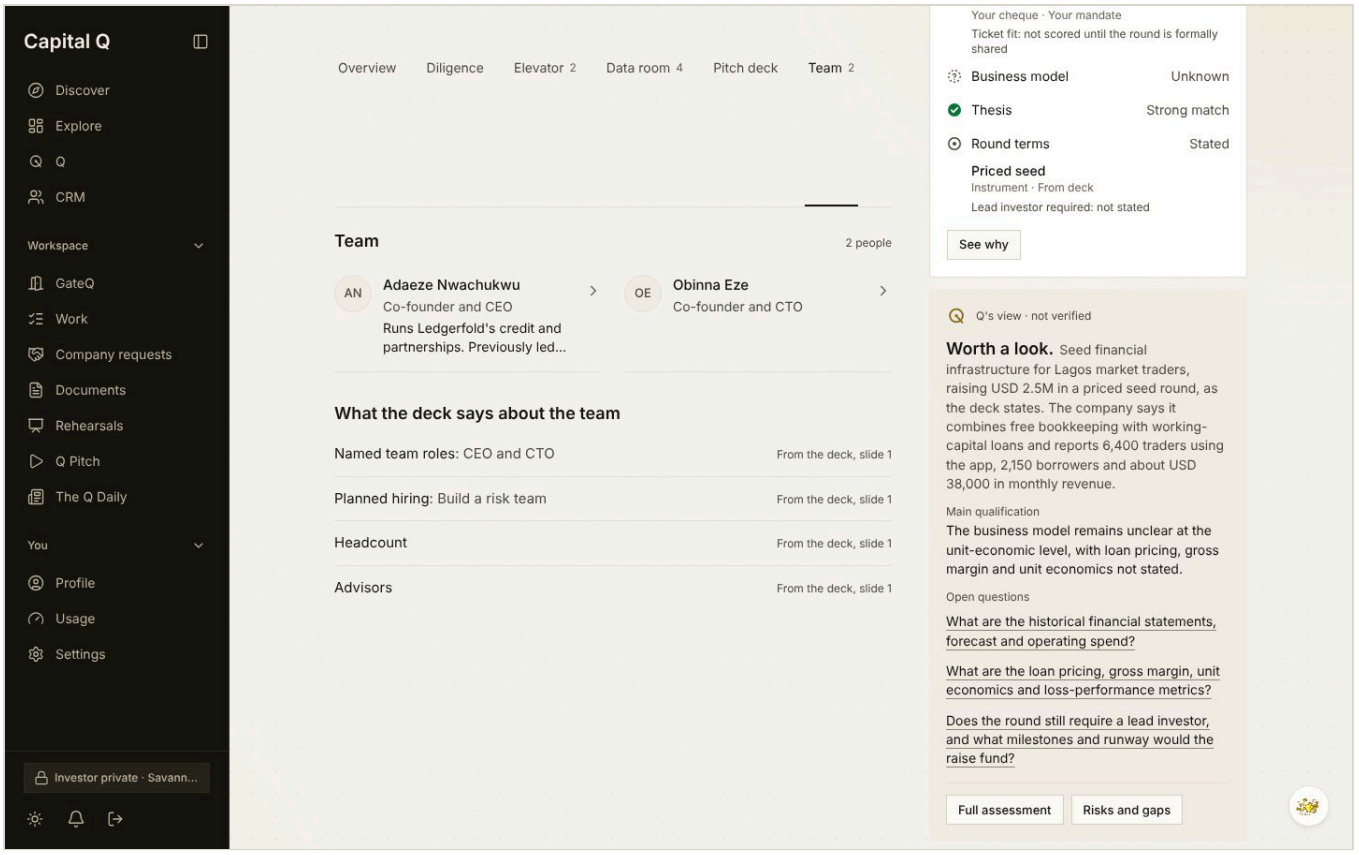

Figure 28. The Team tab.

Founders: filling the gaps with “Tell Q”

On your own profile the Overview says, for example, “7 of 13 sections provided · 7 from the deck. Gaps are yours to fill: tell Q.” Open a section that is missing and tell Q about it in your own words, by typing or talking. Q turns what you say into a proposal for that section; it becomes part of your profile when you confirm it.

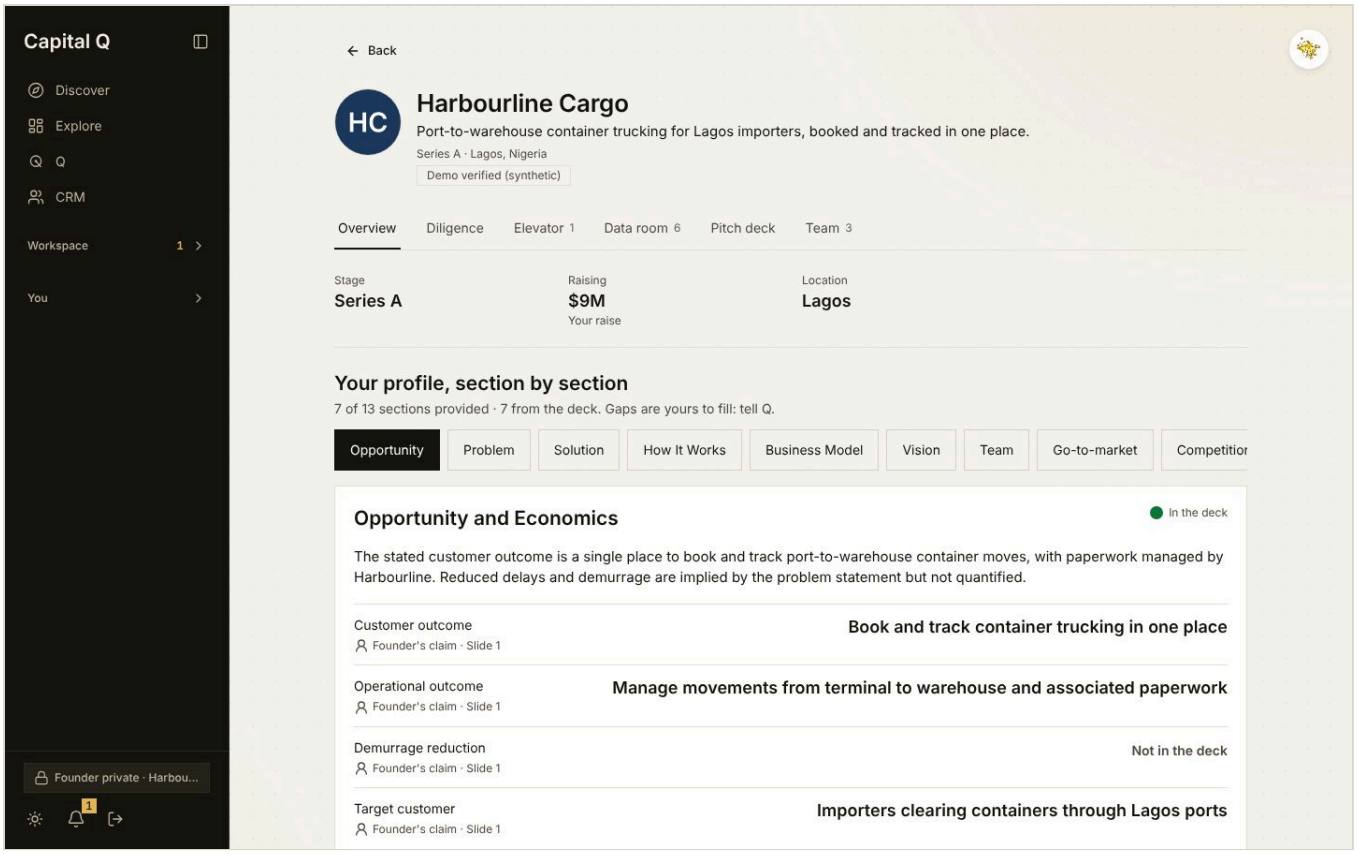

Figure 29. A founder's own Overview: which sections are provided, and the invitation to tell Q the rest.

How Q helps here

Ask Q "open the Diligence tab", "show me their competition section" or "check the evidence". Q tells you what is verified, what the company only claims, and what is unknown.

4.7 An investor profile and mandate

What it's for (founders): what an investor looks for, checked against your company, rule by rule. It uses only their public profile and their published GateQ rules, never their private thesis.

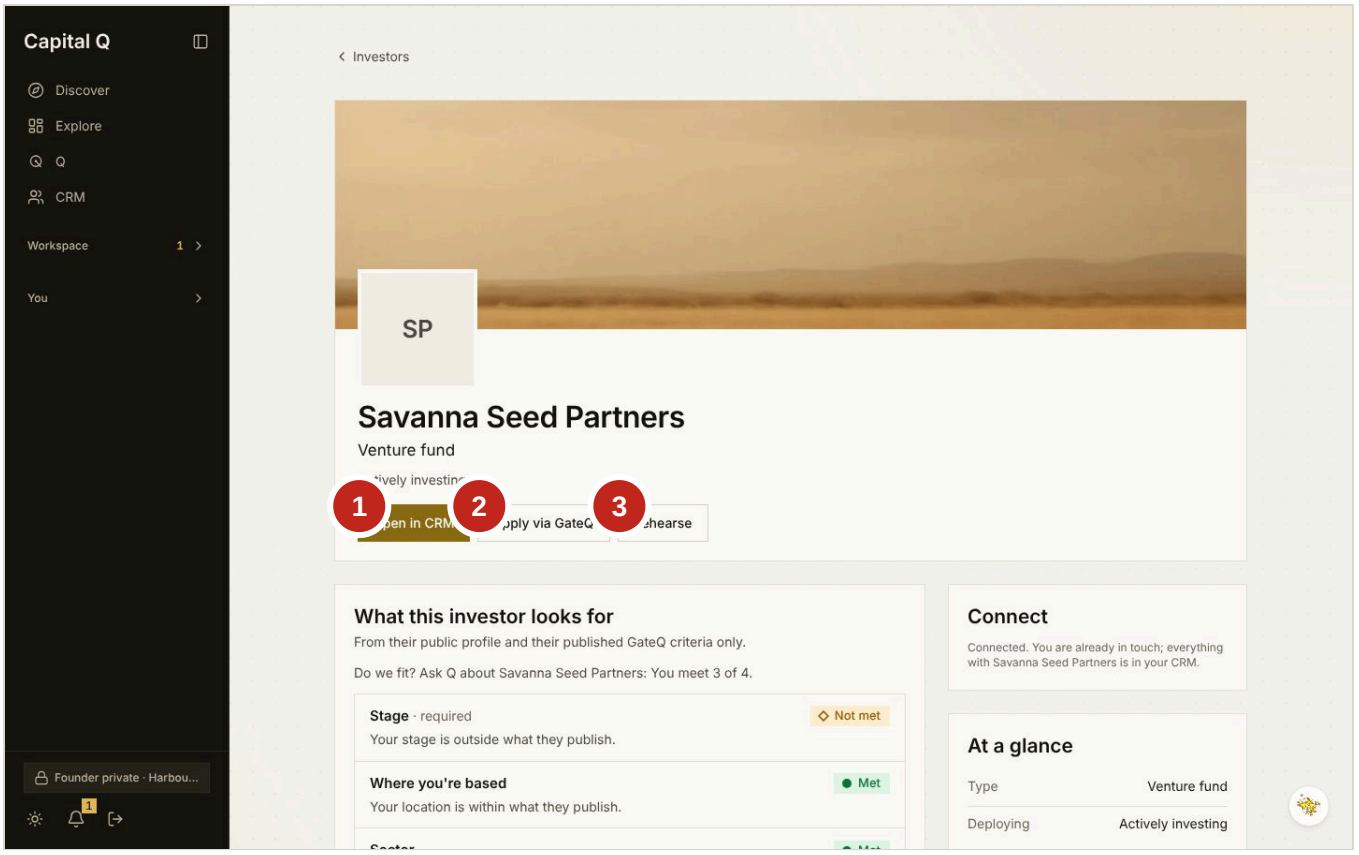

Figure 30. Savanna Seed Partners, seen by a founder: their profile, what they look for, and your next actions.

1. Read **What this investor looks for**. Each rule says Met, Not met or Unknown.
2. Click **Apply via GateQ** to apply through their gate, **Rehearse** to practise a meeting with them, or **Open in CRM** if you are already connected.
3. If you aren't connected yet, use **Connect** to ask to connect.

Your own investor profile: click **Profile** in the You group. It shows your name, role and firm, your typical cheque, stages and key sectors, and an About section. Click **Edit profile** to change it, **Share Q Card** to share it, or **Visibility** to choose whether founders can find you.

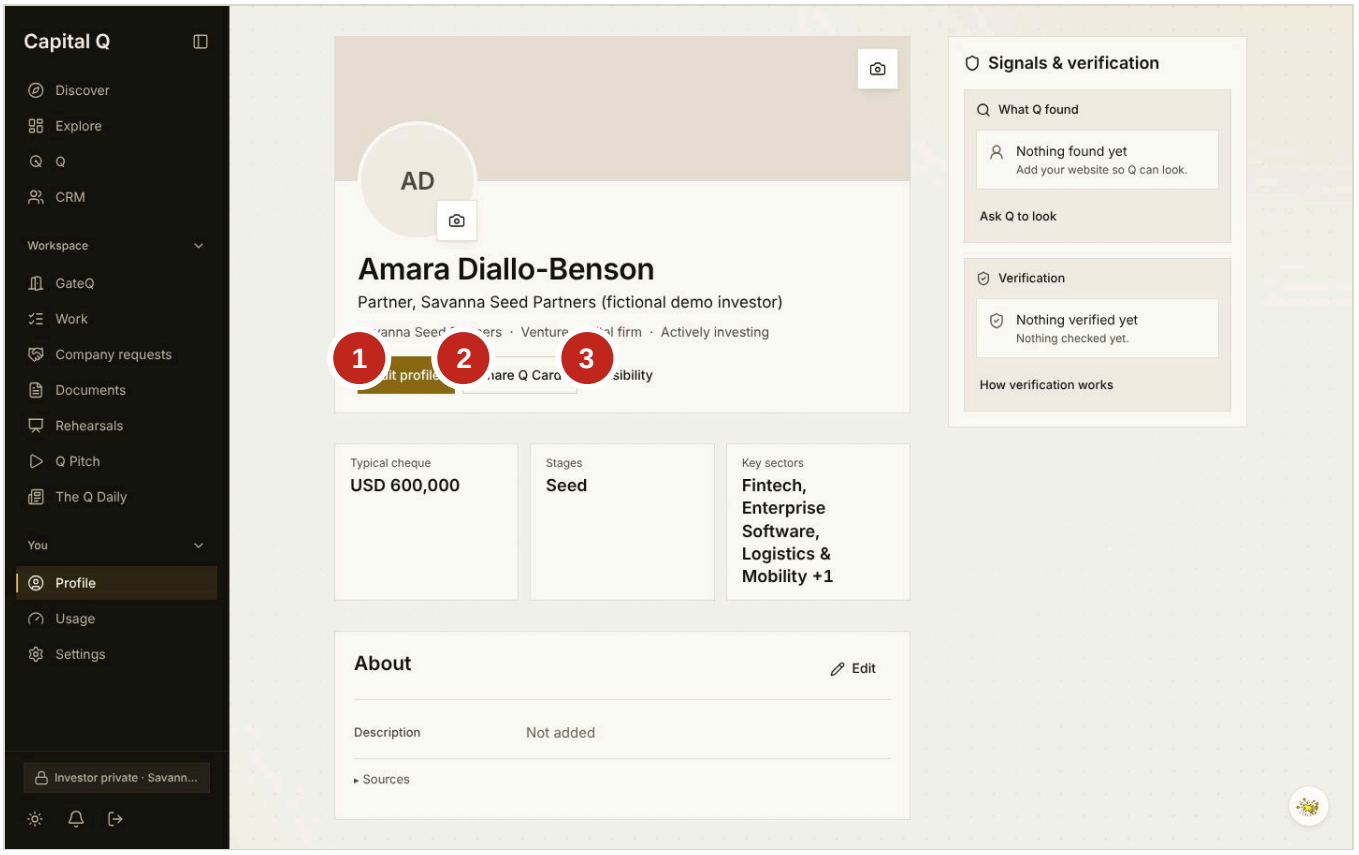

Figure 31. An investor's own profile.

Your mandate is the set of rules you invest by: stage, cheque size, places, sectors, business types, and green and red flags. It is private to your firm. You see it on the CRM **Capital** tab; click **Review my mandate** to change it, or ask Q to "sharpen my mandate". Discover ranks companies against it.

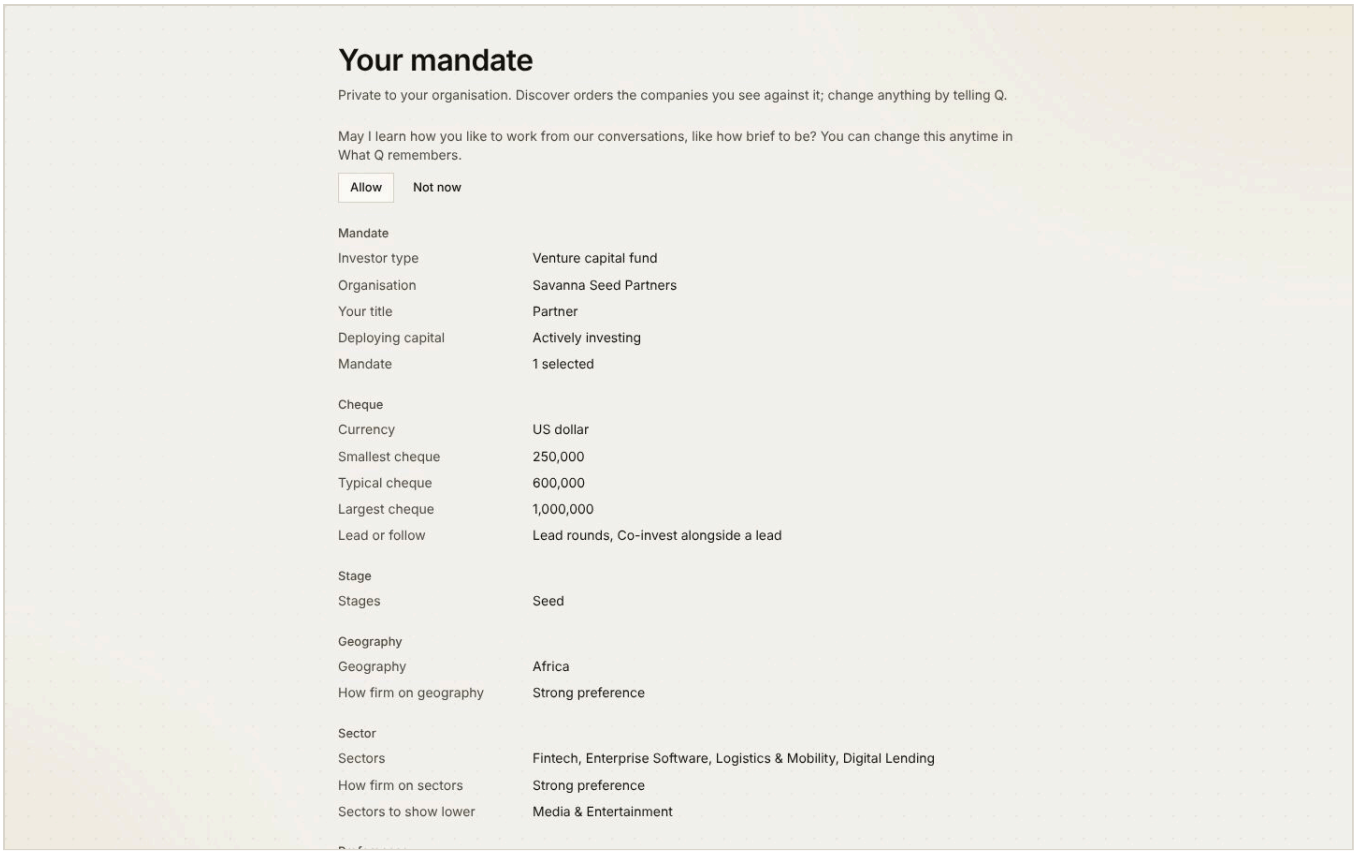

Figure 32. Reviewing your mandate, field by field.

Fund decks

During set-up, once your firm is named, investors can give Q their **fund deck**, thesis or LP letter ("Add a fund deck, thesis or LP letter, optional"). They stay private to your firm. Q reads them to suggest mandate details, such as the customer types you back or criteria beyond the basic mandate, and shows each one as a proposal. Nothing it reads is saved until you accept it.

Not pictured: the demo investor has finished set-up, so the fund-deck step isn't shown.

4.8 Capital (a tab in the CRM)

What it's for (investors): your money and your mandate in one place: what you have committed, what needs you, and the rules you invest by. Click **CRM**, then the **Capital** tab.

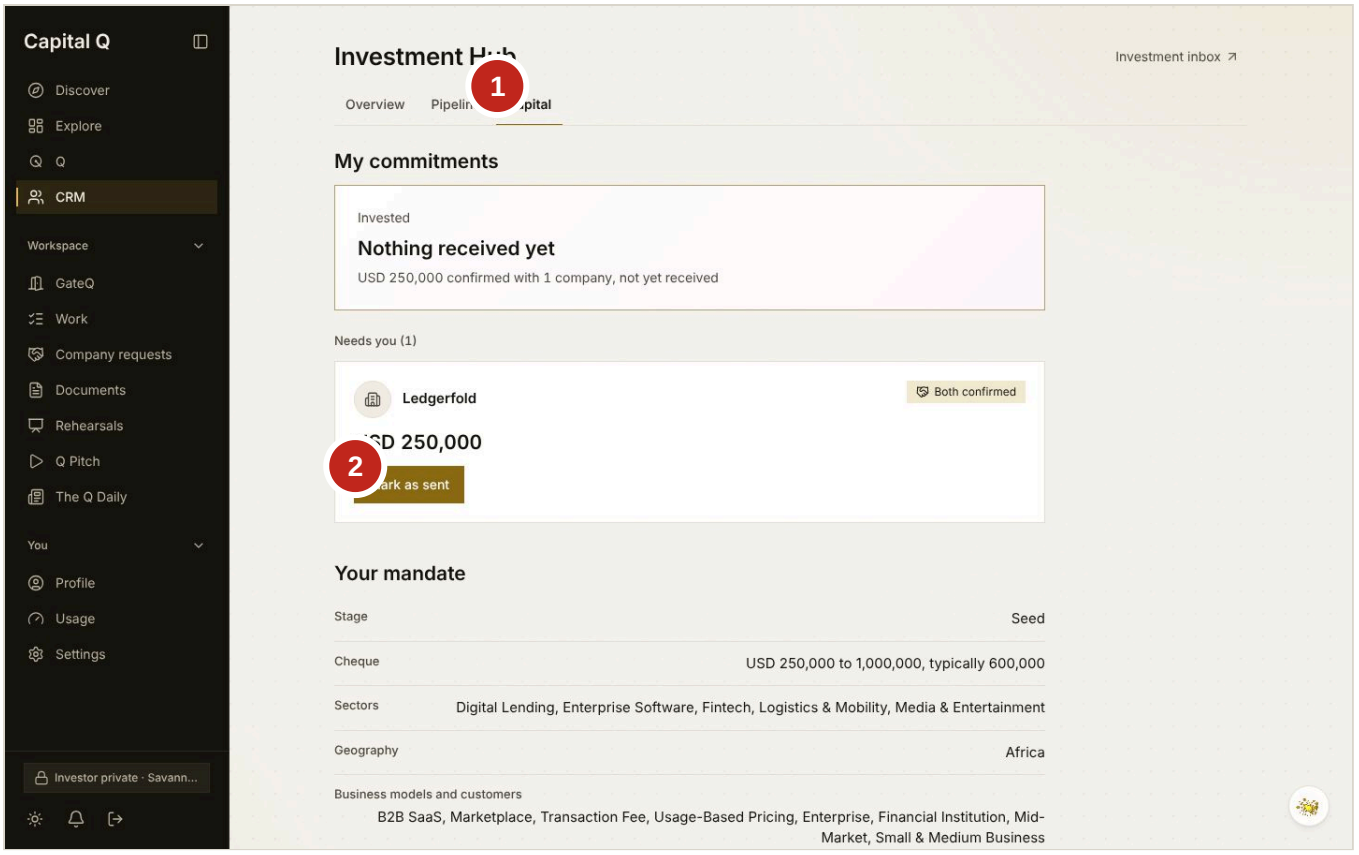

Figure 33. The Capital tab for an investor: commitments at the top, your mandate below.

1. Under **Needs you**, click **Mark as sent** once you have wired agreed money. The company then confirms it arrived.
2. Click **Review my mandate** to change your stage, cheque size, sectors, places or red flags.
3. Use the quick buttons, such as **Companies that fit my mandate** or **Where are my deals?**, to ask Q.

What it's for (founders): your raise. The CRM **Capital** tab, and the full Capital page that Q links to from your home page ("Action plan", "Readiness"), show **Overview**, **Raise & rounds**, **Readiness**, **Action plan**, **12-month plan** and **Investors**.

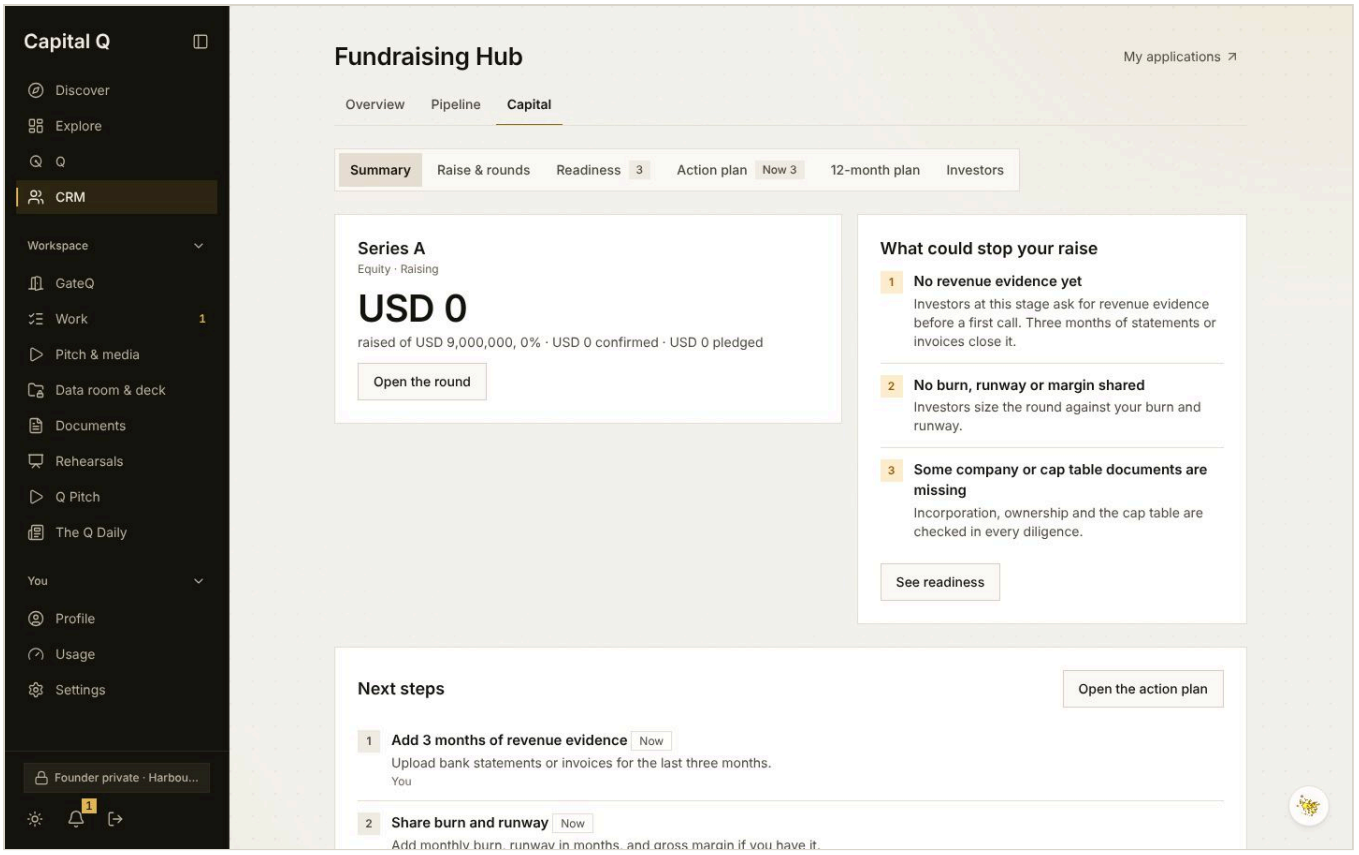

Figure 34. The Capital tab for a founder.

Known issue (16 October, evening)

While this guide was being made, a founder's Capital tab (and the Readiness and Action plan views inside it) showed "This page couldn't load" on the live app. The founder Capital pictures here were taken earlier the same day, when it worked. The team has been told.

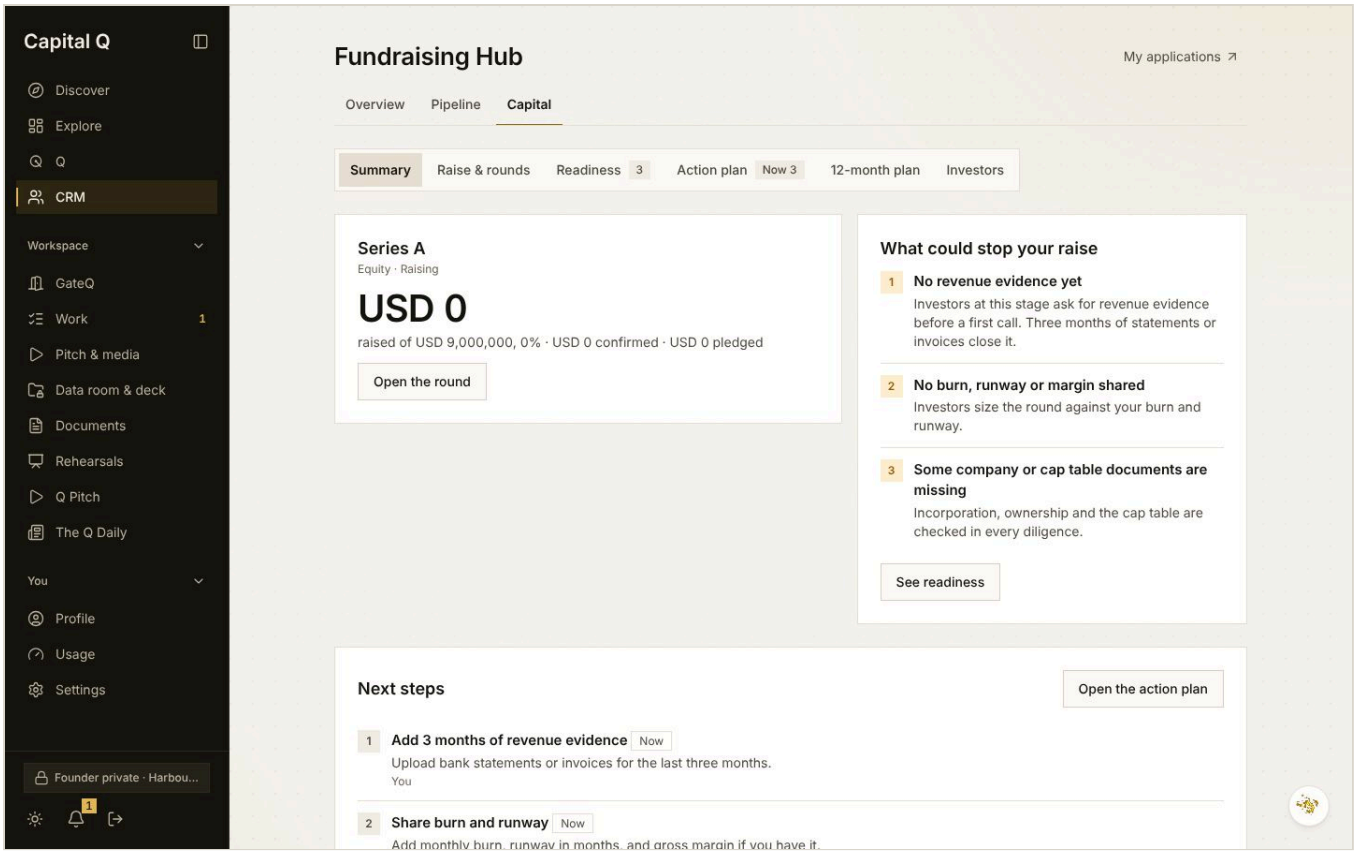

Figure 35. The founder's Capital page: the round, what could stop the raise, and next steps.

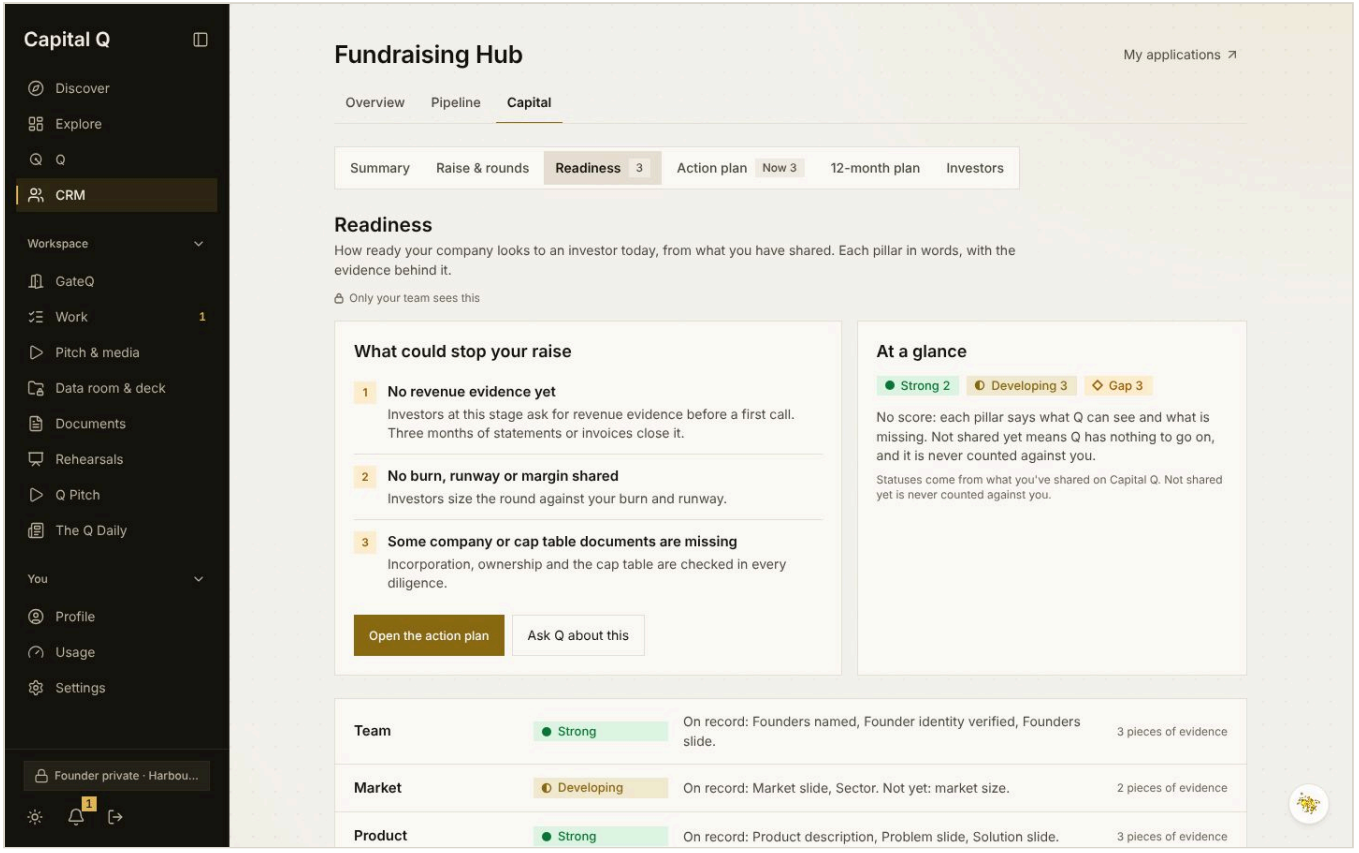

Figure 36. Readiness: how ready you look to an investor today, in words, with the evidence behind it. Only your team sees this.

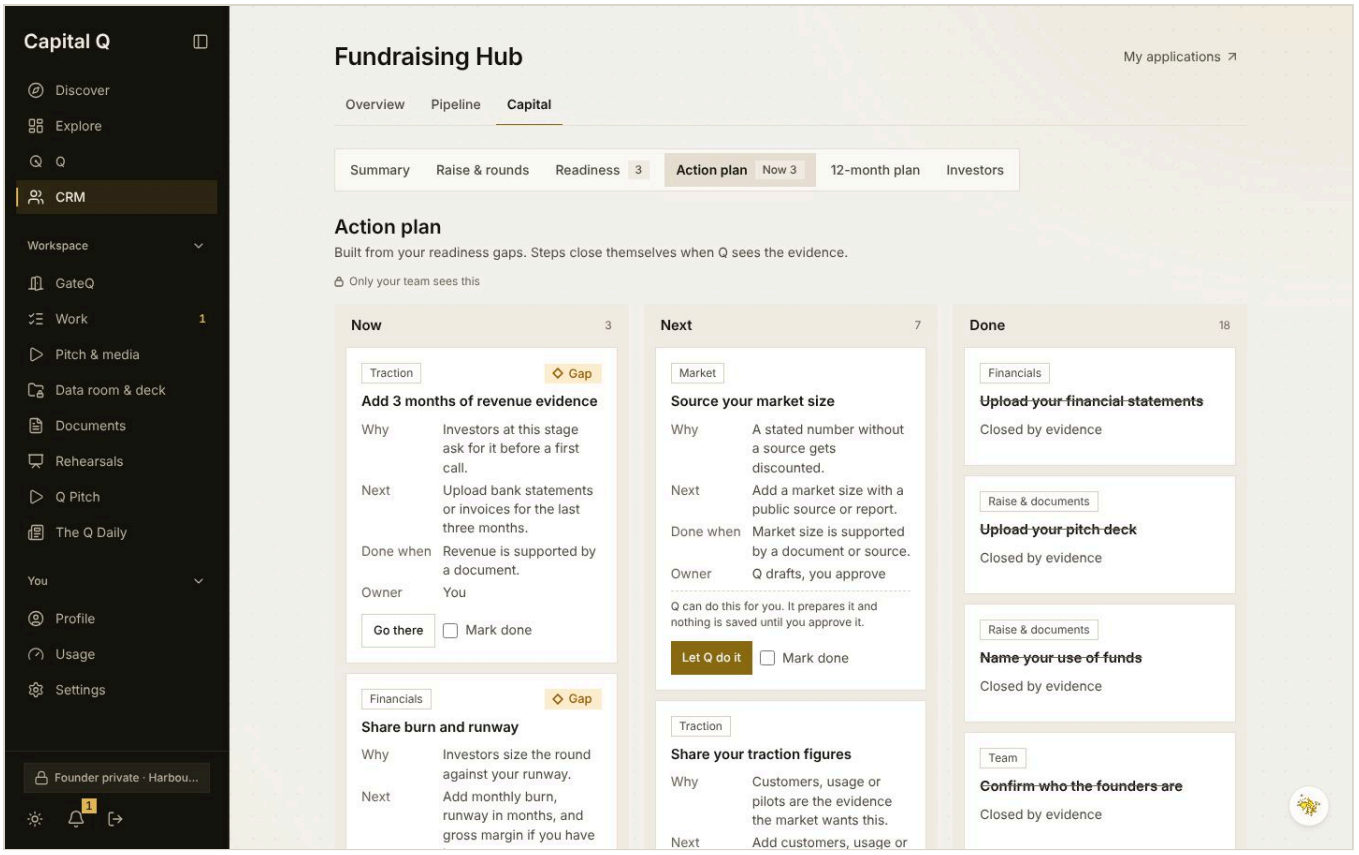

Figure 37. Action plan: the steps to do now, next and later.

> **How Q helps here**
>
> Founders can click **Plan this raise**, **Make my pitch deck** or **What's missing?**. Investors can click **Sharpen my mandate**. Q drafts; you confirm.

4.9 CRM (Investment Hub and Fundraising Hub)

What it's for: one record for every company (or investor) you are talking to, with its stage, history, notes, next step and documents. Investors see it as the **Investment Hub**, founders as the **Fundraising Hub**. There is only ever one record per company–investor pair, so Discover, GateQ and the CRM always agree.

The CRM has three tabs along the top: **Overview**, **Pipeline** and **Capital** (section 4.8).

Overview

Needs you sits at the top, folded to its name and count (for example "Needs you 3"). Click it to open the list: each item has its next button, such as **Reply**, **Mark as sent** or **Decide next step**.

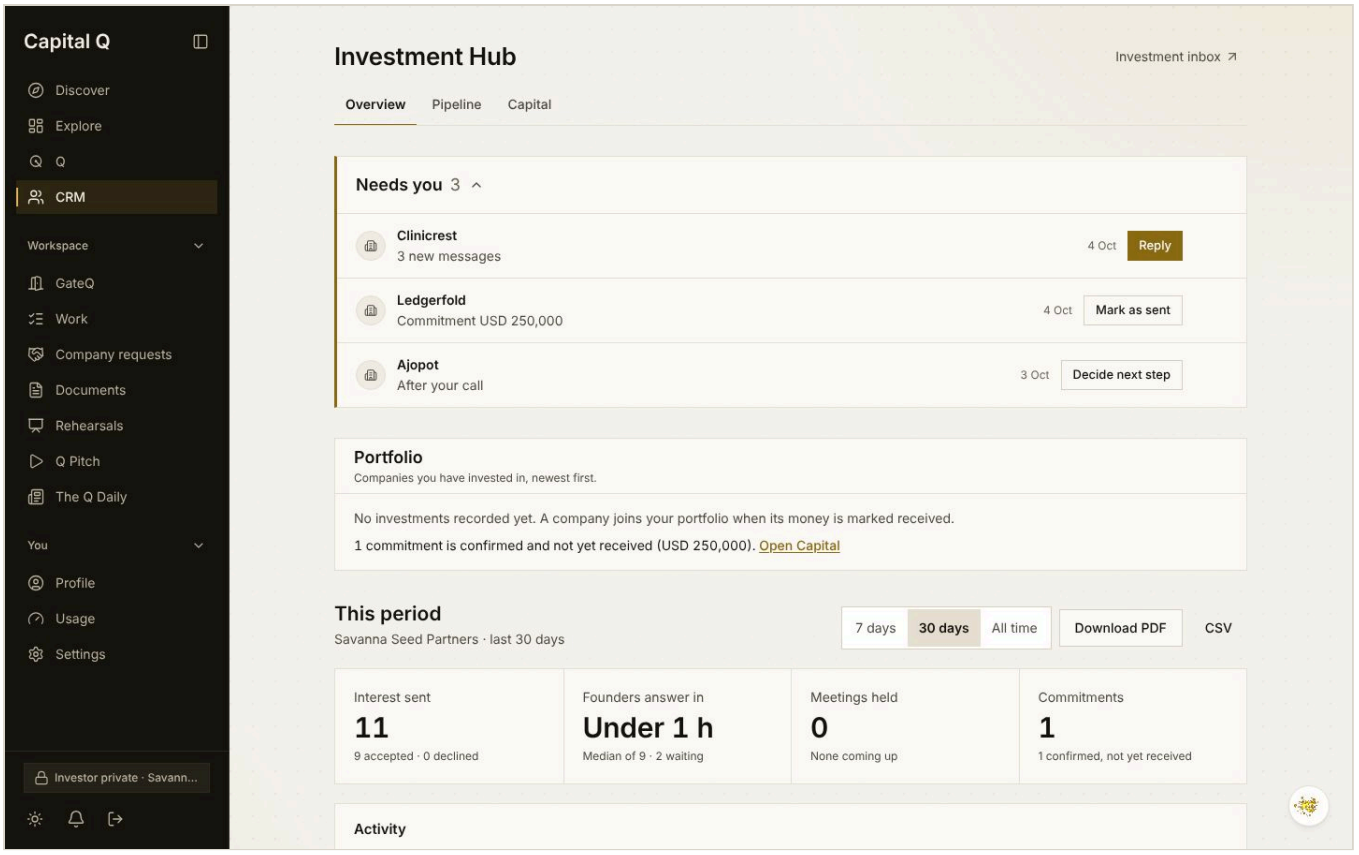

Figure 38. Needs you, opened.

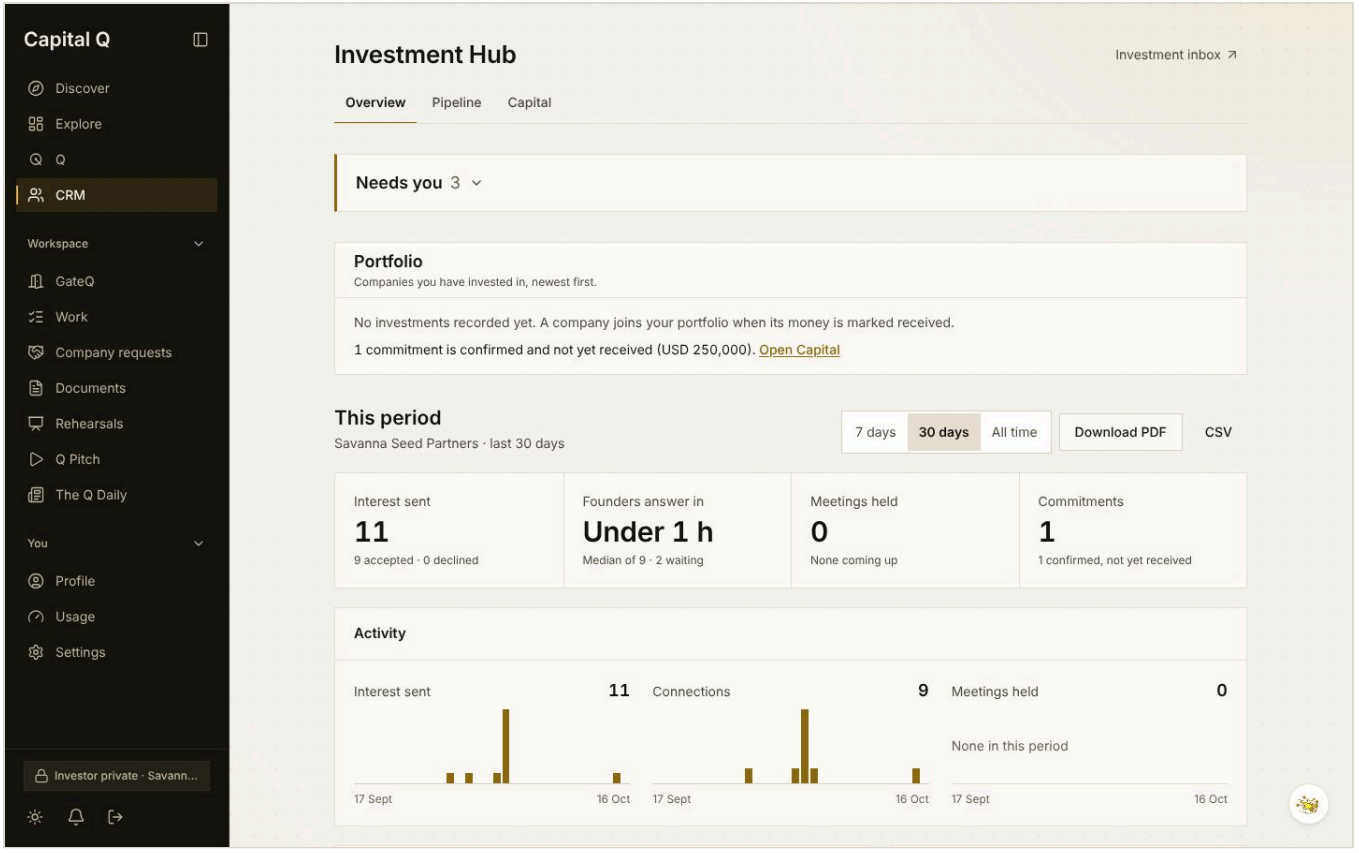

Figure 39. Overview: what needs you, your portfolio, this period's numbers, activity and pipeline. Download as PDF or CSV.

Pipeline: list, table and board

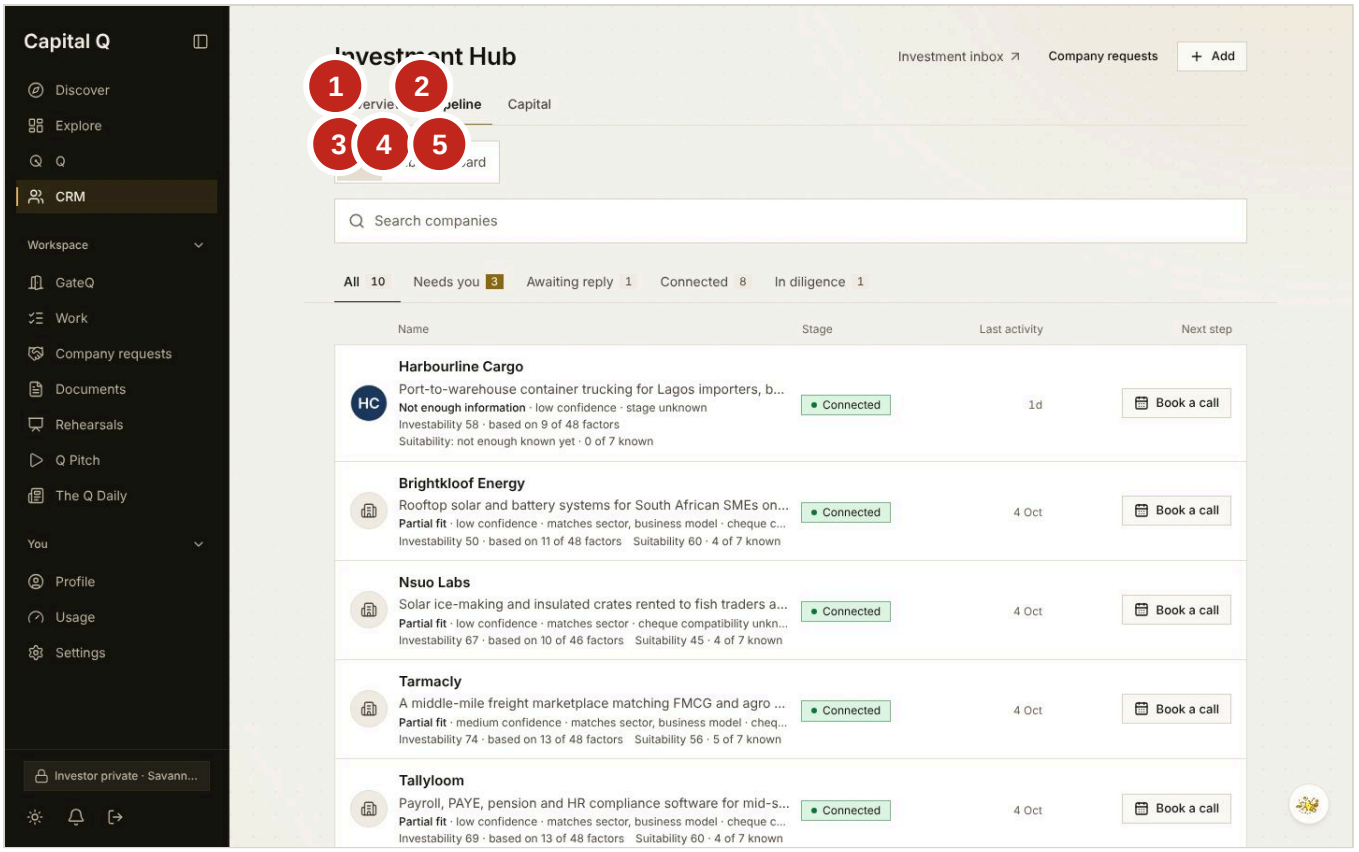

Figure 40. Pipeline as a list, with quick filters: All, Needs you, Awaiting reply, Connected, In diligence.

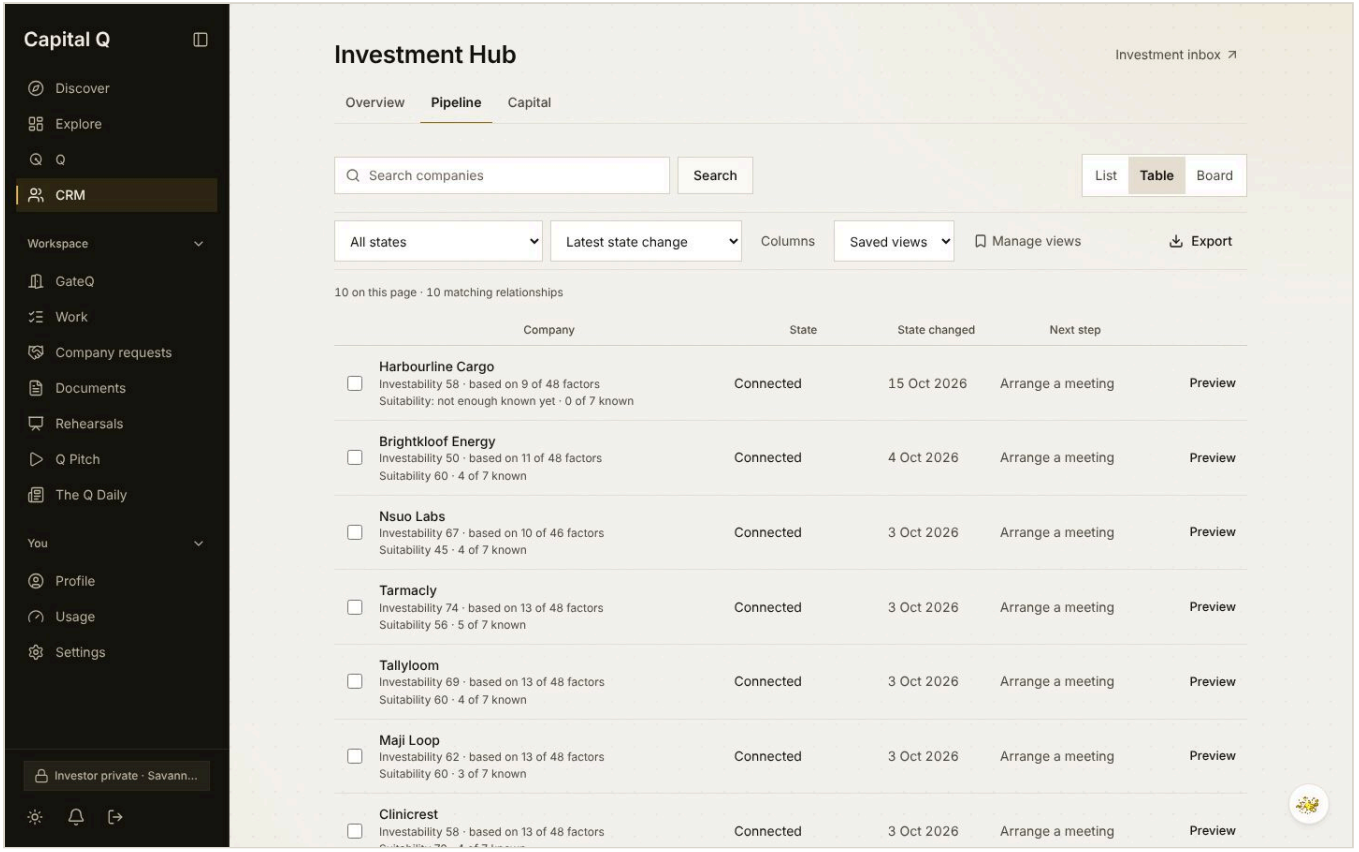

Figure 41. Pipeline as a table. Sort, choose columns, save views and export.

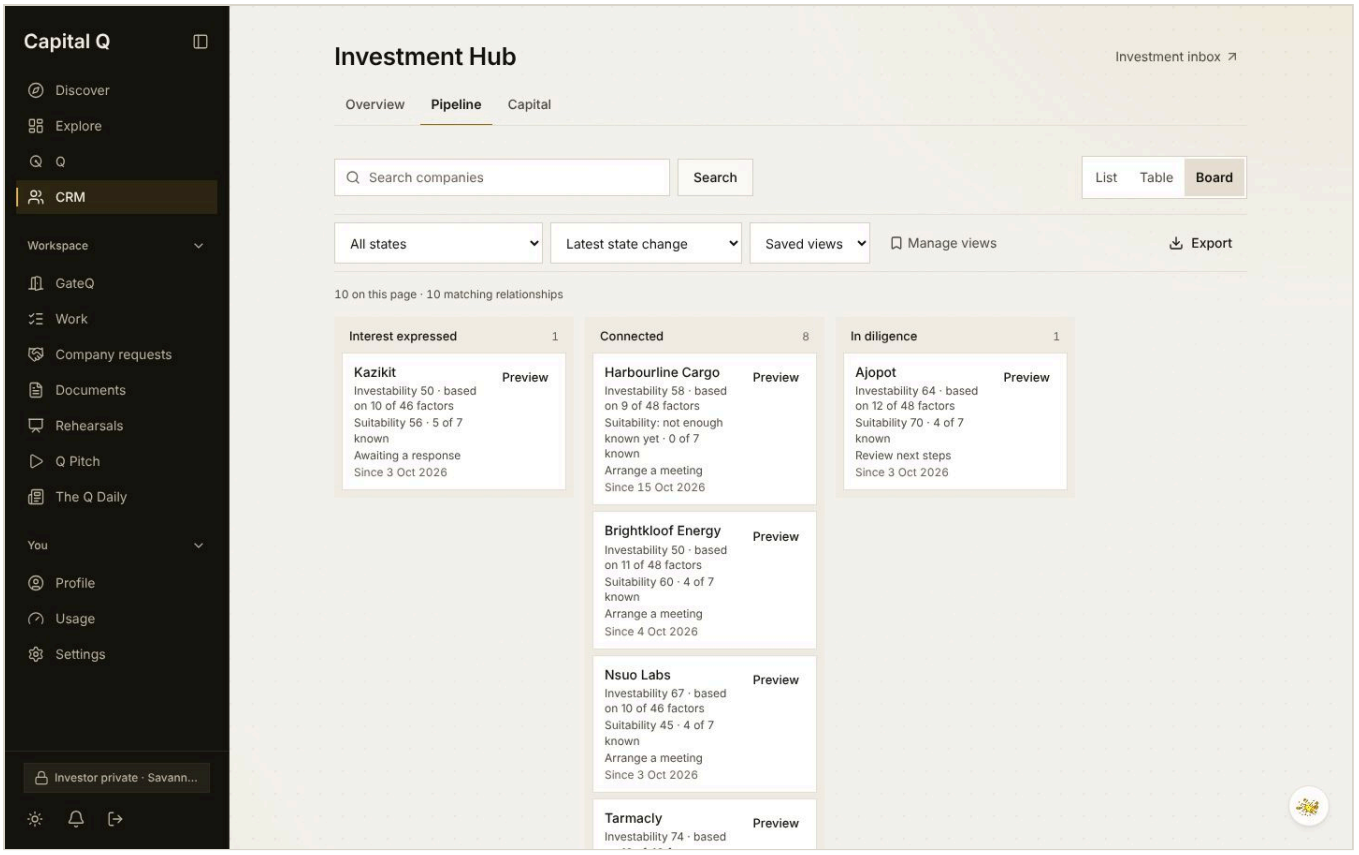

Figure 42. Pipeline as a board, one column per stage.

1. Click **CRM** in the sidebar.
2. Click **Pipeline**, then **List**, **Table** or **Board**.
3. Use the stage filter and sort menus. Click **Save view** to keep a set-up you like.
4. Click **Export** to download the list.
5. Click **Preview** for a quick look, or click a name to open its record.

A record

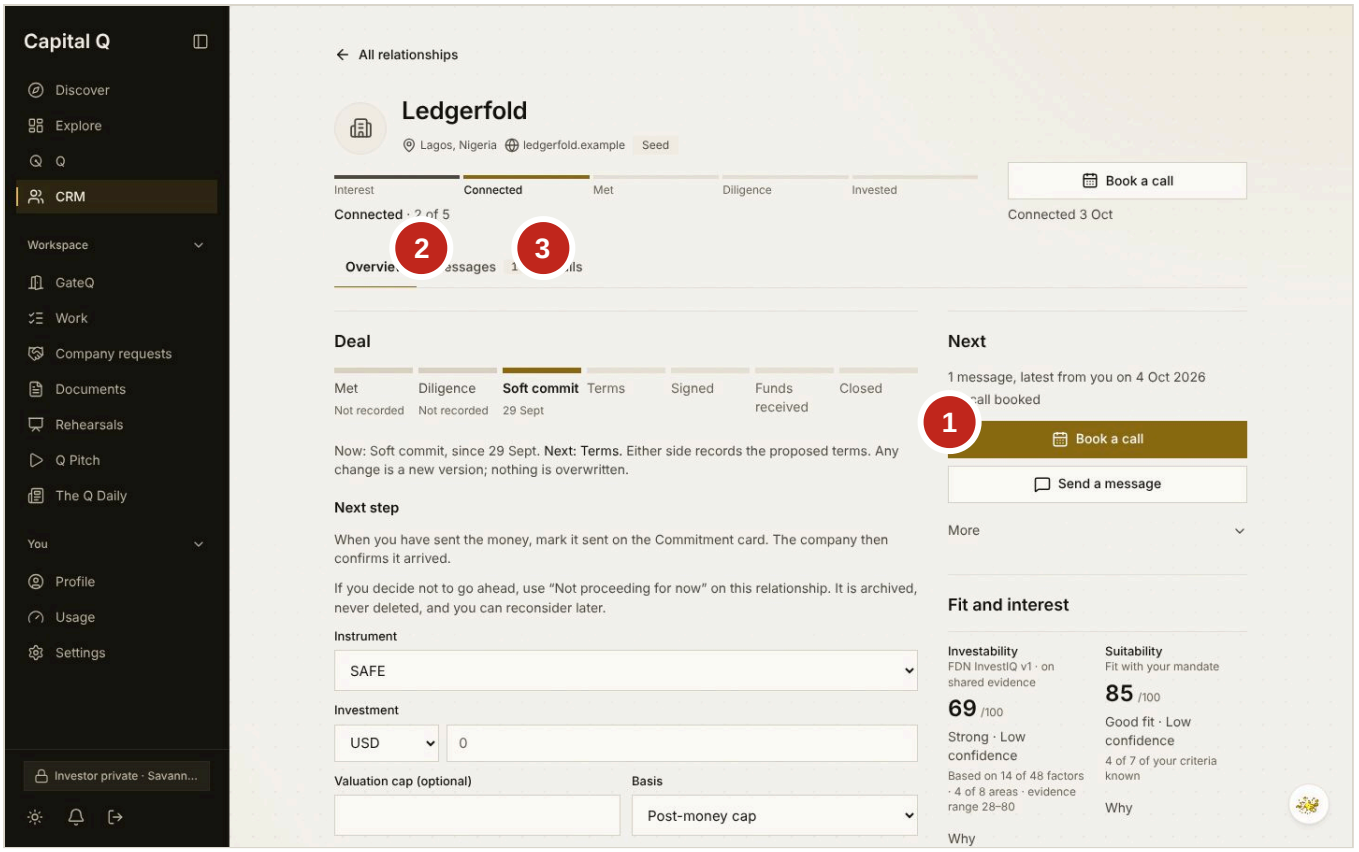

Figure 43. The Ledgerfold record: the stage bar, the deal steps and the next step.

The bar across the top shows the stages: Interest, Connected, Met, Diligence, Invested. Under **Deal** you see Soft commit, Terms, Signed, Funds received and Closed. Any change makes a new version; nothing is overwritten.

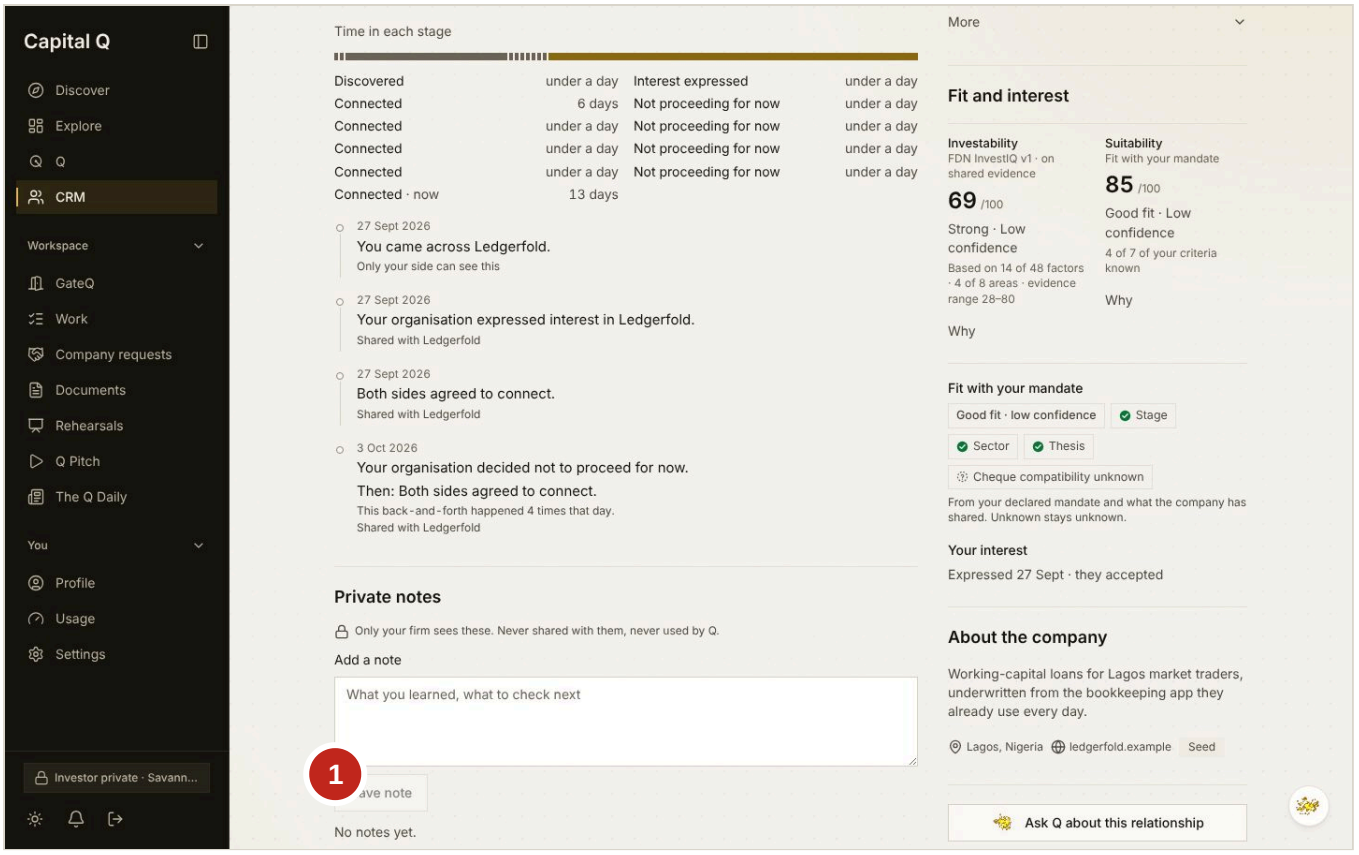

Figure 44. Private notes (only your team sees them) and the Next panel.

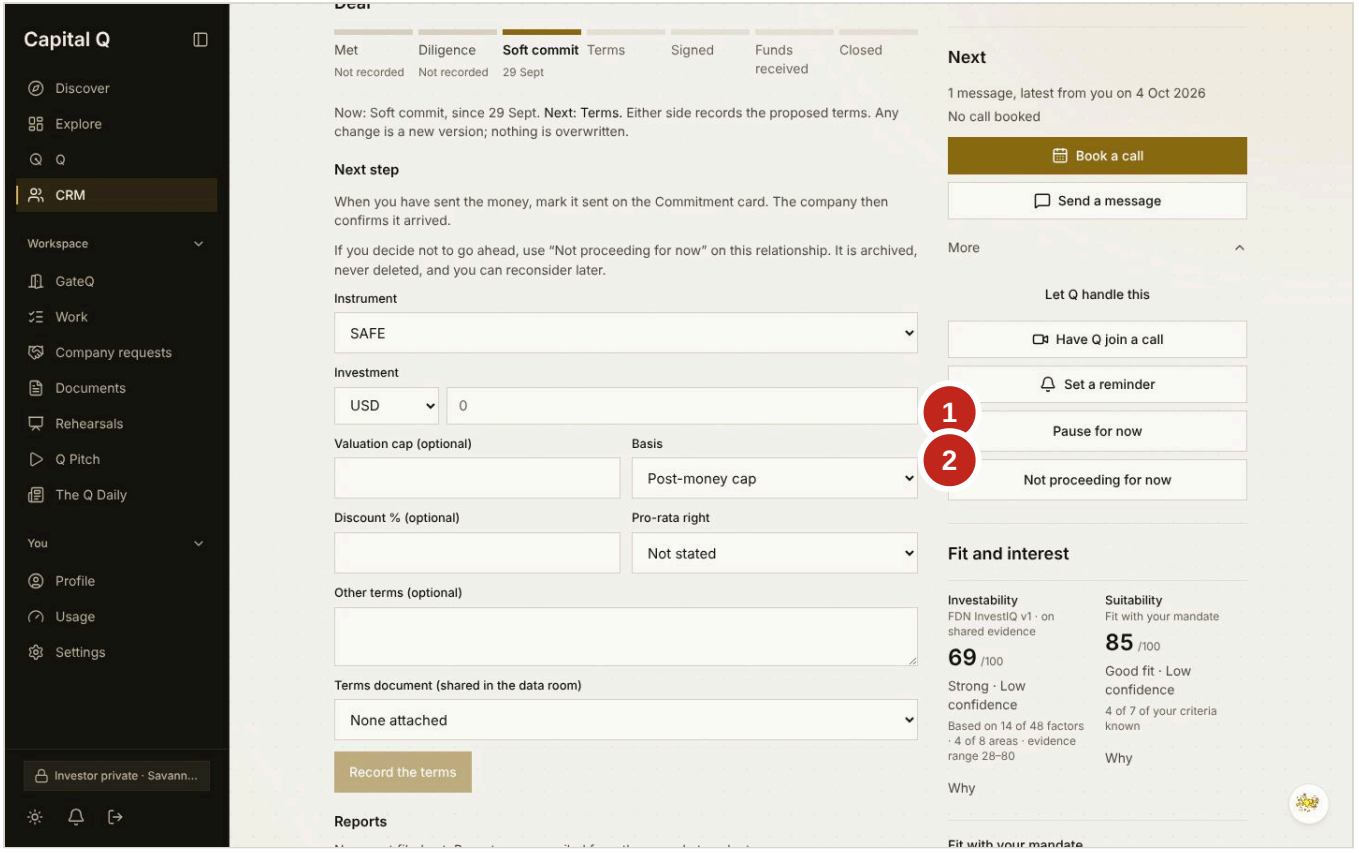

Figure 45. Recording a decision: Pause for now, or Not proceeding for now. A relationship is archived, never deleted.

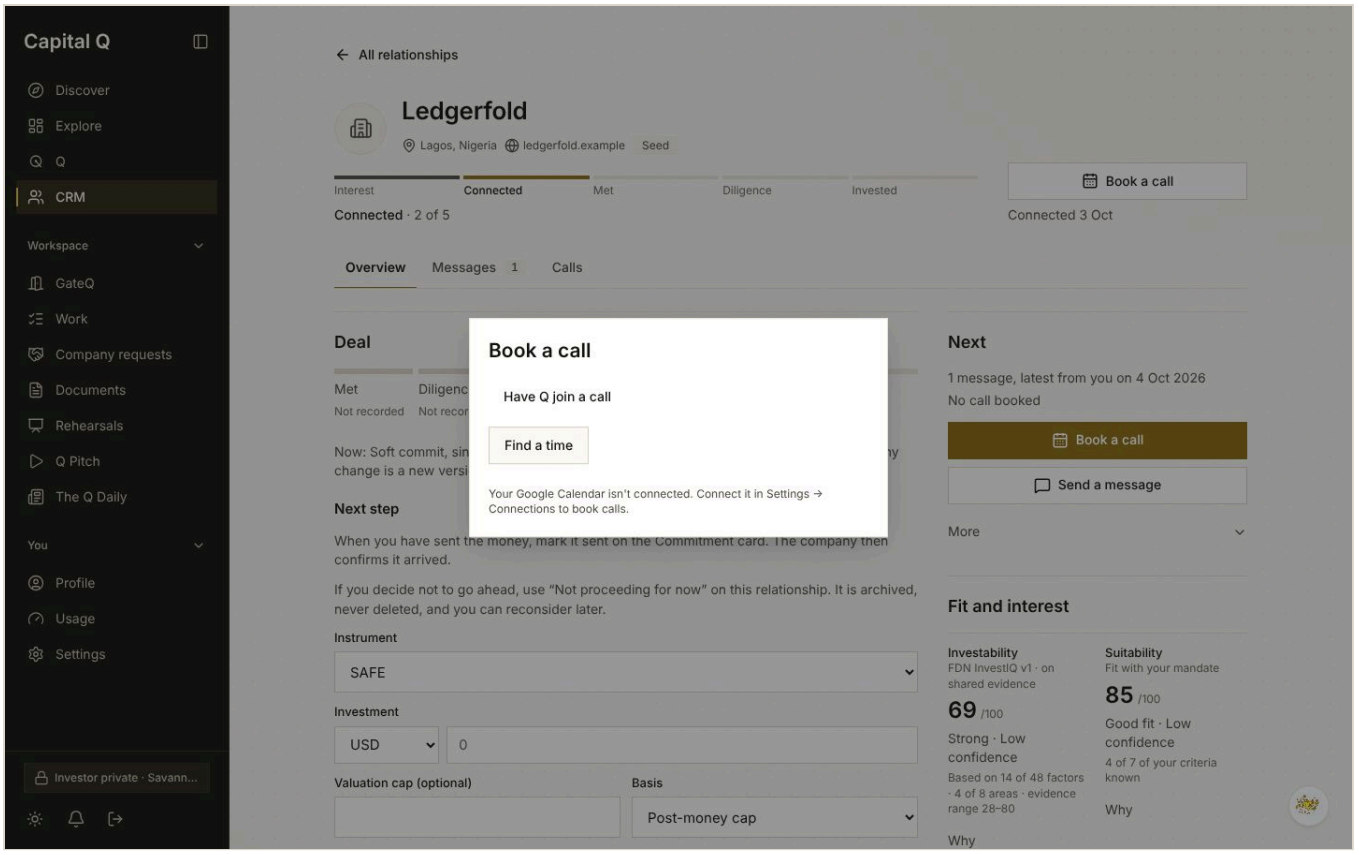

Figure 46. Book a call: find a time, or have Q join the call.

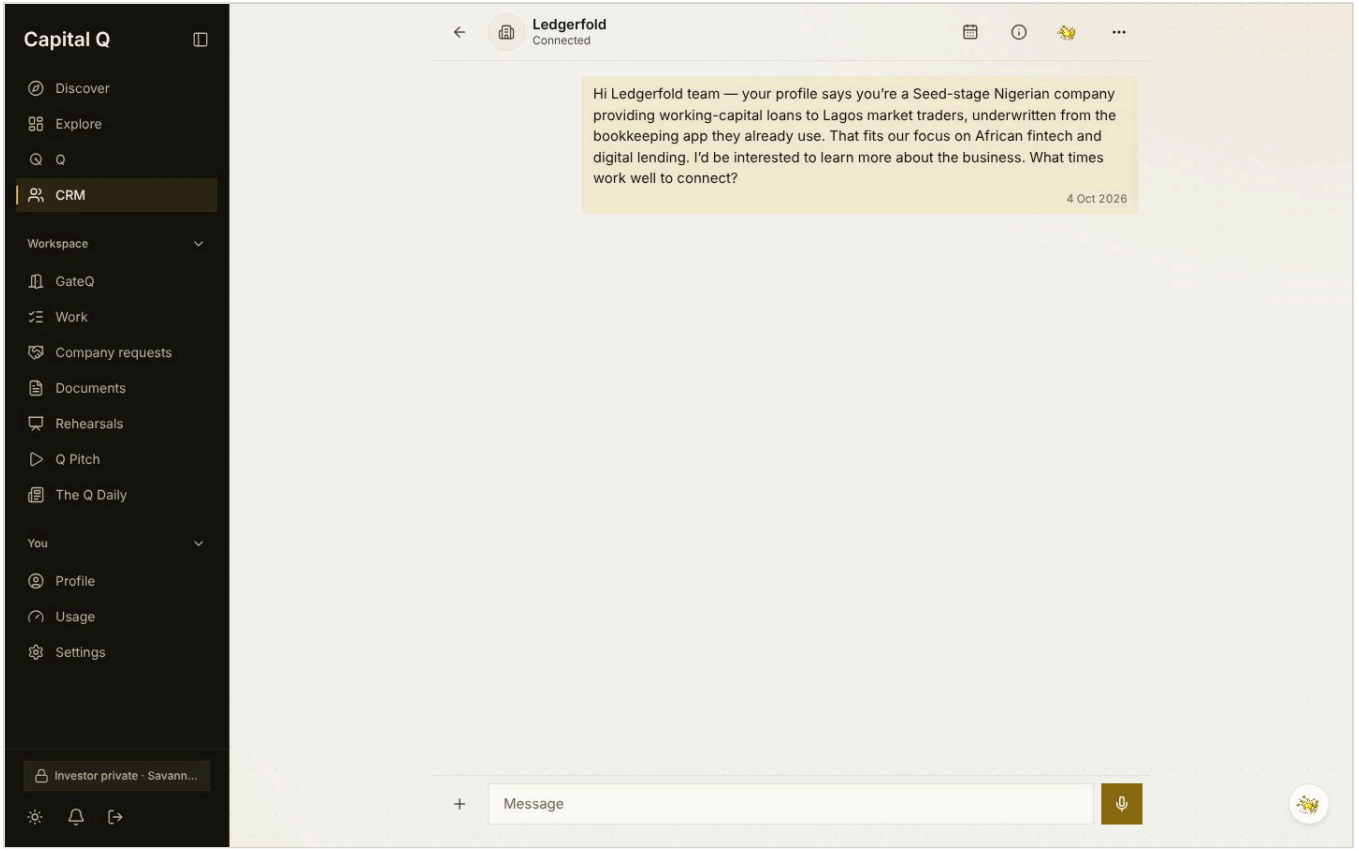

Figure 47. Messages with the company, kept on the record.

Meetings

Open the **Calls** tab on a record to book a meeting, or have Q join it. Below, you see every step of the relationship with its date.

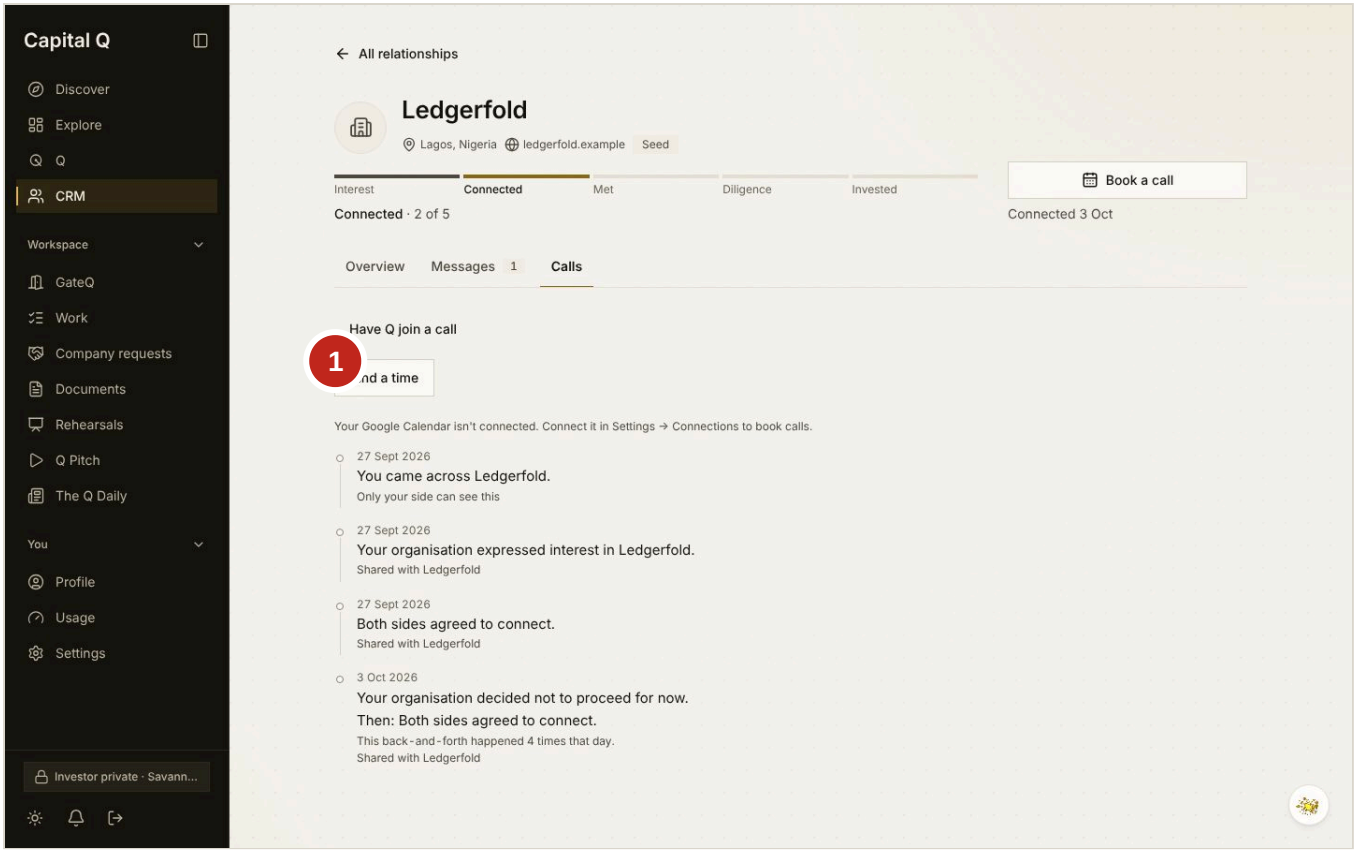

Figure 48. The Calls tab: book a meeting or have Q join it, with the relationship's history underneath.

What you can do on a record

1. Write a **private note** and click **Save note**.
2. Click **Book a call**, then **Find a time**.
3. Click **Send a message** or open the **Messages** tab.
4. Click **Record the terms** or **File a report** as the deal moves on.
5. Click **Set a reminder** so Q nudges you later.
6. Record your decision with **Pause for now** or **Not proceeding for now**.
7. Click **Audit trail (CSV)** to download every step with who did it and when.

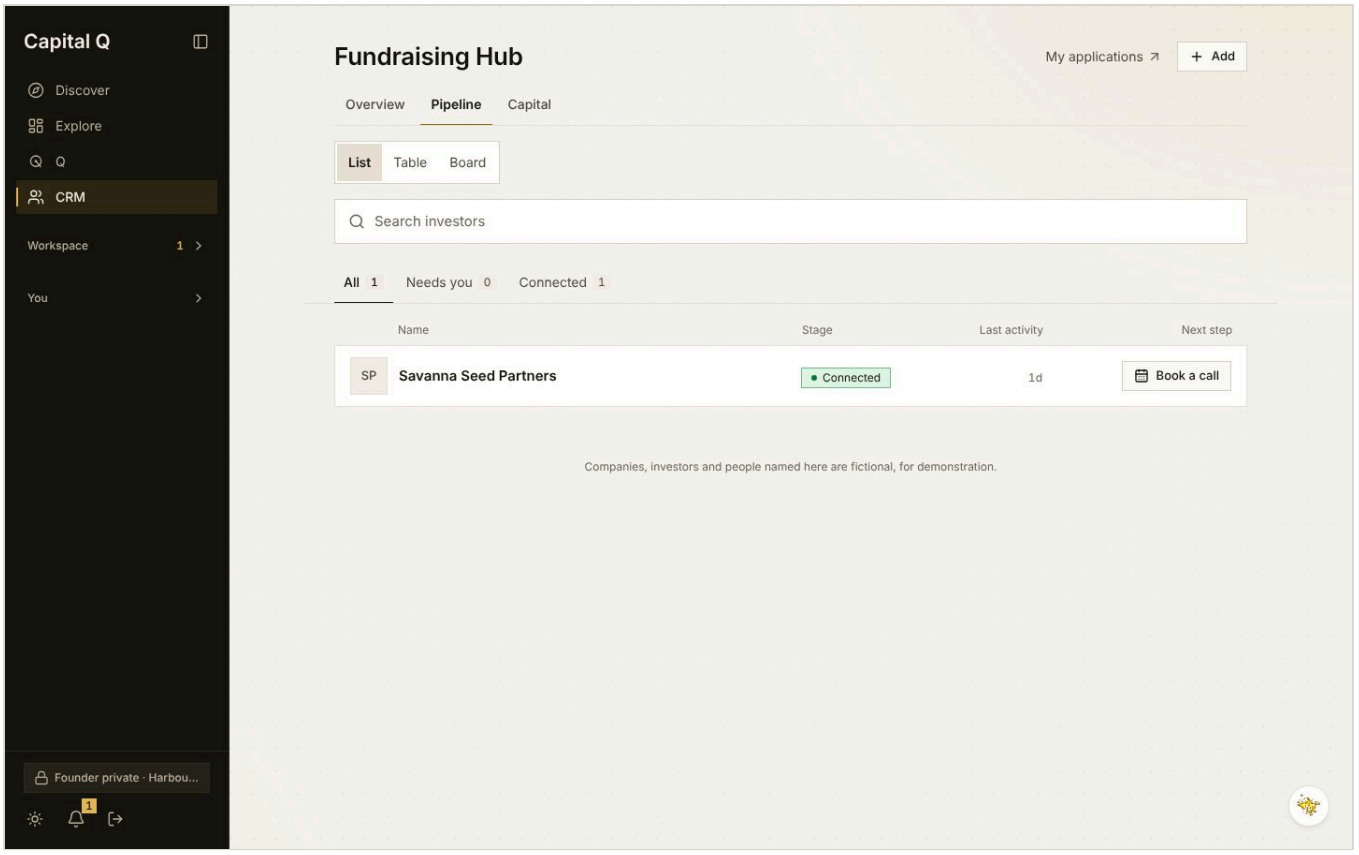

Figure 49. The founder's Fundraising Hub.

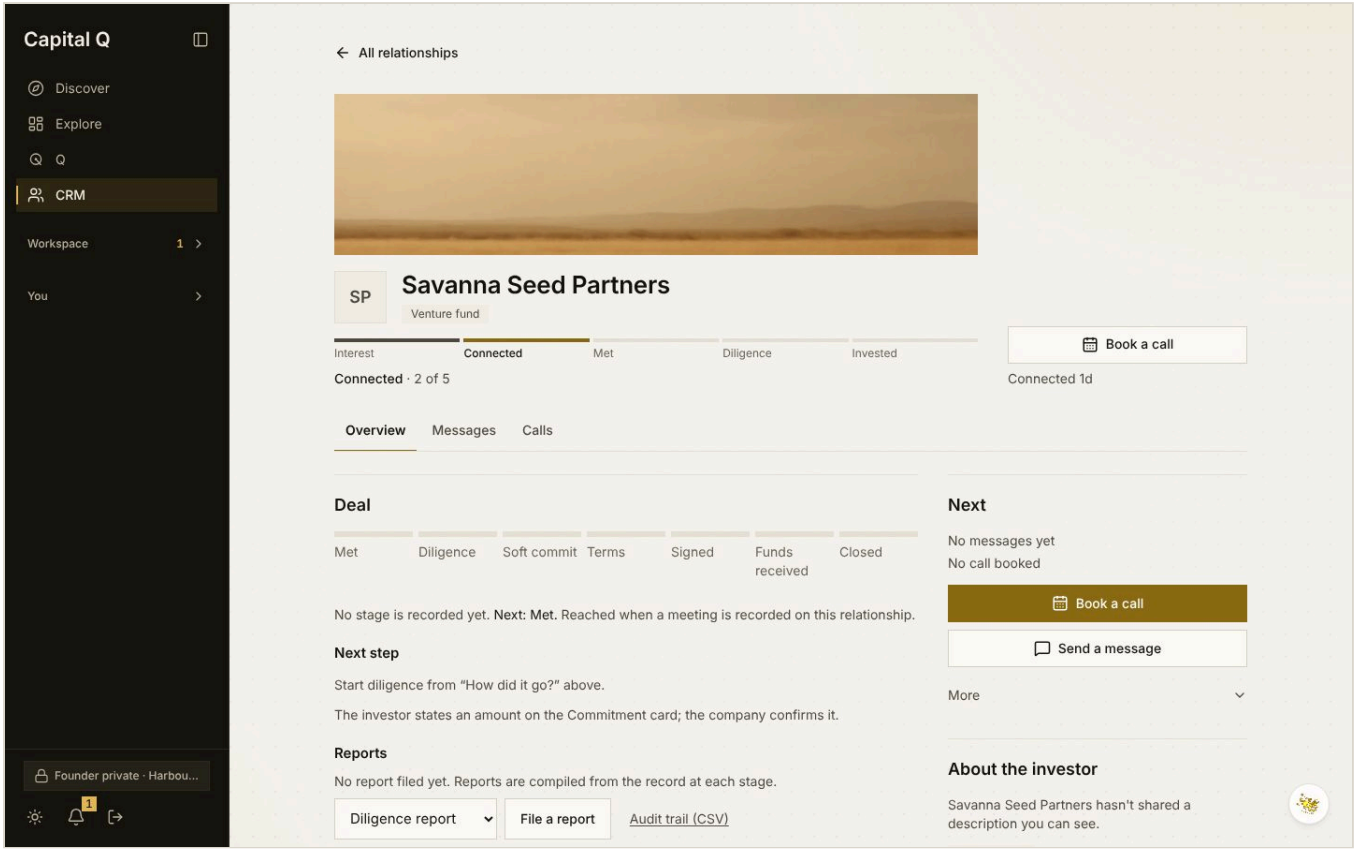

Figure 50. A founder's record for an investor. The investor states an amount on the Commitment card; the company confirms it.

How Q helps here

Click **Let Q handle this** and Q takes care of the follow-up, such as replying or finding a meeting time, asking for your yes before anything is sent. Click **Ask Q about this relationship** for a summary of where things stand. You can also just say “open my pipeline”, “show Ledgerfold’s record” or “go to the Capital tab”, and Q takes you there.

Limits

Booking a call needs your Google Calendar connected in **Settings → Connections**. Without it, Capital Q tells you so and you can’t pick a time yet. Having Q join a live call has not yet been proven in a live meeting.

4.10 Company requests and investor interest

Company requests (investors): companies that asked to connect with you, ranked by fit. Accepting connects you; it is not an investment.

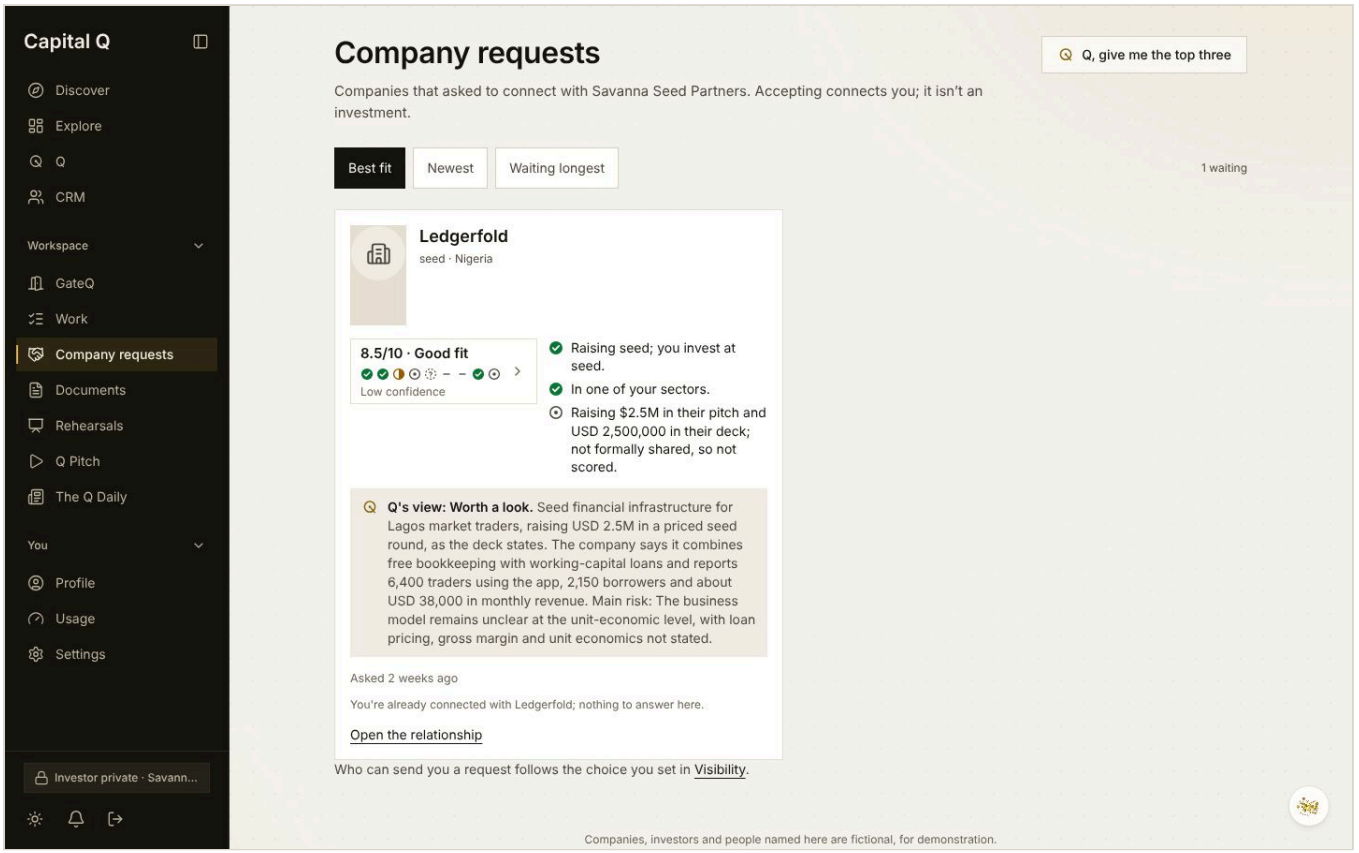

Figure 51. Company requests, with Q’s view and the main risk for each.

Investor interest (founders): investors who expressed interest in your company. Click **Accept** to connect, or **Decline**.

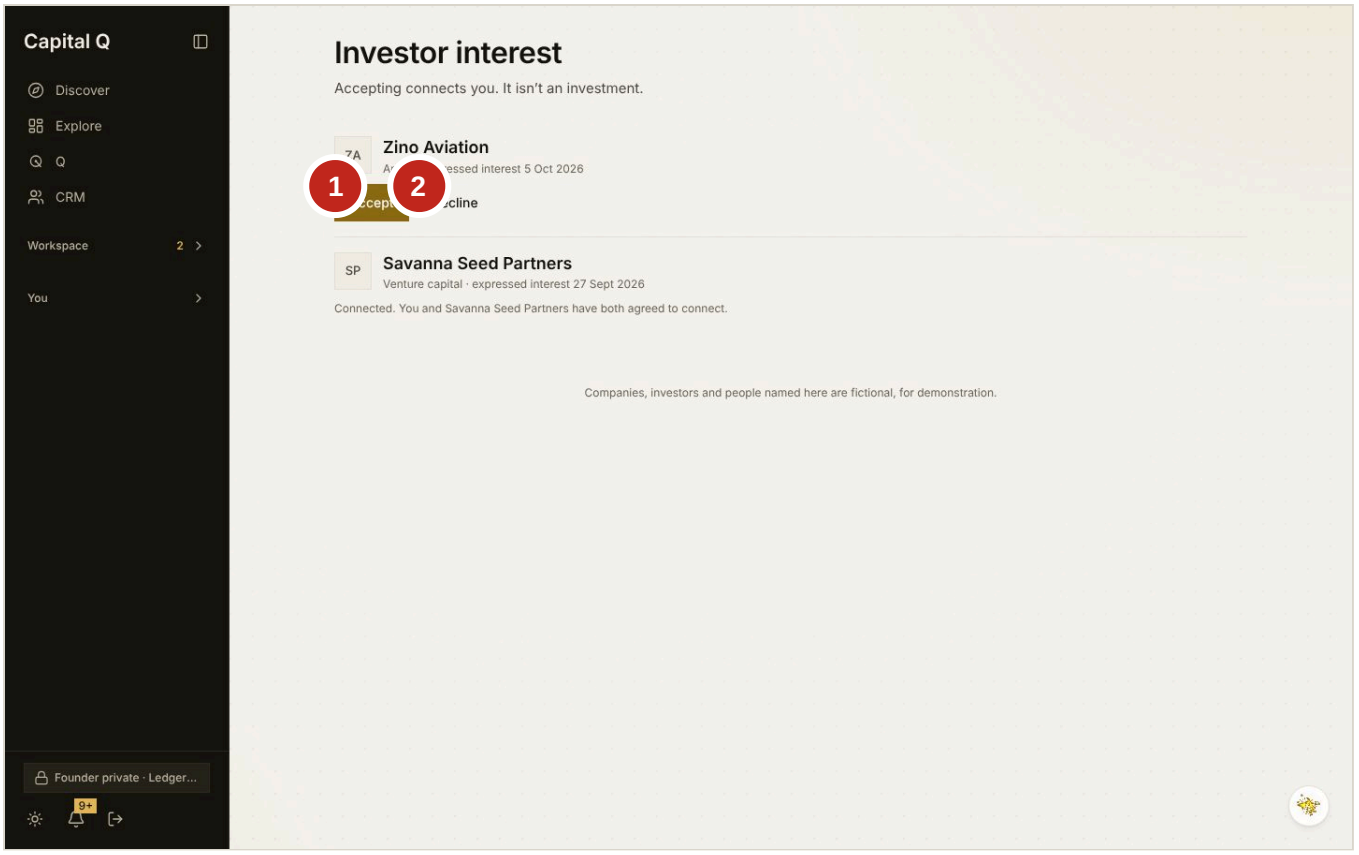

Figure 52. Ledgerfold has interest from Zino Aviation waiting for an answer.

4.11 GateQ

What it's for: GateQ is an investor's front door. The investor publishes a few simple rules (stage, place, sector, cheque size). Founders check their fit in two minutes and apply. Q interviews them and turns the answers into a short dossier for the investor.

Investors: the inbox and the dossier

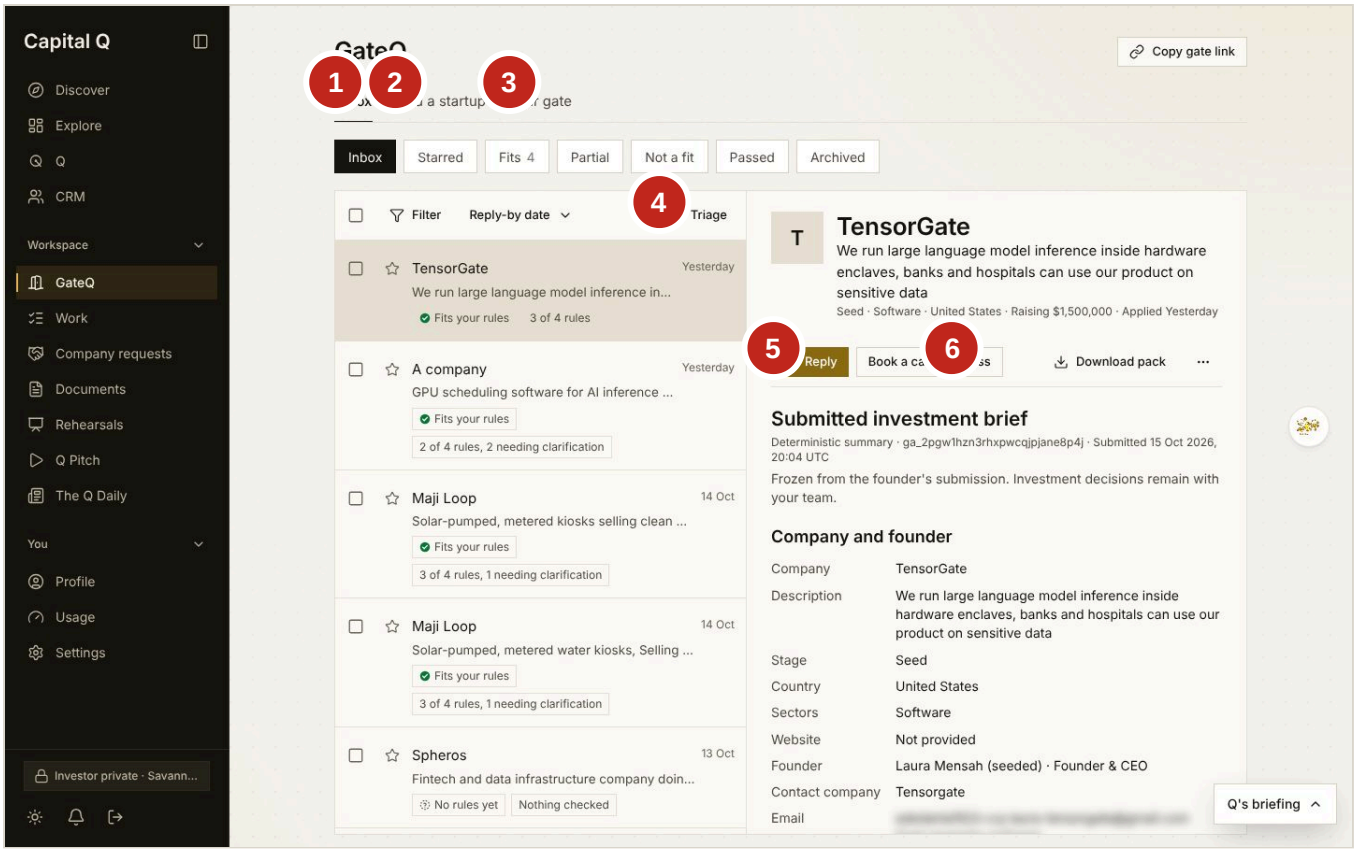

Figure 53. The GateQ inbox. Applications are sorted into Fits, Partial and Not a fit; the dossier opens on the right.

1 Inbox 2 Find a startup 3 Your gate 4 Triage 5 Reply 6 Pass

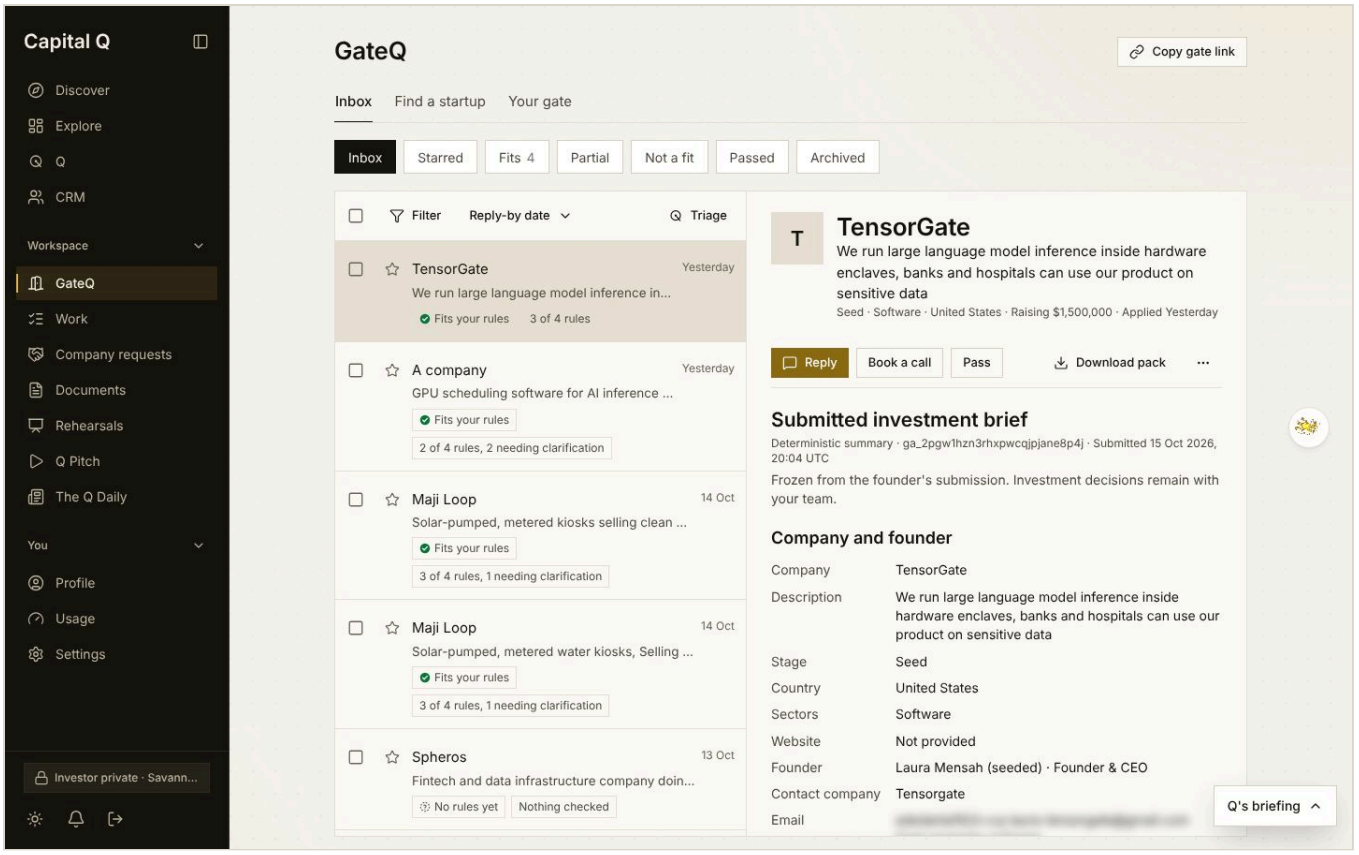

Figure 54. The TensorGate dossier: the submitted investment brief, company and founder details, and Q's reading of the interview, with the founder's own words kept separate from Q's view. (One contact address is blurred: this applicant is a real tester.)

1. Click **GateQ**, then **Inbox**.
2. Use the views on the left: Starred, Fits, Partial, Not a fit, Passed, Archived.
3. Click an application to open its dossier.
4. Read the brief, the rules it meets, and anything needing clarification.
5. Click **Reply** to answer, **Pass** to decline politely, **Download pack** to save it, or **Add note** for your team.

Investors: your gate

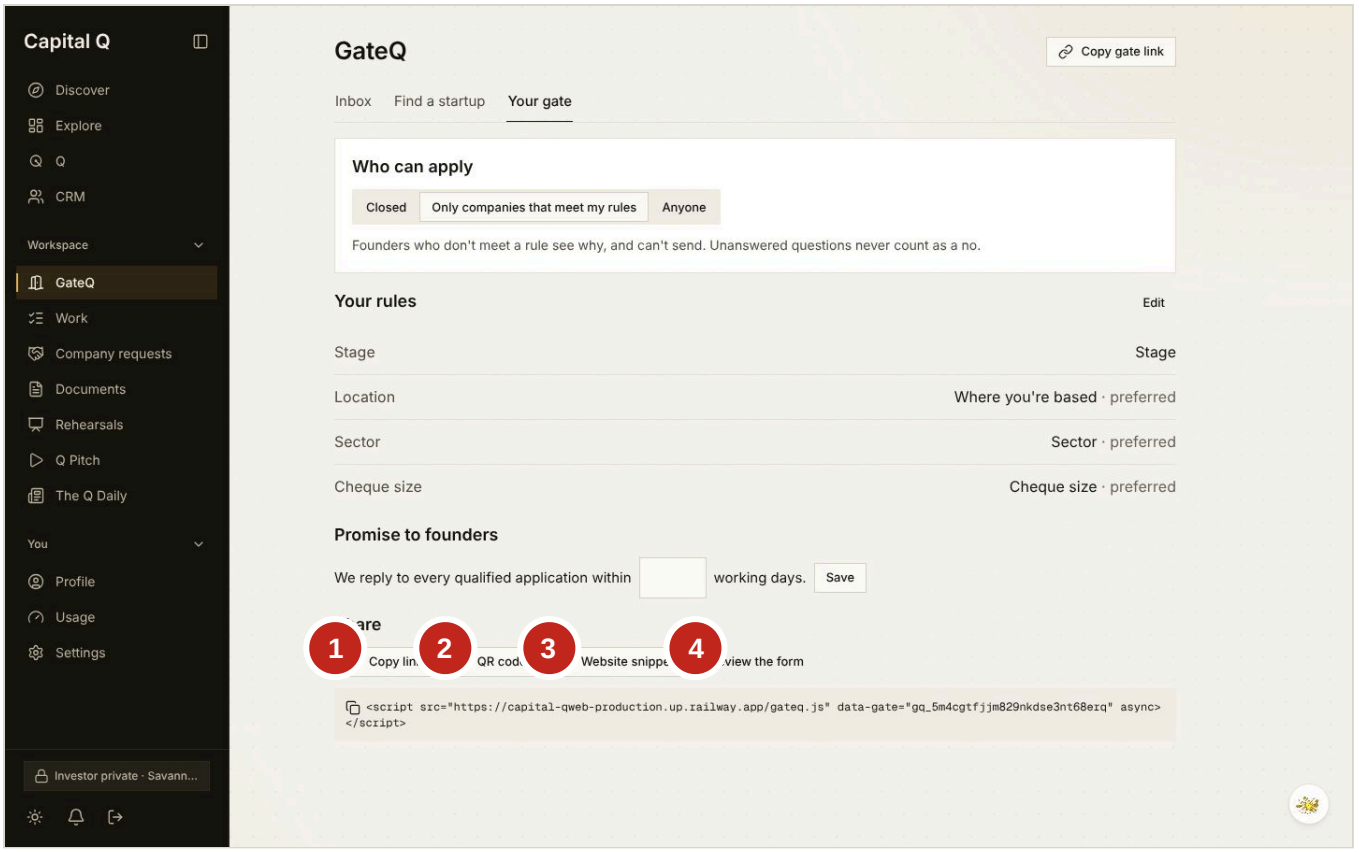

Figure 55. Your gate: who can apply, your rules, your promise to founders, and how to share it.

1. Choose who can apply: **Closed**, **Only companies that meet my rules**, or **Anyone**.
2. Click **Edit** to change your rules, then **Save**.
3. Share the gate with **Copy link**, a **QR code**, or a **Website snippet** for your own site.

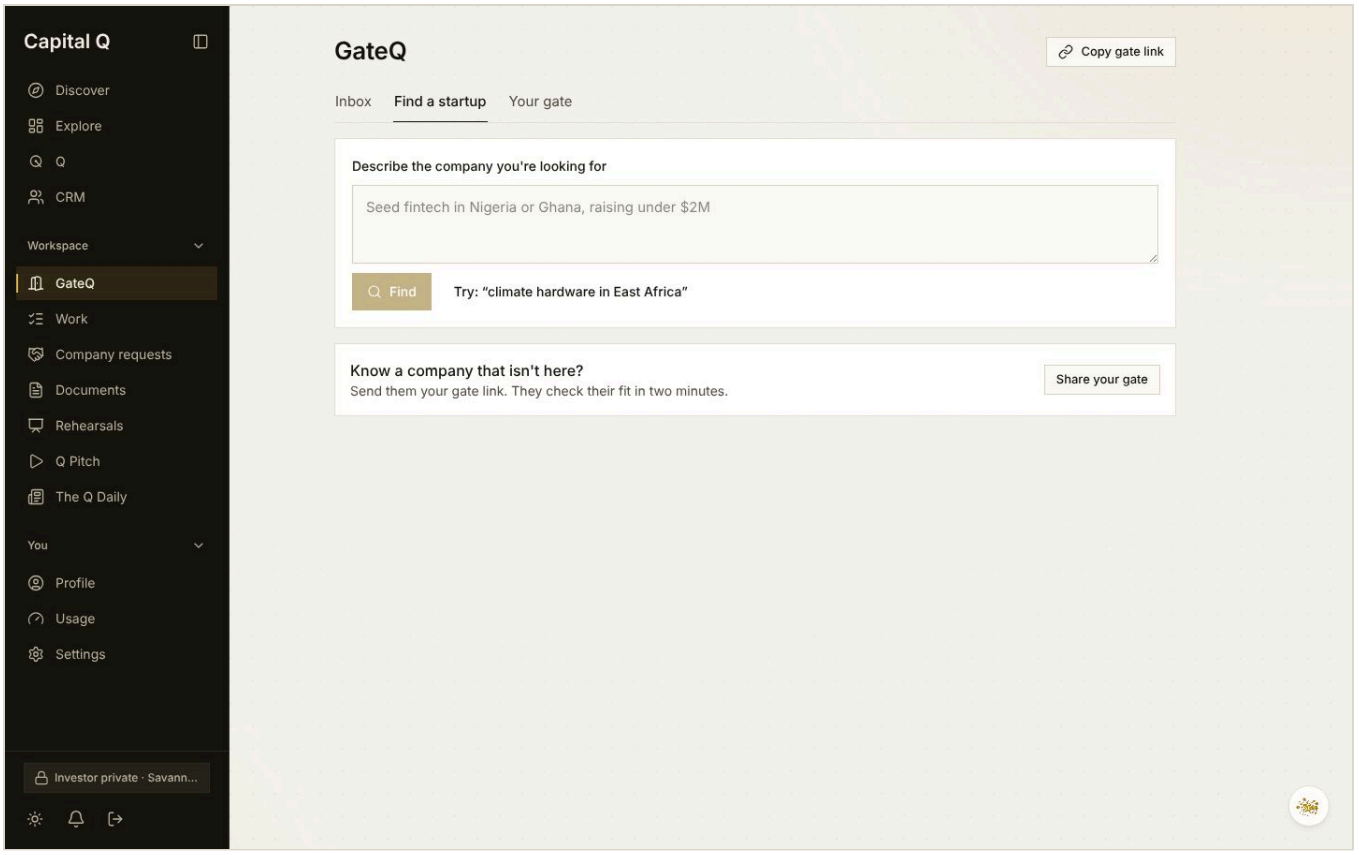

Figure 56. Find a startup: describe what you want in your own words.

Founders: applying

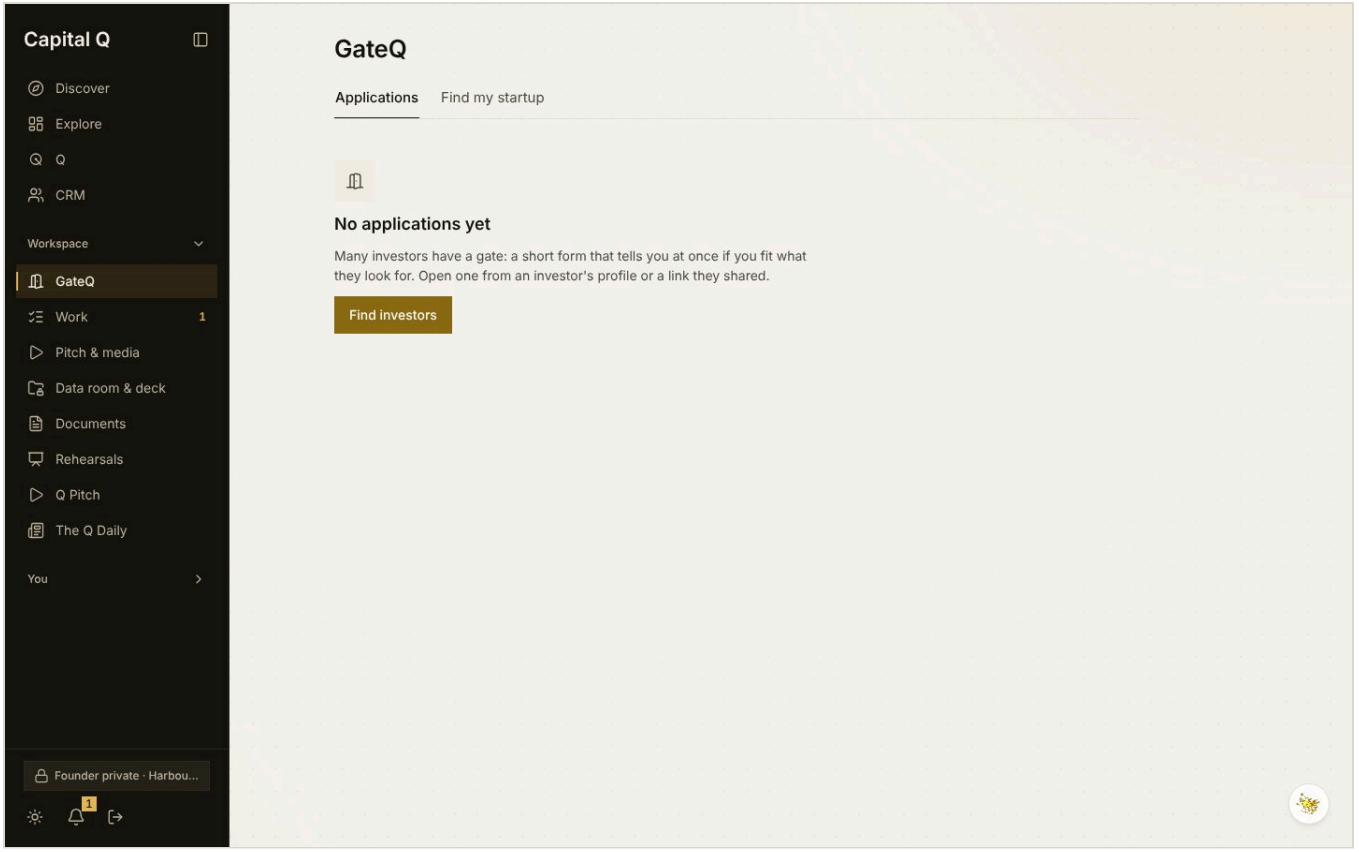

Figure 57. GateQ for a founder: your applications, and Find my startup.

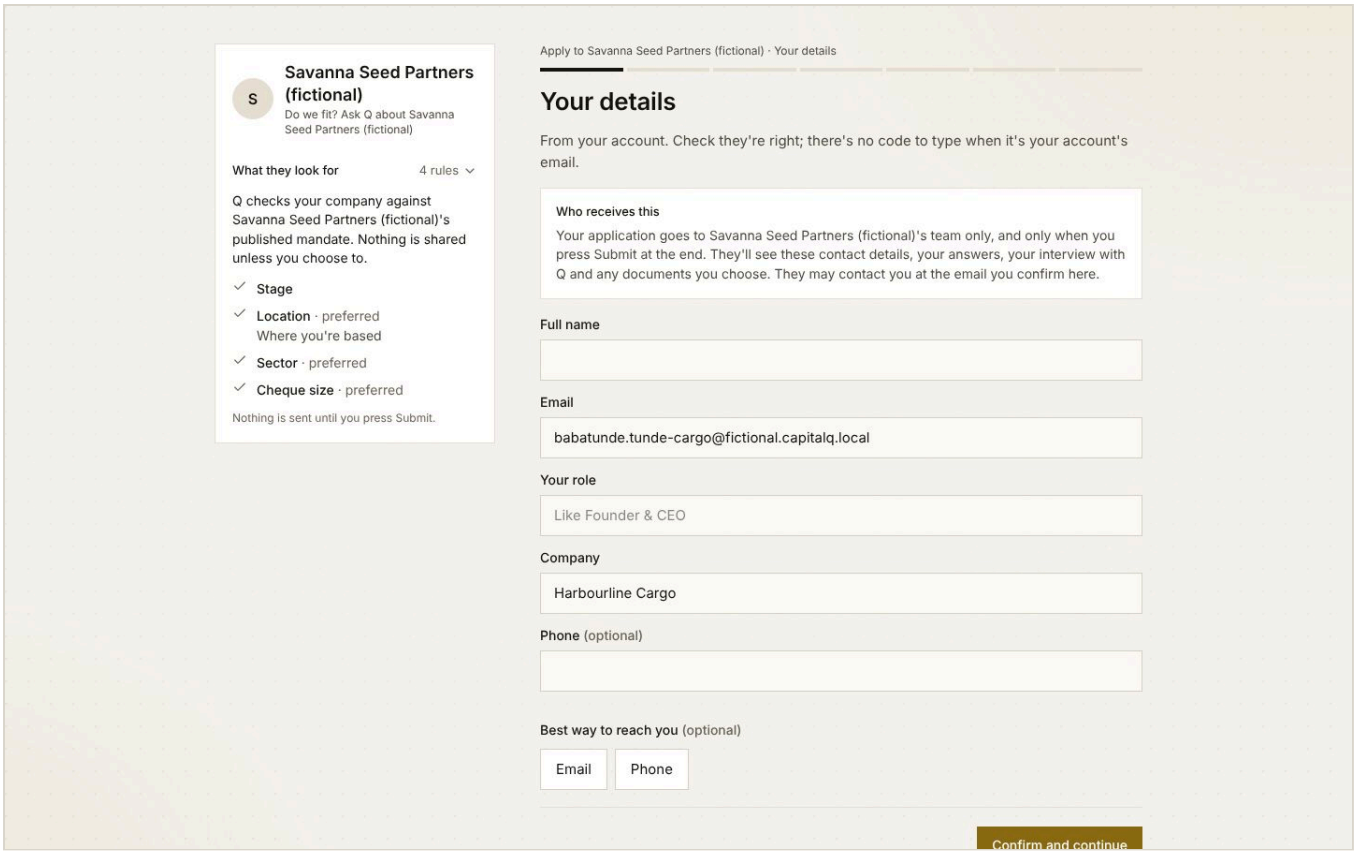

Figure 58. An investor's gate, seen by a founder. The rules are on the left; your application on the right. Nothing is sent until you press Submit.

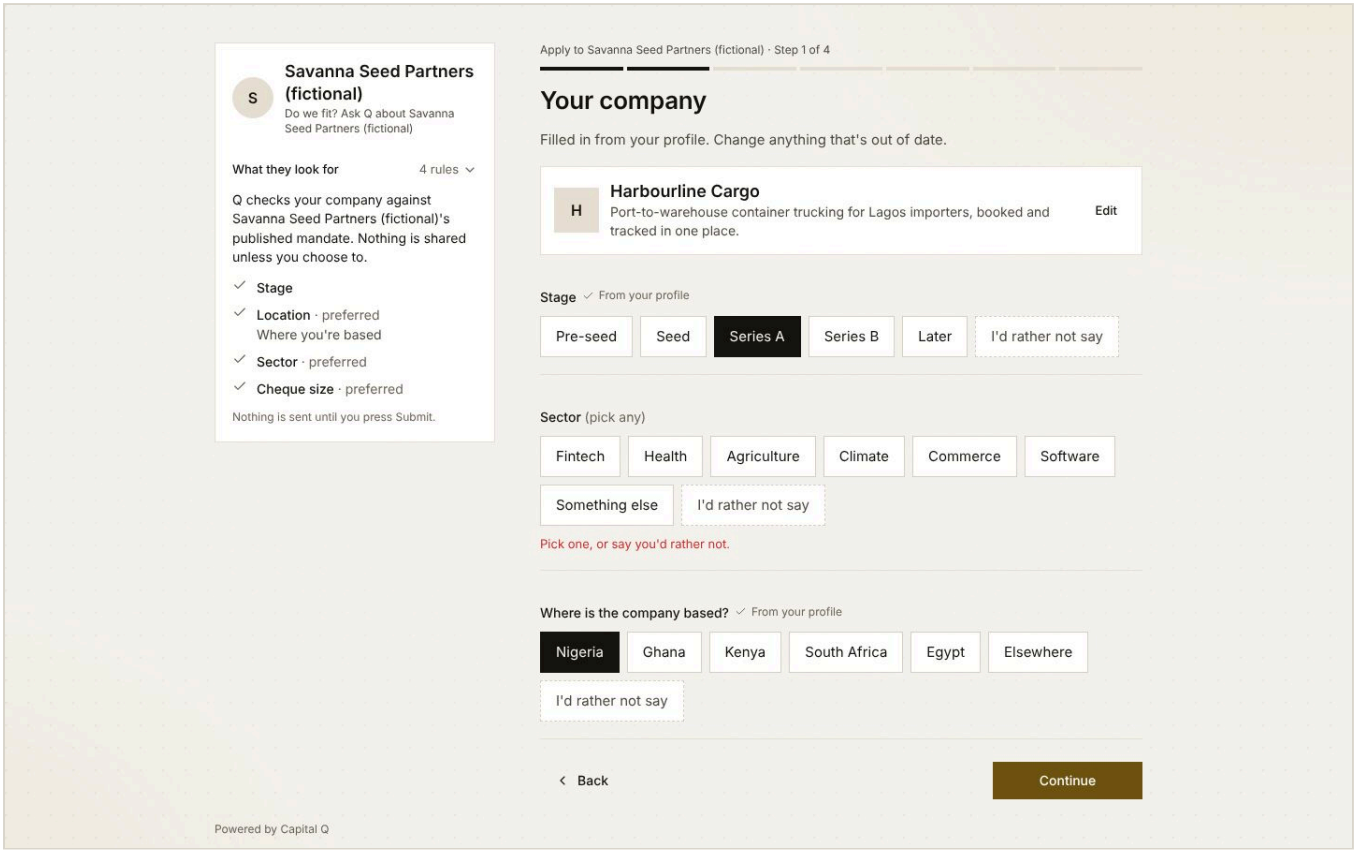

Figure 59. Applying: Q fills in what it already knows from your profile. You check each of the four short steps and click Continue.

The interview is video first. After the short form, Q offers a short video interview: Q appears on screen and asks a few questions about your company. You agree to the recording, then start it. If video isn't offered or you would rather type, you answer the same questions in writing. When you finish, you review the summary and press **Submit**. The investor gets a dossier with your answers in your own words, and Q's reading of them, clearly labelled.

How Q helps here

Investors can ask Q to triage the inbox, summarise an application, draft a reply or a pass, label or star applications. Founders get a short interview from Q instead of a long form, and can ask Q "do we fit?" before applying.

Limits

The video interview uses a paid video service with a monthly allowance, so it appears only when it is switched on and there is time left. Typing is always available.

4.12 Rehearsals

What it's for: practising a meeting before the real one. Q plays the other side by voice (an investor for founders, a founder for investors), based only on public and shared information. Afterwards you get a scored review.

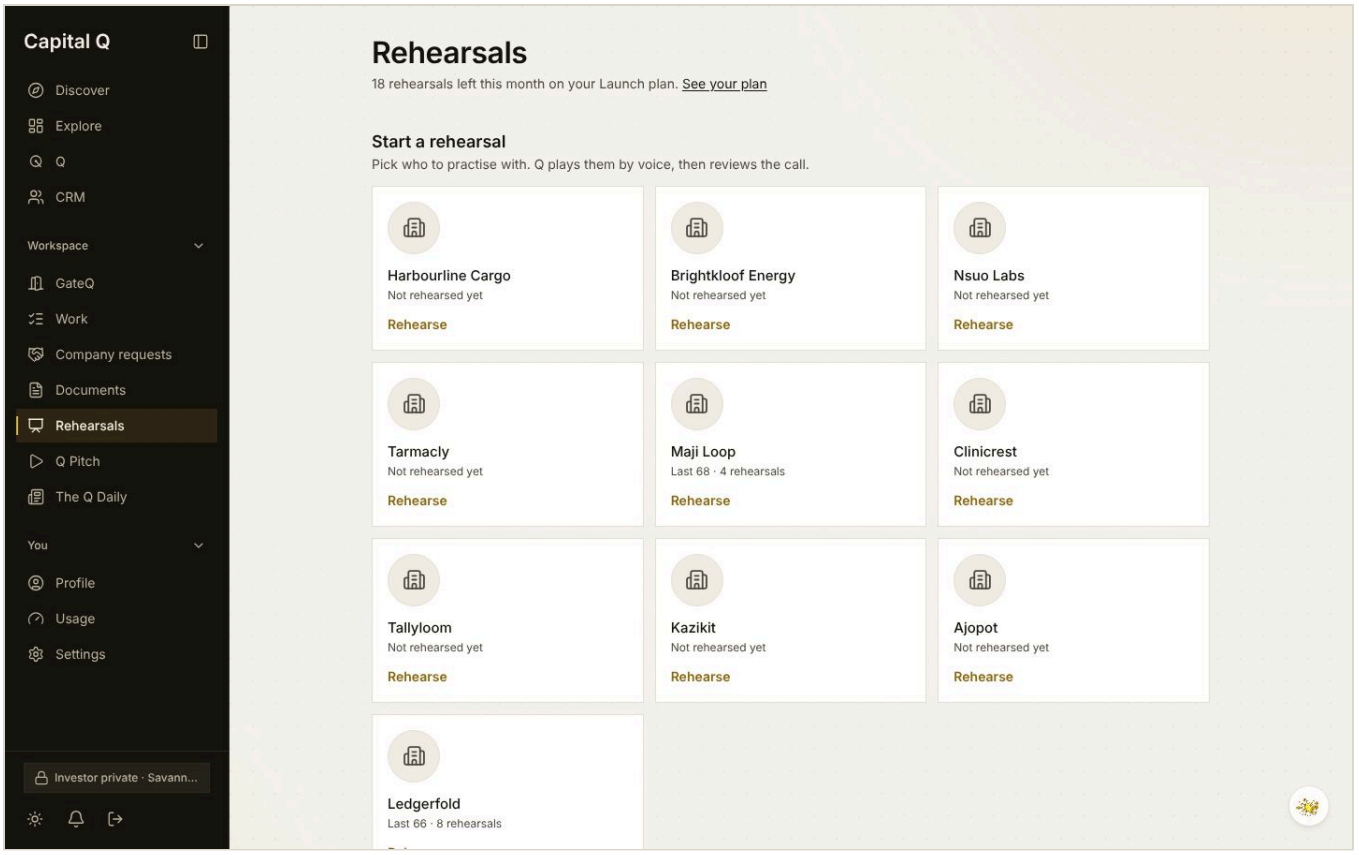

Figure 60. Rehearsals: pick who to practise with, see your latest score and past rehearsals.

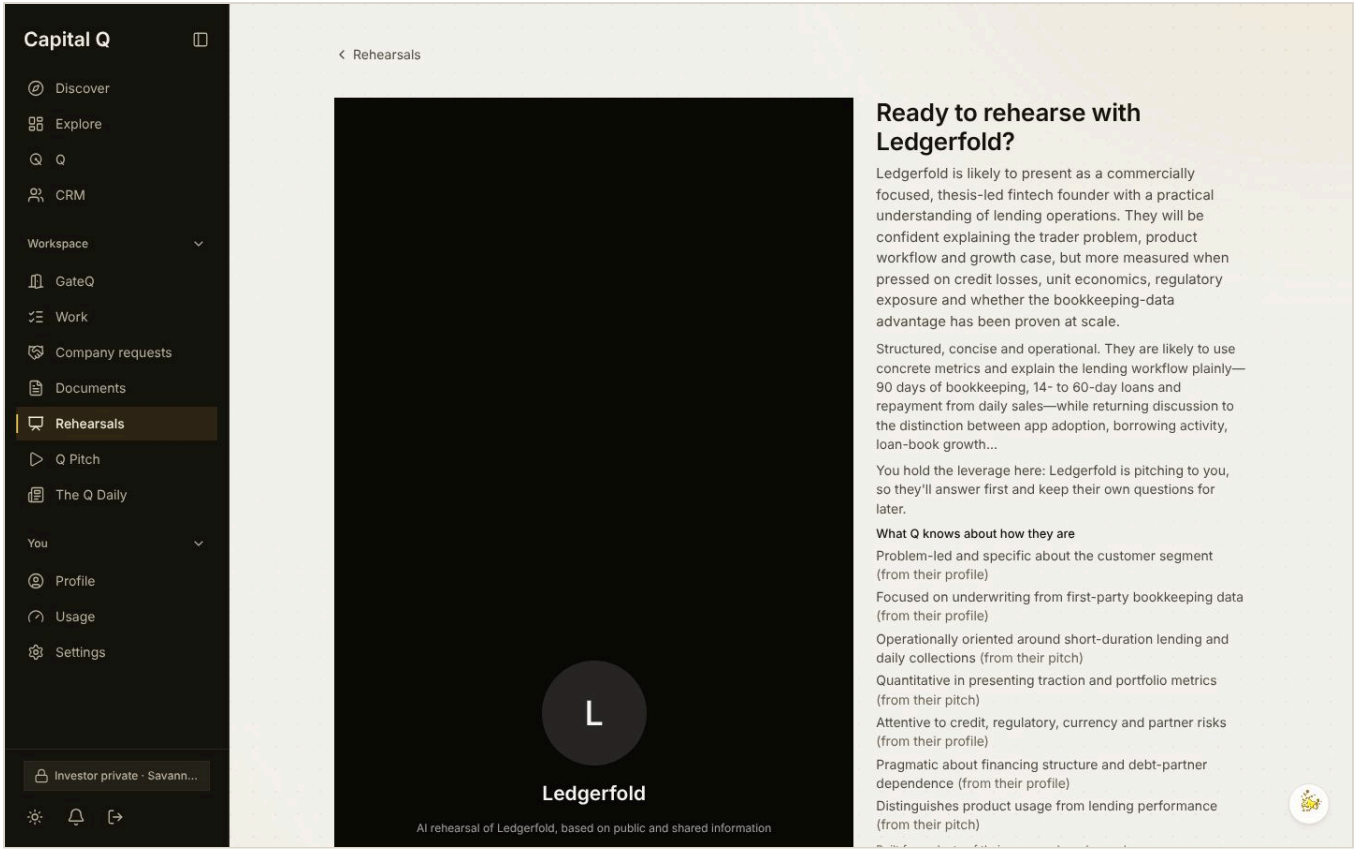

Figure 61. The lobby: what Q knows about how they are likely to come across. Click Join now to start.

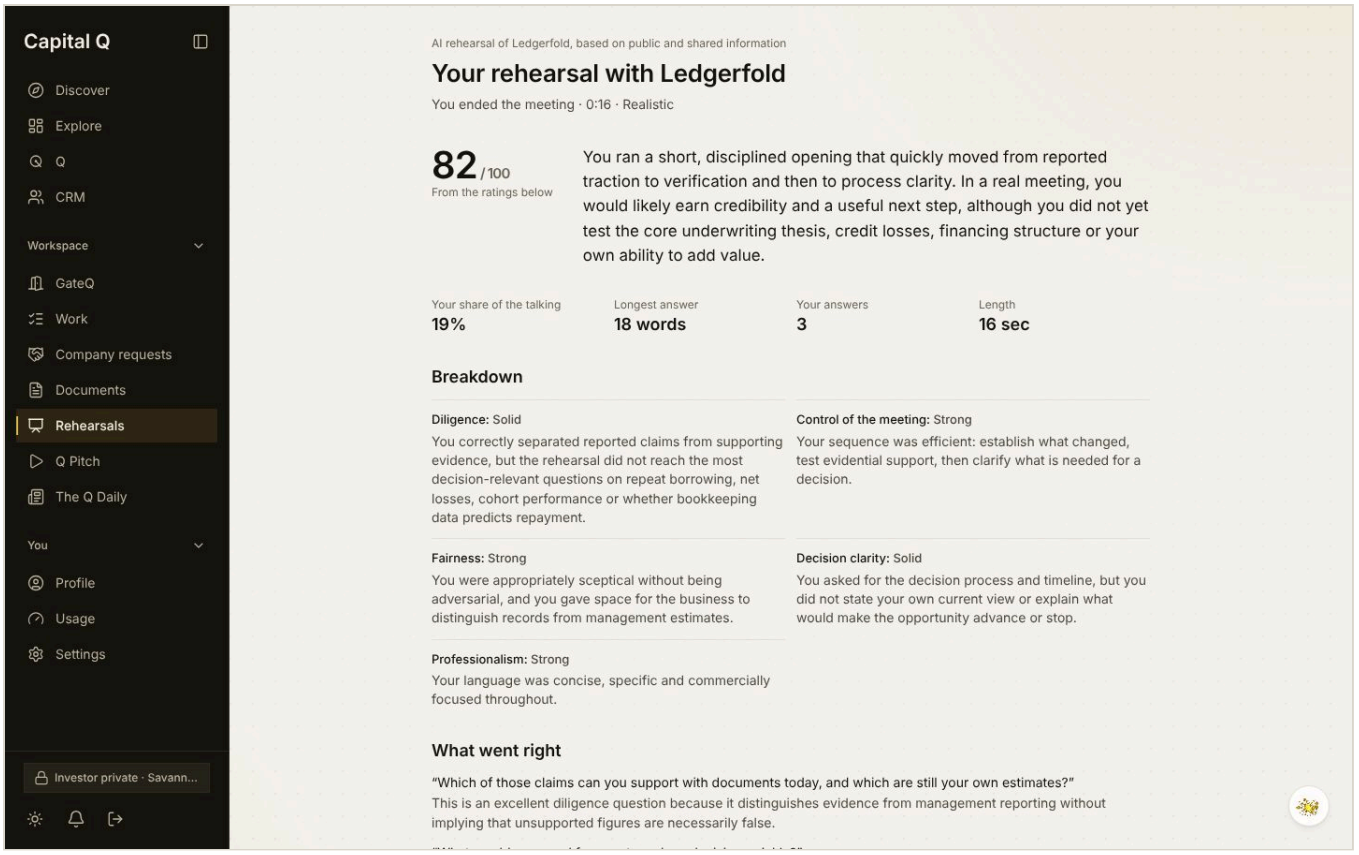

Figure 62. The review: a score, what went right, what to improve, tips, and the transcript.

1. Click **Rehearsals**, then **Rehearse** next to a name.
2. Read the lobby notes. Pick Q's voice, how hard they should be (**Gentle**, **Realistic** or **Tough**), and how you'll meet (**Voice room**, or **Video** for up to 3 minutes when available).
3. Click **Join now** and allow your microphone.
4. Talk as you would in the real meeting. End when you are ready.
5. Read the review and click **Rehearse again** to try once more.

> **Limits**
>
> Your plan sets how many rehearsals you get each month; the page tells you how many are left.

4.13 Q Work

What it's for: the jobs you give Q, and everything Q needs your yes for. Sections: **Needs you**, **Q suggests**, **Done for you** and **In progress**.

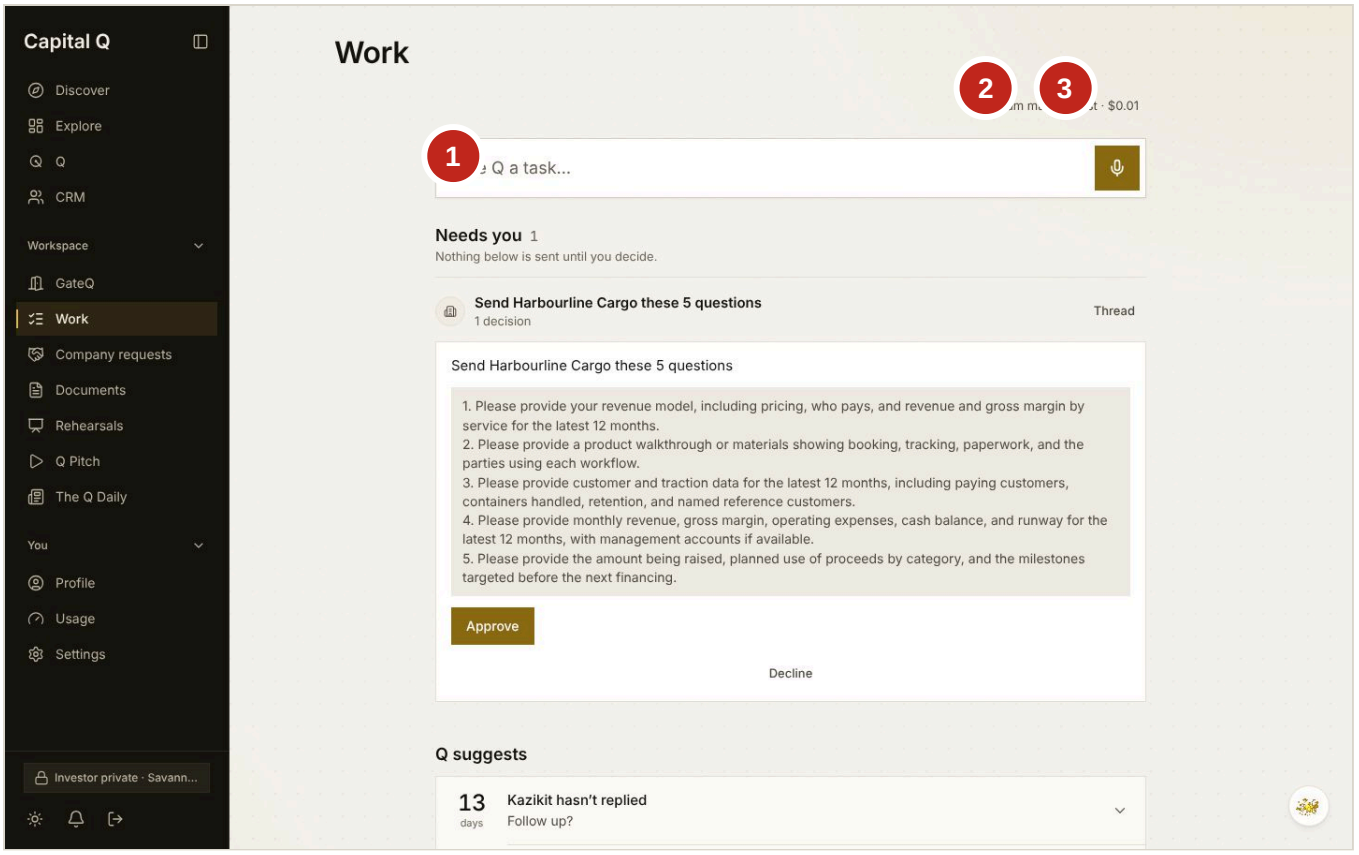

Figure 63. Q Work: what needs you, what Q suggests, what it has done, and what it is doing.

1. Click **Give Q a task** and describe the job in a sentence.
2. Watch it appear under **In progress**.
3. When Q needs you, it appears under **Needs you**. Read the exact message or action, then approve or change it.
4. Under **Done for you**, click **Thread** to see what was sent and the replies.
5. Click a suggestion under **Q suggests**, such as “Kazikit hasn’t replied. Follow up?”, to start it.

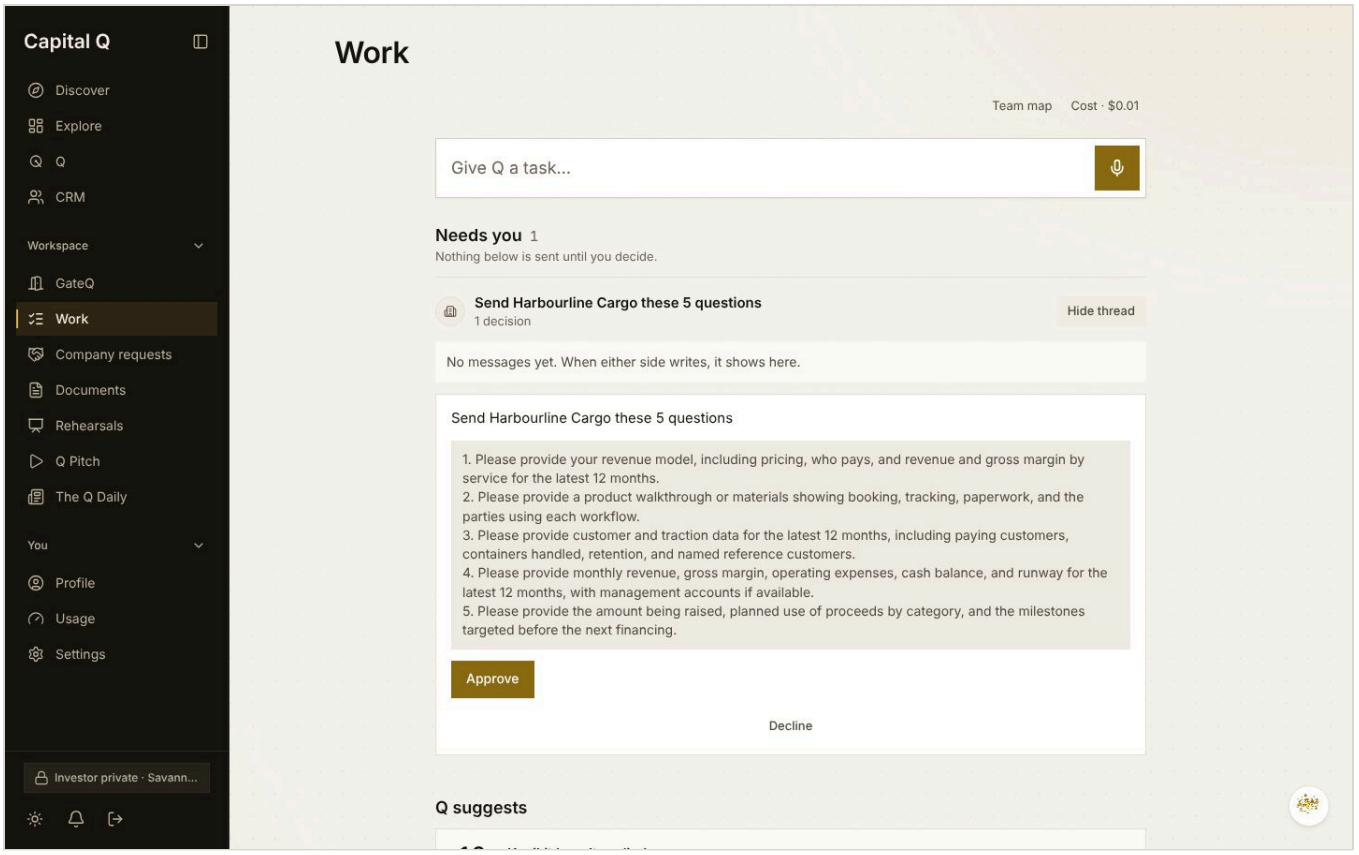

Figure 64. A job Q finished: the approved message to the founder and the conversation that followed.

Q's team at work

Behind the one Q you talk to, a team of specialists does the steps of a bigger job: research, documents, writing, reviewing, scheduling, outreach. Click **Team map** to see who is working, who is idle and what each one did. You never pick or talk to them directly.

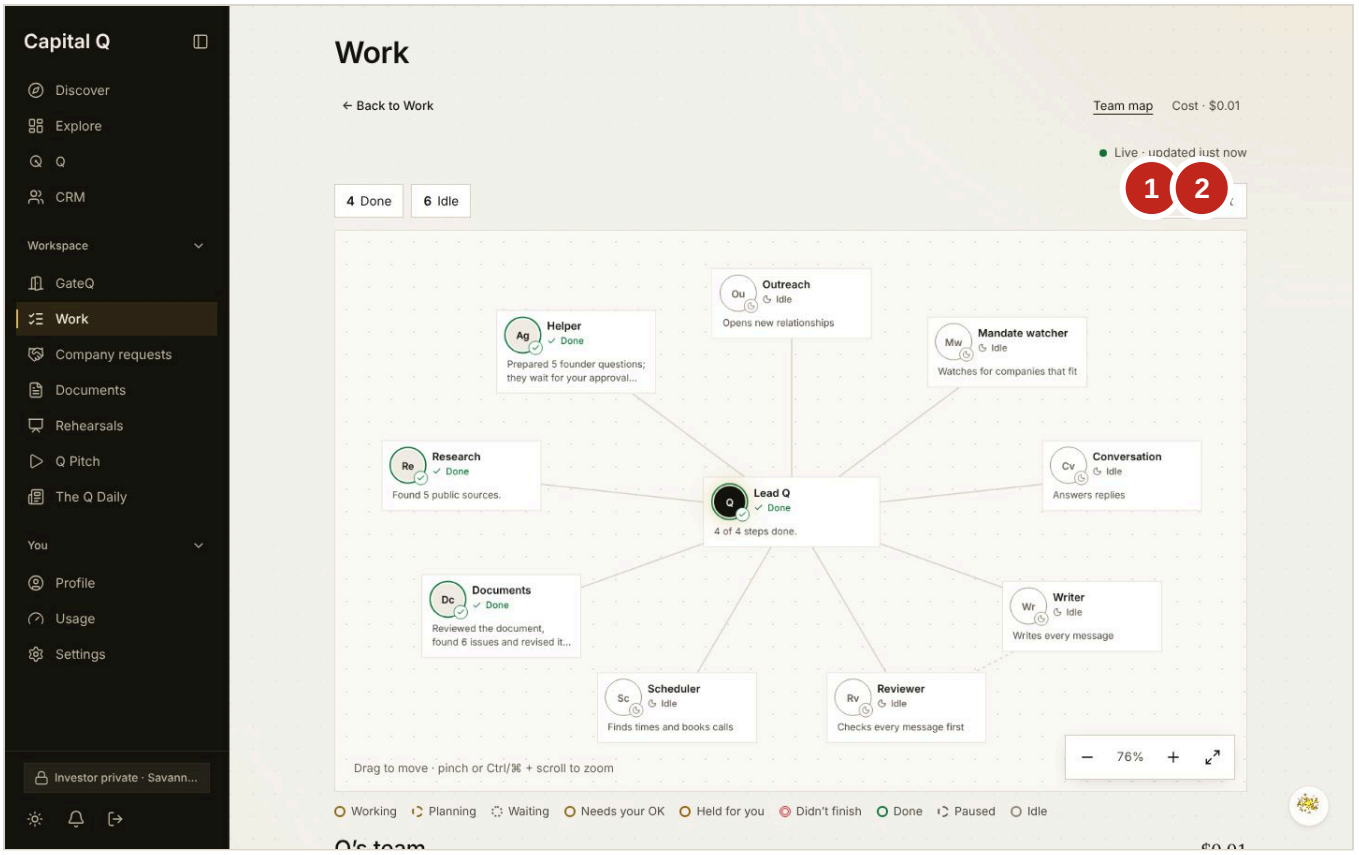

Figure 65. Team map: Lead Q finished all 4 steps of the Harbourline diligence job; Research, Documents and Helper did their parts.

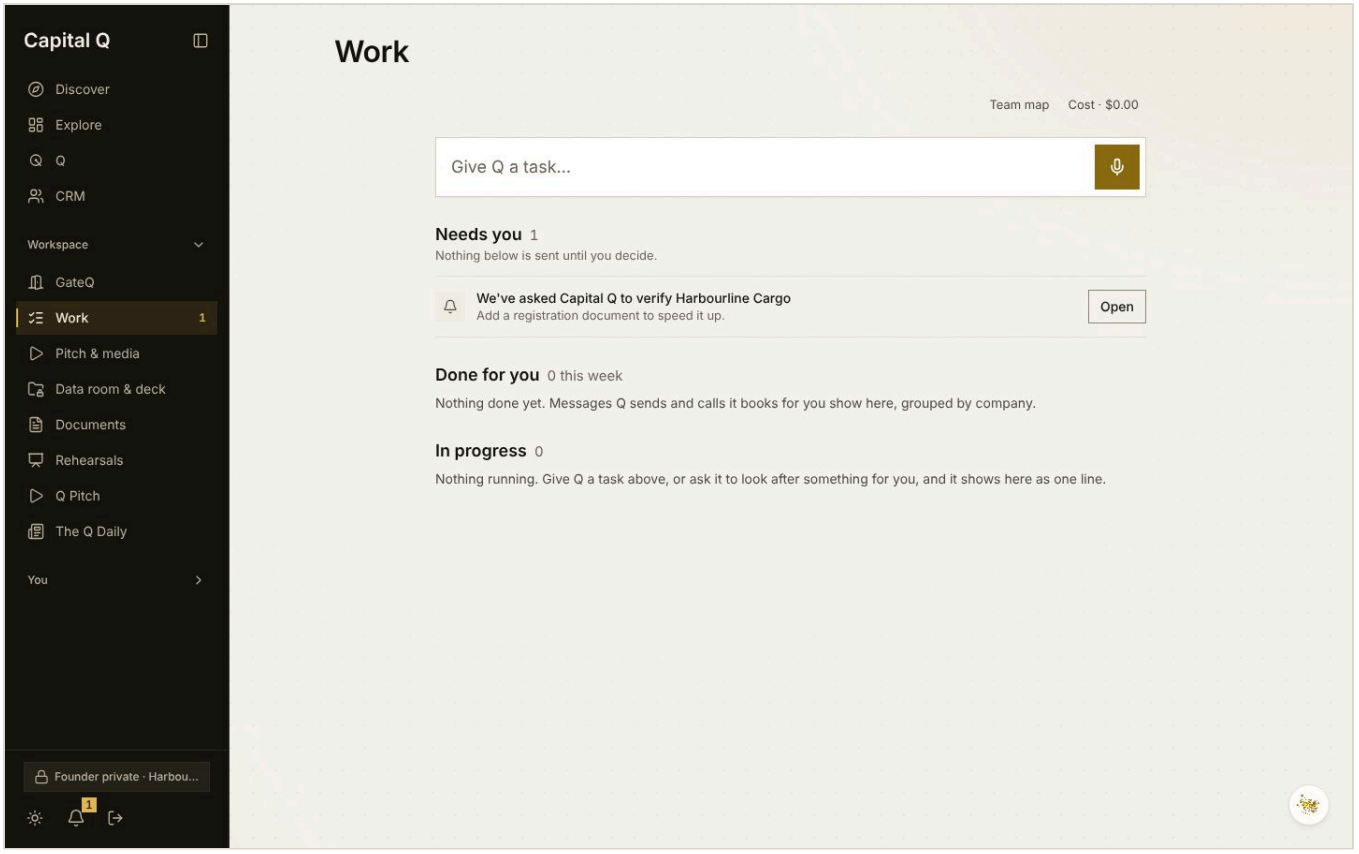

Figure 66. Q Work for a founder: verification is waiting on a registration document.

Limits

Cost shows what Q's work has cost so far. You can pause Q's work at any time.

4.14 Documents, data room and deck

What it's for: every file you have uploaded and every document Q has written for you, such as investment memos and briefs. Each file says who can see it.

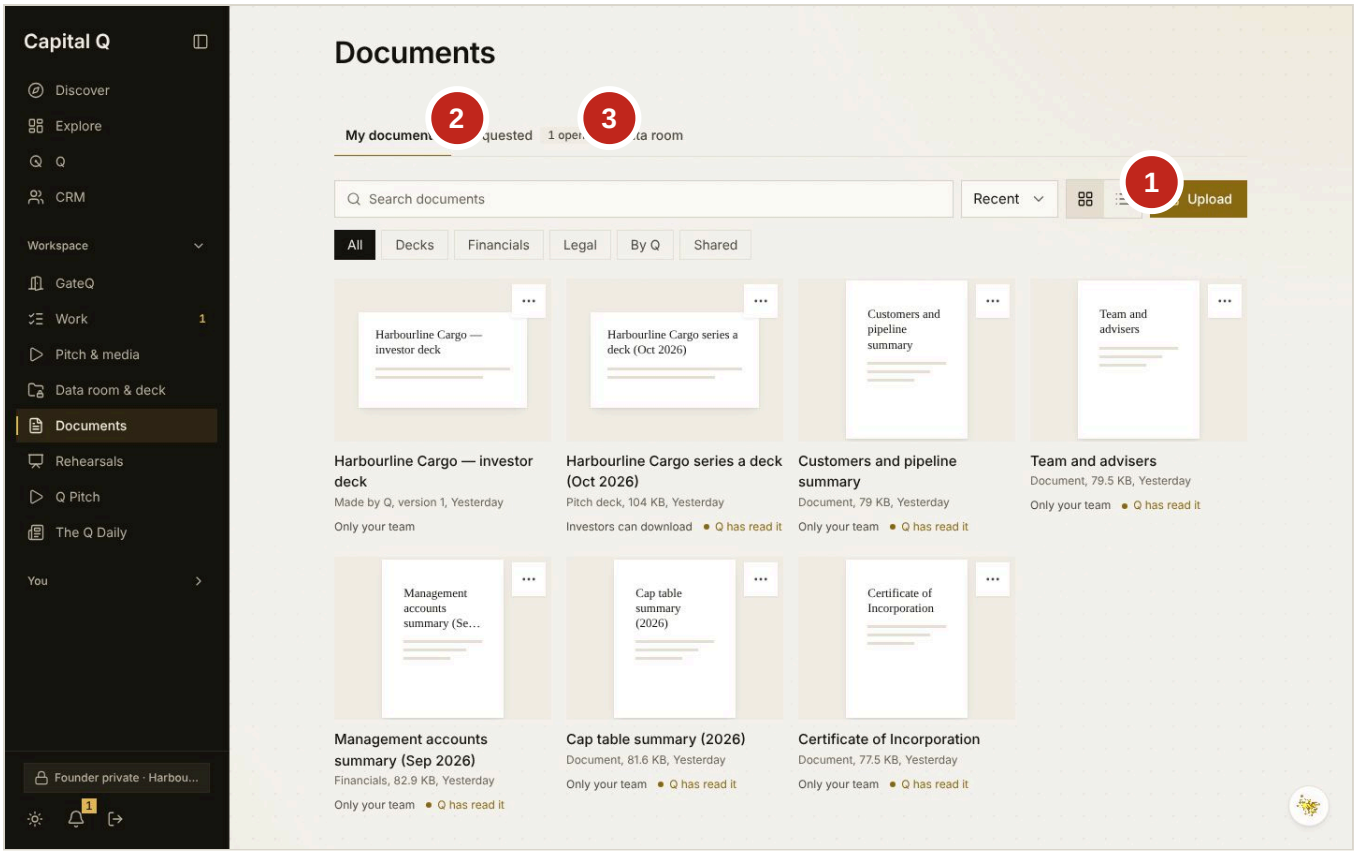

Figure 67. A founder's documents: each shows its type, size, who can see it, and whether Q has read it.

1. Click **Upload** and pick your files. Q reads each one.
2. Use the filters (Decks, Financials, Legal, By Q, Shared) or search.
3. Click a document's actions menu to rename, share with an investor, or archive it.
4. Open **Requested** to see documents investors have asked for.

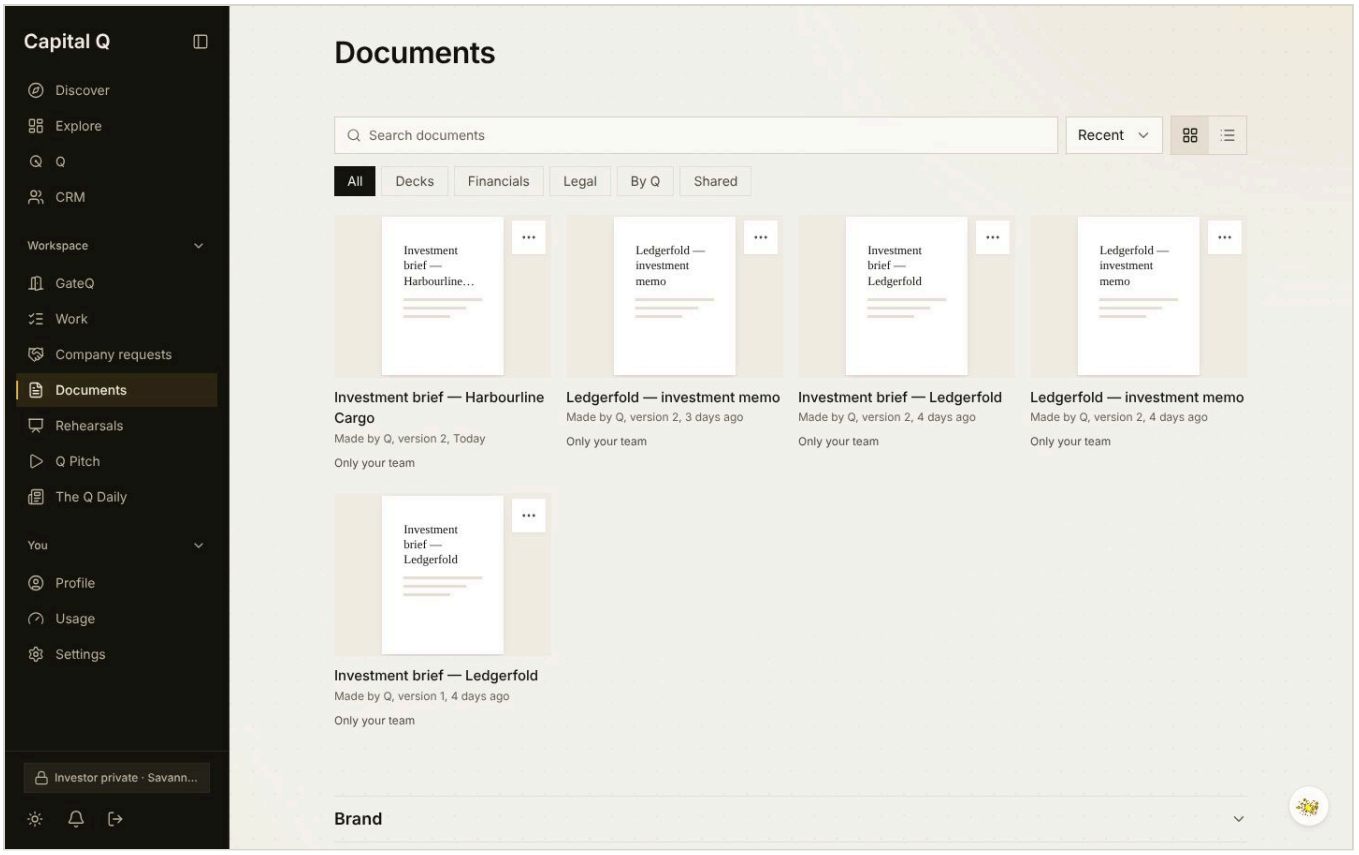

Figure 68. An investor's documents: memos and briefs Q made, visible only to your team.

Data room (founders)

Click **Data room & deck** in the sidebar. Documents sit in standard folders. For each document you choose **Public**, **On request**, **Shared only** or **Private**. Investors see the data room once you accept their interest. Capital Q shows how many of the usual documents for your round you already have.

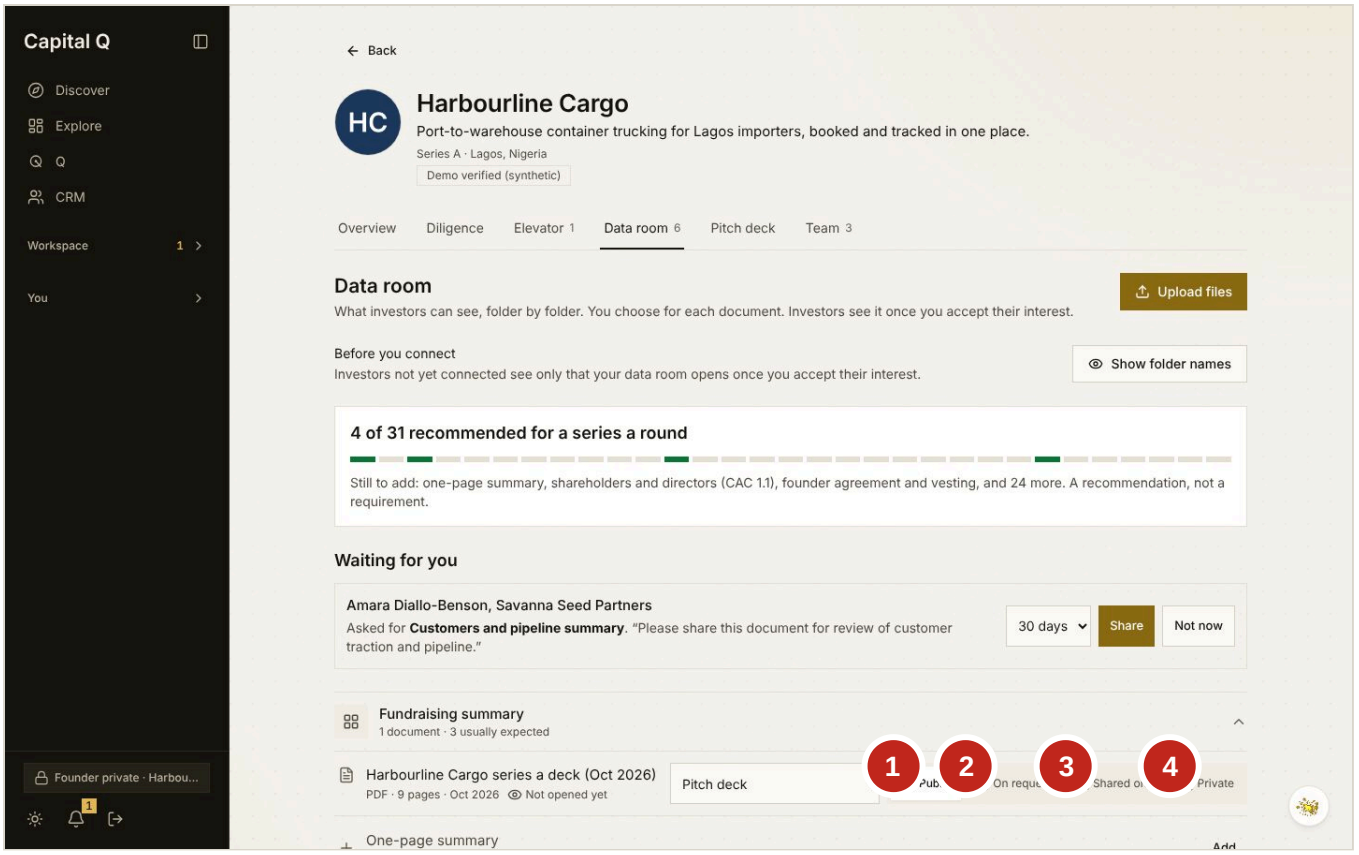

Figure 69. The founder's data room, folder by folder, with a visibility choice for each document.

When an investor asks for a document, it shows under **Waiting for you**. Click **Share** to send it for a set time (for example 30 days), or **Not now**.

Deck (founders)

When you upload a deck, Q reads it section by section. Investors see a section only after you confirm Q read it correctly.

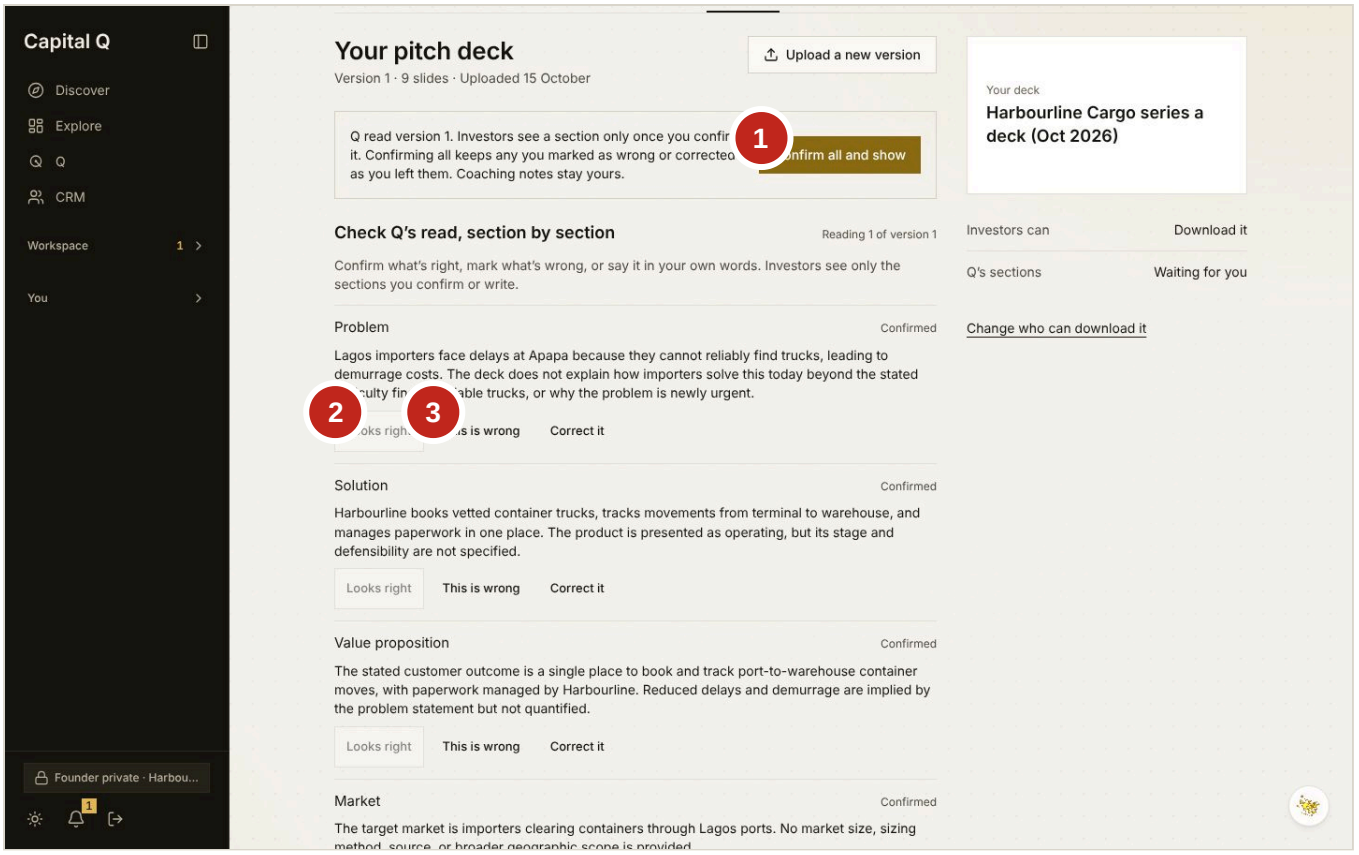

Figure 70. Checking Q's reading of your deck: Looks right, This is wrong, or Correct it.

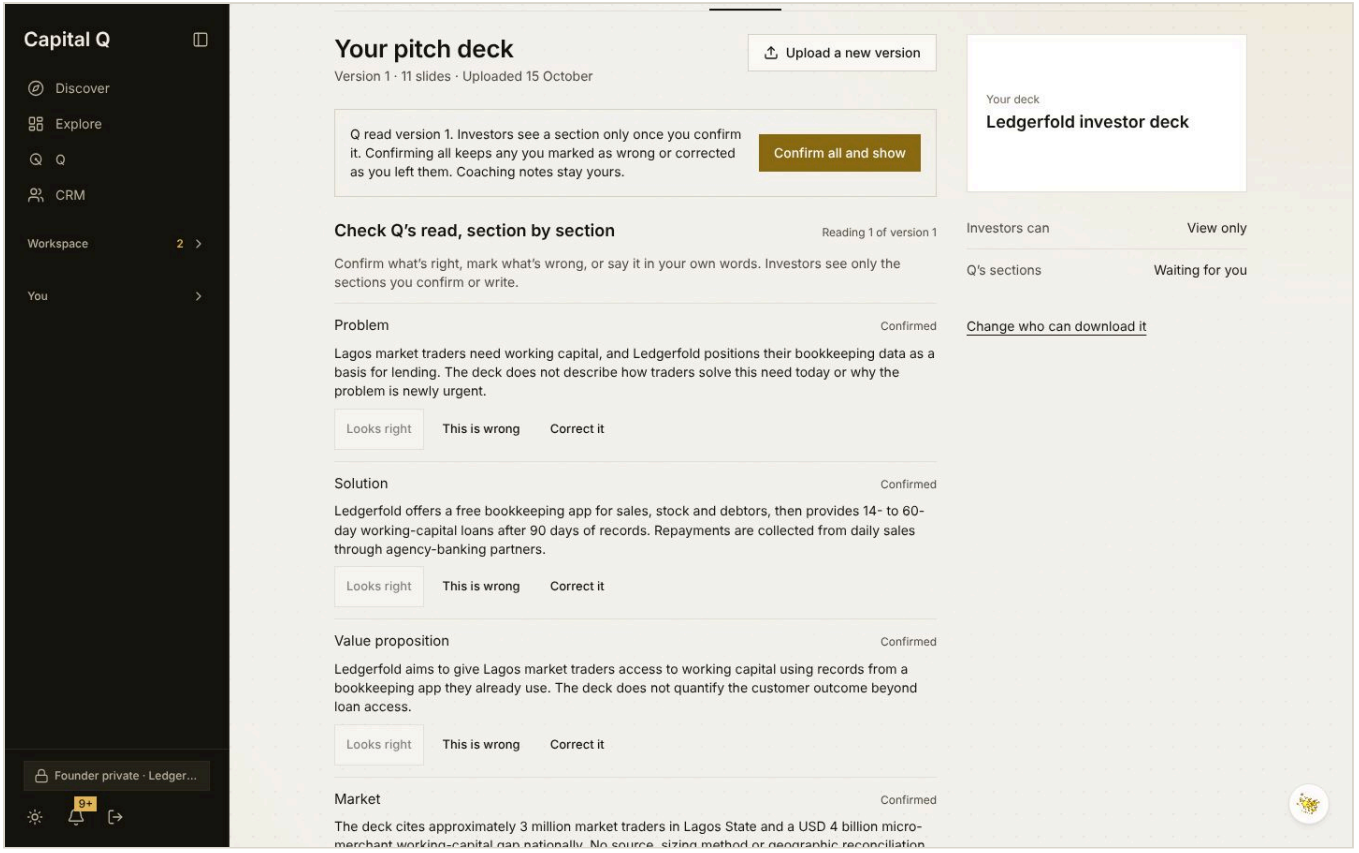

Figure 71. Ledgerfold's deck, which Q prepared with the founder.

4.15 Pitch & media (founders)

What it's for: your pitch videos. A live video appears in investors' Discover feeds, subject to who you let see it.

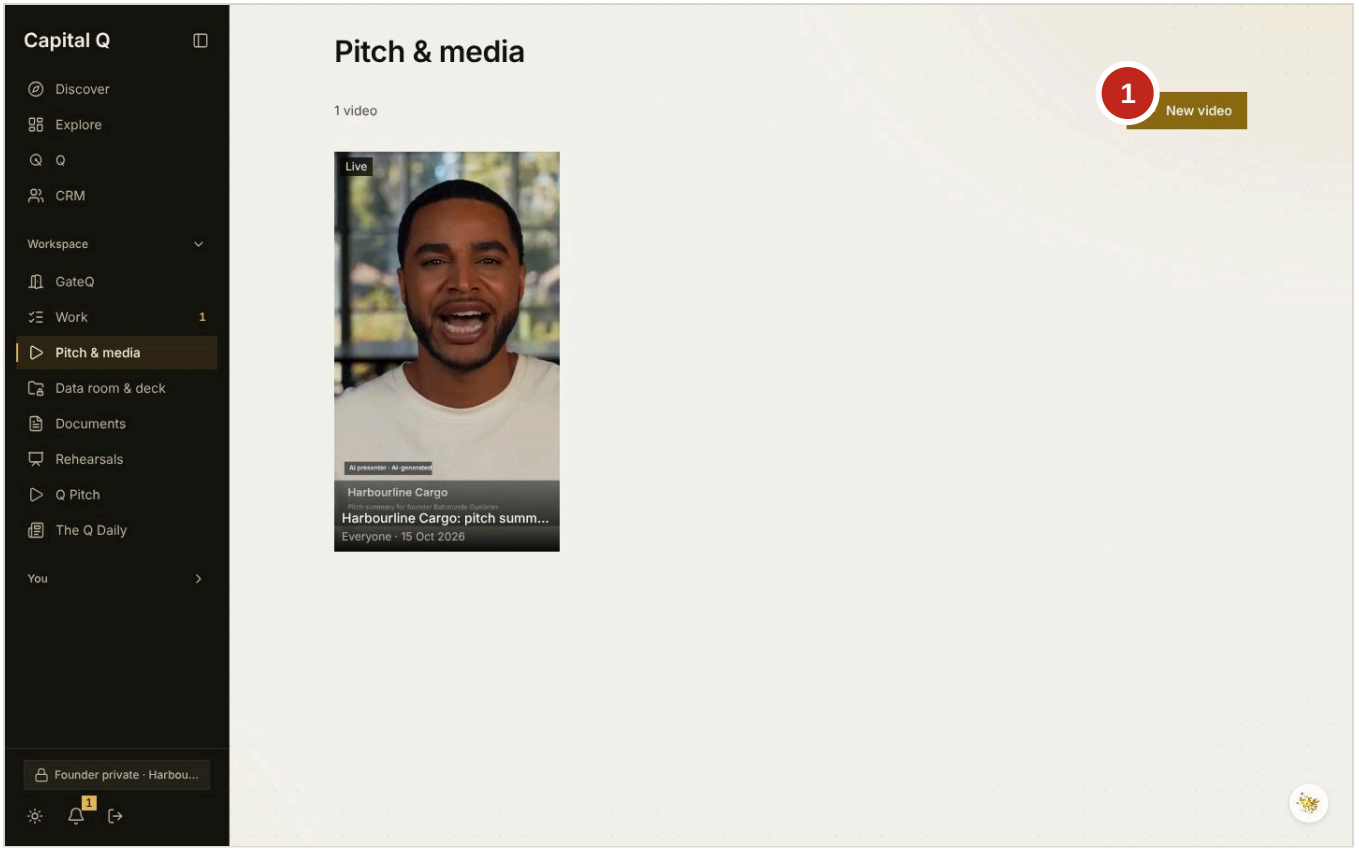

Figure 72. Pitch & media: your videos and who can see each one.

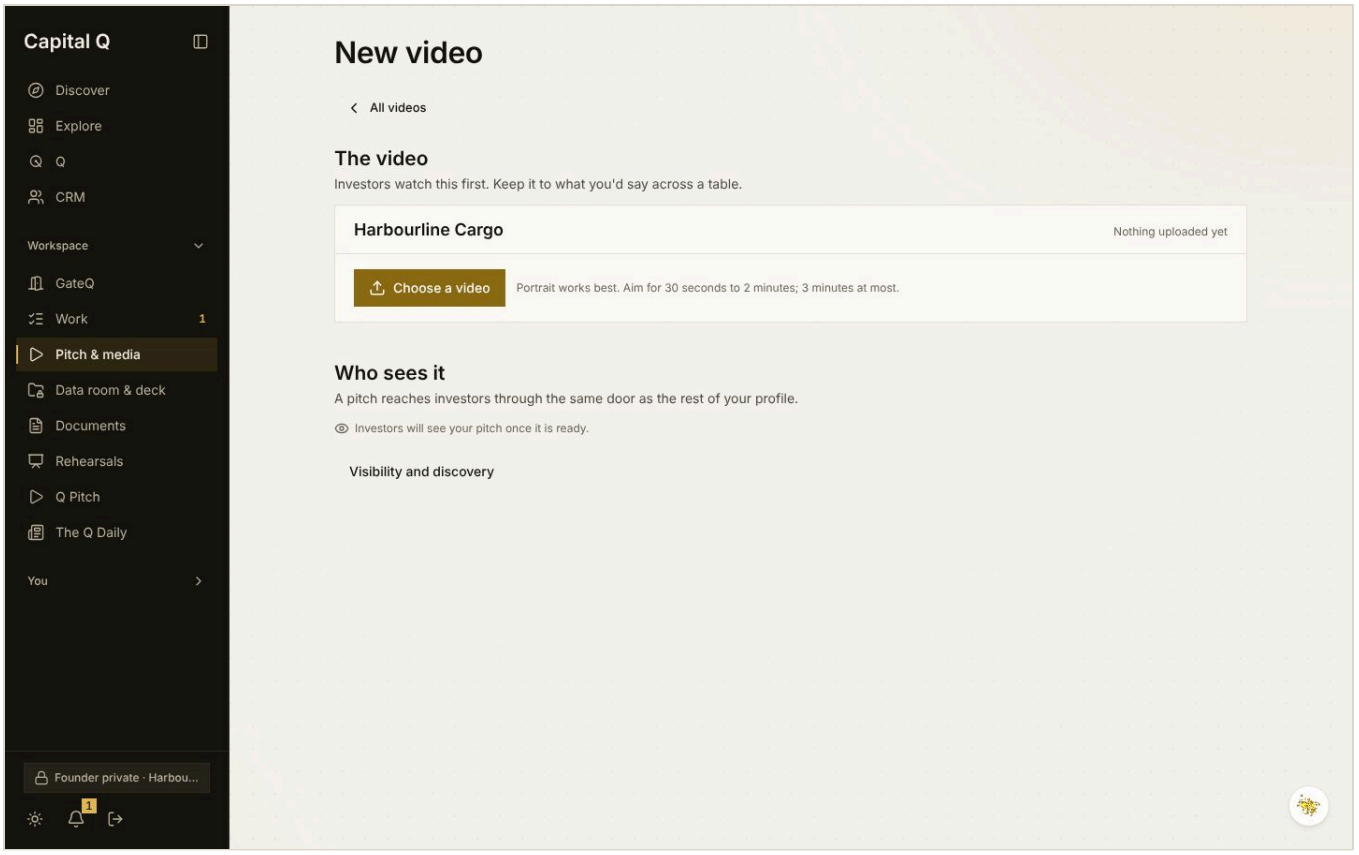

Figure 73. Adding a new pitch video.

1. Click **Pitch & media**, then **New video**.
2. Upload your video and give it a title.
3. Choose who can see it, then publish.

4.16 The Q Daily

What it’s for: a short news edition written for you, following your sectors and stage. Each story links to its source.

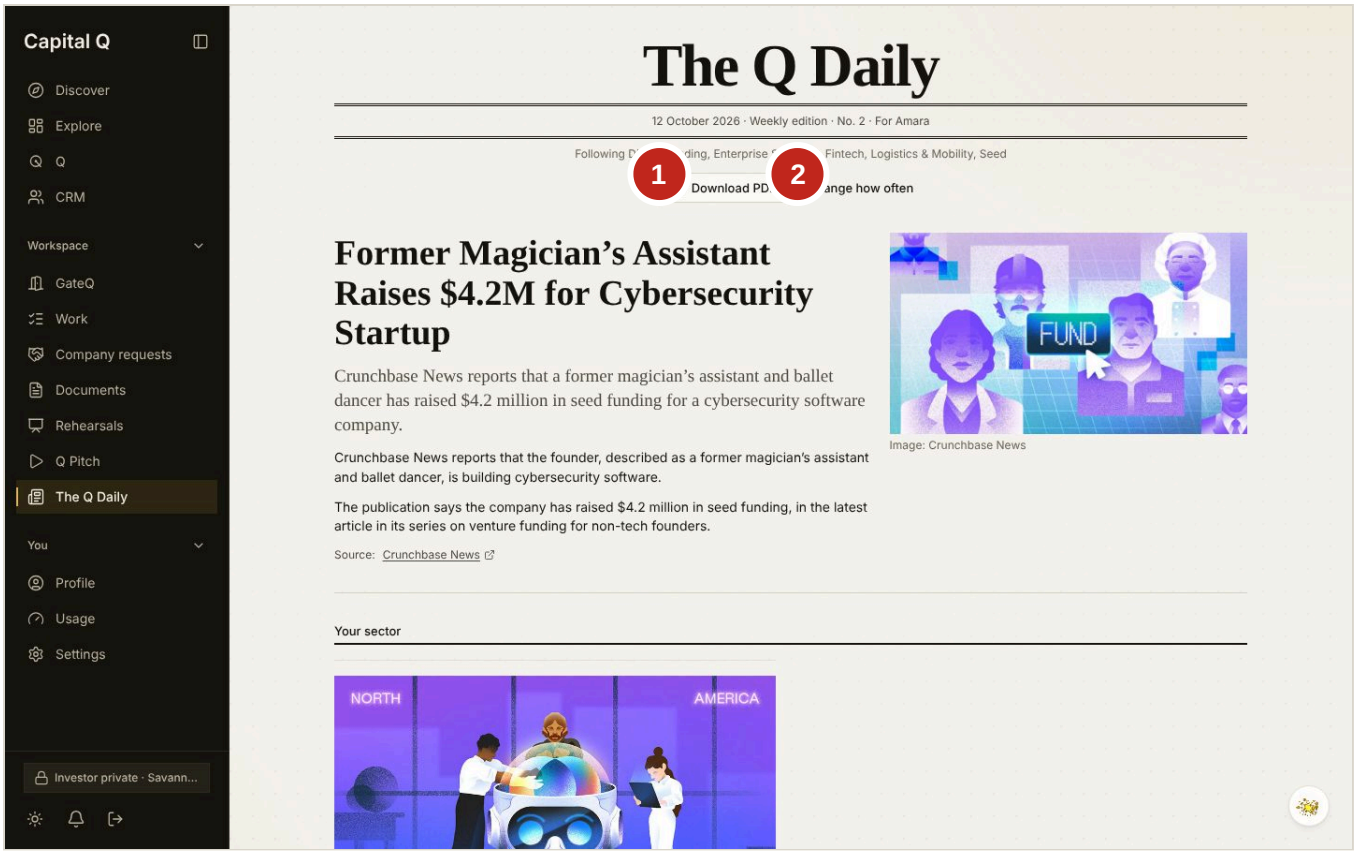

Figure 74. The Q Daily: your sector, deals and rounds, Q's take, and earlier editions.

1. Click **The Q Daily**.
2. Read the lead story, then scroll for your sector, deals and Q's take.
3. Click **Download PDF** to keep it, or **Change how often** to pick daily or weekly.

4.17 Q Pitch

What it's for: a guided tour of Capital Q that Q leads by voice, through the real app and real (demo) data. The **Investor premiere** is one continuous tour of about 5 to 7 minutes. The **Two-minute version** is a short taster. The **Feature Atlas** lets you open one chapter at a time when you want to go deeper.

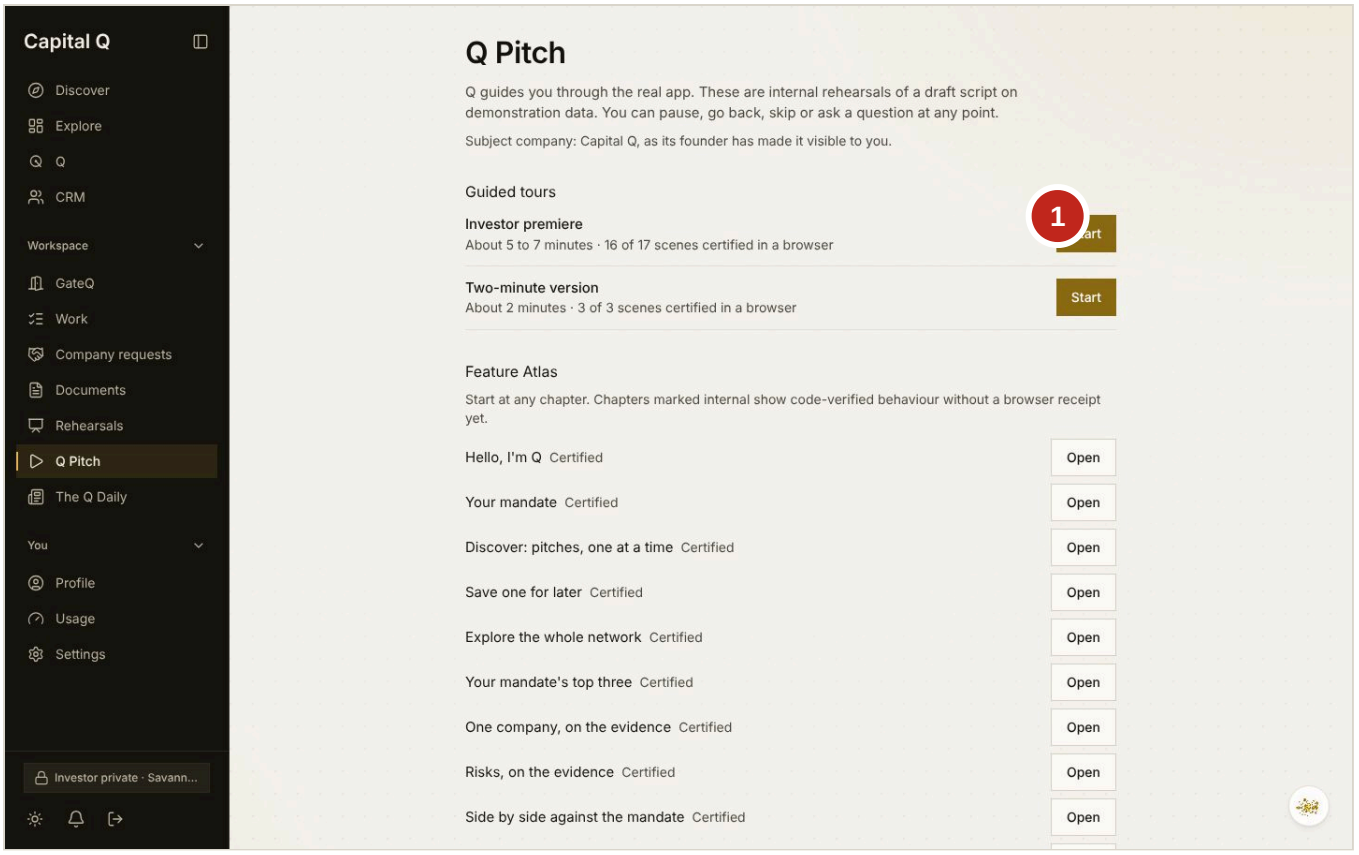

Figure 75. Q Pitch: the investor premiere, the two-minute version, and the Feature Atlas.

1. Click **Q Pitch** in the Workspace group. Turn your sound on.
2. Click **Start** beside *Investor premiere* or *Two-minute version*. Q takes you to the Q page; click **Start the tour** to hear it, or **Captions only**.
3. Q moves through the app on its own: your mandate, your feed and top three, saving a company, one company on the evidence, risks, a side-by-side comparison, what Q knows versus what you may see, GateQ and an applicant's transcript, the CRM record and its history, preparing a meeting, Q Work, Documents and The Q Daily.
4. Use the on-screen controls at any time: **Back**, **Pause**, **Show me that again**, **Skip**, **Chapters** and **End**. Press Escape to pause, or just ask a question out loud.
5. To see one topic only, scroll to the **Feature Atlas** and click **Open** beside a chapter.

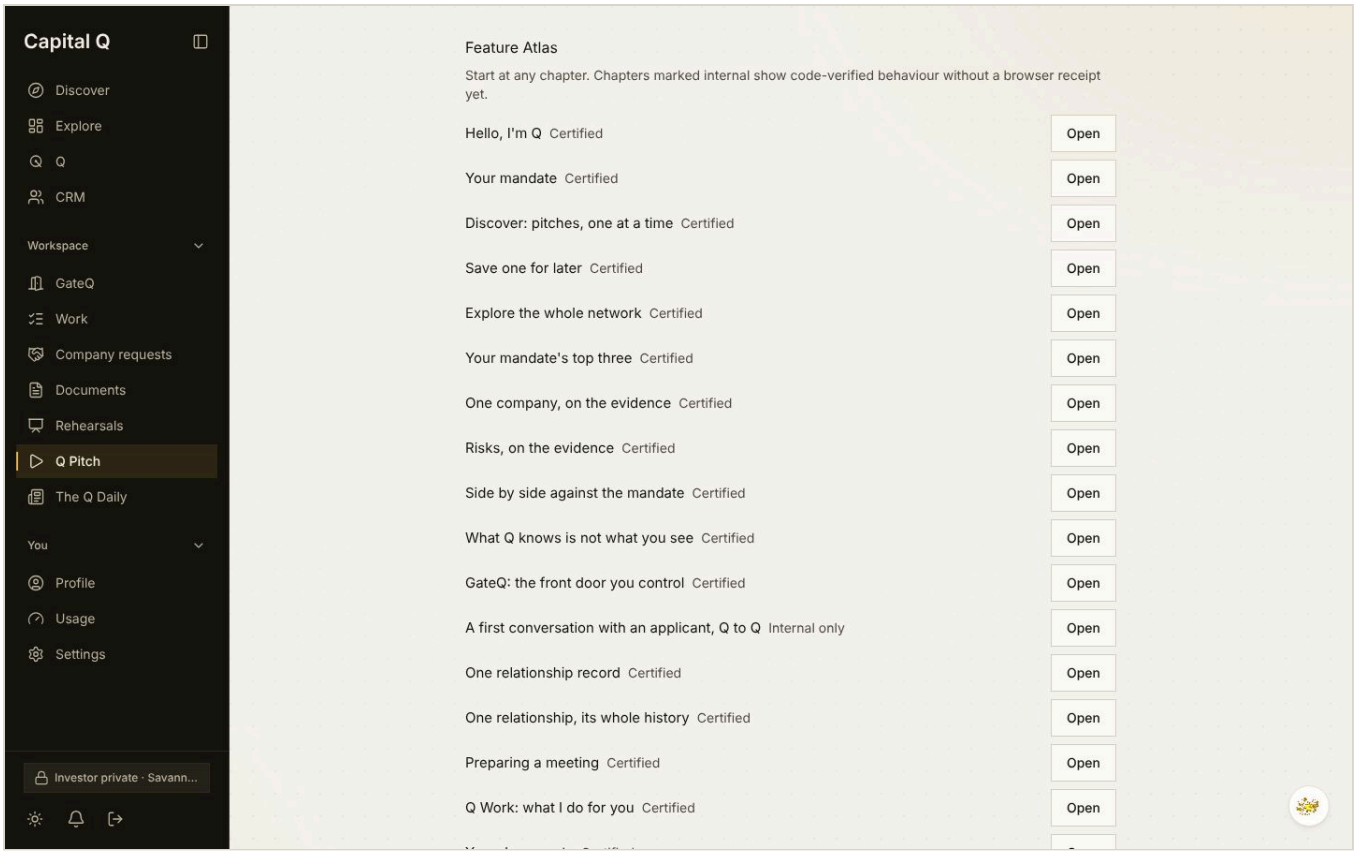

Figure 76. The Feature Atlas. Each chapter says whether it has been checked in a live browser (Certified) or not yet (Internal only).

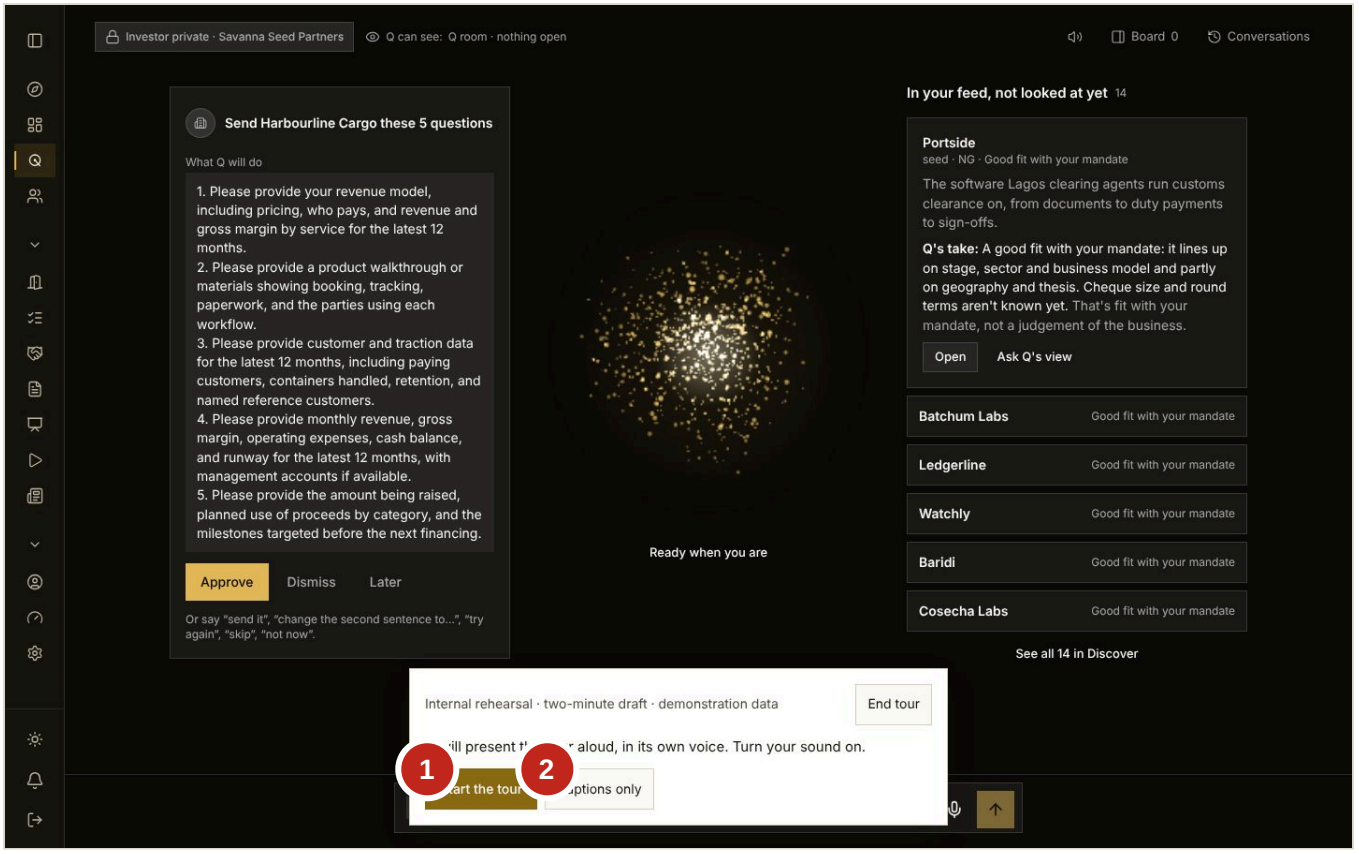

Figure 77. Starting a tour: Q asks whether to present aloud (turn your sound on) or show captions only. Click Start the tour.

Limits

Q Pitch is for investor workspaces. Founders see a note that a founder edition hasn't been built yet. In the premiere, 11 of 17 scenes have been checked in a live browser; the rest are marked internal.

4.18 Profile and Q Card

What it's for: what other people see about you and your company. Edit any section in place. Your **Q Card** is a short, shareable summary of your company with a link and QR code that works outside Capital Q.

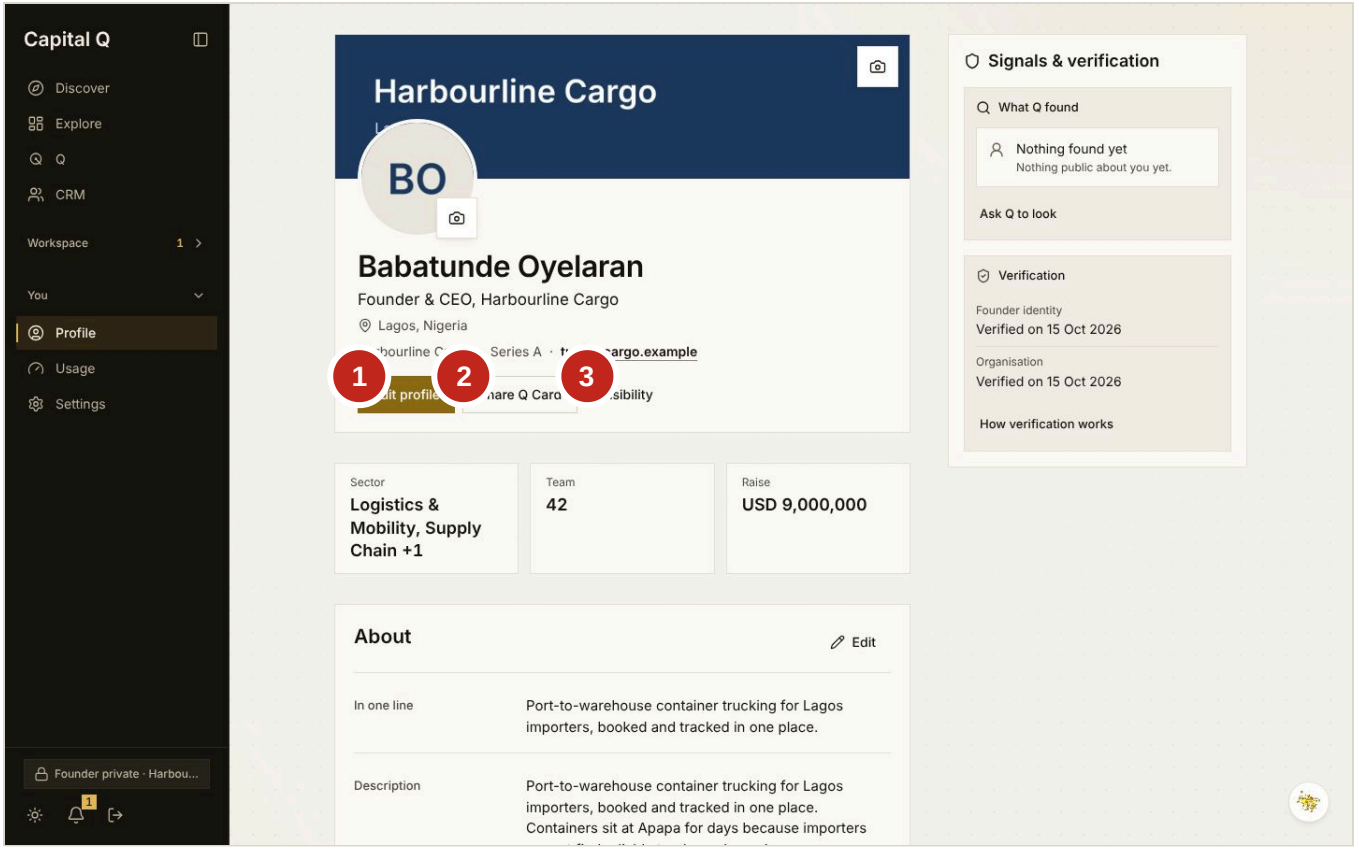

Figure 78. A founder's profile. Edit any section; share your Q Card; set visibility.

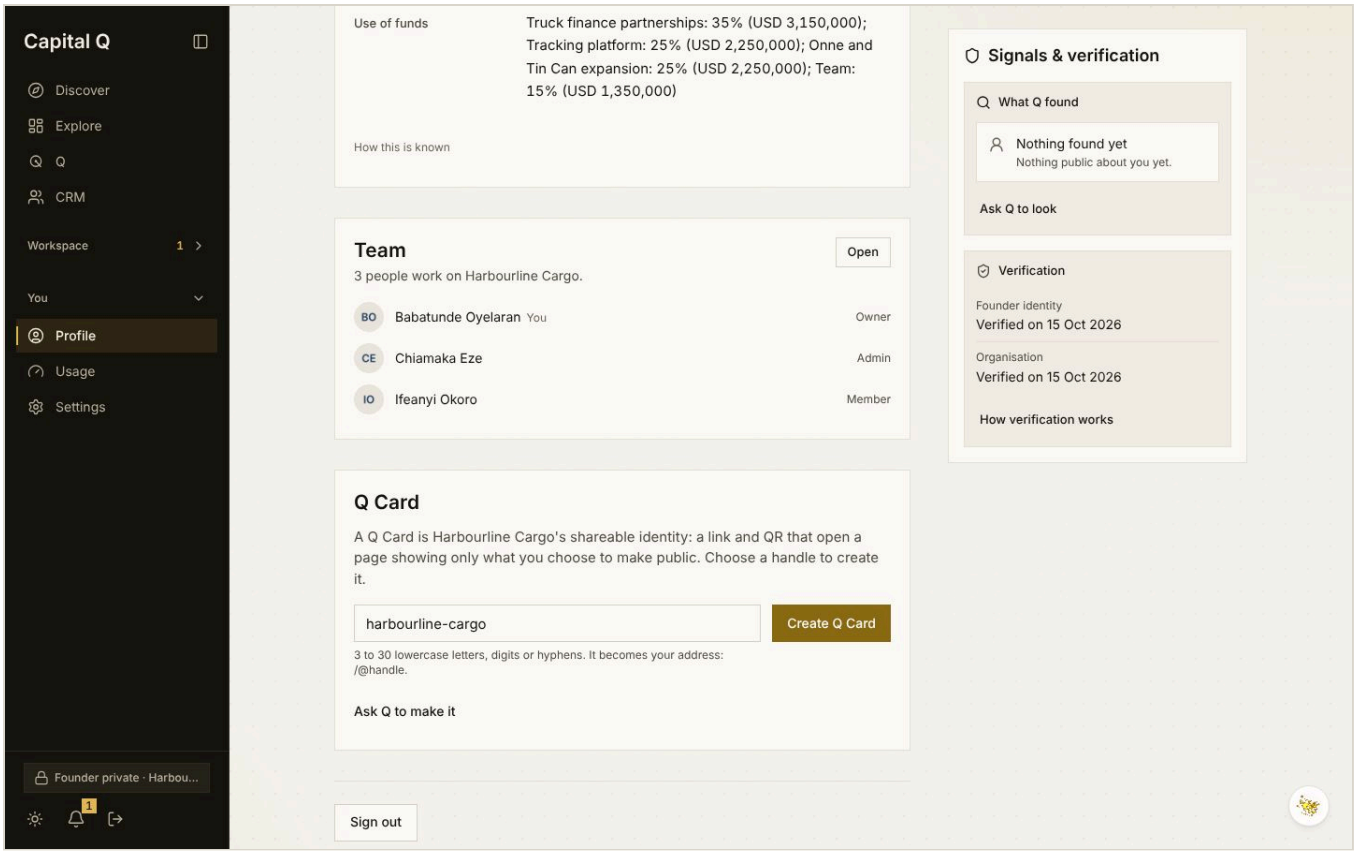

Figure 79. The Q Card section: create it yourself or ask Q to make it.

4.19 Settings, plan and usage

What it's for: your account, team, appearance, how Q speaks, notifications, connections (such as Google), plan and billing, and privacy.

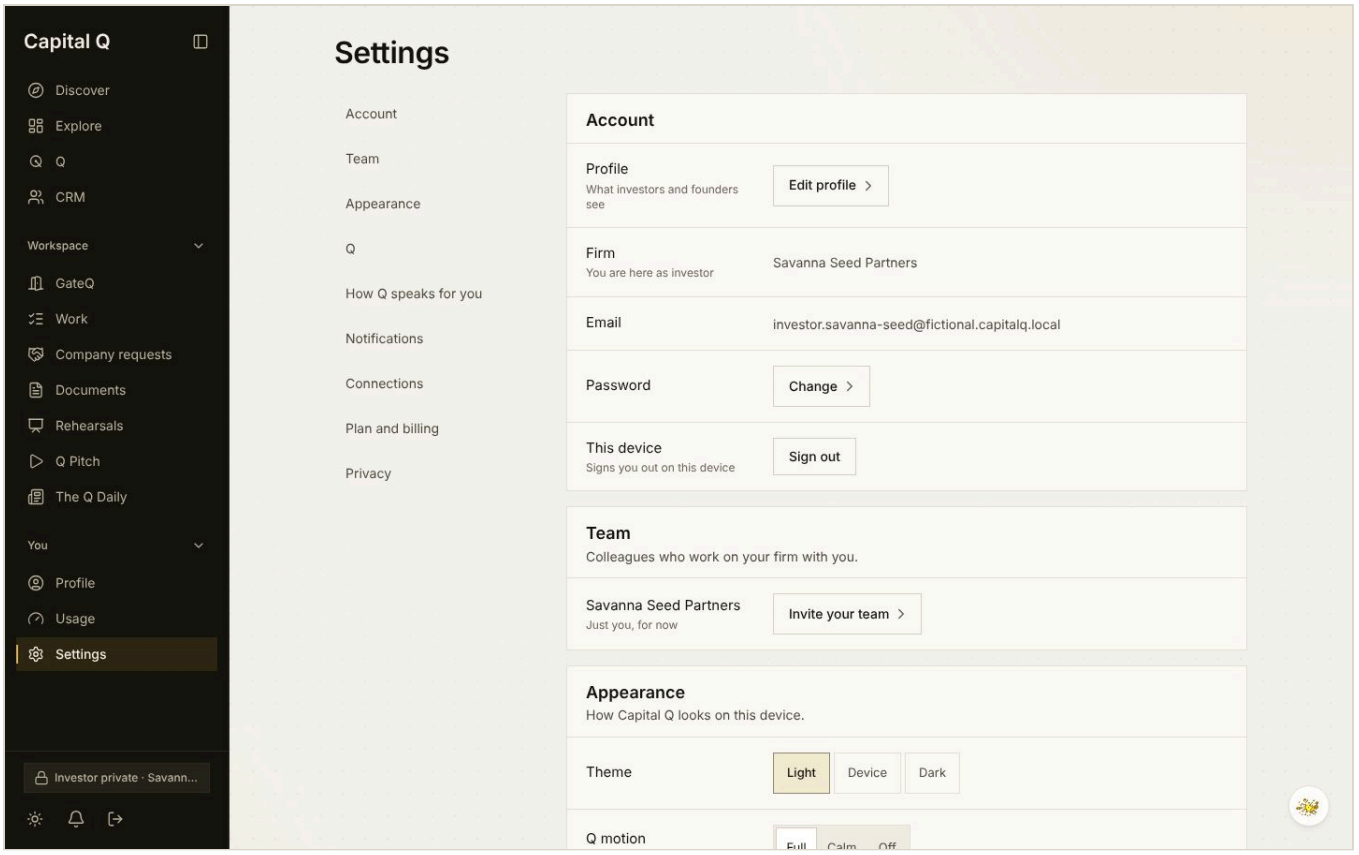

Figure 80. Settings, top of the page: Account, Team and Appearance.

- **Appearance:** light, device or dark; how much Q's light moves; sounds.
- **Q:** Q's voice (female or male) and personality (warm, witty, sharp).
- **How Q speaks for you:** write a guide for the tone Q uses in your name.
- **Notifications** and **The Q Daily** frequency.
- **Connections:** connect Google to book calls.

Language: see section 4.25.

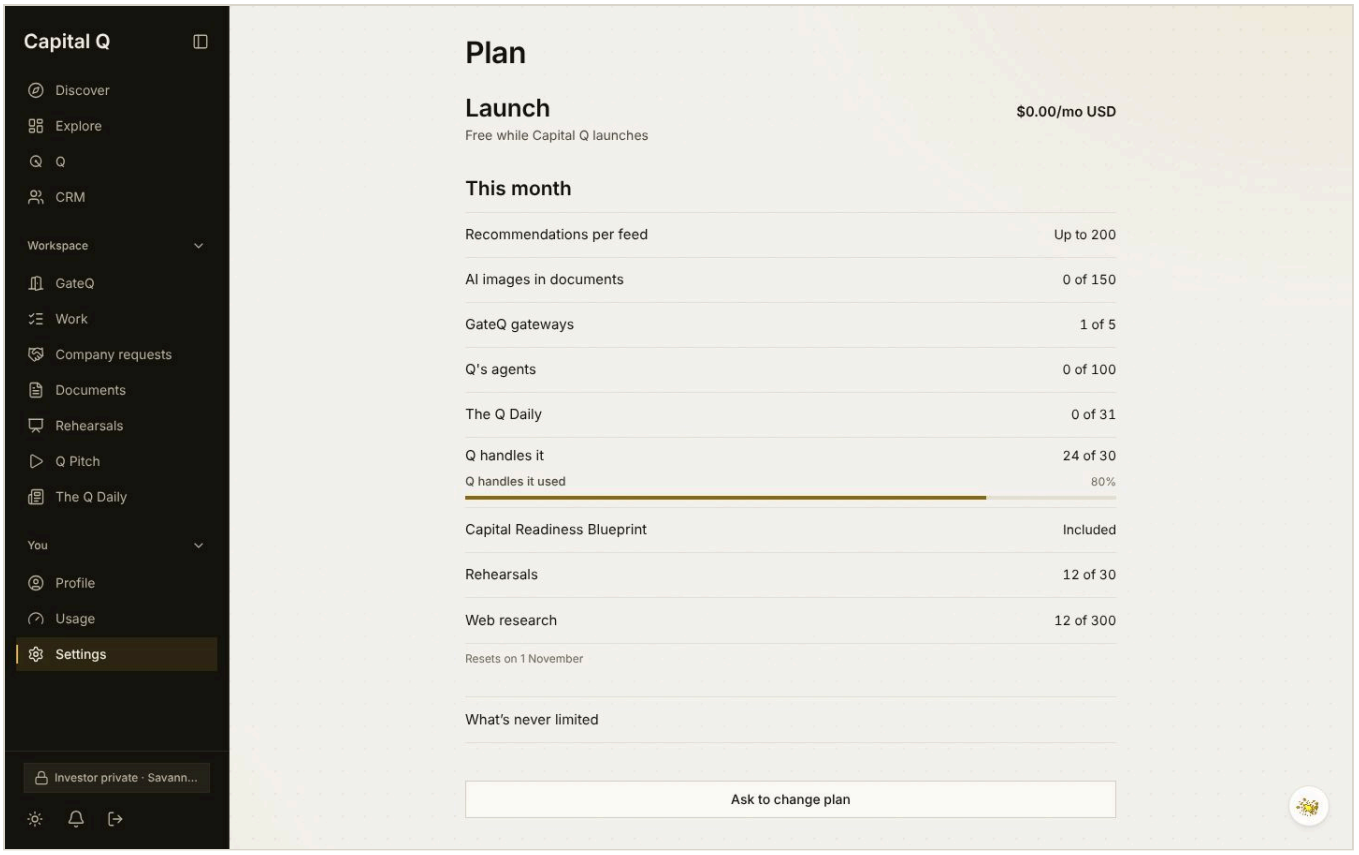

Figure 81. Plan: what is included this month and how much you have used.

Limits

Everyone is on the free **Launch** plan while Capital Q launches. To change plan, click **Ask to change plan**.

4.20 Team and invitations

What it's for: the people who work on your company or firm with you, and what each role can do. **Owner**: everything, plus billing and handing over ownership. **Admin**: invites people, edits the profile, approves what Q sends. **Member**: reviews, writes notes, works the inbox; can suggest but not approve.

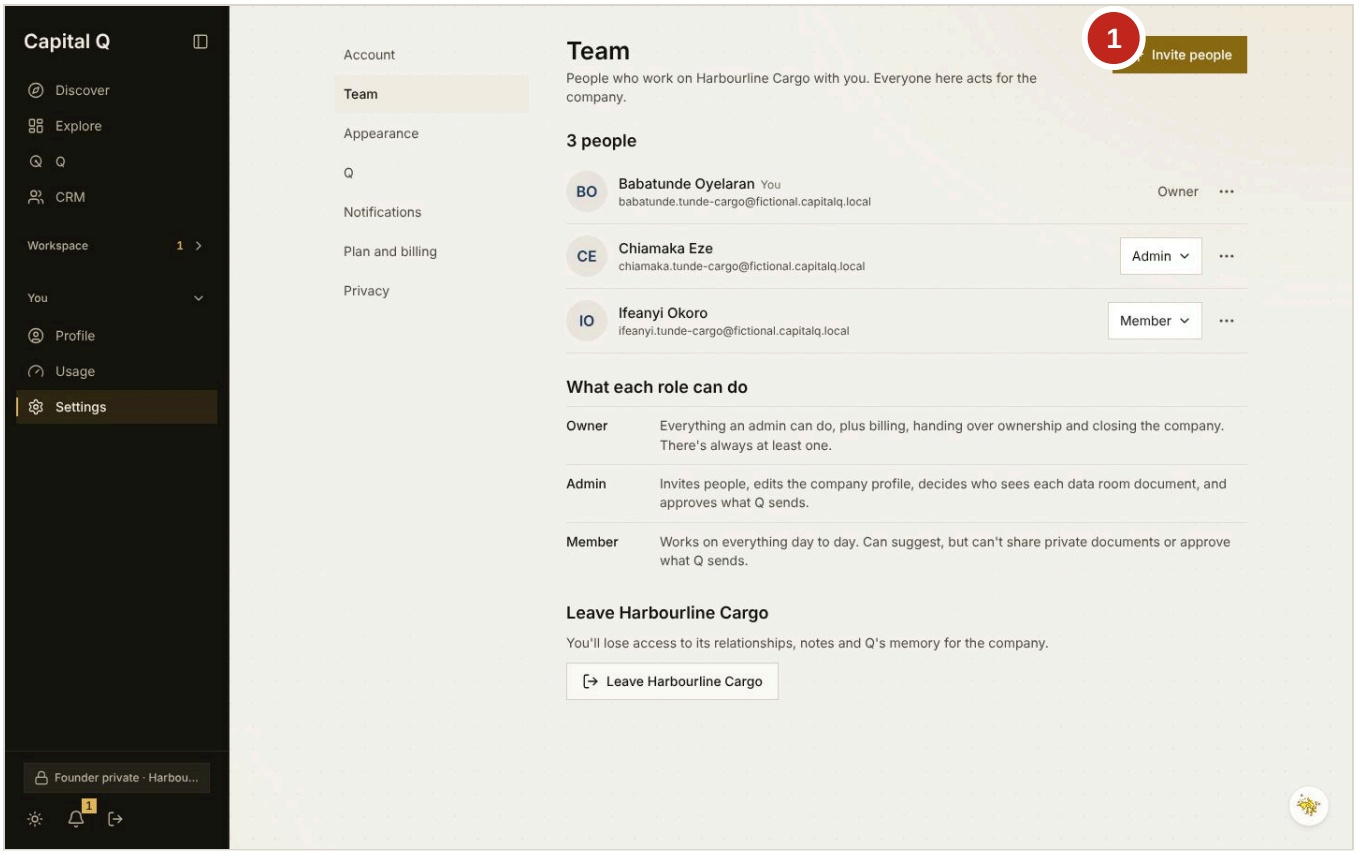

Figure 82. Harbourline Cargo's team: an owner, an admin and a member.

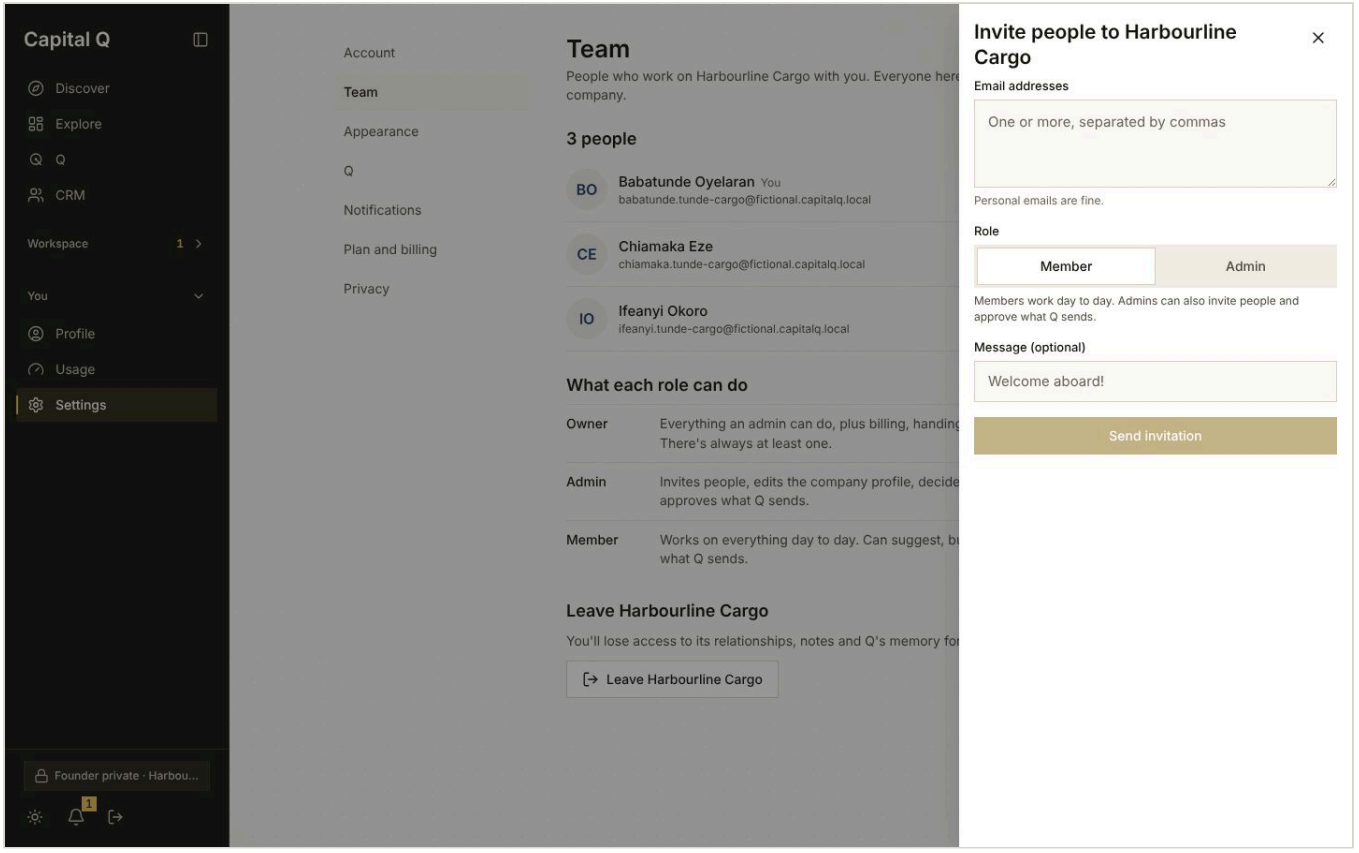

Figure 83. Inviting someone: their email and their role.

4.21 Notifications and approvals

What it's for: one list of what happened and what needs your yes. Click the **bell** at the bottom of the sidebar.

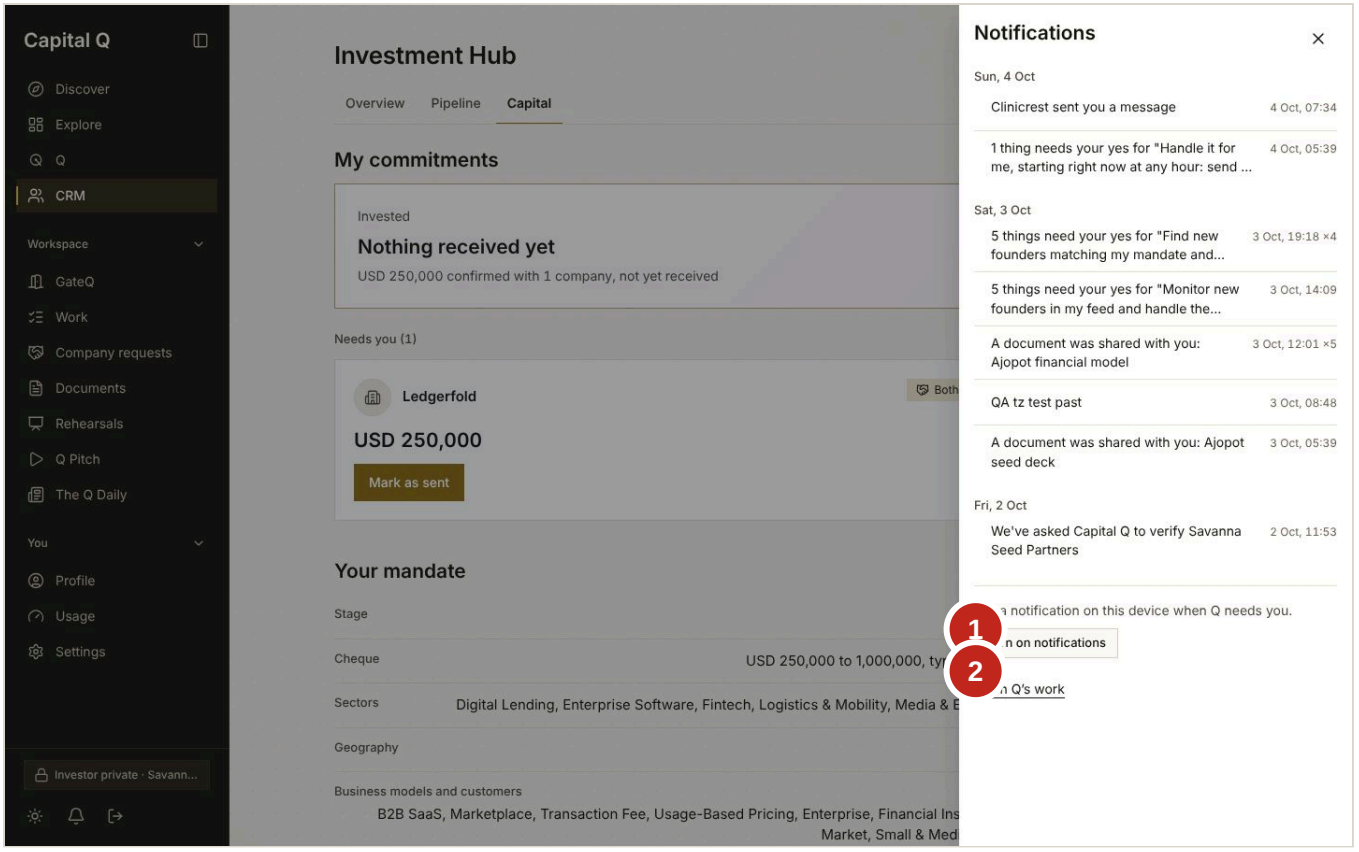

Figure 84. Notifications: messages, things that need your yes, shared documents.

Approving by voice or text

When Q has something ready for your yes, such as a reply, an introduction or questions to a founder, you can approve it on its card, or just tell Q: say or type "yes, send it", "approve" or "not now". Q records that you approved it and where. If you ask for a change, Q shows the new version and asks again.

Some things always need a tap. Anything about **money** (such as marking funds sent or confirming an amount), **deal terms**, and **sharing a private document** can only be approved with the card's **Approve** button. Q will remind you; words alone never approve them.

1. Click the bell.
2. Click an item to open it.
3. For "needs your yes" items, click **Open Q's work** to approve or change them.
4. Click **Turn on notifications** to get alerts on this device.

4.22 Verification

What it’s for: a person at Capital Q checks your identity and your organisation’s registered details. Verified means checked; it is not an endorsement.

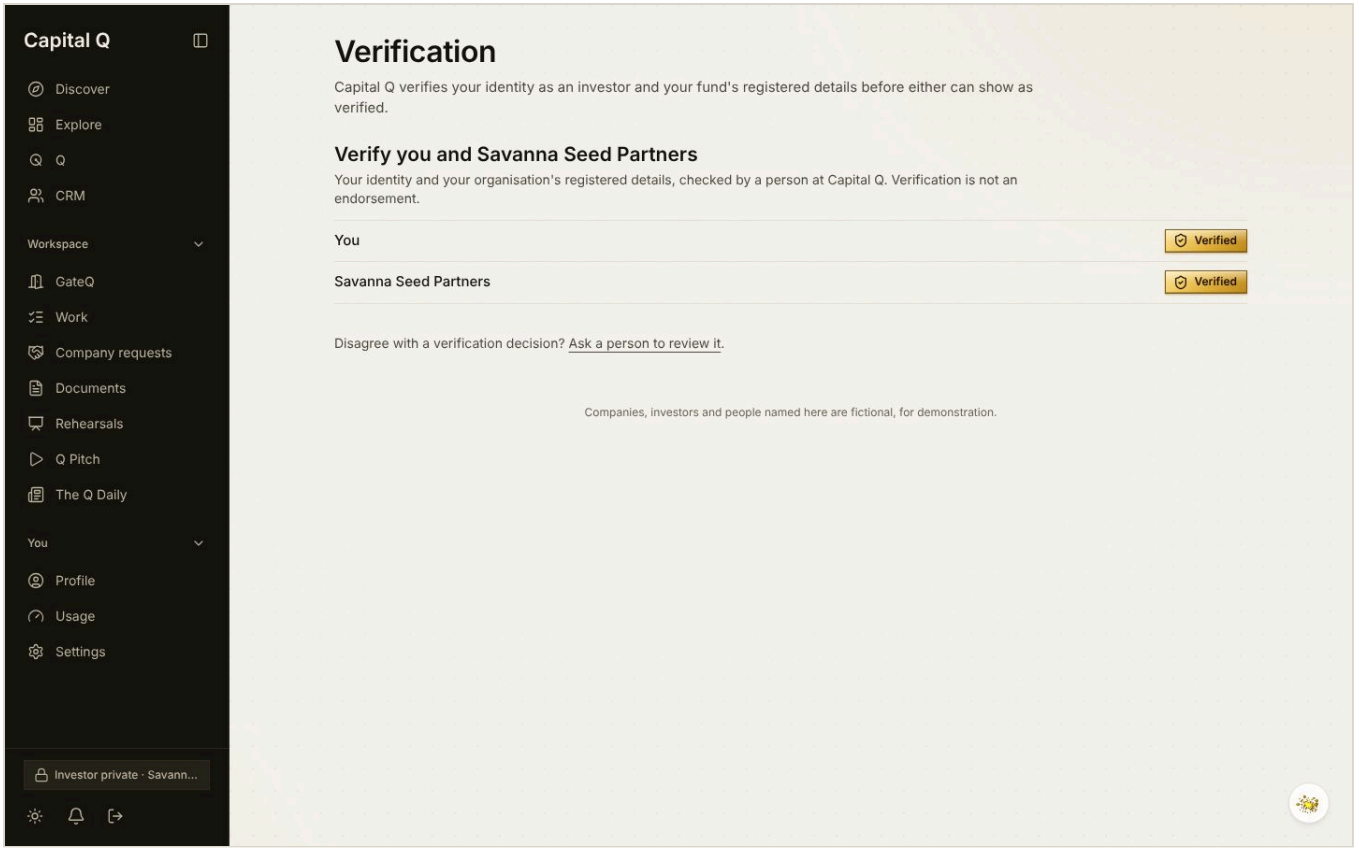

Figure 85. Verification: both the person and the fund are verified.

4.23 Getting started: set-up with Q

What it’s for: getting your company (founders) or your mandate (investors) onto Capital Q quickly. Q leads the set-up as a warm, short conversation. You can talk or type.

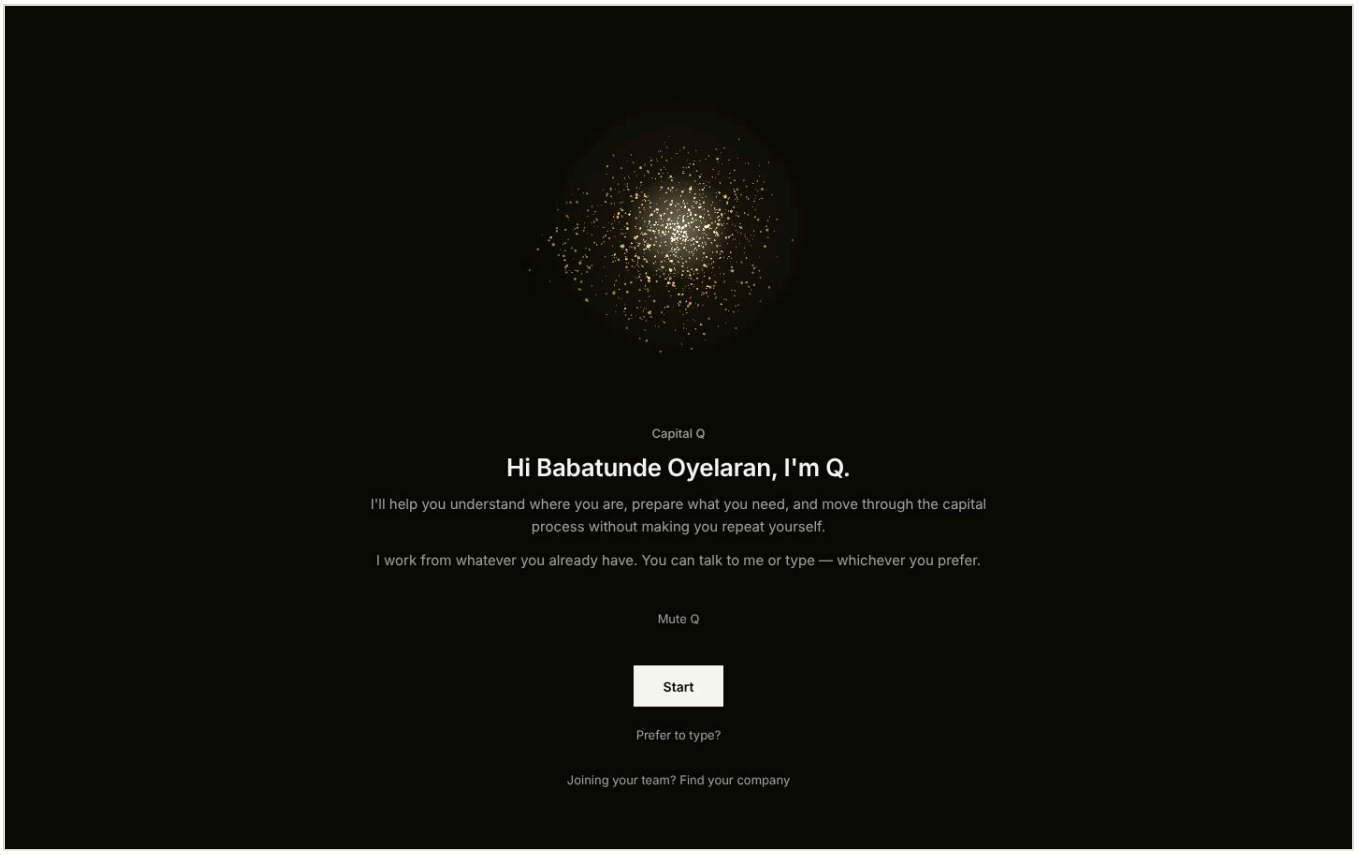

Figure 86. Meeting Q. Every new person starts here.

How the conversation works

- **One answer fills many fields.** Say “We’re a seed fintech in Lagos lending to market traders, raising $2.5M” and Q fills in stage, place, sector, what you do and the raise at once. It only asks about what is still missing.
- **Corrections are easy.** Say “actually we’re in Abuja” or “no, it’s Series A” and Q fixes that one fact.
- **Your own words count.** If none of Q’s options fit, choose **Other** and say it your way; Q keeps your words.
- **Documents mid-conversation.** Drop in your deck, accounts or fund deck at any point. Q reads it and proposes what it found; anything important waits for your confirmation.
- **Private stays private.** If you mark a document private, Q acknowledges you shared it but does not read it.
- **Continue later.** Click **Continue later** at any time. Everything you have confirmed is saved, and Q picks up where you left off. You can choose to get a reminder.
- **Preferences only with consent.** Q asks before it learns how you like to work.

The form, kept in step

Prefer forms? The same set-up is available as a form. The form and the conversation share one record: anything you tell Q appears in the form, and anything you type in the form, Q knows.

Founders cover: your company, stage, what it does, its category, what you already have (pitch deck, financial model, management accounts, memo), your founding team, business and traction, and whether you are raising now. **Investors** cover: which mandate, whether you are deploying now, stage and cheque, where you invest, sectors, business attributes, and green and red flags. Your personalised feed appears straight away.

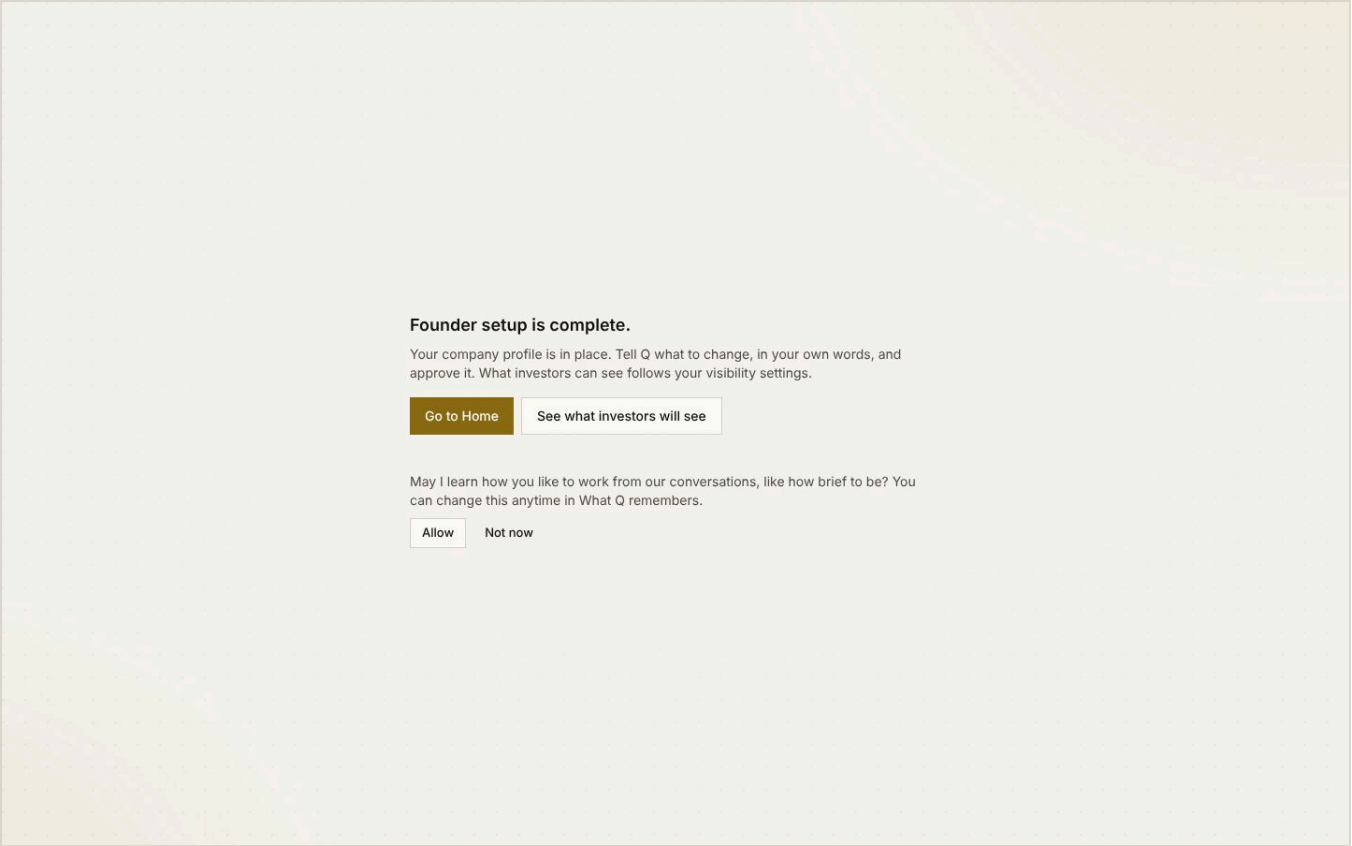

Figure 87. A founder who has finished set-up sees this; answers can be changed later from the profile.

Not pictured

The demo accounts have already finished set-up, and creating a brand-new account needs a real inbox for the confirmation email, so the first-time conversation is described here rather than shown.

4.24 Scores: Investability and Suitability

Investors see two numbers for each company, side by side and never added together:

- **Investability** (out of 100): how investable the company looks on the evidence it has shared with investors, using the FDN InvestIQ method. It is the same for every investor. Founder-private documents never change it.
- **Suitability** (out of 100): how well the company fits *your* mandate. It is different for each investor.

Each number comes with:

- **Confidence**, in words (low, medium, high): how sure the number is, given how much is backed by documents or verification rather than just stated.
- **Coverage**: how much the number is based on, for example “based on 14 of 48 factors · 4 of 8 areas” or “4 of 7 of your criteria known”. Investability also shows an **evidence range** (such as 28–80): where the score could land as more becomes known.

When too little is known, you see “not enough known yet” instead of a number. Unknown never counts as zero.

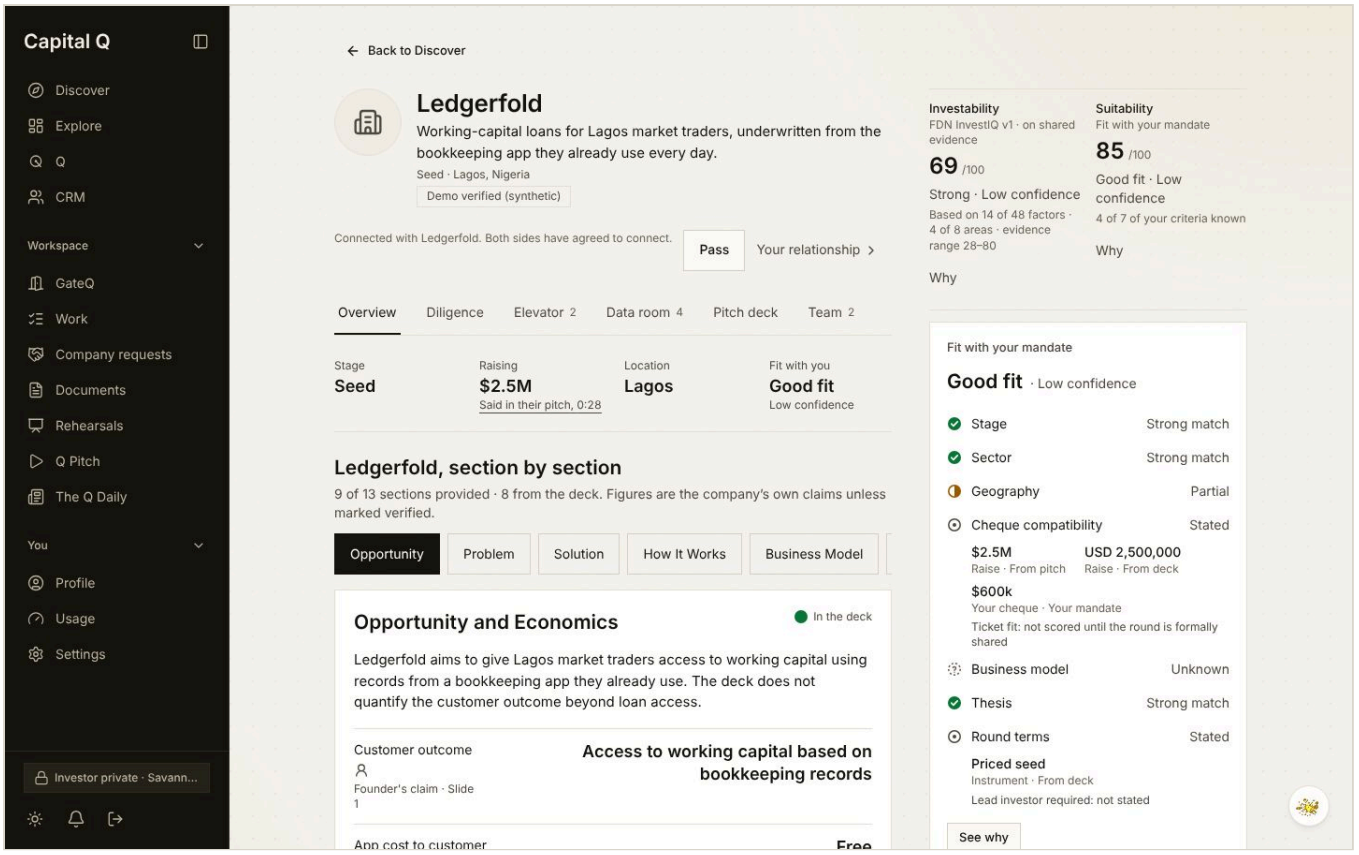

Figure 88. The two scores at the top right of a company profile: Investability and Suitability, each with its confidence, coverage and a Why link.

Where you see them: the company profile, Discover, Explore (as “Inv.” and “Suit.”), the CRM pipeline, search, Saved and comparisons.

How Discover ranks: first, only companies your declared rules allow. Then mostly by Suitability (your mandate), then by Investability, then a little variety so you see beyond the obvious. Nobody can pay to rank higher, and what you watch or click never changes the order.

Founders improve their Investability by sharing evidence with investors and getting it verified; private uploads don’t move it.

4.25 Language

Capital Q works in your language. Choose it once and Q's replies, its voice and the screens all follow.

1. Click **Settings**, then **Q**, and find **Language**.
2. Search or scroll the list of 183 languages, each shown in its own script, and click yours. **Automatic** follows your device.
3. The page switches straight away. Under the list, Capital Q says honestly what works in that language: screens (translated by hand, or by machine), Q's replies, **voice conversations** (available, or "type to Q instead") and **video rehearsals and interviews**.

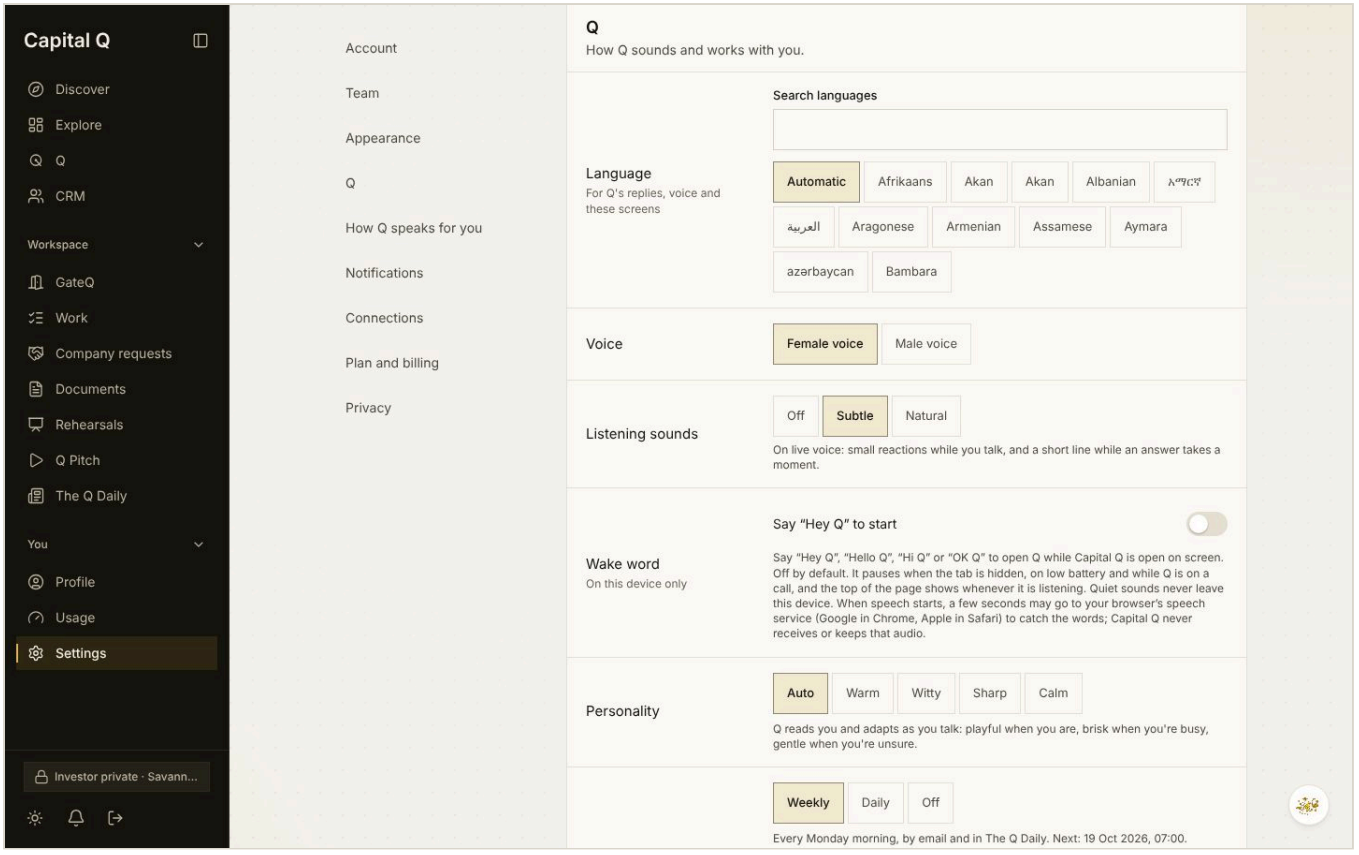

Figure 89. Settings → Language, with Automatic and the language list.

Telling Q to switch. You can also just say or type "speak French" or "reply in Arabic". Q switches and remembers.

Right-to-left. In Arabic, the whole app flips: the sidebar moves to the right and text reads right to left. Arabic screens are translated by hand.

Figure 90. The Q page in Arabic, on a phone.

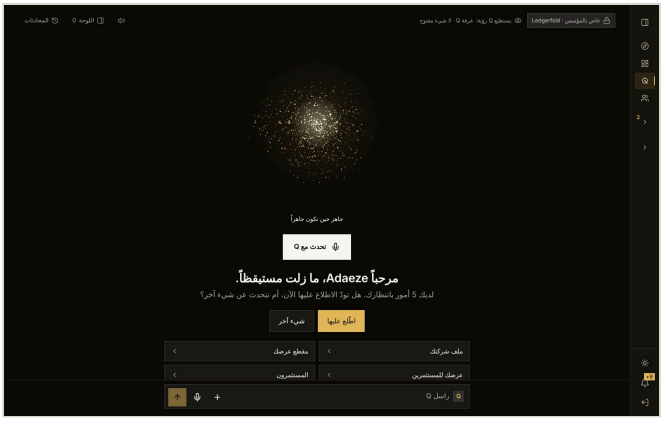

Figure 91. The Q page in Arabic on a computer: “You have 5 things waiting.”

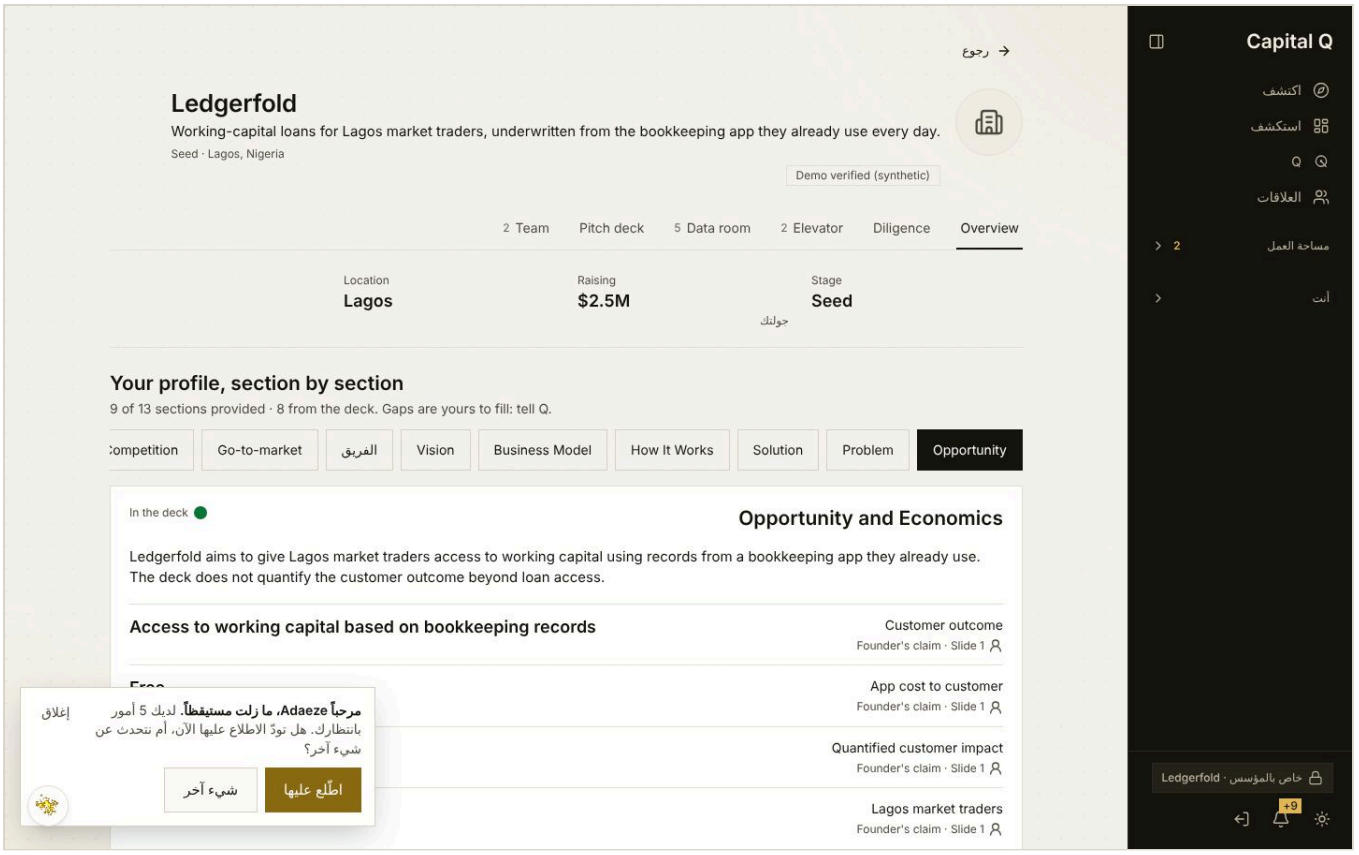

Figure 92. A company profile in Arabic. Company content stays in the language it was written in.

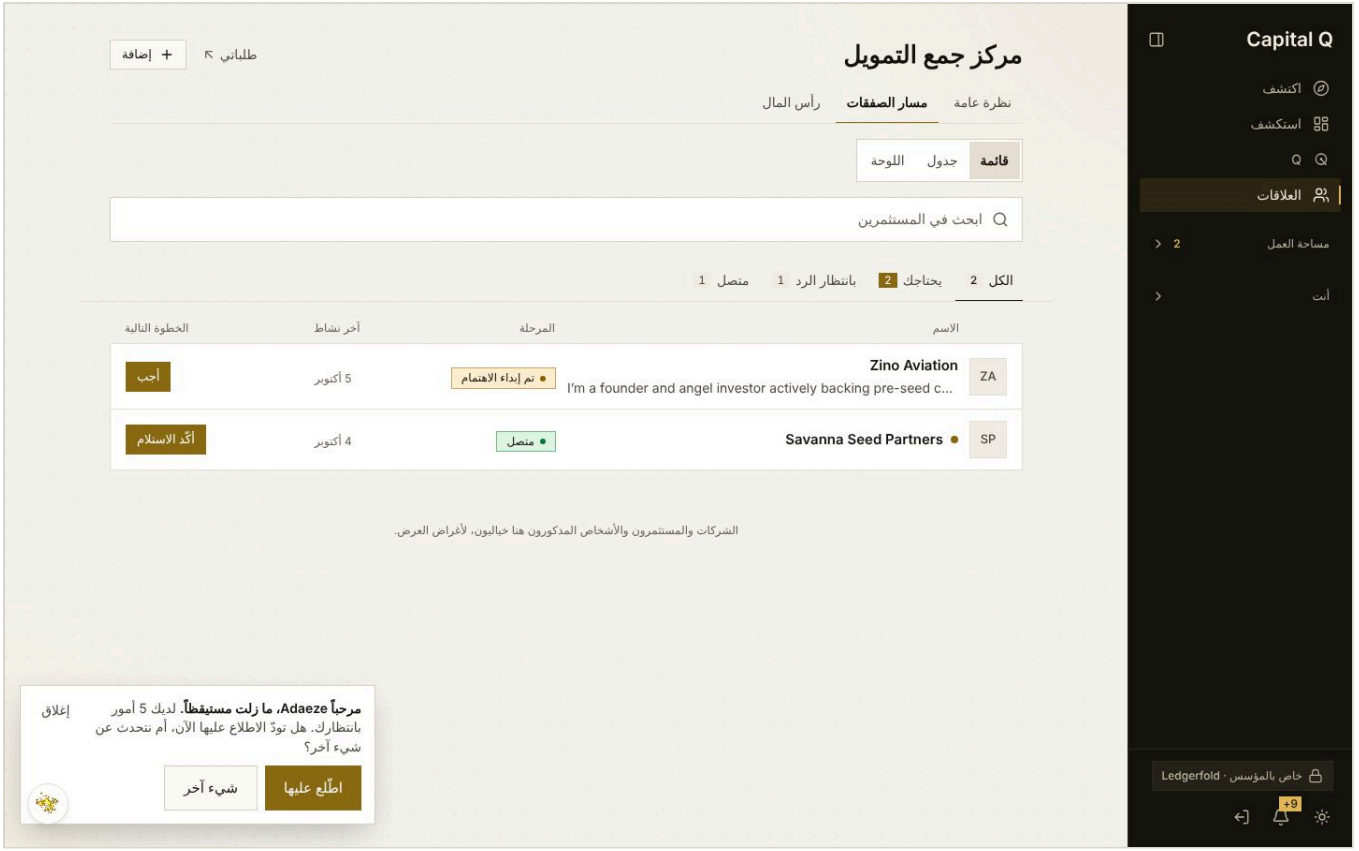

Figure 93. The Fundraising Hub in Arabic.

Emails from Capital Q, such as invitations and reminders, are written in the person's chosen language.

> **Honest limits**
>
> Voice and video work only in languages the voice providers support; Settings tells you which, and you can always type. Screens in languages without a hand translation are machine-translated the first time anyone uses them. Company content (decks, profiles) is not translated.

4.26 On a phone or tablet

Everything works on a phone. The sidebar becomes a bar at the bottom with **Discover**, **Explore**, **Q**, **CRM** and **More**. Tap **More** for GateQ, Work, Documents, Rehearsals, Settings and the rest. The bell and the theme switch sit at the top. Pages stack into one column; lists open their details on a new screen.

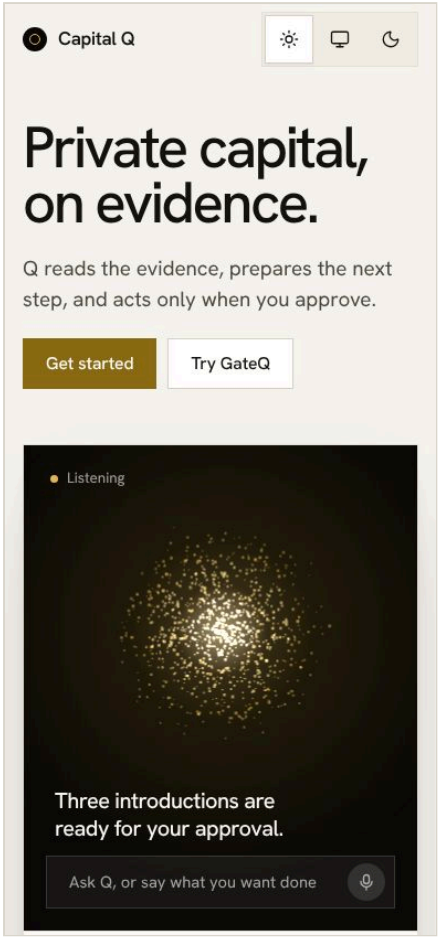

Figure 94. Home page on a phone.

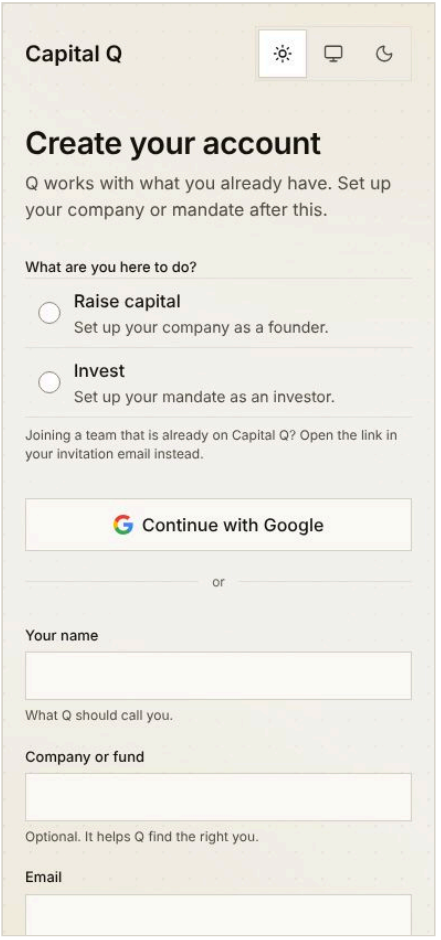

Figure 95. Create account.

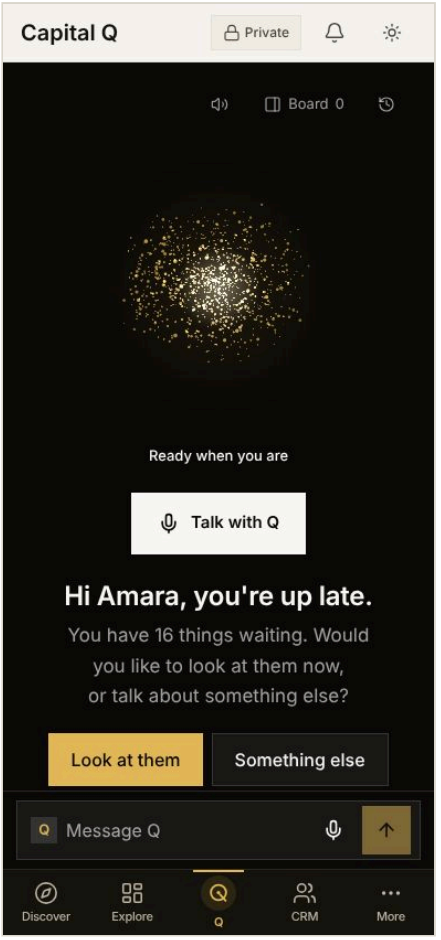

Figure 96. The Q page.

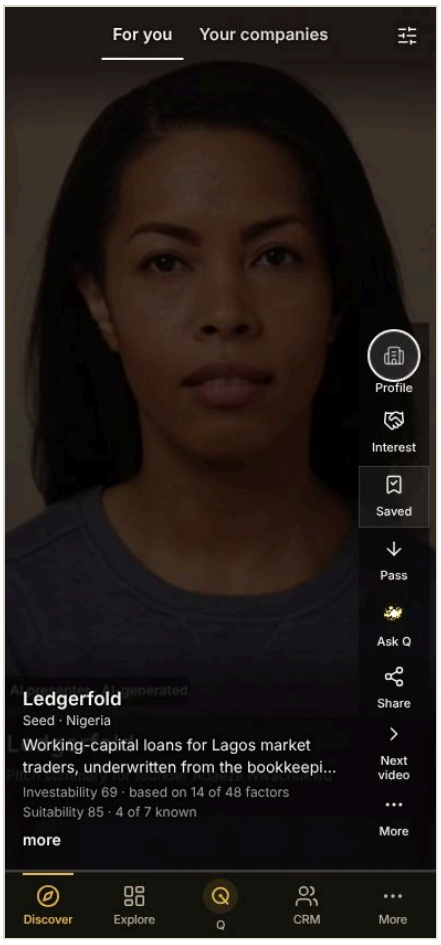

Figure 97. Discover: the pitch fills the screen.

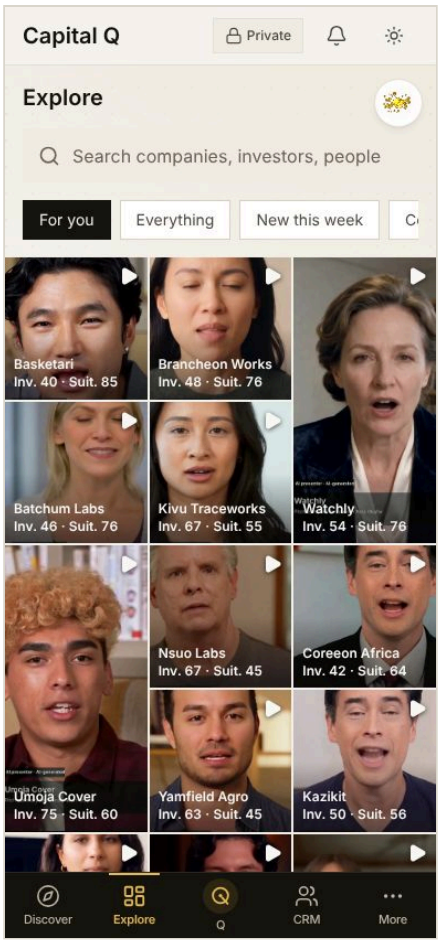

Figure 98. Explore.

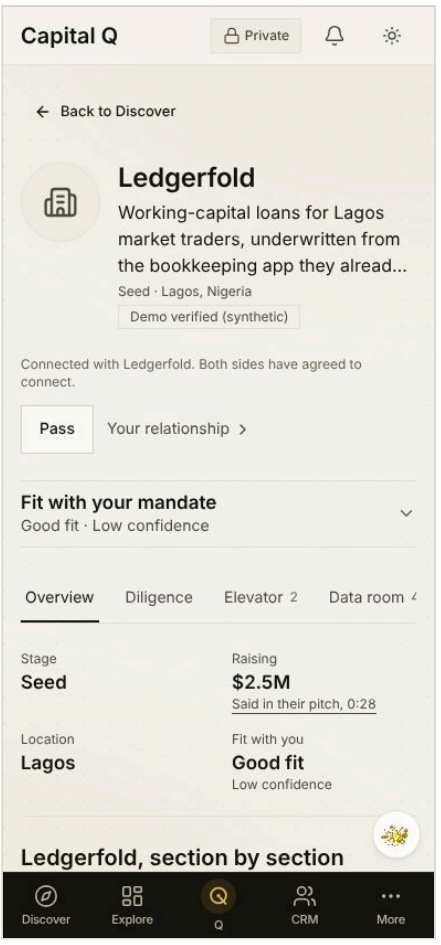

Figure 99. A company profile.

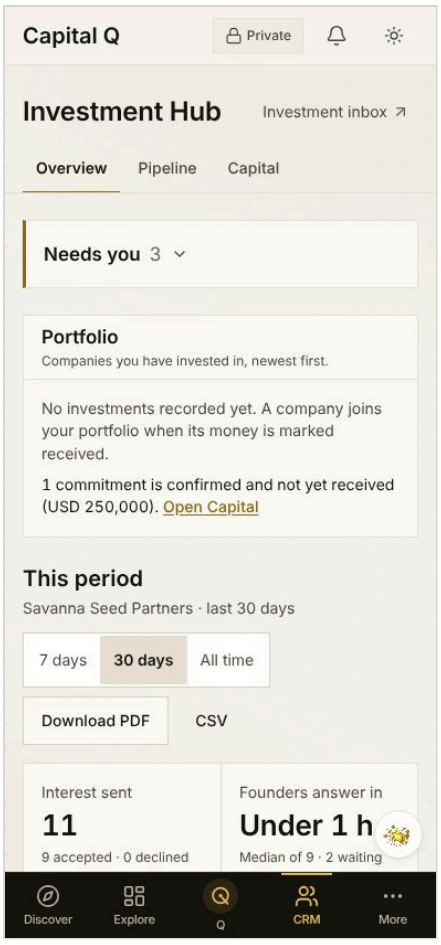

Figure 100. CRM Overview.

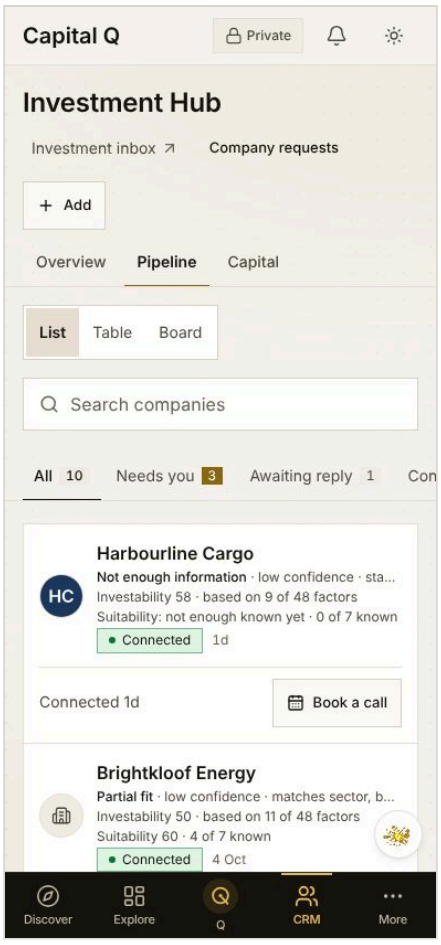

Figure 101. CRM Pipeline.

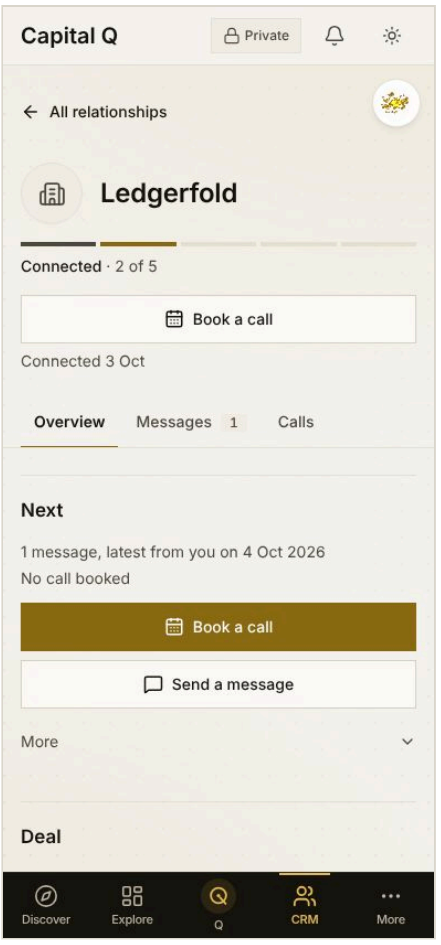

Figure 102. A CRM record.

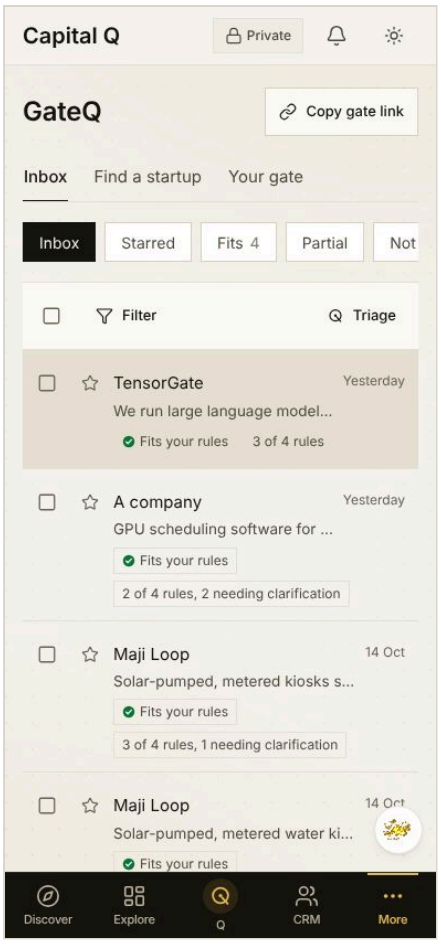

Figure 103. GateQ inbox.

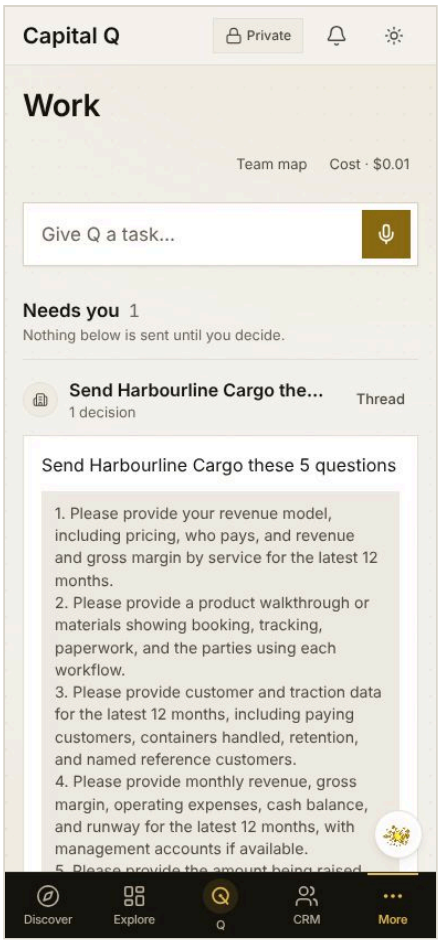

Figure 104. Q Work, with an approval waiting.

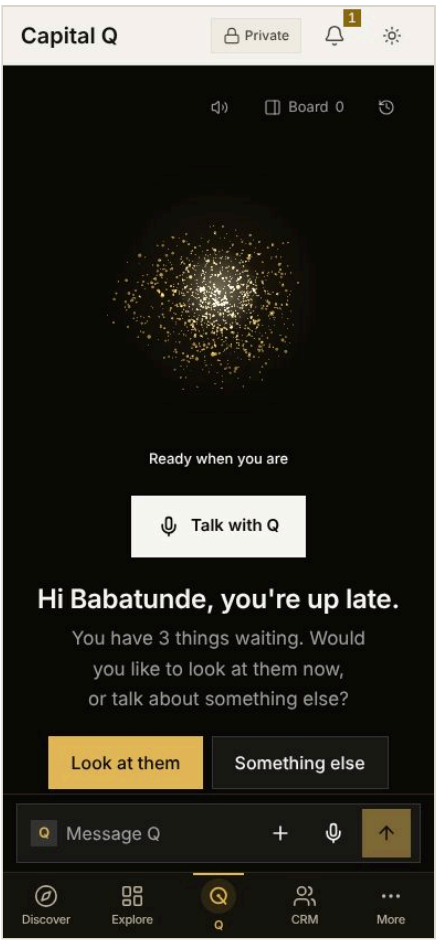

Figure 105. A founder's Q page.

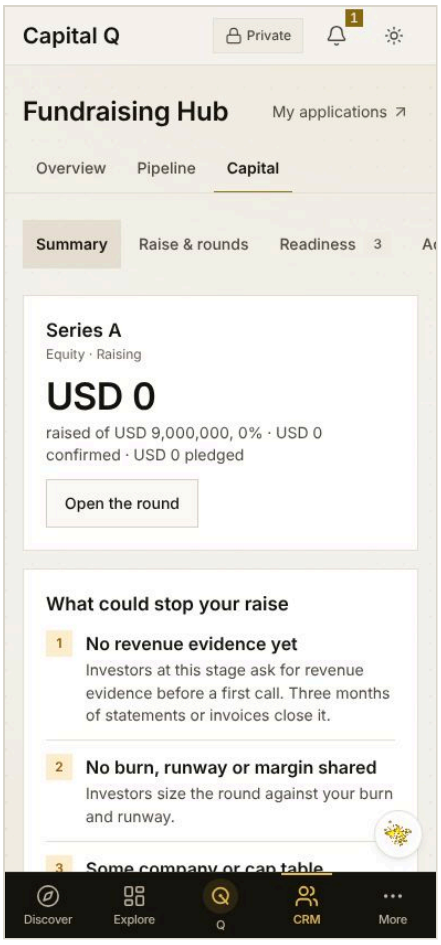

Figure 106. A founder's Capital page.

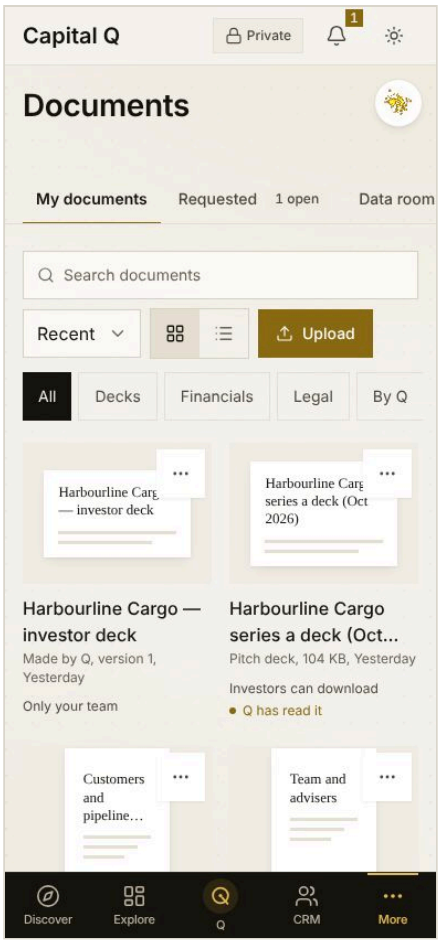

Figure 107. Documents.

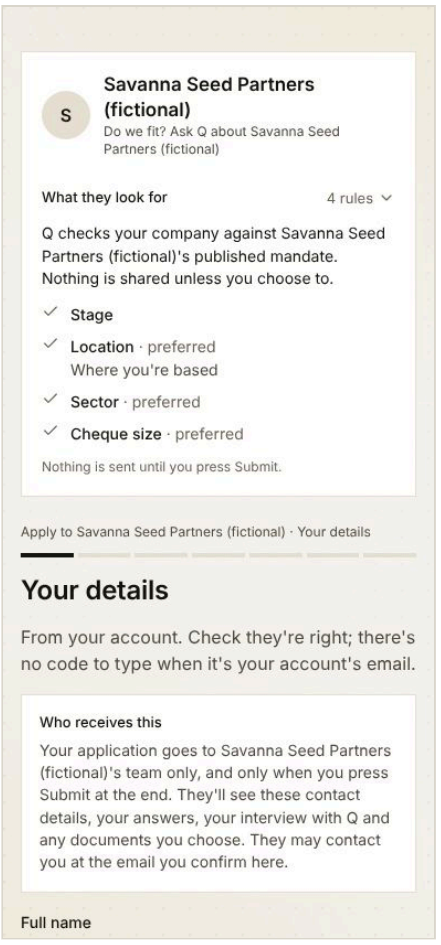

Figure 108. Applying through GateQ.

On a tablet held upright (about 834 pixels wide), Capital Q uses the phone layout with more room: the bottom bar replaces the sidebar and wider pages such as the pipeline board keep their columns.

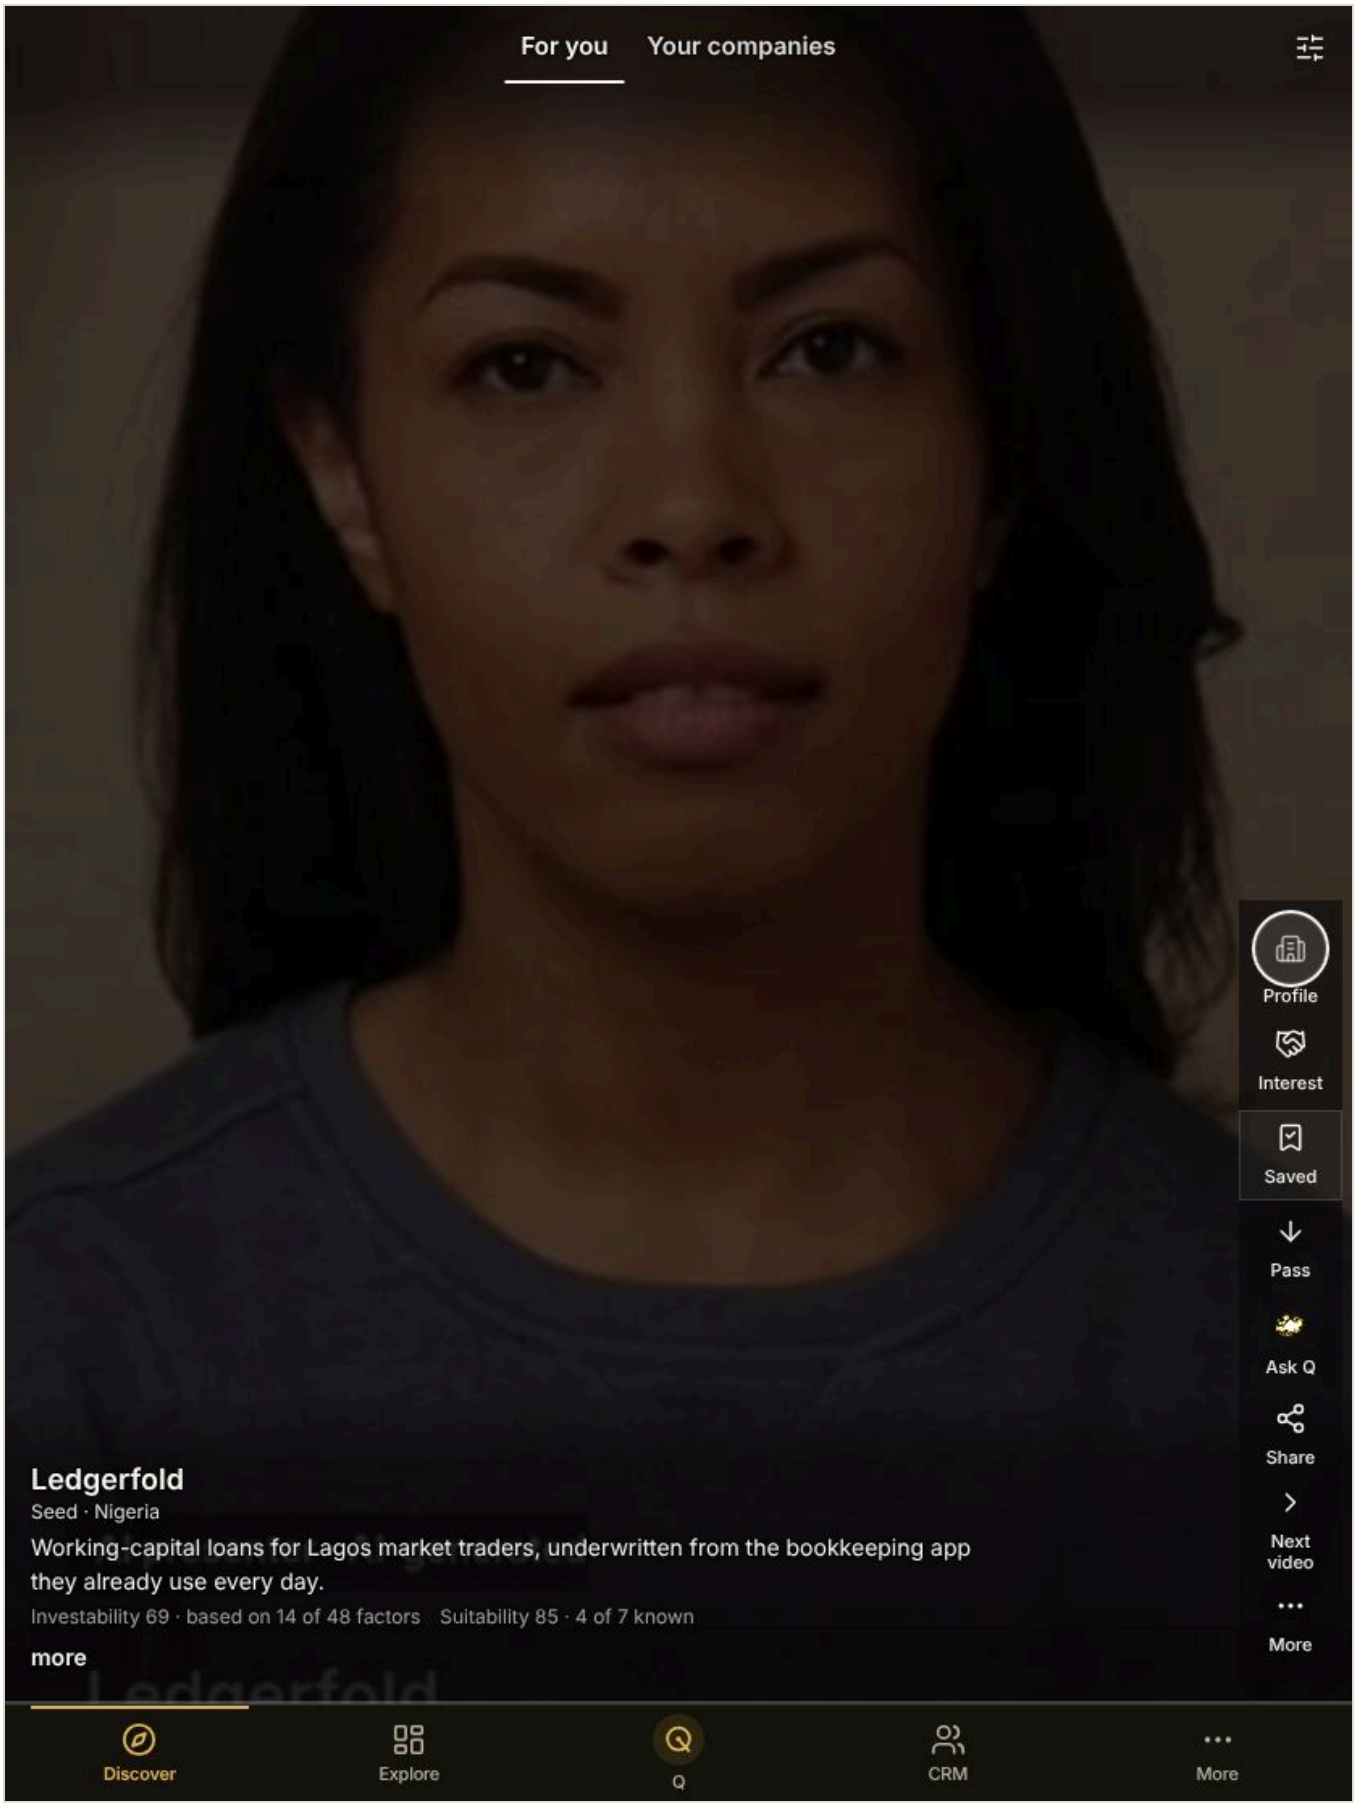

Figure 109. Discover on a tablet: the pitch fills the screen, with the actions down the right.

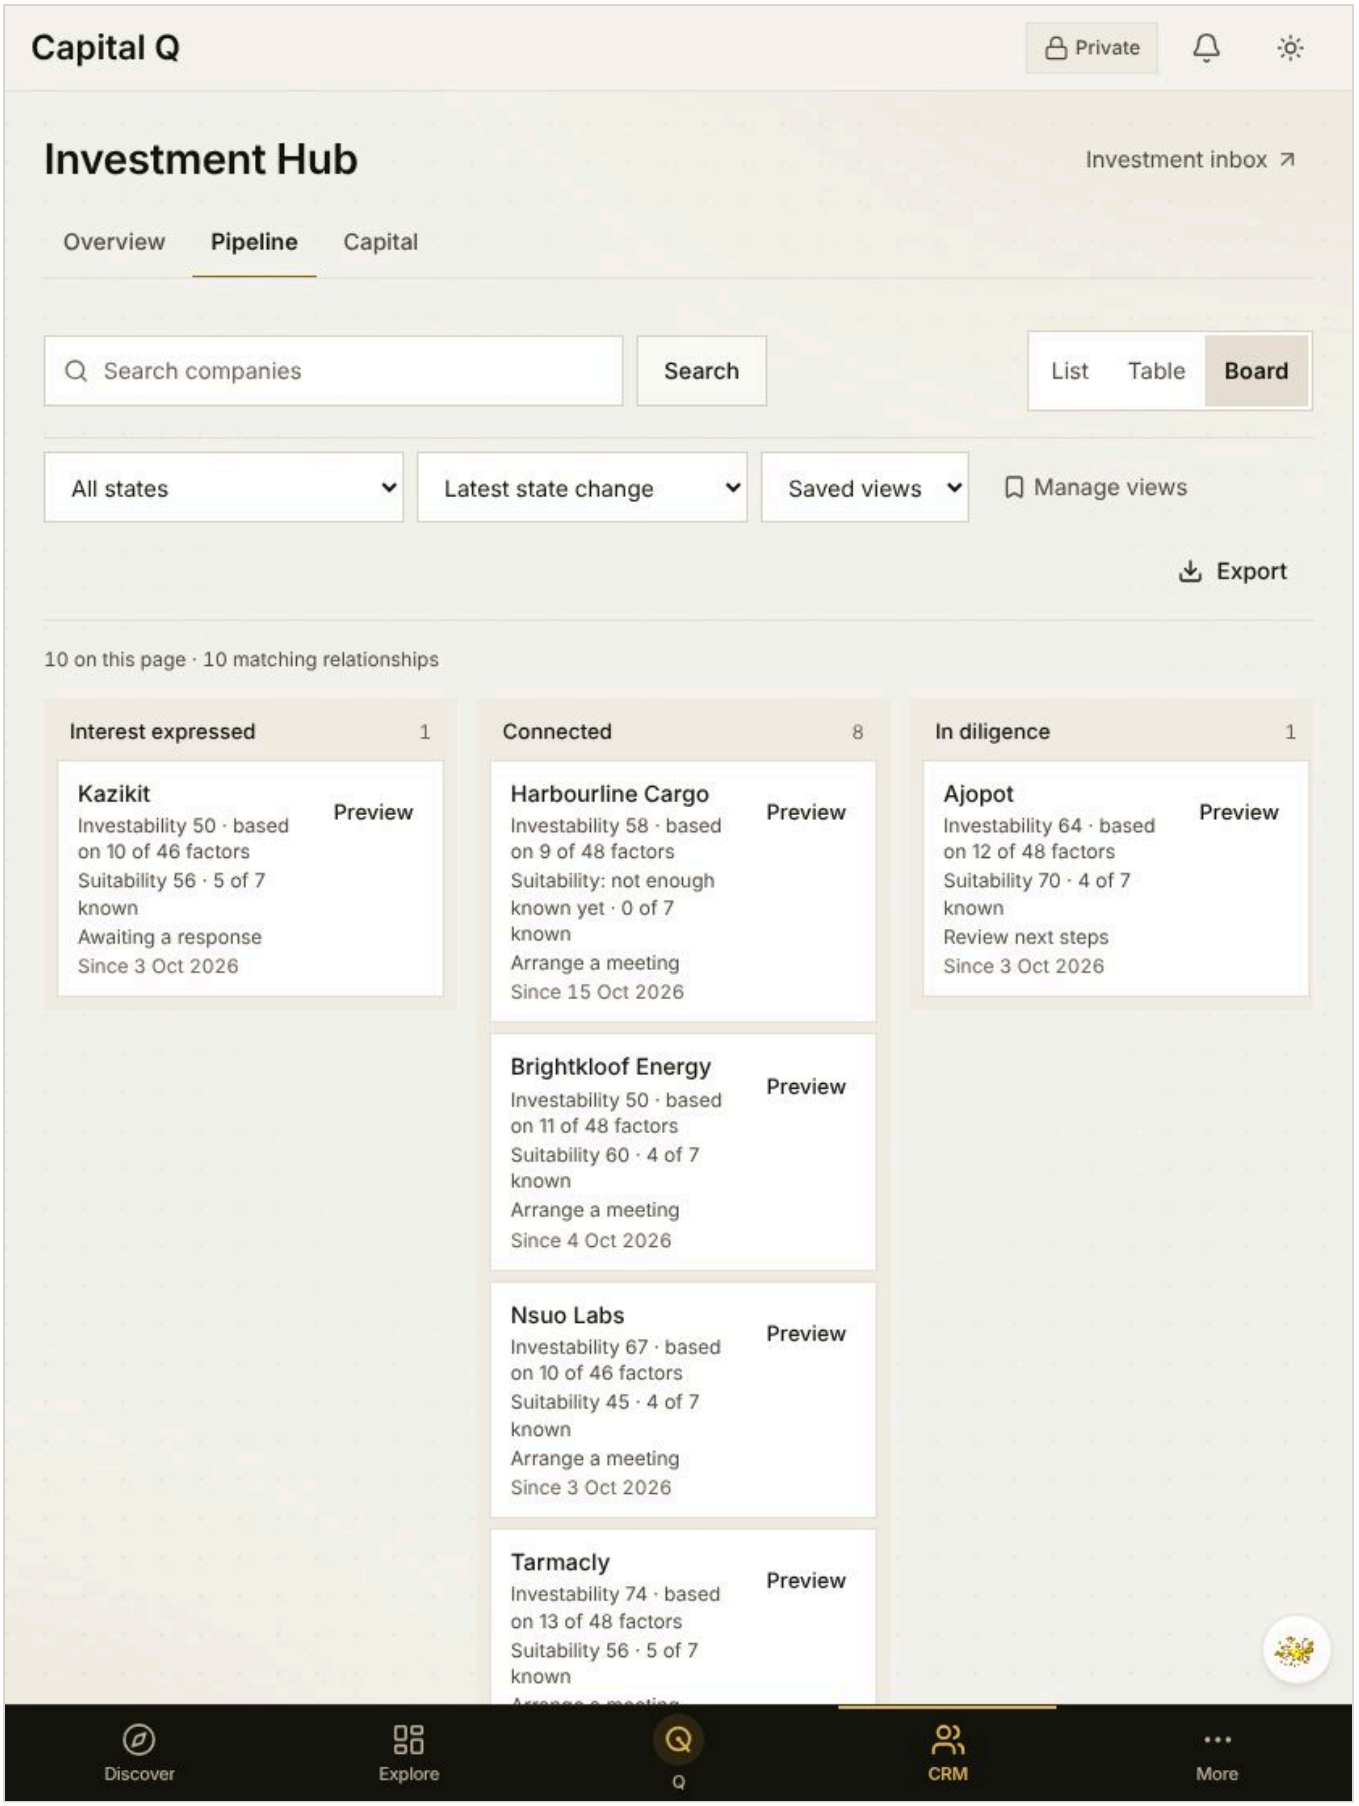

Figure 110. The pipeline board on a tablet, with the bottom bar.

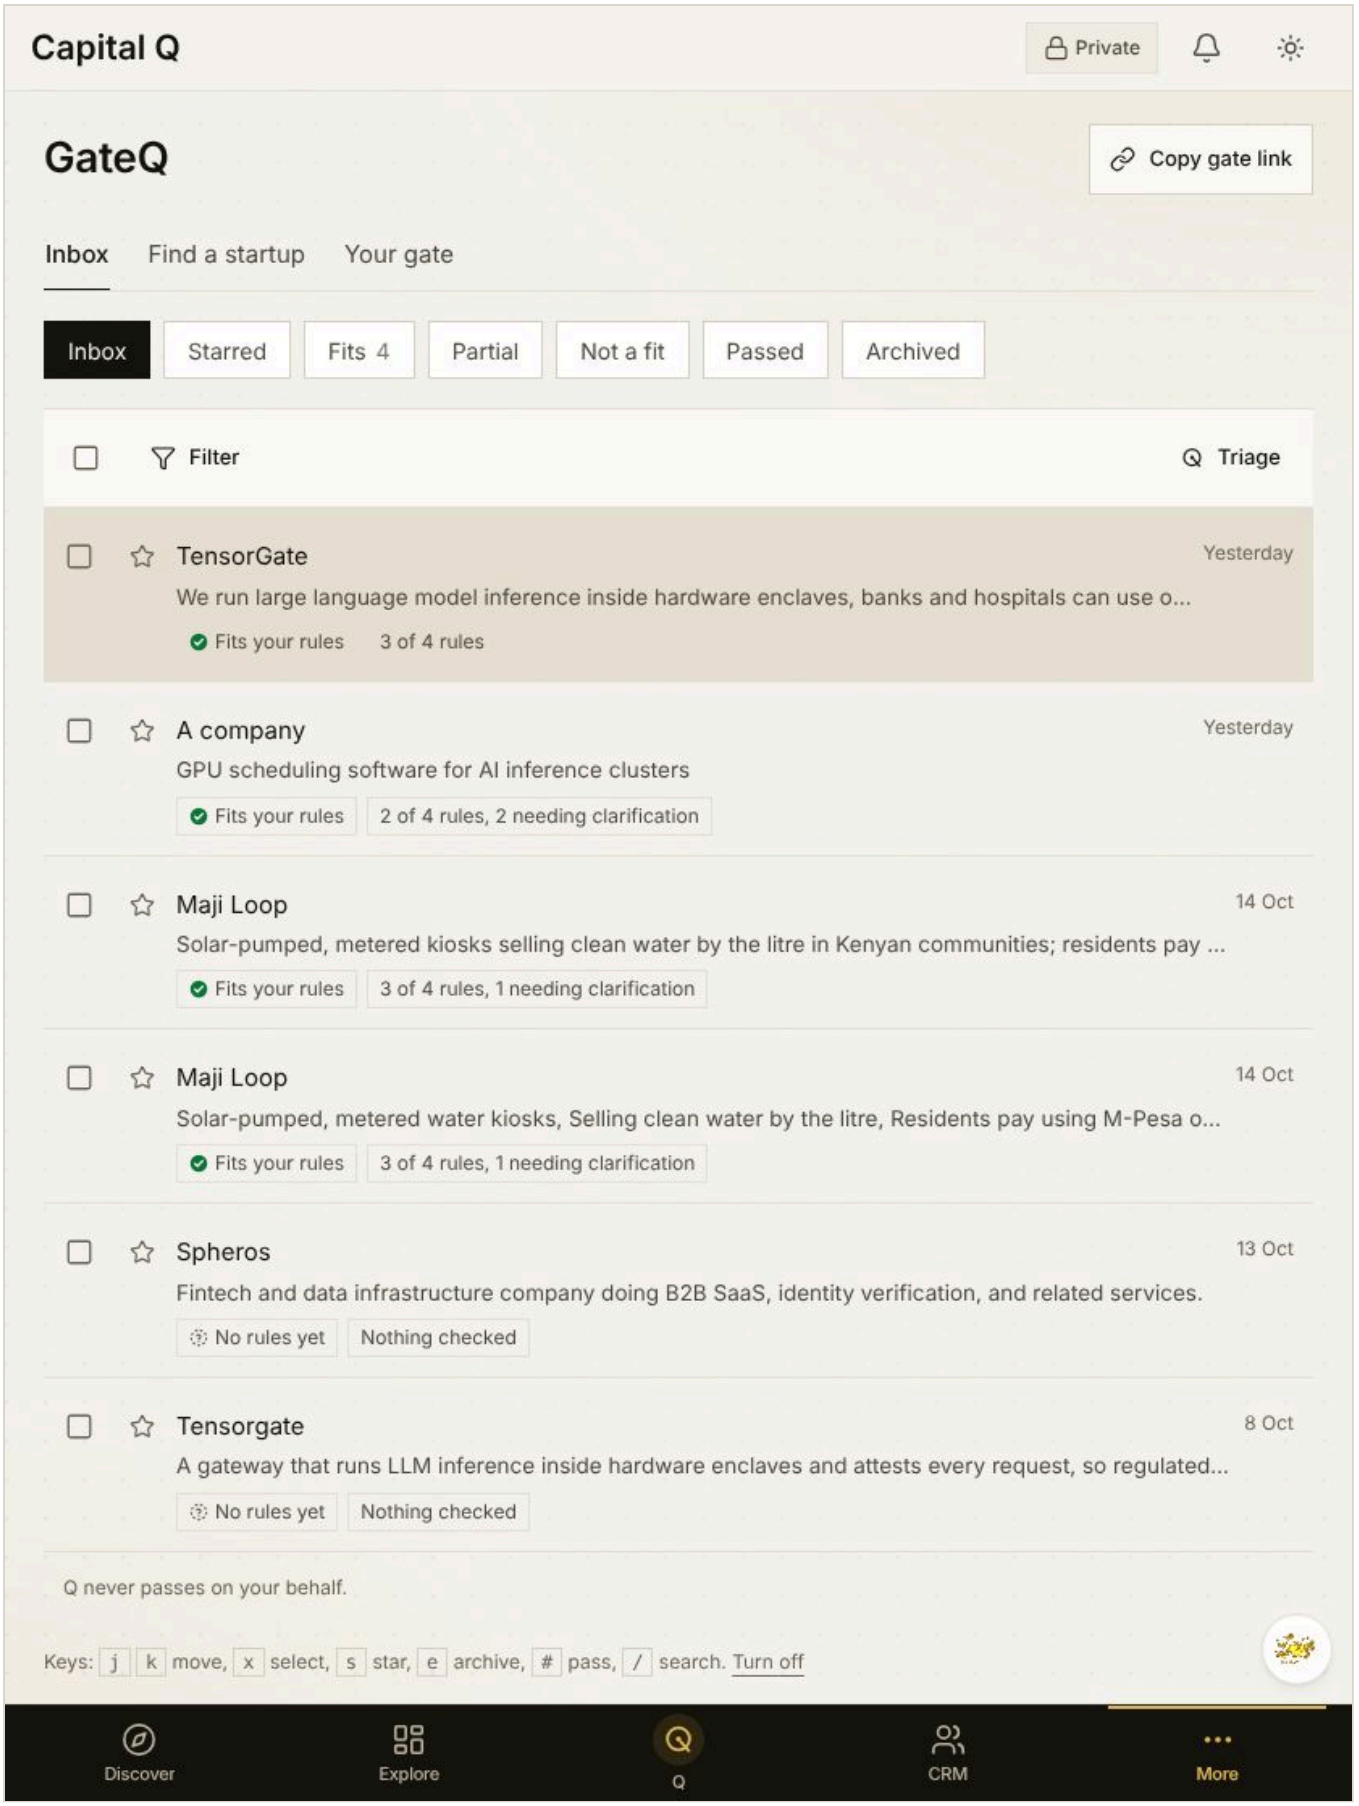

Figure 111. GateQ on a tablet.

5. Step-by-step stories

Each story follows one person through a real task, from start to finish, using the demo accounts.

Story 1. An investor finds a company and decides

Sign in as Amara (investor). Time: about 15 minutes.

1. **Open Discover.** Click **Discover**. You see Ledgerfold, a seed fintech in Lagos. Read **Why it's here**: stage, place and sector all match your mandate.

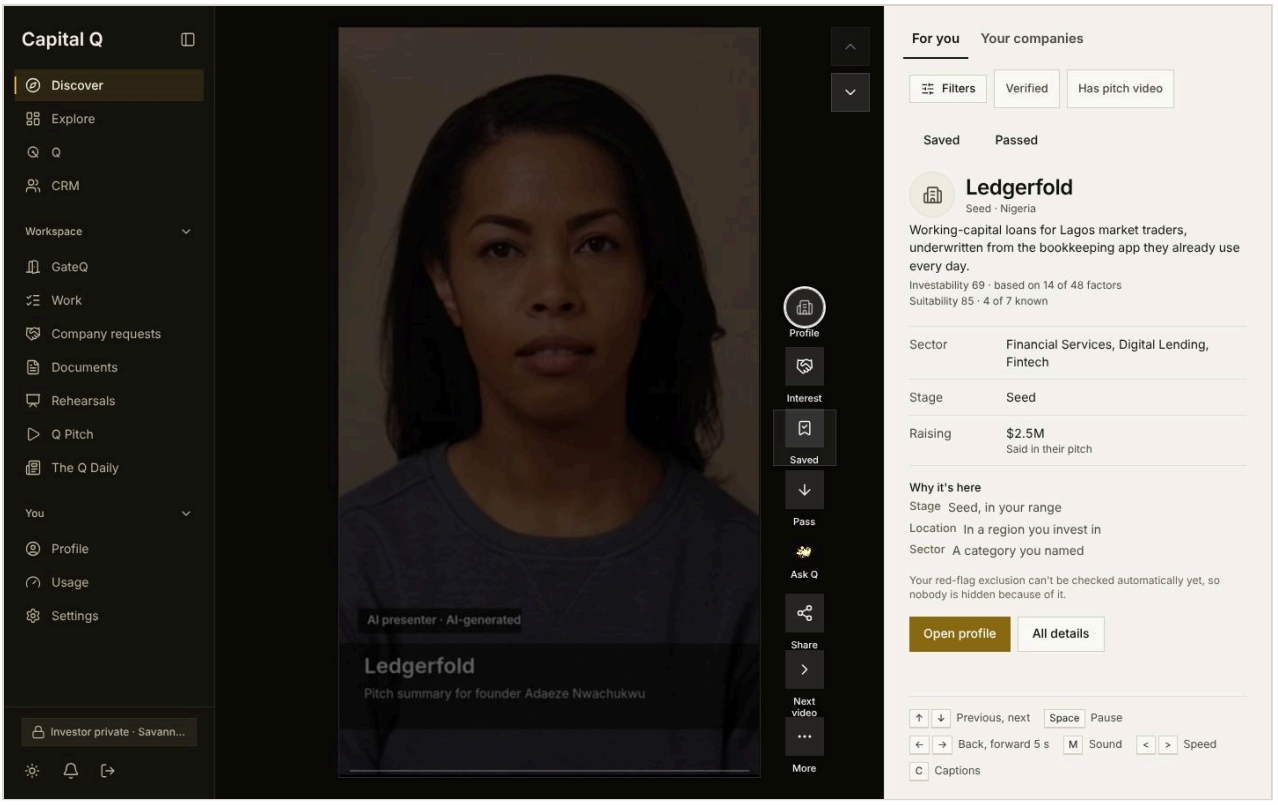

Figure 112. Ledgerfold in Discover.

2. **Save it.** Click **Save**. It goes to your Saved list. Ledgerfold is not told.

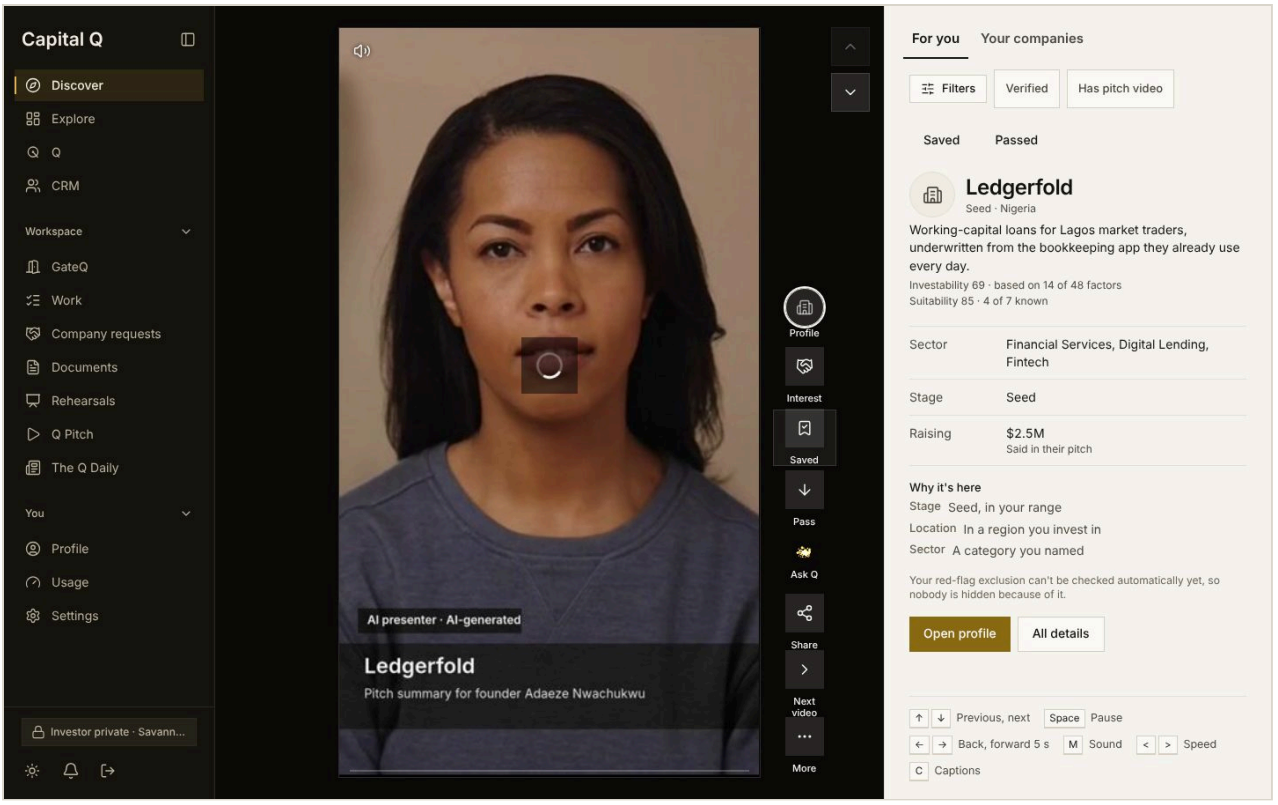

Figure 113. After clicking Save.

3. **Ask Q.** Click **Ask Q**, or open Q and ask “What are the main risks with Ledgerfold?”. Q answers with a card that separates what is verified from what is claimed or unknown.

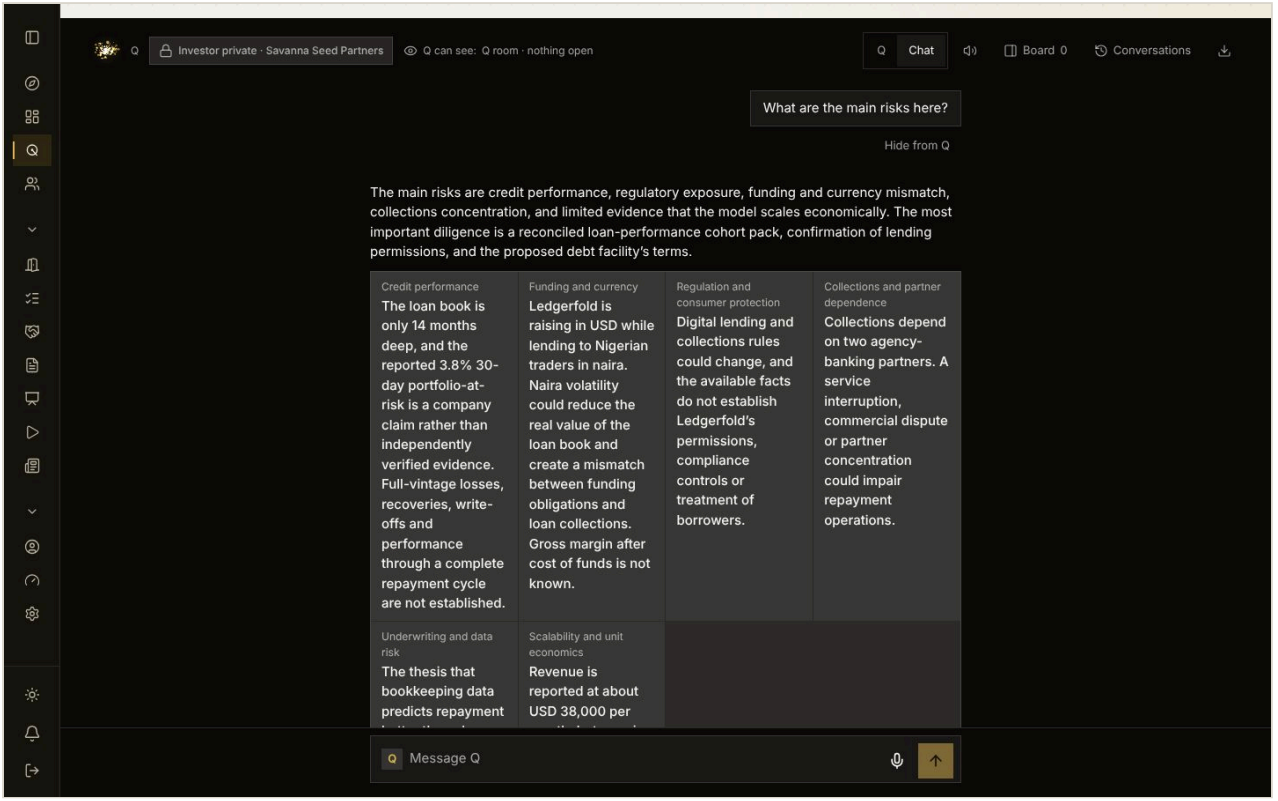

Figure 114. Q’s risk assessment of Ledgerfold.

4. **Compare.** Click **Saved**, tick Ledgerfold and another company, and click **Compare side by side**. Or ask Q: “Compare Ledgerfold and Harbourline Cargo against my mandate.”

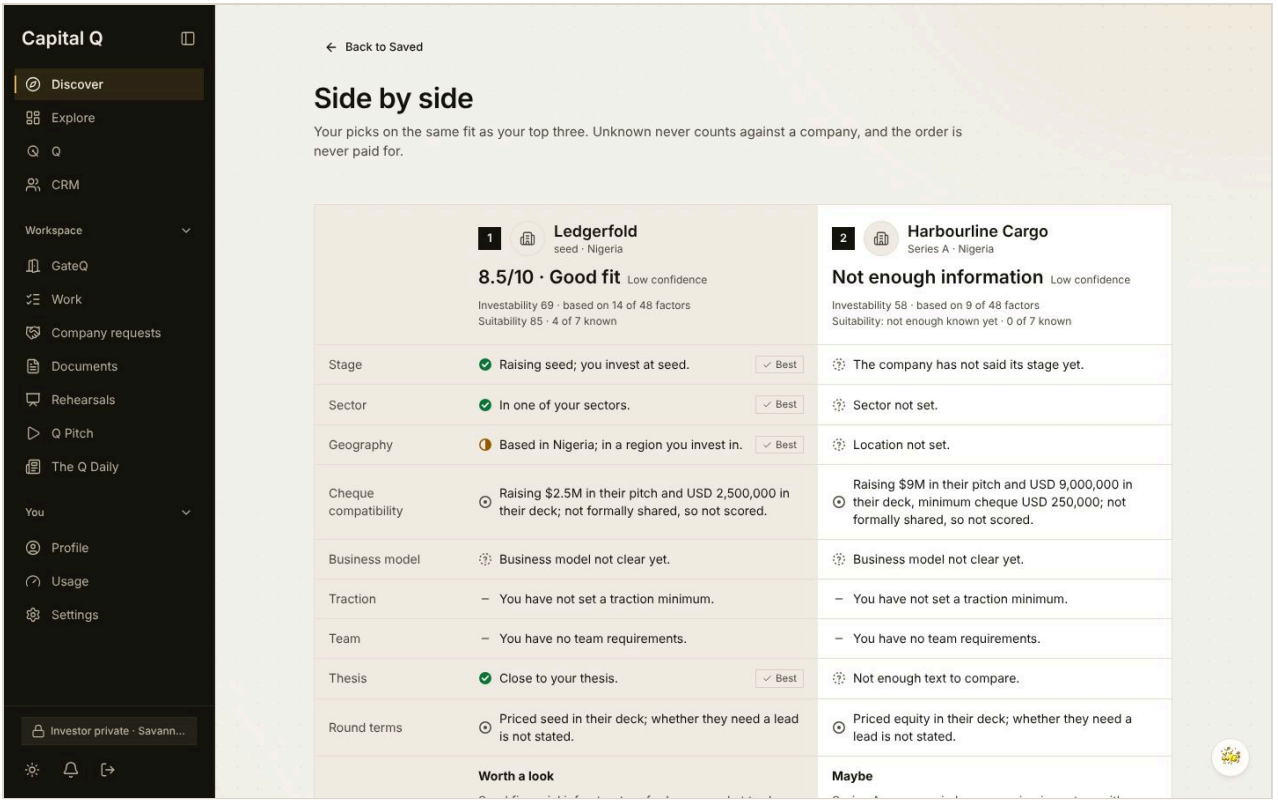

Figure 115. Side by side.

5. **Read the full profile.** Click **Open profile**. Check the deck, the data room and the team tabs.

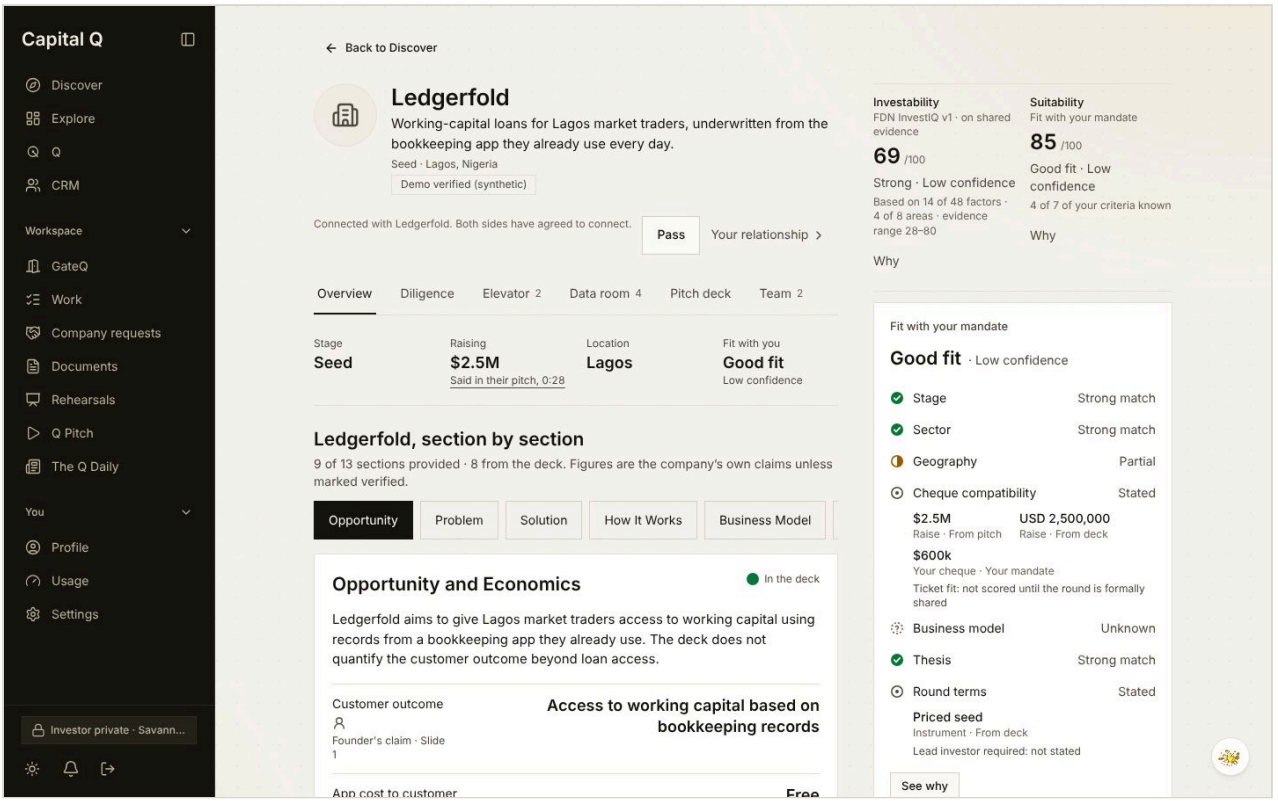

Figure 116. Ledgerfold’s profile.

6. **Express interest.** Back in Discover, click **Interest**, then **Express interest**. Ledgerfold's founders are told you would like to explore. In this demo, Ledgerfold has already accepted, so you are *Connected*.

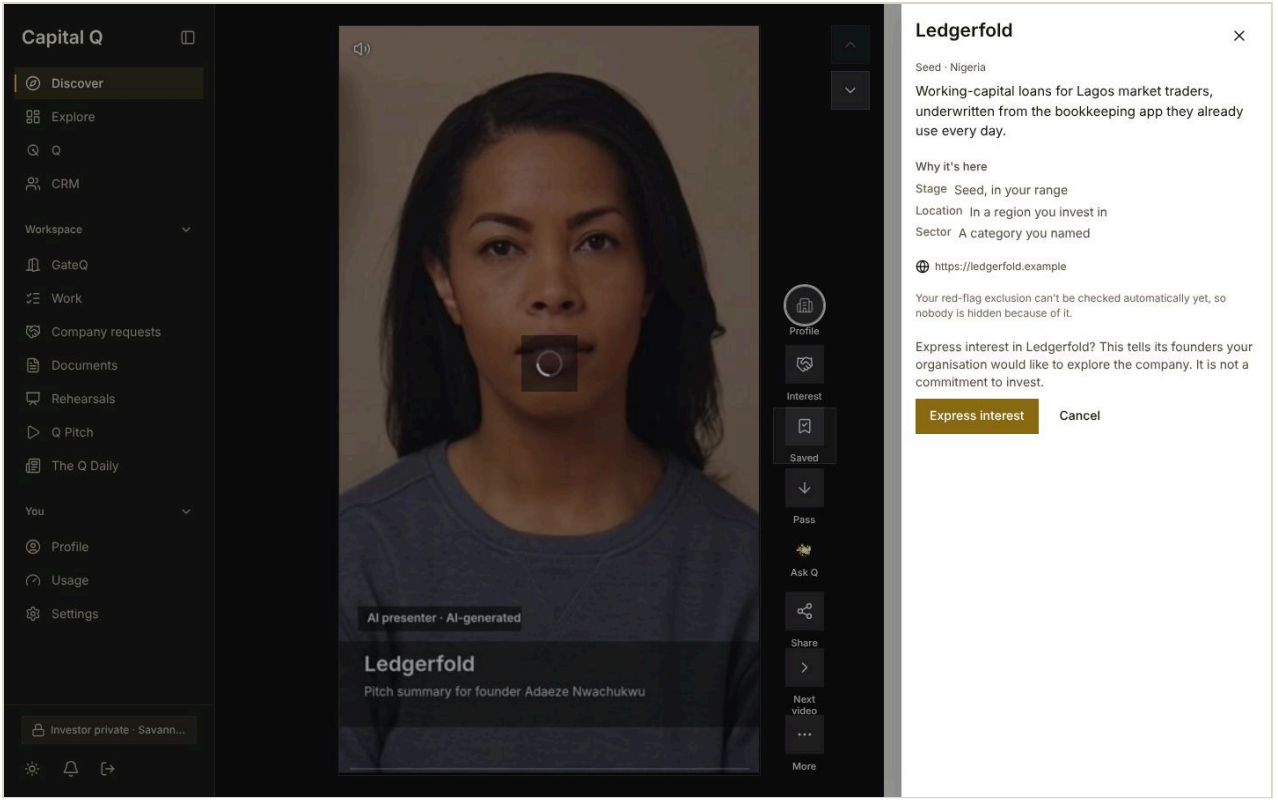

Figure 117. Express interest.

7. **Follow up in the CRM.** Click **CRM**. Ledgerfold is in your pipeline. Click its name to open the record.

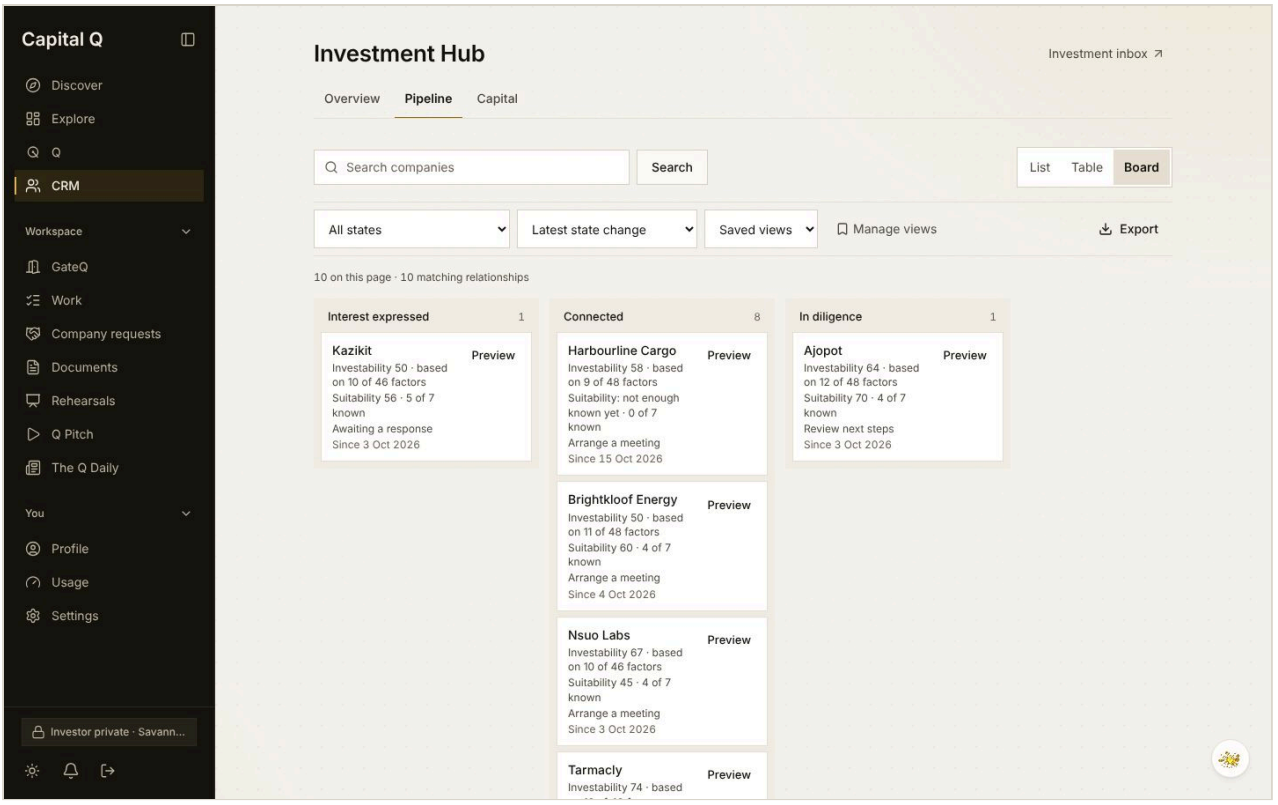

Figure 118. Your pipeline as a board.

8. **Write a private note.** Scroll to **Private notes**, type your thoughts, and click **Save note**. Only your team sees it.

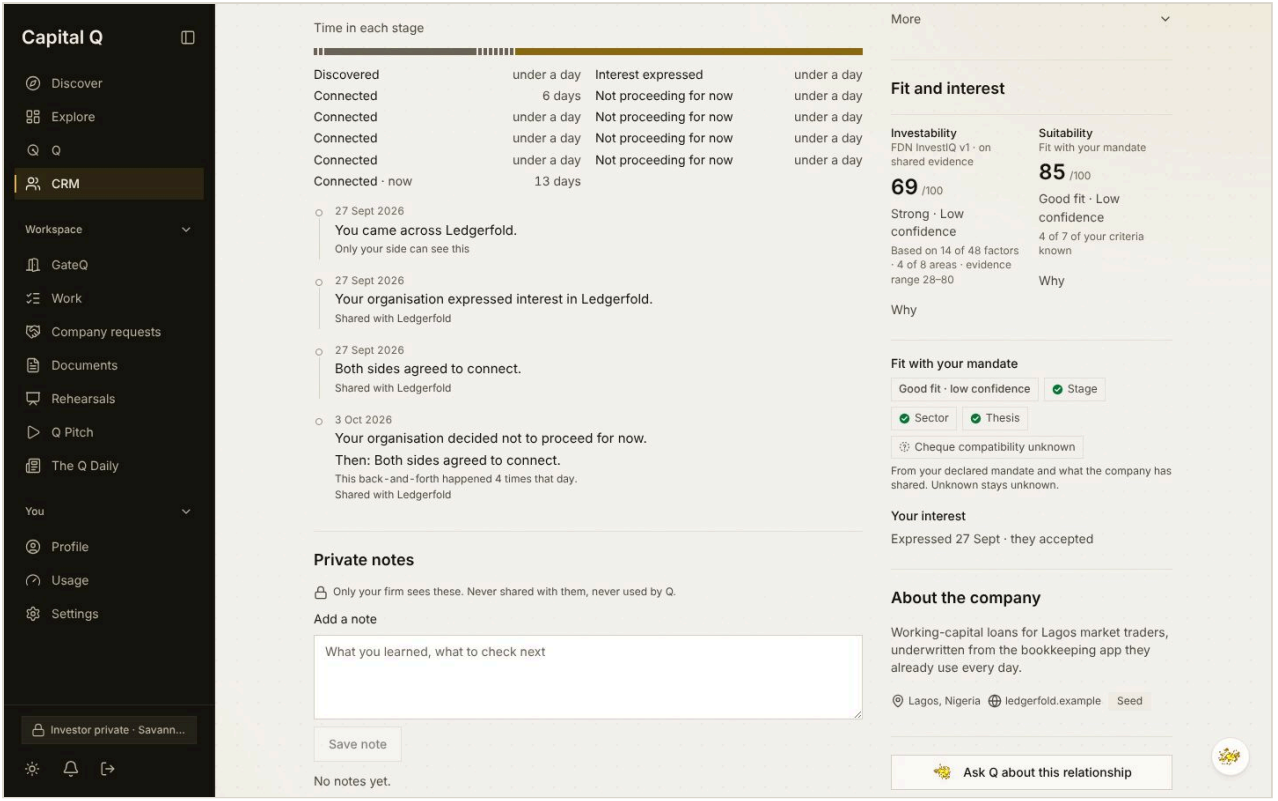

Figure 119. Private notes on the record.

9. **Book a meeting.** Click **Book a call**, then **Find a time**. (Connect Google Calendar in Settings first.) You can also click **Have Q join a call**.

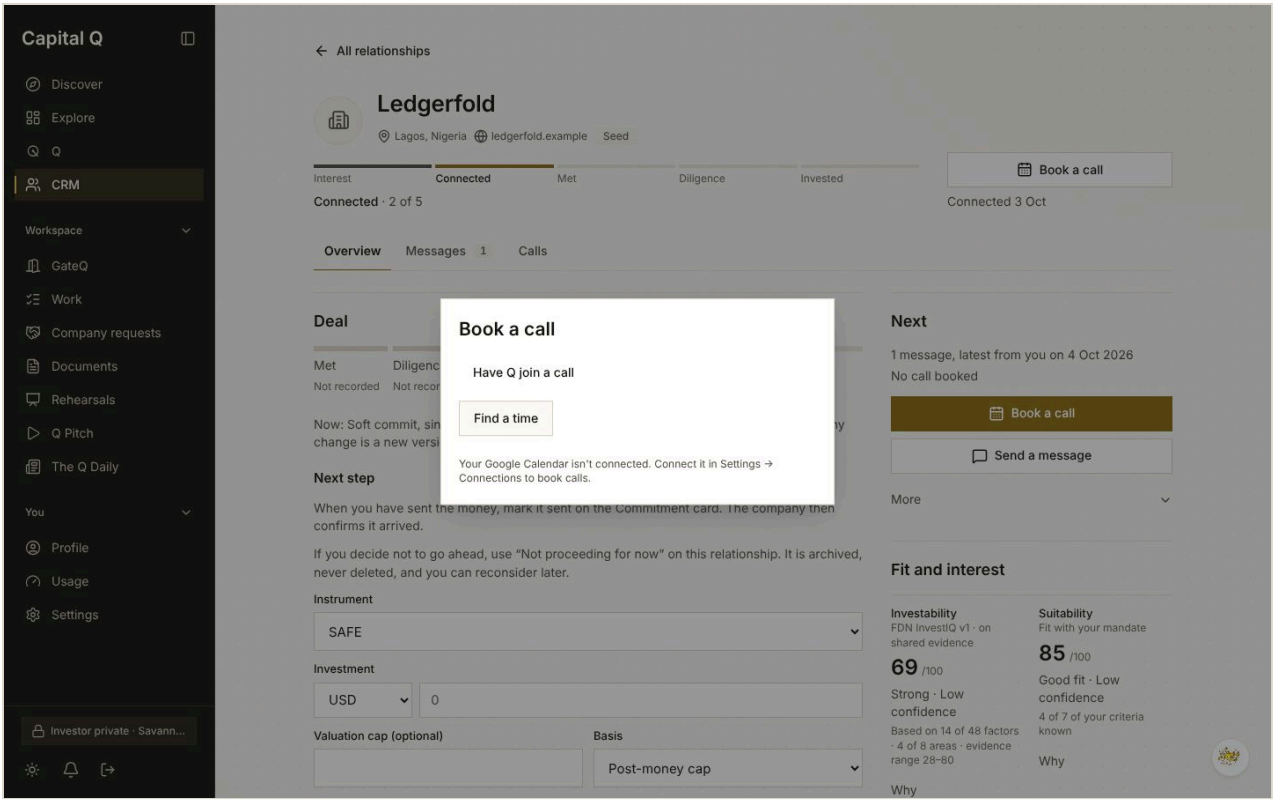

Figure 120. Book a call.

10. **Record your decision.** After the meeting, move the deal forward with **Record the terms**, or record **Pause for now** or **Not proceeding for now**. If you go ahead, the commitment appears on the CRM **Capital** tab, where you click **Mark as sent** once the money is wired.

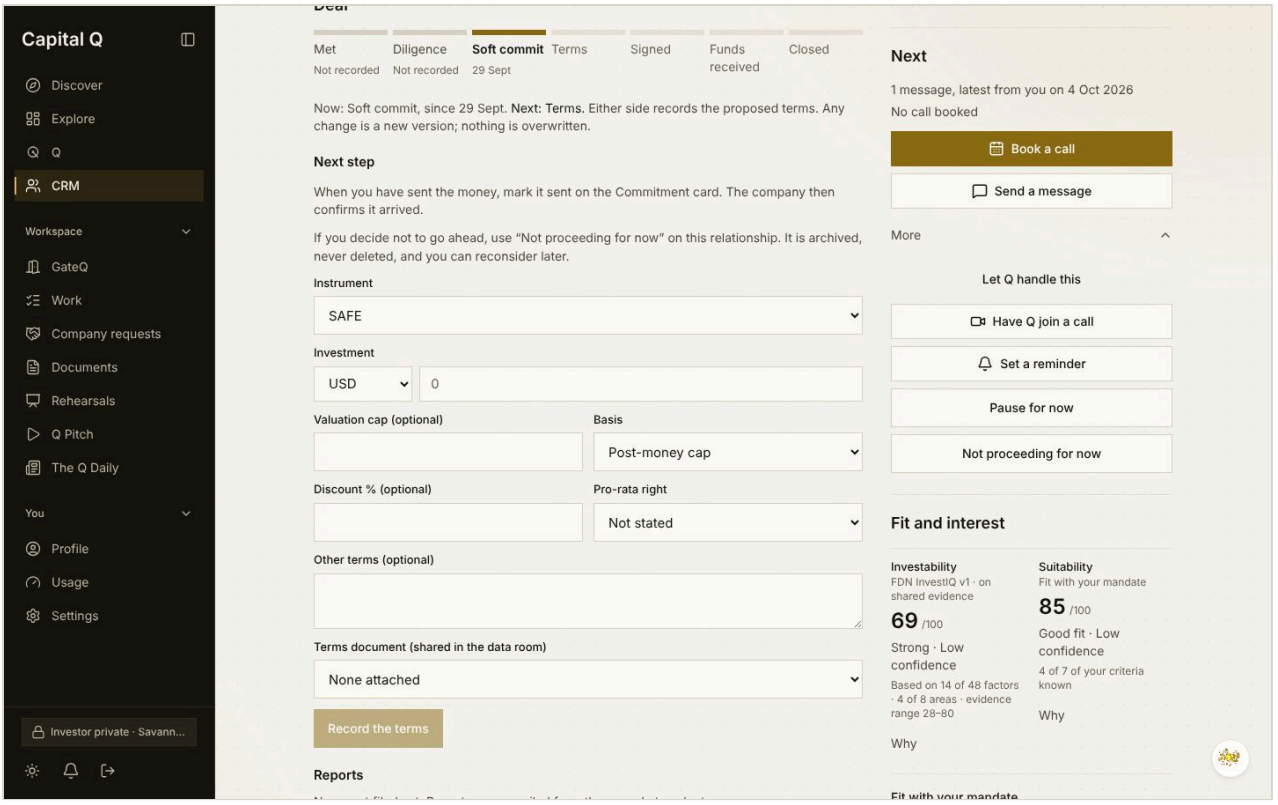

Figure 121. Decision buttons on the record.

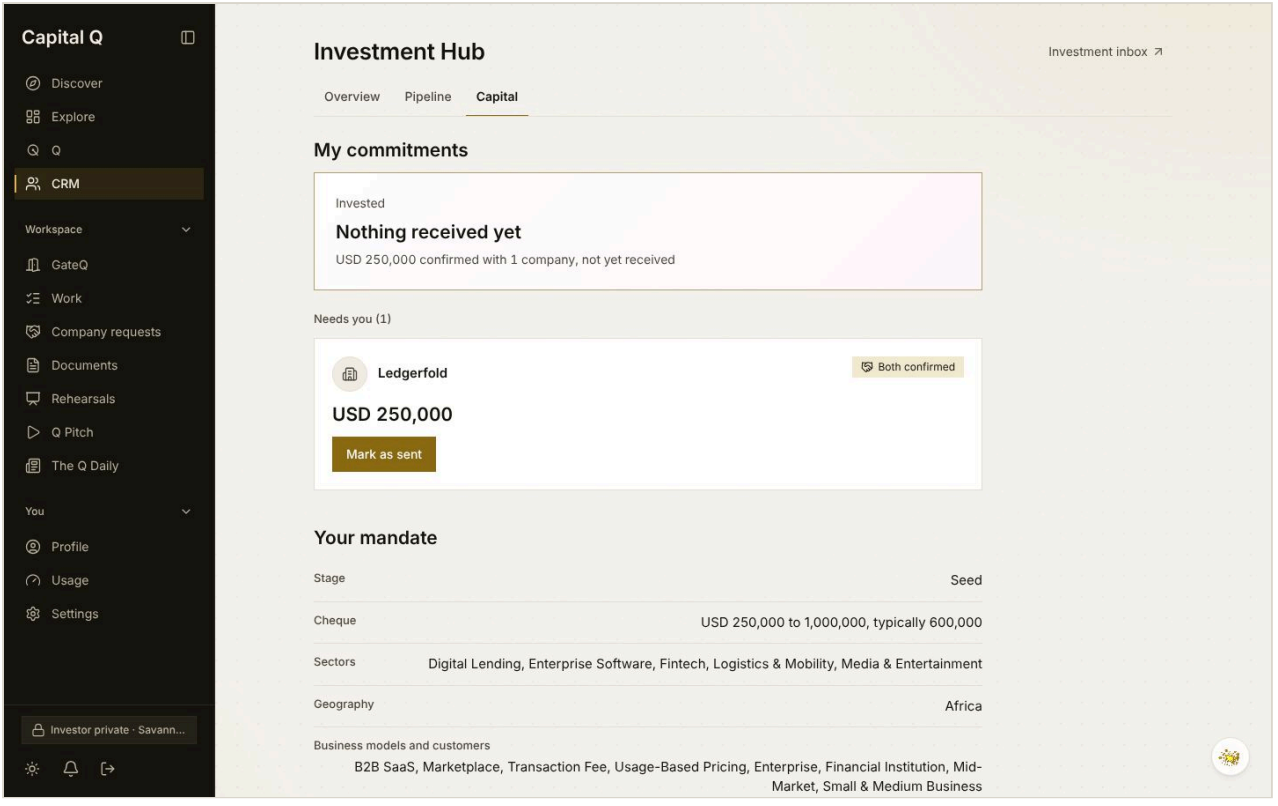

Figure 122. The Ledgerfold commitment on the Capital tab, ready to mark as sent.

Story 2. A founder gets ready, applies and tracks interest

Sign in as Babatunde (Harbourline Cargo). Ledgerfold's account shows the same steps further along.

1. **Sign up and onboard.** Click **Get started**, choose **Raise capital**, and create your account. Q greets you and runs the set-up as a conversation: one answer fills several fields, you can drop in your deck as you go, and you can stop with **Continue later**. (See section 4.23.)
2. **Upload documents.** Click **Documents**, then **Upload**. Add your deck, accounts and team summary. Each shows "Q has read it".

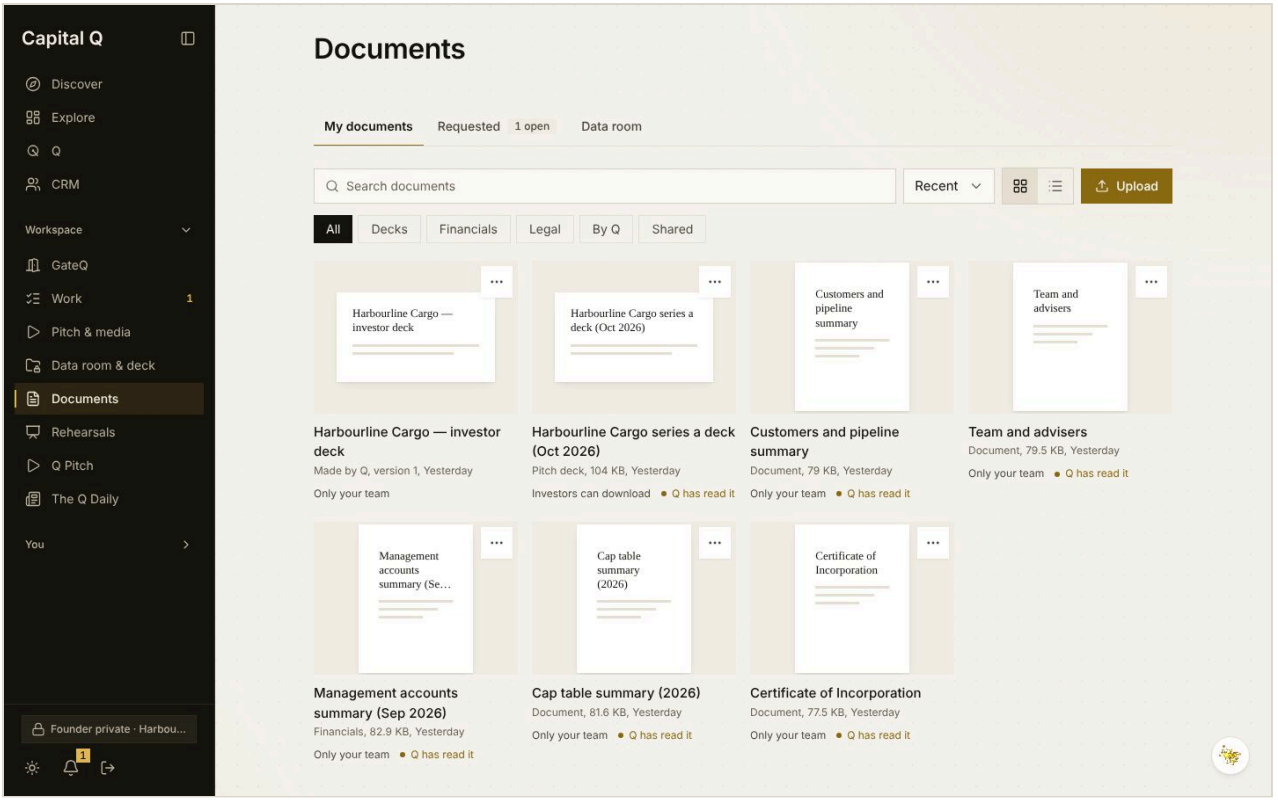

Figure 123. Harbourline's uploaded documents.

3. **Check what Q read in your deck.** Open the **Pitch deck** tab on your company. Mark each section **Looks right** or **This is wrong**, then click **Confirm all and show**.

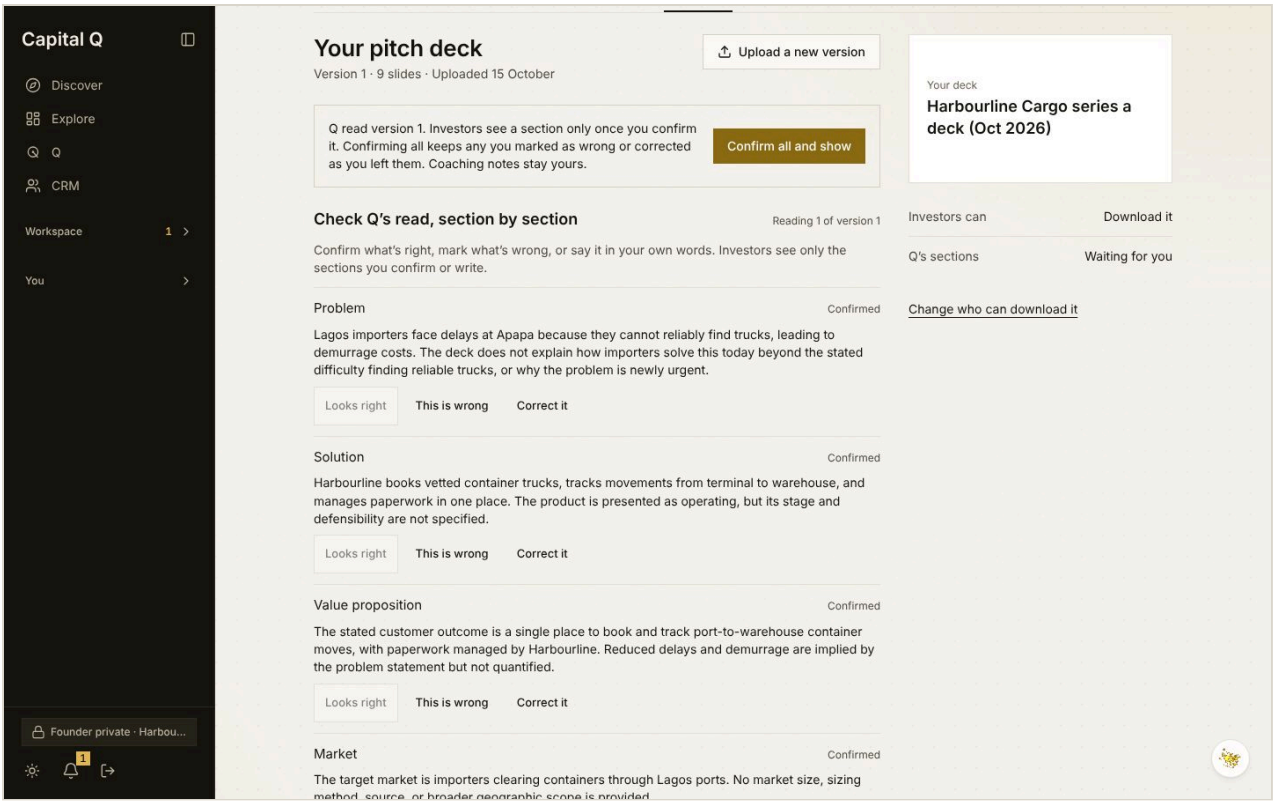

Figure 124. Confirming Q's reading of the deck.

4. **Let Q build the deck.** On **Capital**, click **Make my pitch deck**. Q drafts an investor deck from your documents. Ledgerfold's founder already has one.

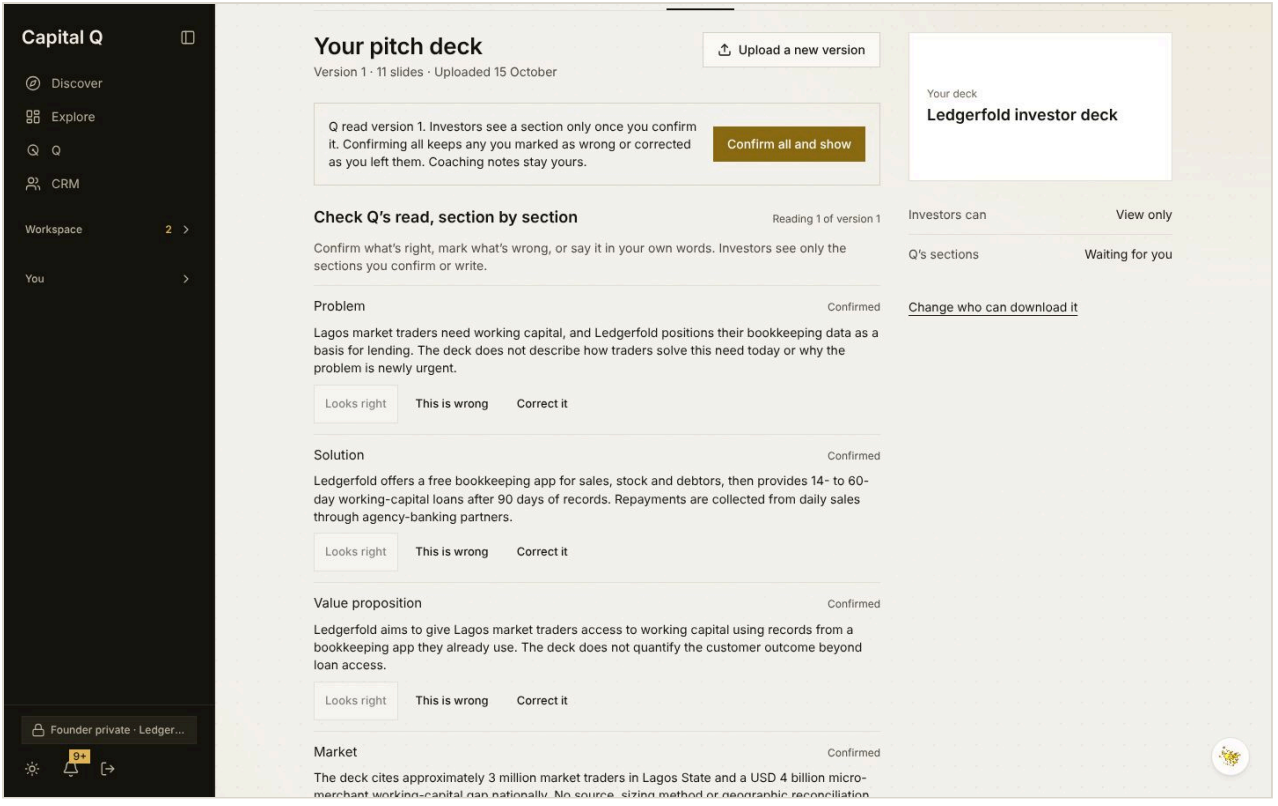

Figure 125. The deck Q prepared for Ledgerfold.

5. **Set up the data room.** Click **Data room & deck**. Choose who can see each document.

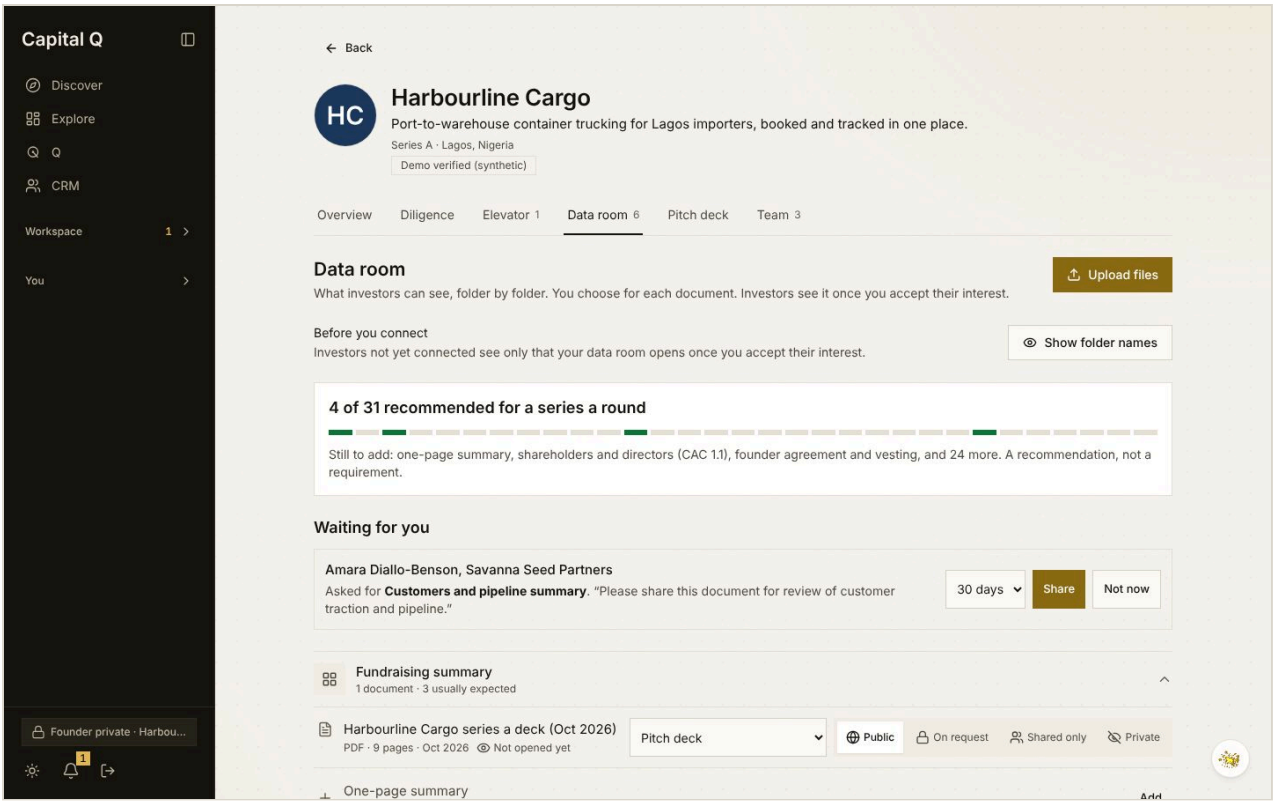

Figure 126. The data room.

6. **Publish a pitch.** Click **Pitch & media**, then **New video**, upload, choose who can see it, and publish. Your pitch now appears in investors' Discover feeds.

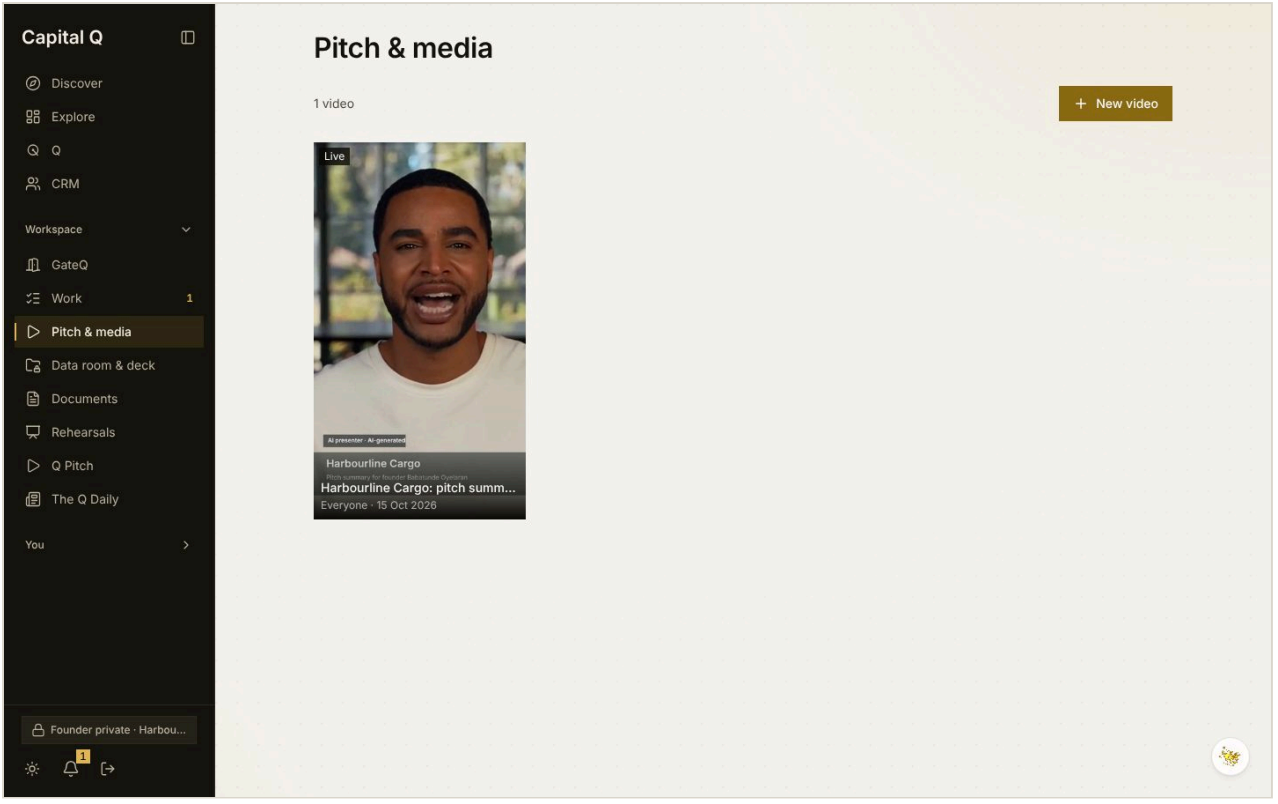

Figure 127. Harbourline's live pitch video.

7. **Find an investor.** Click **Discover** and open Savanna Seed Partners. Check which of their published rules you meet.

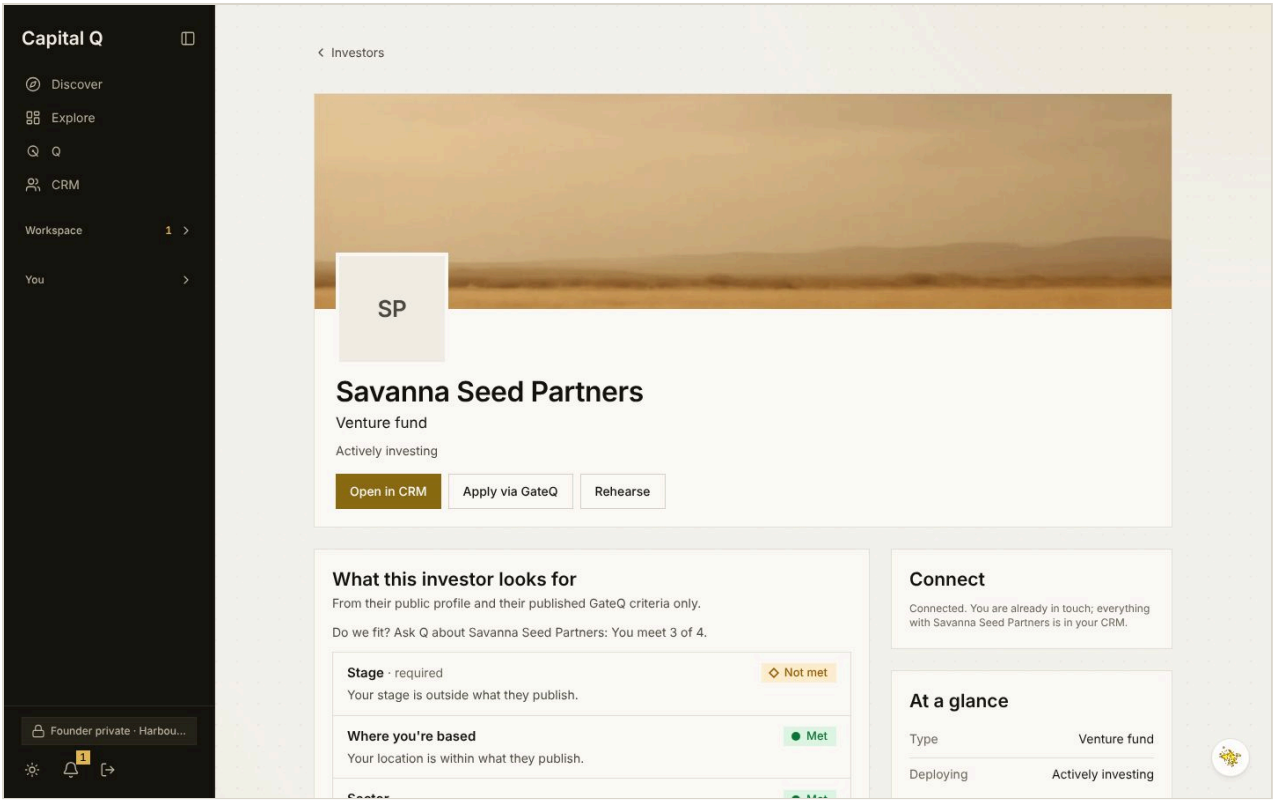

Figure 128. Savanna Seed Partners' profile.

8. **Apply through GateQ.** Open the investor's gate. Confirm your details and check the four short steps Q filled in. Q then offers a short **video interview** first; agree to the recording and start it, or answer the same questions by typing. Review, then press **Submit**.

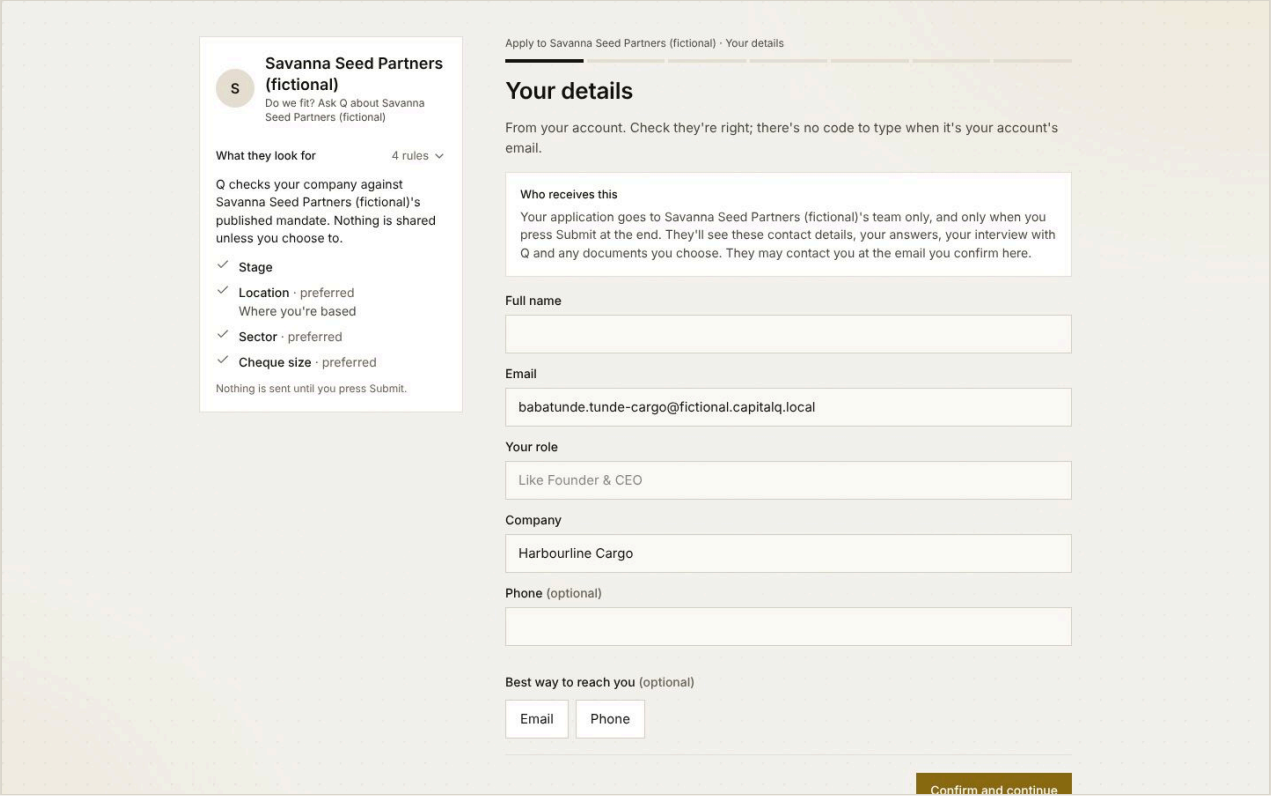

Figure 129. The gate: rules on the left, your application on the right.

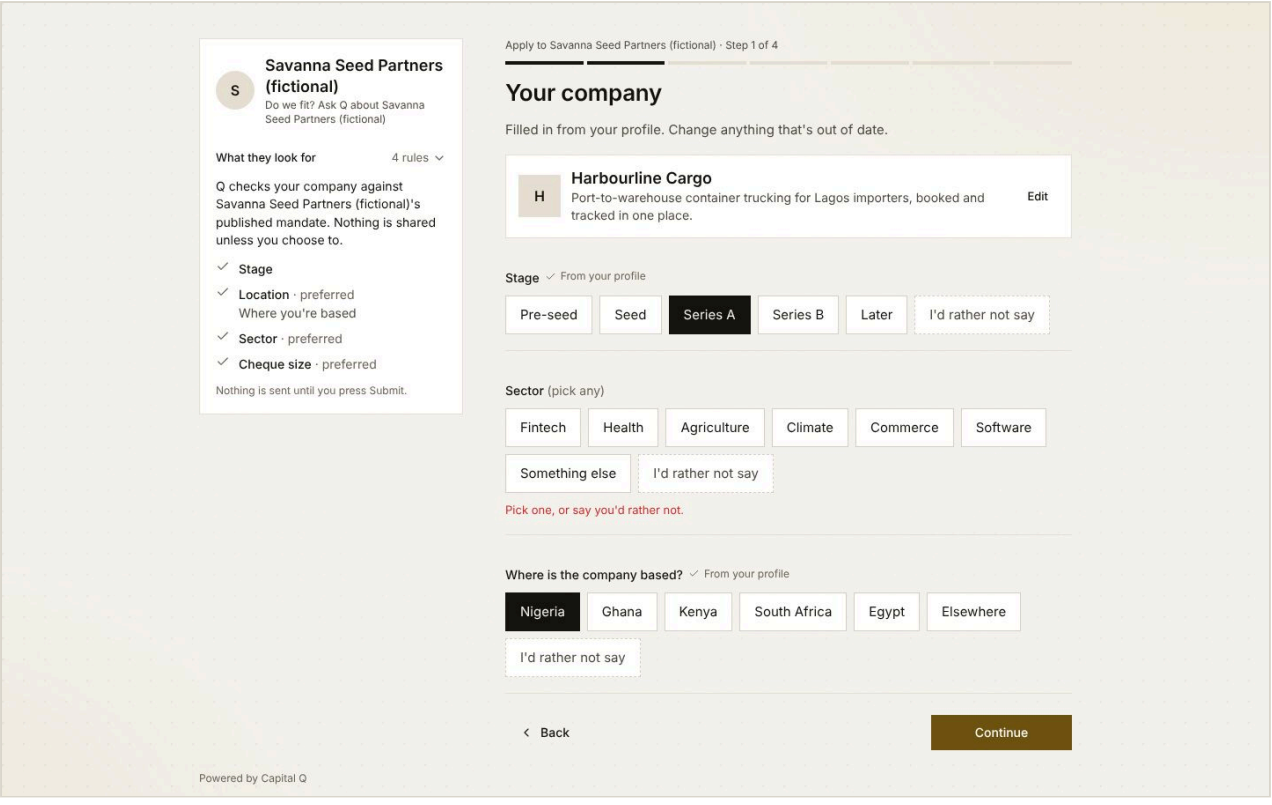

Figure 130. Step 1 of 4, already filled in from your profile.

9. **Rehearse.** Click **Rehearsals**, then **Rehearse** beside the investor. Q plays the investor by voice. Read your review afterwards.

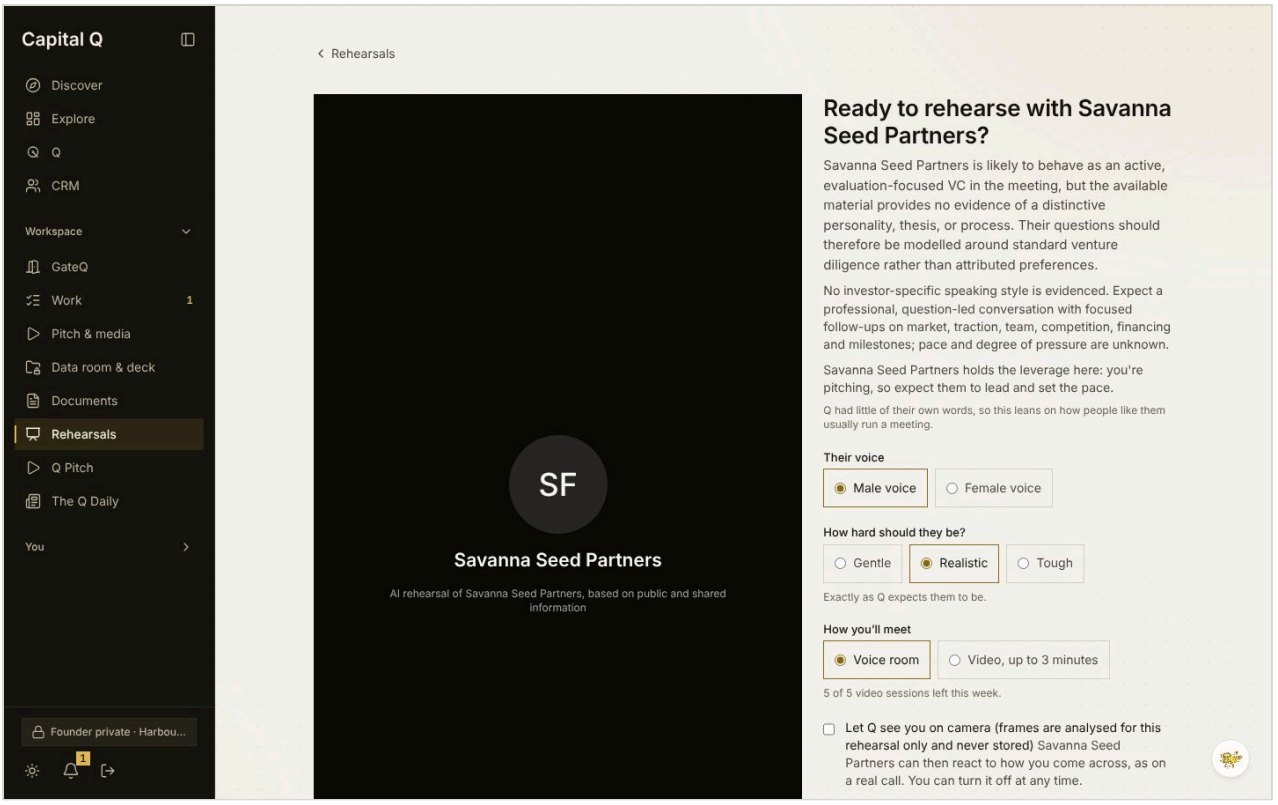

Figure 131. Ready to rehearse with Savanna Seed Partners.

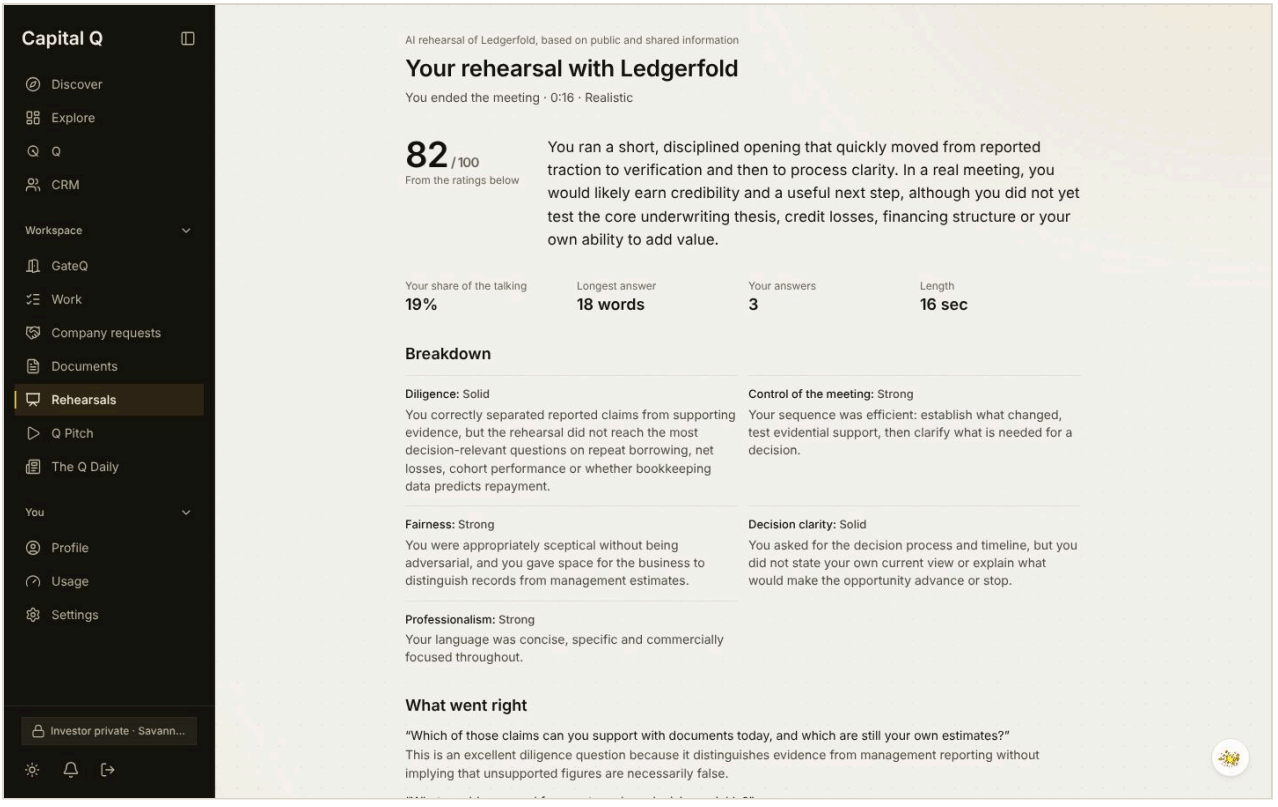

Figure 132. A rehearsal review: a score, what went right, what to improve, and the transcript.

10. **Track interest in the CRM.** When an investor expresses interest, it appears on **Q** and under **Investor interest**. Click **Accept** to connect. Then follow each investor in your **Fundraising Hub**.

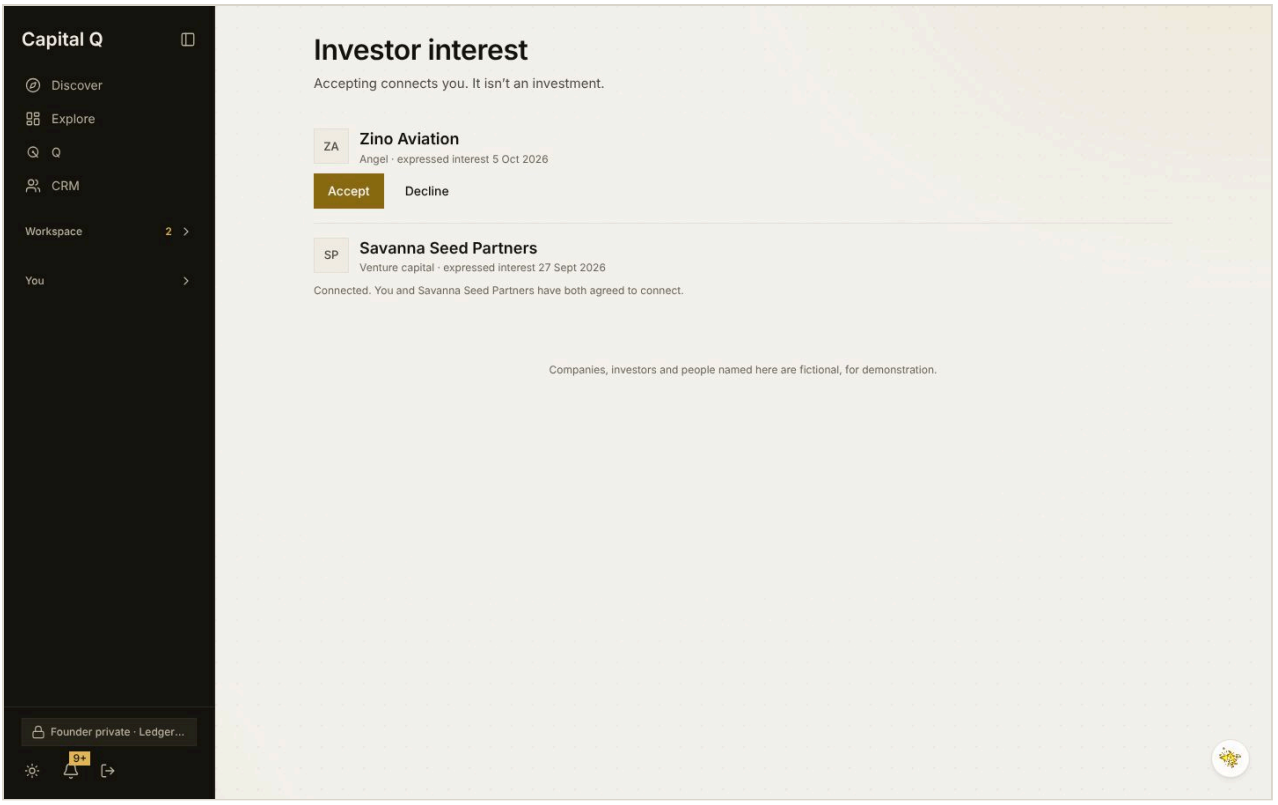

Figure 133. Answering investor interest.

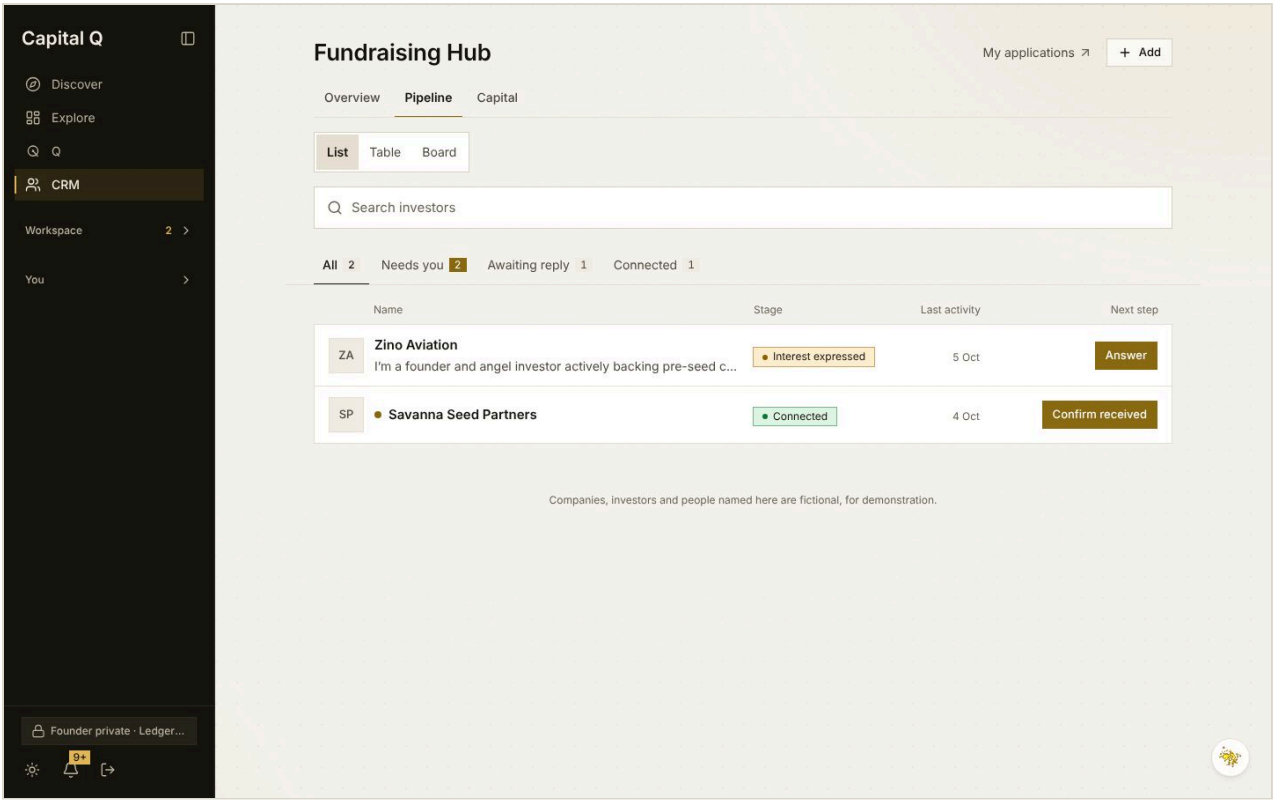

Figure 134. Ledgerfold's Fundraising Hub.

Story 3. An investor reviews a GateQ application and decides

Sign in as Amara.

1. Click **GateQ**. The inbox opens on **Inbox**. Applications show how many of your rules they meet.

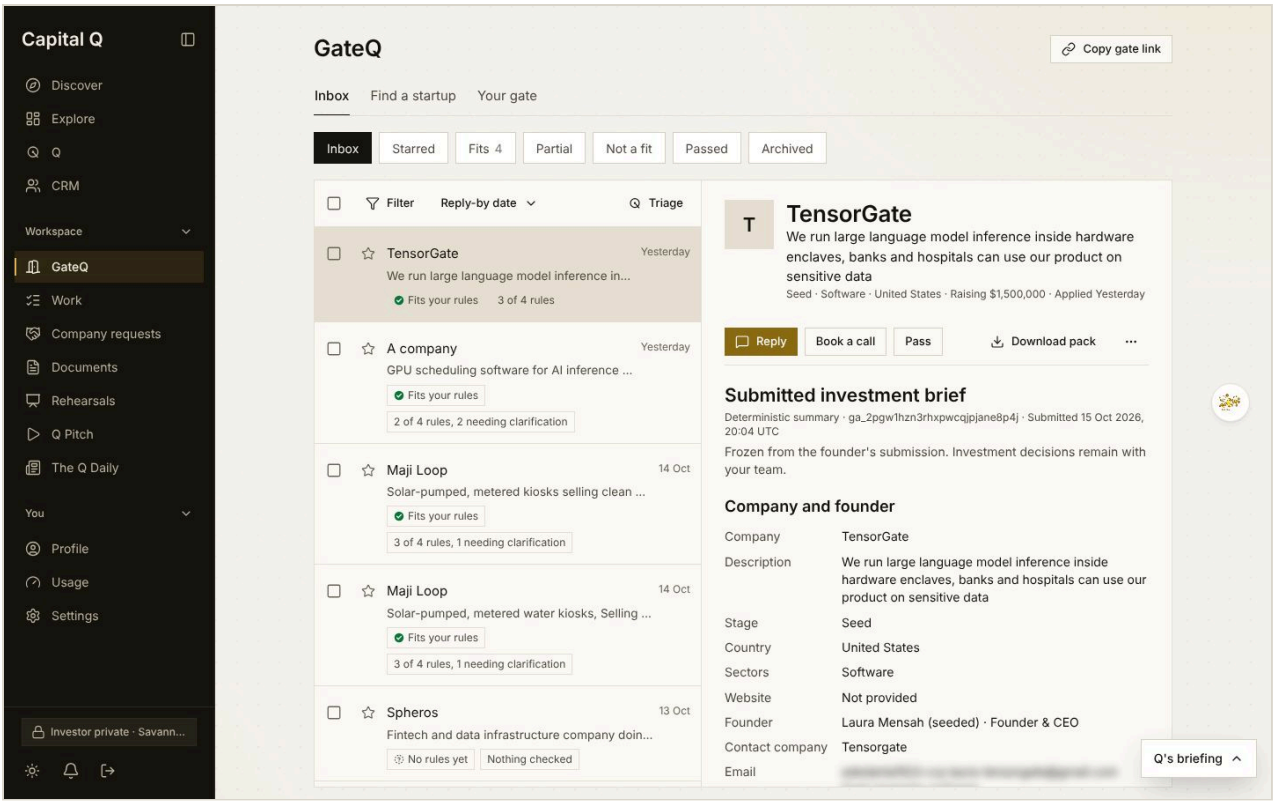

Figure 135. The GateQ inbox.

2. Click **Fits** to see only the applications that meet your rules. Click one, for example Maji Loop.
3. Read the dossier: the submitted investment brief, what they shared, any rules needing clarification, and what has happened so far.

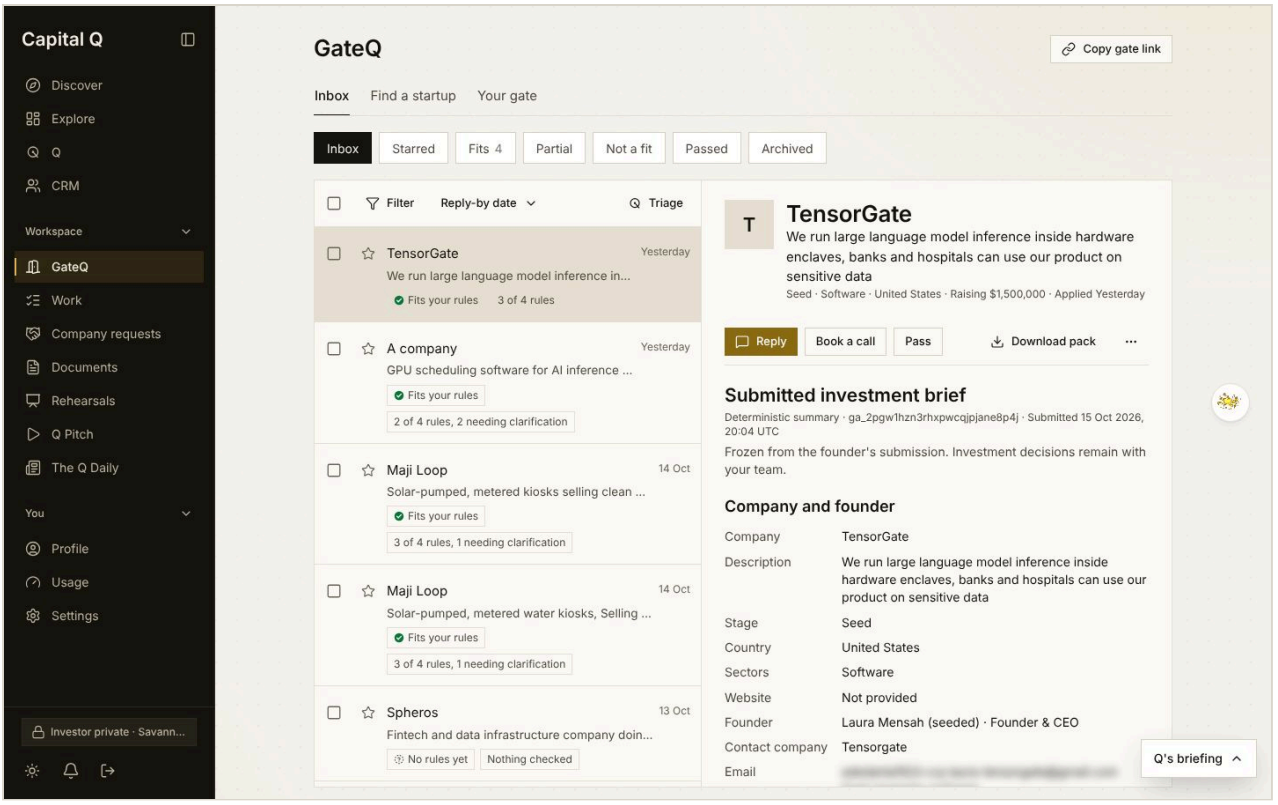

Figure 136. The Maji Loop dossier.

4. Ask Q: “Summarise this application and tell me what to ask.” Q answers from the dossier only.
5. Add a note for your team with **Add note**, or star it.
6. Decide. Click **Reply** to invite them to a call, or **Pass**. Q can draft the pass for you; you approve the exact words before it is sent. Either way, the founder hears back, as your gate promises.

Story 4. A team owner invites a teammate

Sign in as Babatunde (owner of Harbourline Cargo).

1. Click **You** in the sidebar, then **Settings**, then **Team**.

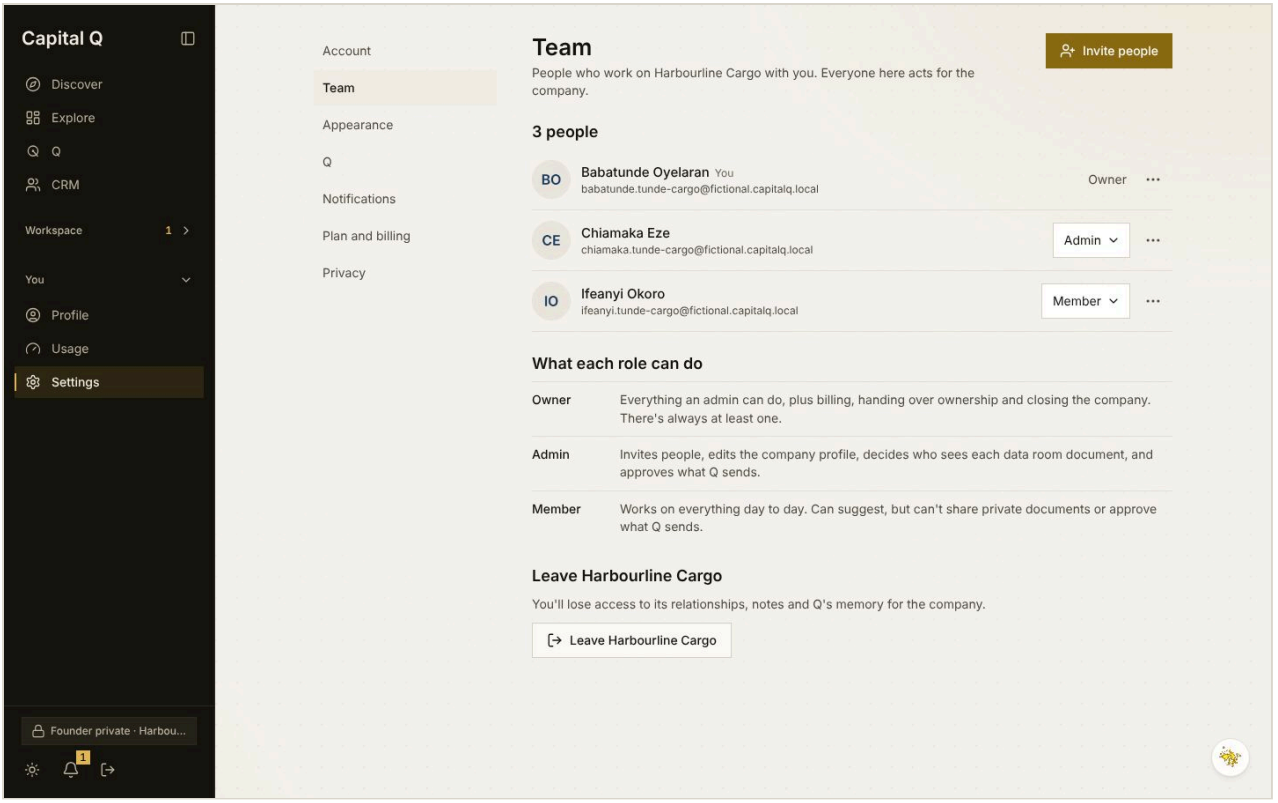

Figure 137. The team page.

2. Click **Invite people**. Type the person's email (you can add several, separated by commas), choose **Member** or **Admin**, add a short message if you like, and click **Send invitation**.

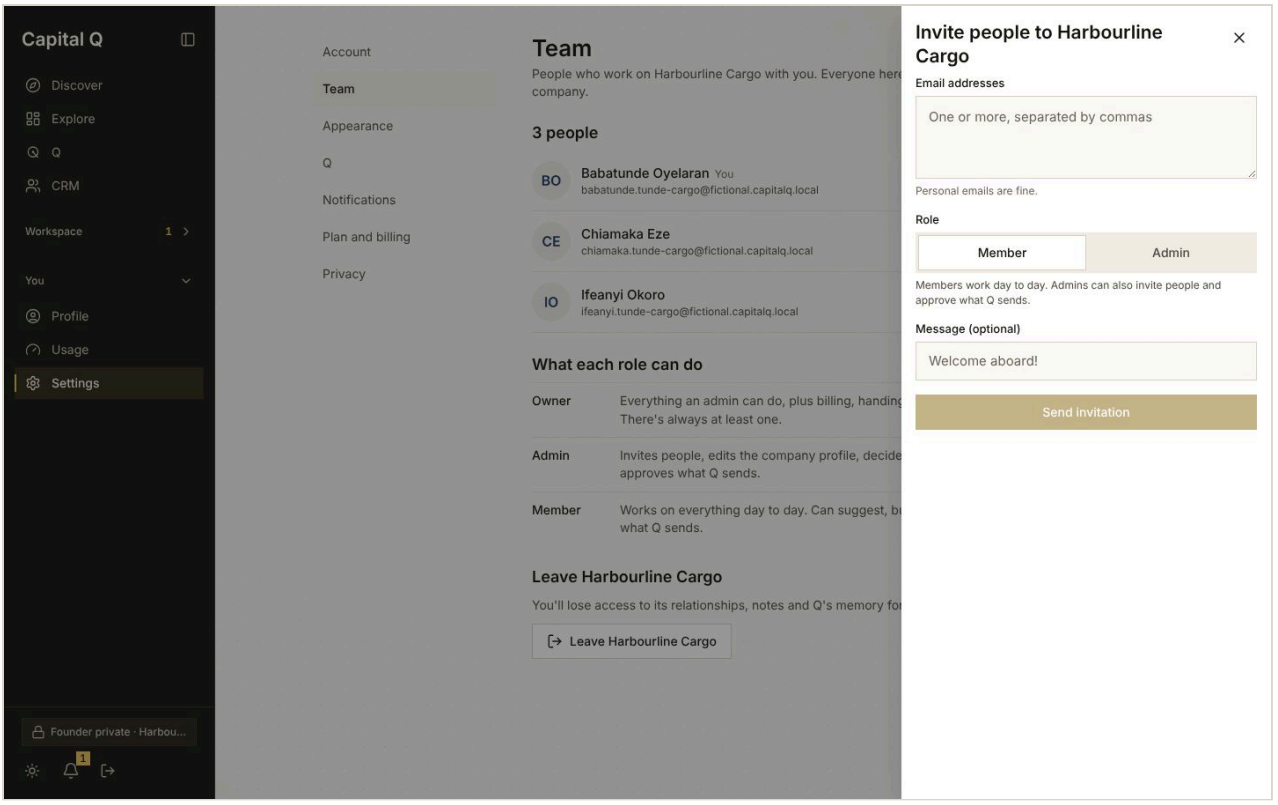

Figure 138. The invite form.

3. The teammate gets an email. When they sign in to Capital Q with that email, they see an invitation card. They click **Accept** and join the company. They can also decline.
4. Back on the Team page, the new person appears with their role. You can change their role, resend or cancel an invitation, or remove someone.

Not pictured

The acceptance screen is not shown: taking it would send a real invitation from a demo account.

Story 5. Q Work: a multi-step diligence job, approved by you

Sign in as Amara. This job already exists on the demo account, so you can follow it without starting a new one.

1. Click **Work**. In **Give Q a task**, Amara typed: “Get the team ready for our Harbourline Cargo diligence: research, a reviewed memo and founder questions.”
2. Q showed its plan and its budget, and waited. Amara clicked **Approve**. Nothing starts until you approve the plan.
3. Q’s team did four steps: research on the company, a document review, an investment brief that a second specialist checked, and five questions for the founder. Click **Team map** to see who did what.

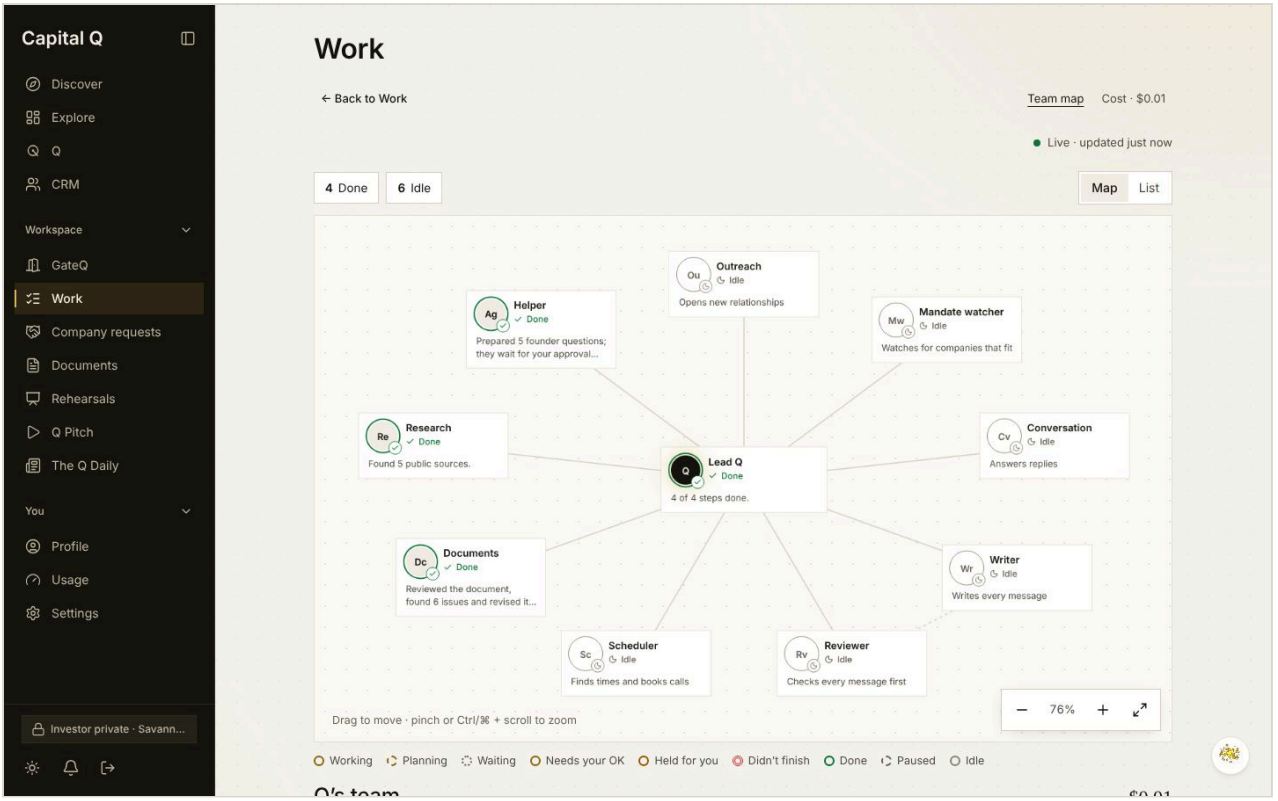

Figure 139. The team map for the job.

4. The job shows under **Done for you**. Click **Open document** to read the investment brief Q wrote.

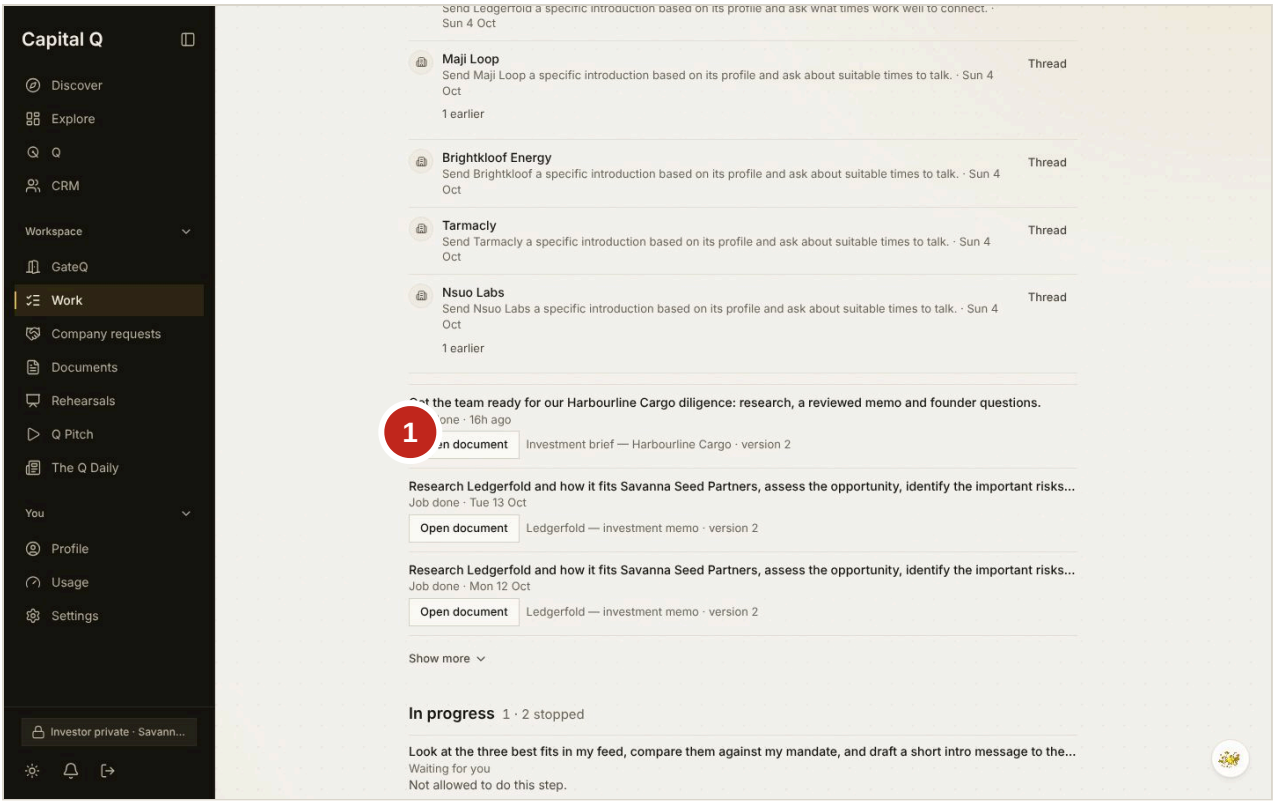

Figure 140. The finished job, with its investment brief.

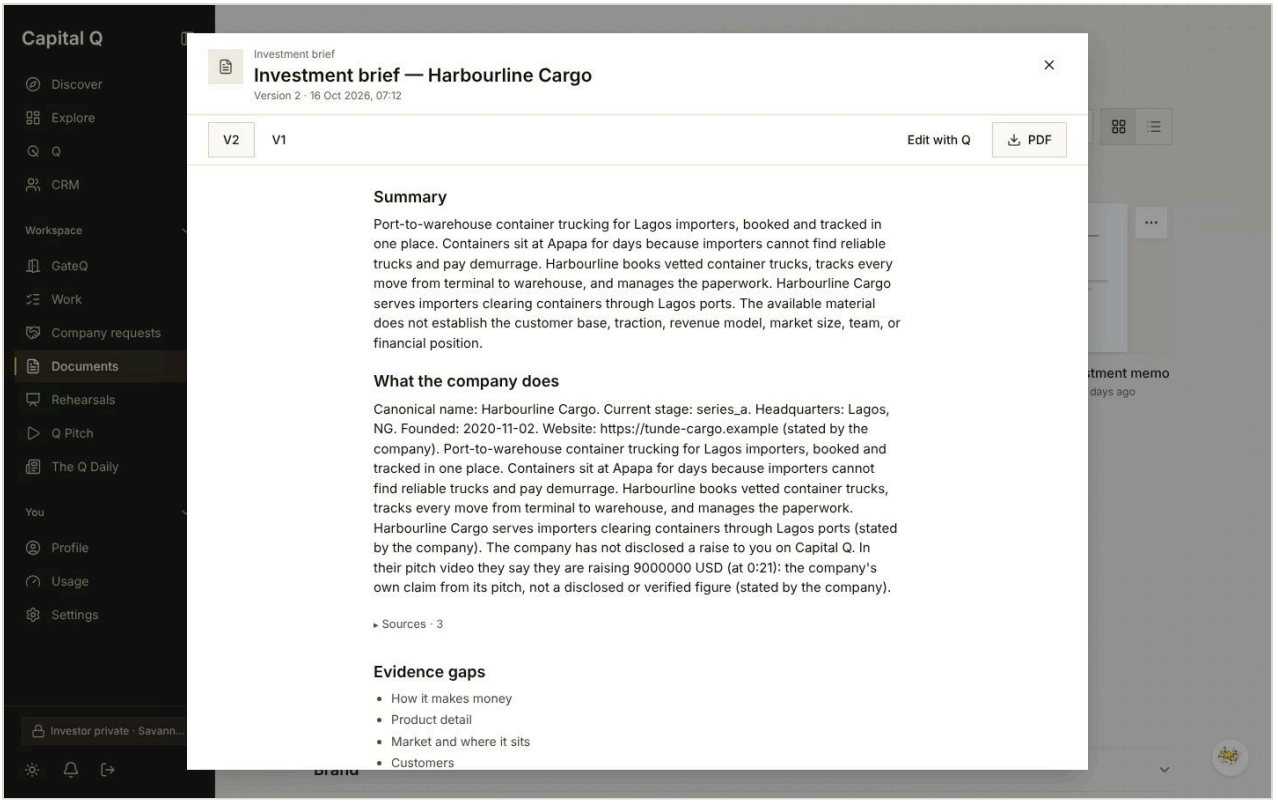

Figure 141. The investment brief Q wrote on Harbourline Cargo. Use Edit with Q to change it, V1/V2 to see versions, or PDF to download it.

5. The five founder questions go to another company, so Q did not send them. They wait under **Needs you**, word for word.

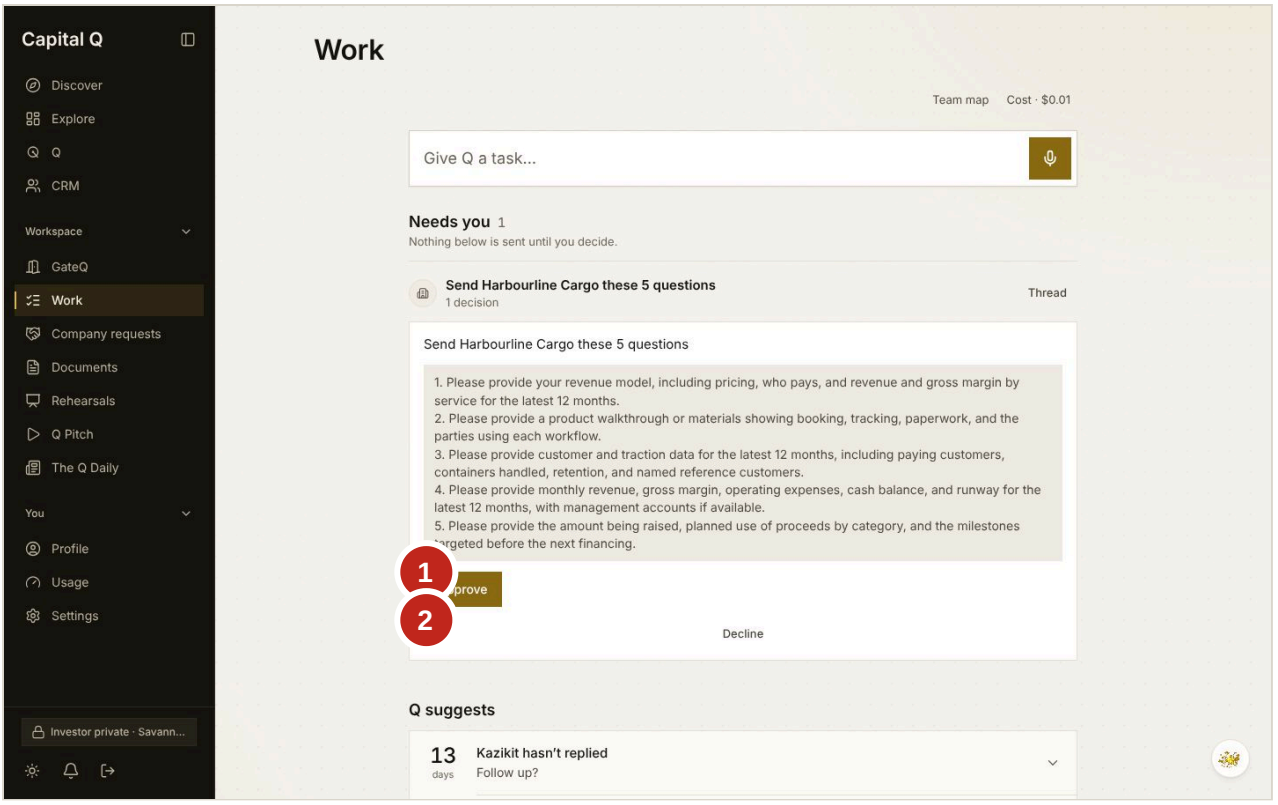

Figure 142. "Send Harbourline Cargo these 5 questions" waiting for your yes.

6. Read them. Click **Approve** to send them exactly as written, or **Decline**. If you ask Q to change the wording, you approve the new words again.

Good to know

Some older test jobs on the demo account show "Failed" or "Not allowed to do this step", each with a plain reason; nothing was sent for those. The Cost figure at the top of Q Work shows what Q's work has cost so far.

Story 6. Running Q Pitch

Sign in as Amara. Turn your sound on. The premiere takes 5 to 7 minutes.

1. Click **Q Pitch** in the Workspace group.

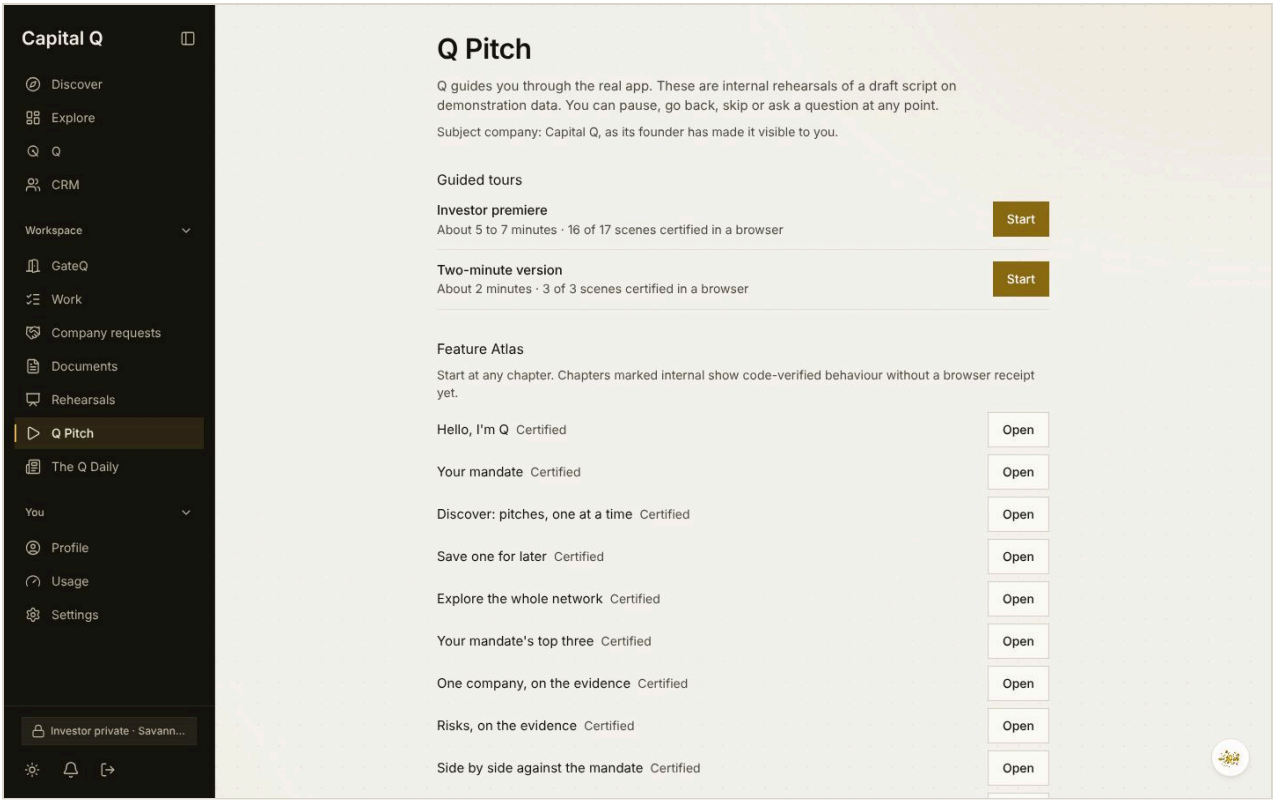

Figure 143. Q Pitch.

2. Click **Start** beside **Investor premiere**. Q opens the Q page and asks how to present; click **Start the tour** (or **Captions only**). Q introduces itself and begins.

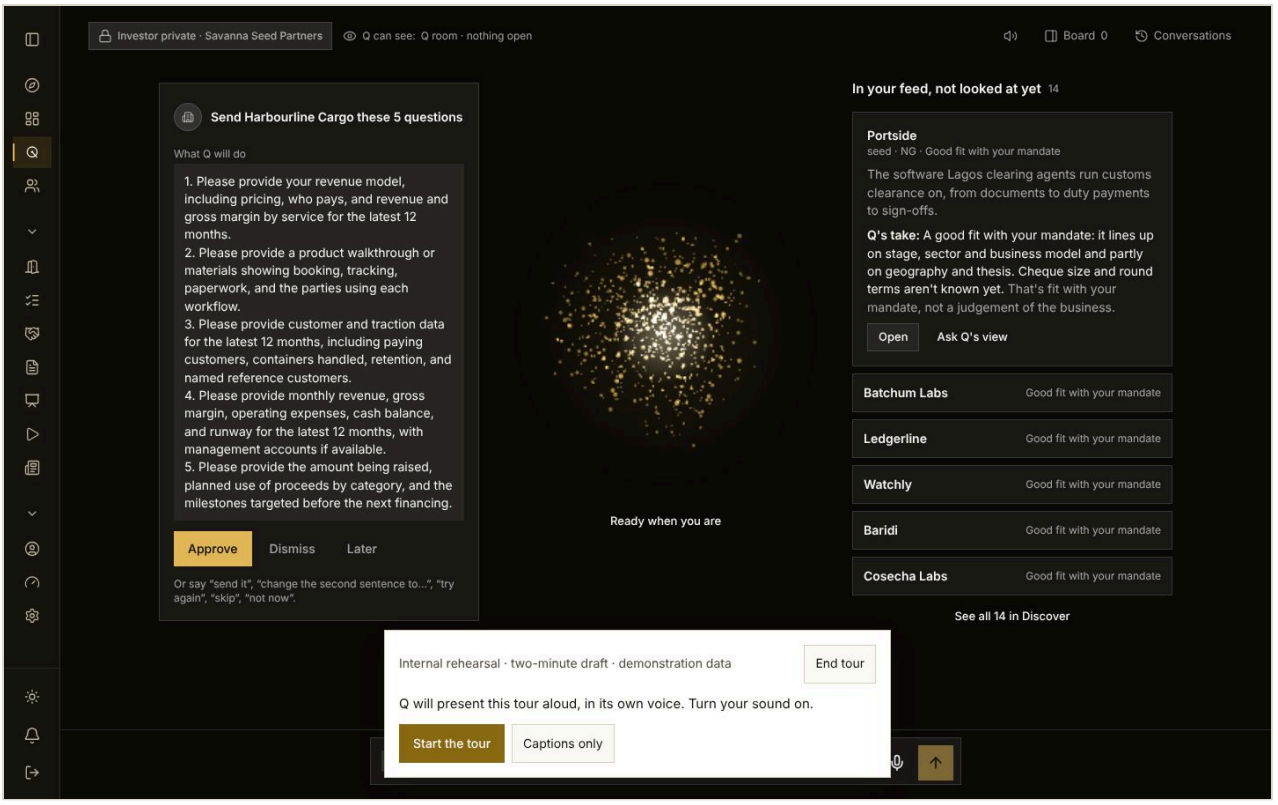

Figure 144. Choose Start the tour (with sound) or Captions only.

3. Sit back. Q opens each page itself and explains what you see, from your mandate to the CRM and Q Work.
4. Interrupt whenever you like: click **Pause** or **Back**, say “show me GateQ”, or ask a question. Q answers, then carries on.
5. Click **End** when you are done. Later, open a single chapter from the **Feature Atlas**.

Story 7. A new founder: sign-up to a complete profile

Use your own email address; the demo accounts have already done this.

1. On the home page, click **Get started**, choose **Raise capital**, fill in your name, company, email and password, and click **Create account**. Confirm your email.

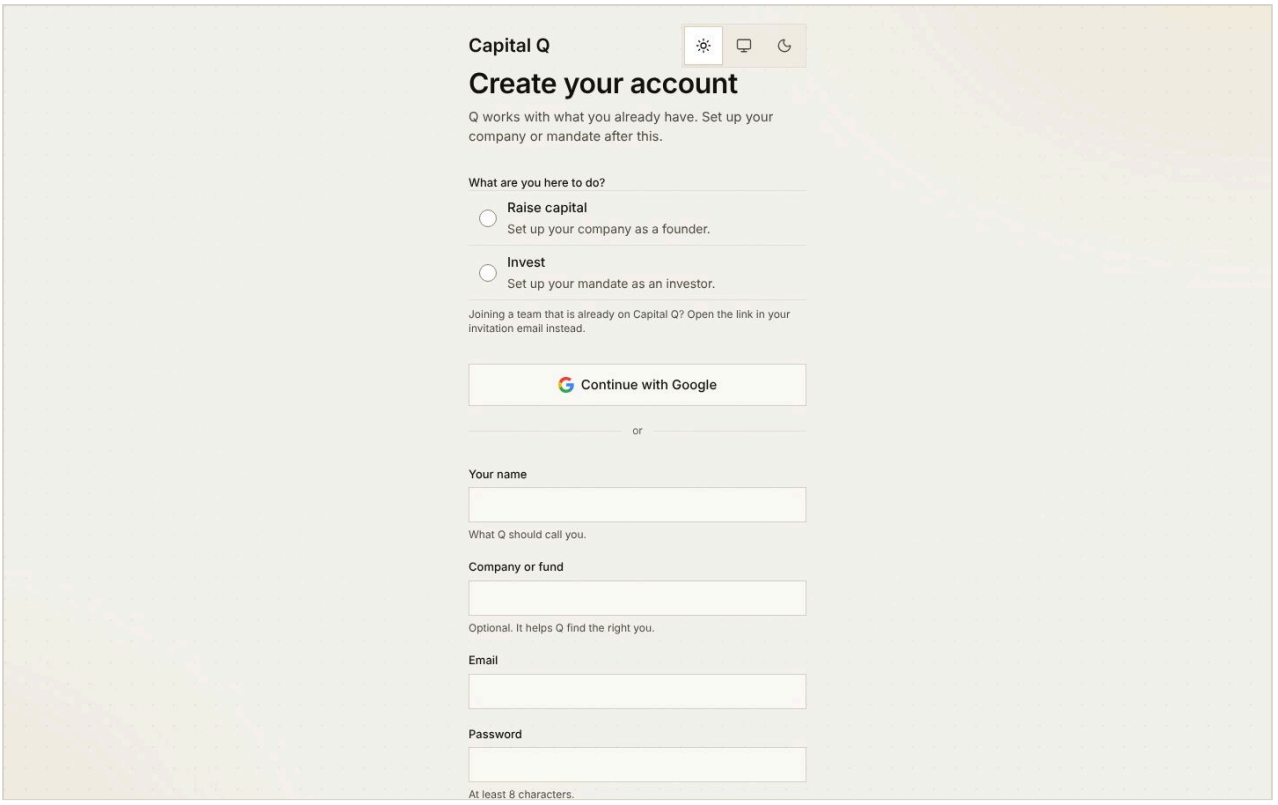

Figure 145. Create your account.

2. Q greets you by name. Click **Start** and tell Q about your company in a sentence or two. Q fills in several fields from one answer and only asks about what is missing.

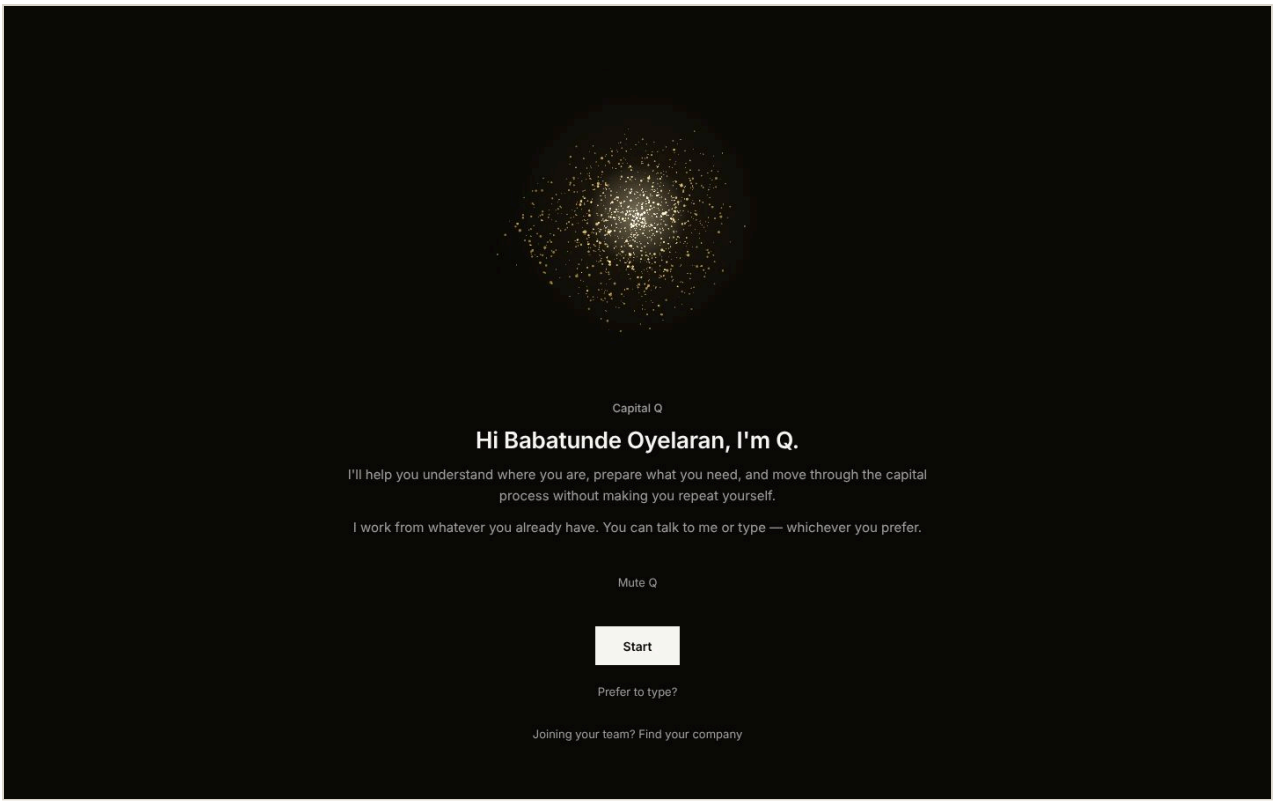

Figure 146. Q greets you.

3. When Q asks what you already have, drop in your deck. Q reads it while you keep talking and shows what it found for you to confirm. If you mark a file private, Q notes it but doesn't read it.
4. Need a break? Click **Continue later**. Next time, Q picks up where you stopped.
5. At the end, open your company profile. The Overview shows which sections are filled from your deck and which are gaps. Open a gap and tell Q about it; confirm Q's wording.

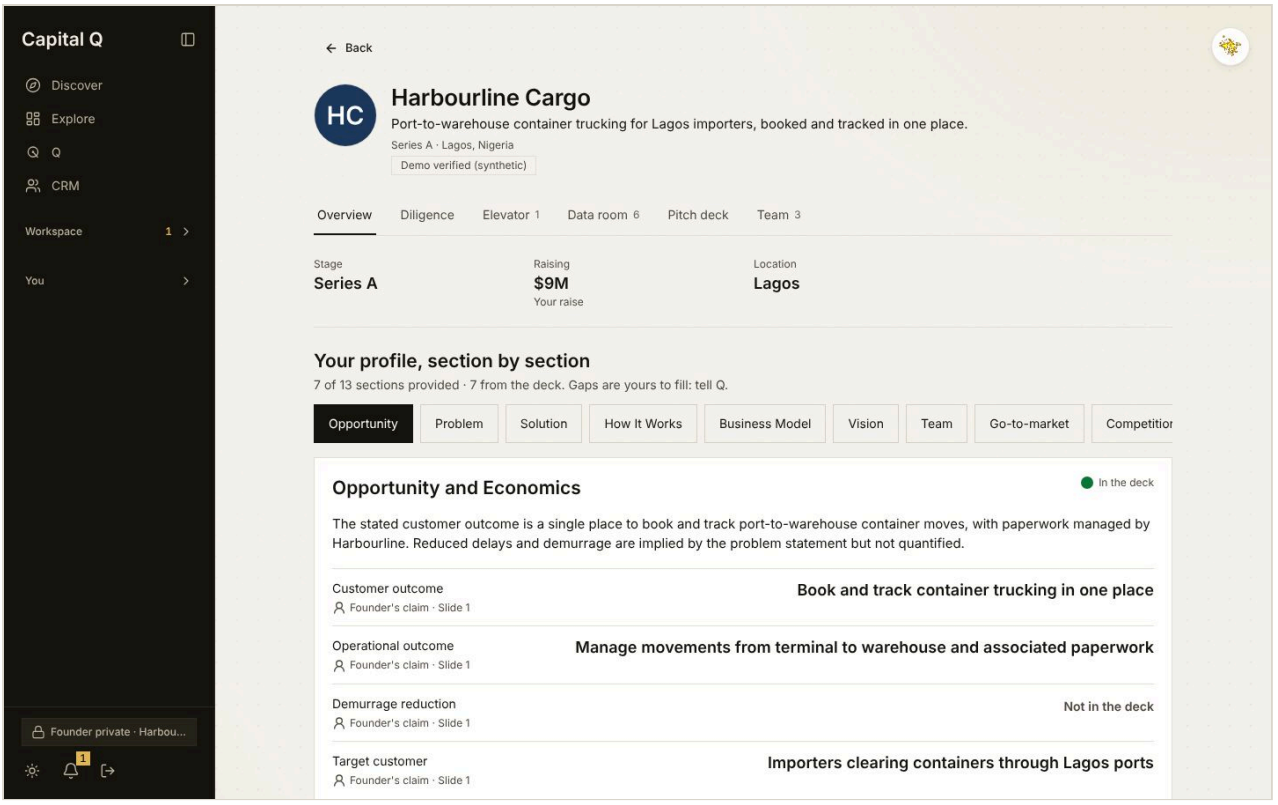

Figure 147. Your Overview: gaps are yours to fill by telling Q.

6. Back on the Q page, Q tells you what is waiting. Click **Look at them** to go through Q's deck reading and other items.

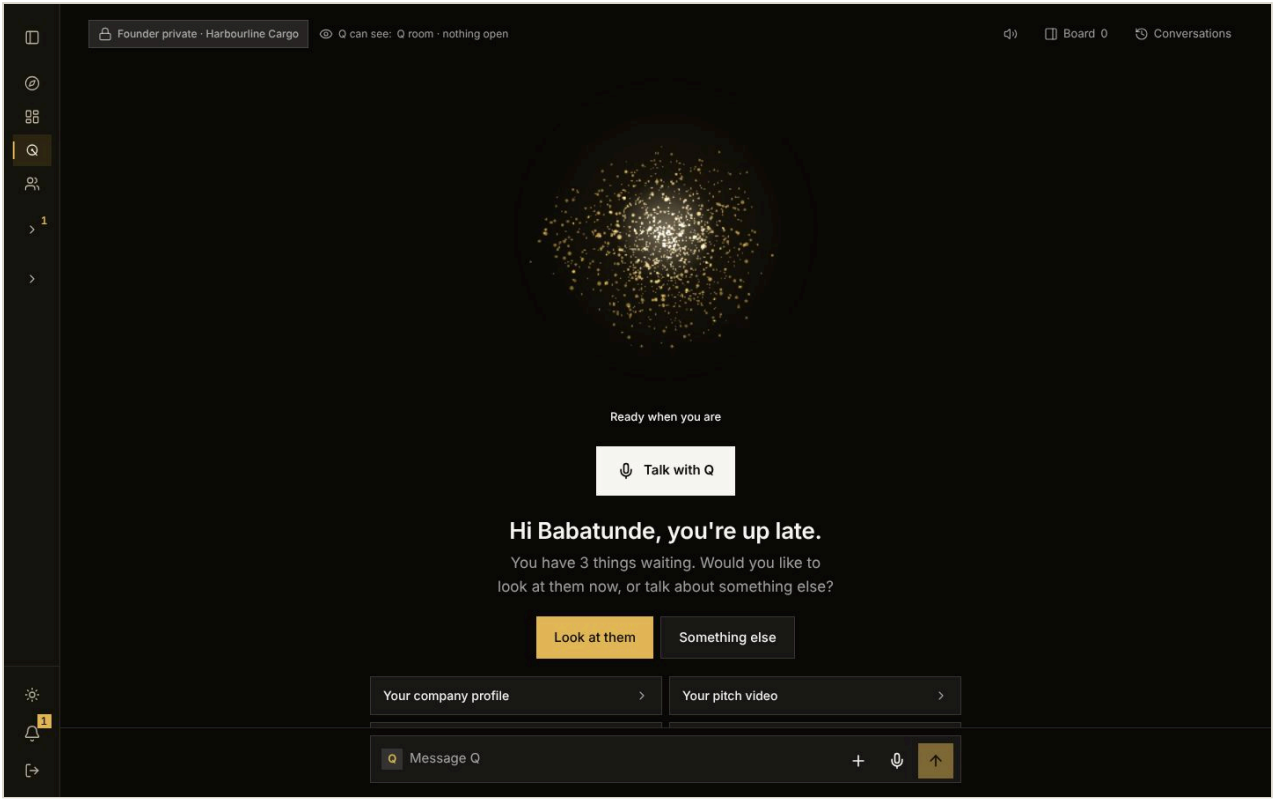

Figure 148. "You have 3 things waiting."

Story 8. An investor works in Arabic and weighs two companies by their scores

Any investor account. Switch back to Automatic when you finish.

1. Click **Settings**, find **Language**, and click **العربية**. The app turns right-to-left at once. Read the lines under the list: screens are translated by hand, and voice is available.

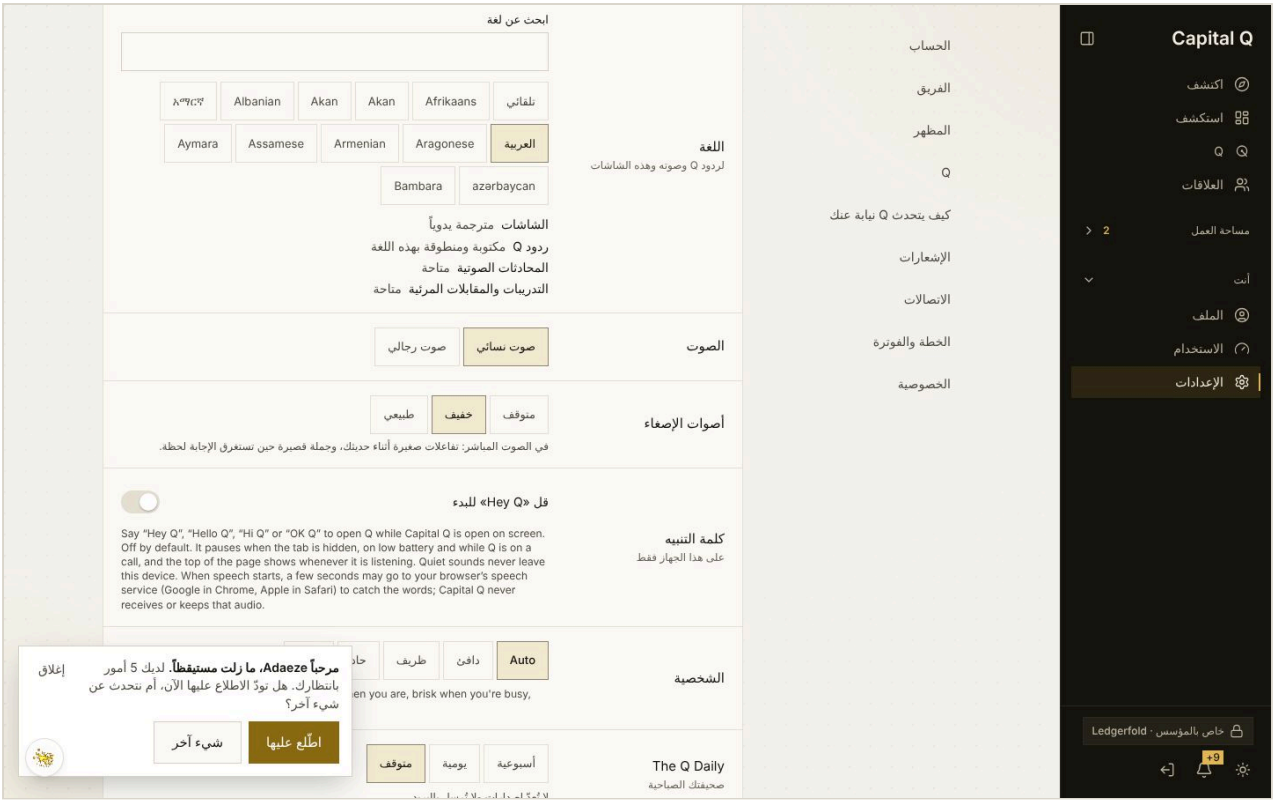

Figure 149. Choosing Arabic.

2. Open **Explore** (استكشف). Each tile shows Inv. and Suit. Tap one to open the company.
3. On the profile, compare the two scores. A high Suitability with low confidence means it fits your mandate on what little is known. Click **Why** to see which factors count and what is missing.

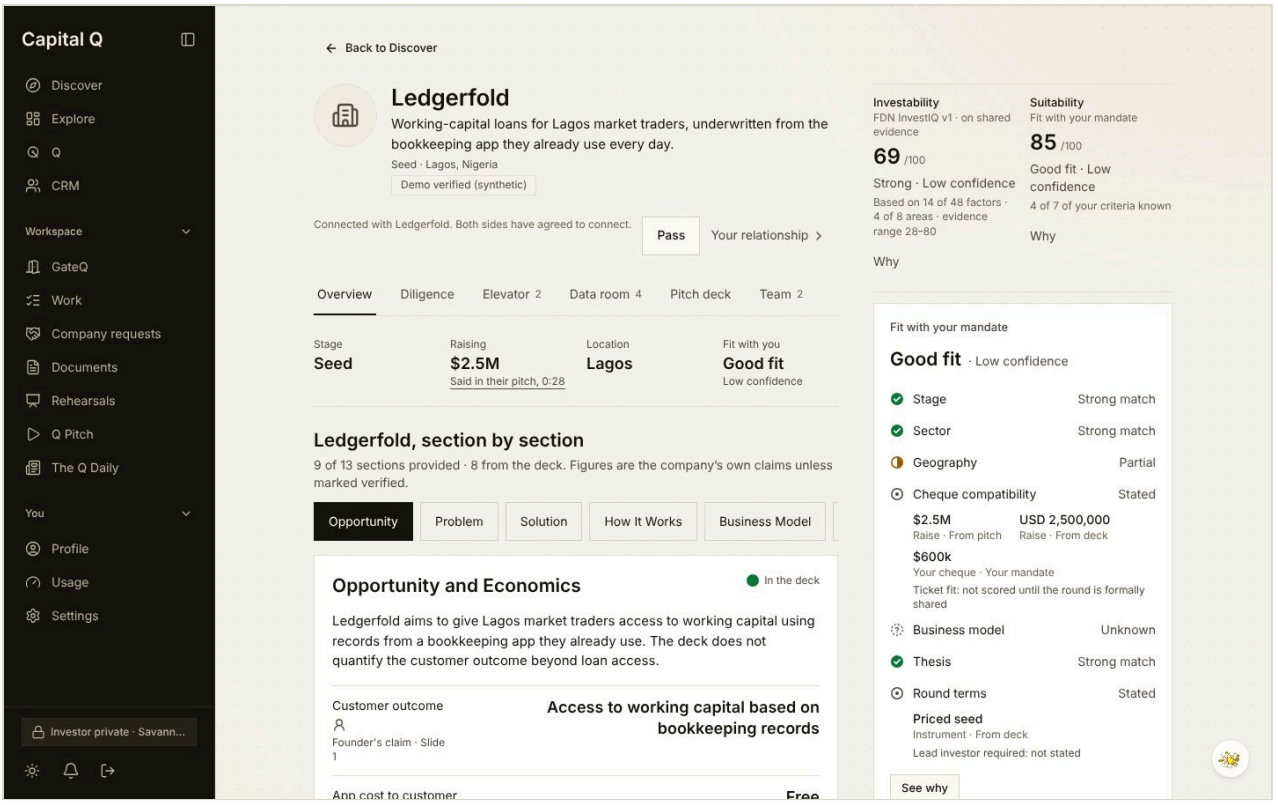

Figure 150. Investability and Suitability, with confidence and coverage.

4. Ask Q, in Arabic or English, “what would raise our confidence in this company?” Q answers in your language and lists the evidence to ask for.
5. In the CRM, the same two scores sit on every row, so you can see at a glance which relationships deserve your time.

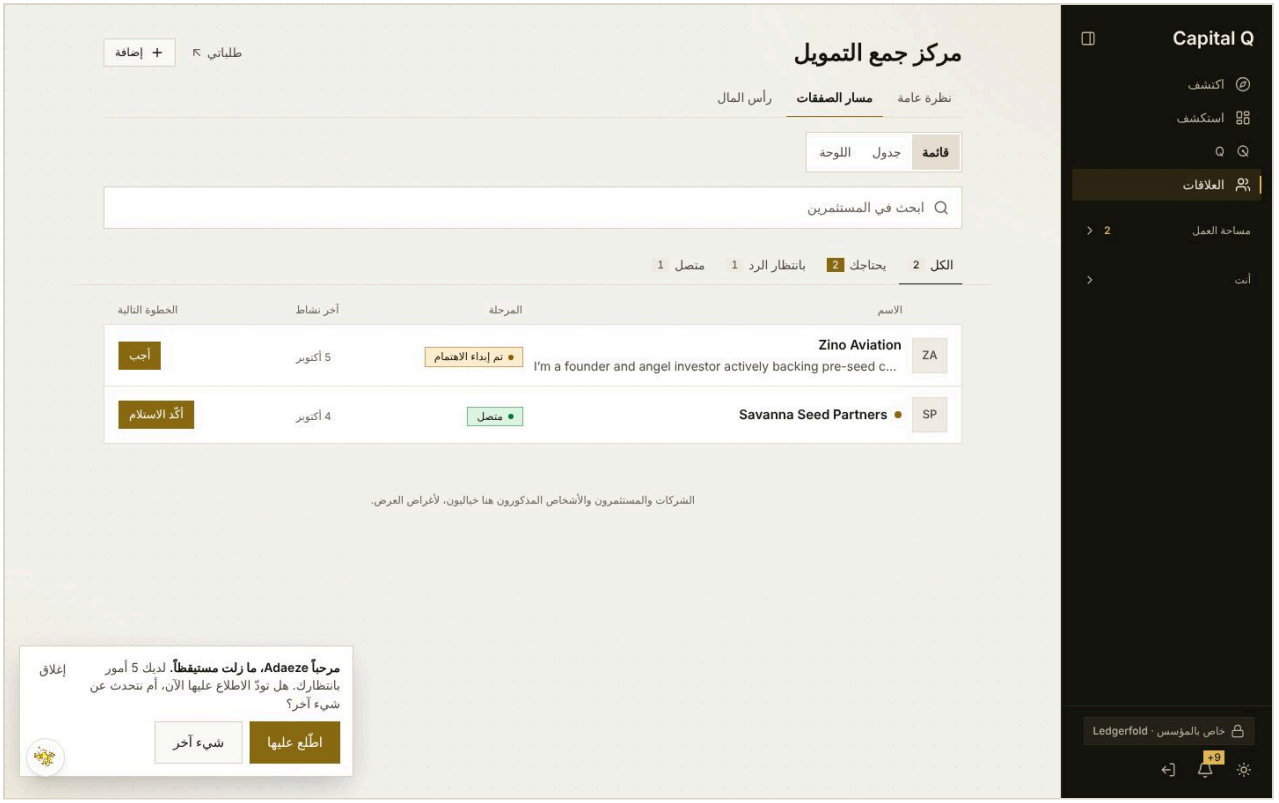

Figure 151. The CRM in Arabic (shown here from a founder account; the investor’s looks the same).

6. Go back to Settings and click **Automatic** to return to your device’s language.

6. Glossary

Approve

Your yes to an action Q prepared. It covers exactly what you saw; if anything changes, Q asks again.

Board

The panel on the Q page where Q keeps its cards, tables and comparisons.

Commitment

An amount an investor says they will invest, confirmed by the company. It moves from agreed, to sent, to received.

Connected

Both sides agreed to talk. It is not an investment.

CRM

Where you track every relationship. Investors call it the Investment Hub; founders the Fundraising Hub.

Data room

A founder’s folders of company documents. The founder decides, document by document, who can see what.

Discover

The ranked video feed of companies (for investors) or the list of investors (for founders).

Dossier

The short report Q makes from a GateQ application, for the investor to review.

Express interest

Telling a company you would like to explore. It is not a commitment.

GateQ

An investor’s front door: published rules, a two-minute fit check for founders, a short interview by Q, and an inbox of dossiers.

InvestIQ

Capital Q’s method for judging how ready a company is to raise. Founders see it as **Readiness** on the Capital page: each area in words, with its evidence and gaps. It does not give a single score yet.

Confidence

How sure a score is, in words. It rises as facts are backed by documents or verification.

Coverage

How much a score is based on, such as “14 of 48 factors” or “4 of 7 criteria known”.

Investability

A score out of 100 for how investable a company looks on the evidence it has shared with investors. The same for every investor.

Mandate

What an investor invests in: stage, cheque size, places, sectors, business types, and red flags. Discover ranks companies against it.

Mandate fit

How well a company matches your mandate. It is not a judgement of the business.

Pass

Moving a company out of your feed, or declining an application. You can undo a pass in Discover.

Pipeline

Your relationships by stage, shown as a list, table or board.

Q

Capital Q’s AI investment analyst. You talk to one Q, wherever you are in the app.

Q Card

A short, shareable summary of a company, with a link and QR code, that works outside Capital Q.

Q Daily

Your personal news edition, daily or weekly.

Q Pitch

A guided tour of Capital Q, narrated by Q.

Q Work

Jobs you have given Q, and the steps waiting for your approval.

Readiness

See InvestIQ.

Rehearsal

A practice meeting where Q plays the other side by voice, followed by a scored review.

Save

Keeping a company for later. The company is not told, and saving is not interest.

Suitability

A score out of 100 for how well a company fits your mandate. Different for each investor, and never blended with Investability.

Unknown

A fact Capital Q doesn’t have. It never counts against anyone.

Verified

Checked by a person at Capital Q. Not an endorsement.

Visibility

Who can see something: just you, your team, a specific investor, everyone on Capital Q, or the public web.

7. Limits and what’s coming

Works today, with limits

- **Booking calls** needs Google Calendar connected in Settings → Connections.
- **Video interviews in GateQ** run on a paid video service with a monthly allowance. When it is off or used up, founders type their answers instead.
- **Rehearsals, Q Daily, web research and other Q features** have monthly allowances on the free Launch plan. See **Settings → Plan**.
- **Voice** needs a microphone and a recent Chrome, Edge or Safari.
- **Pitch videos** need a browser that plays standard web video. Very locked-down browsers show “This pitch can’t play here”; the rest of the profile still works.
- **Scores** are honest about thin evidence: most demo companies are self-reported, so confidence is usually low. The InvestIQ method is still being calibrated. A founder’s private Readiness view stays in words.
- **Voice and video by language:** not every language has voice or video yet; Settings shows which, and typing always works.
- **Red-flag rules** in a mandate can’t all be checked automatically yet. When one can’t, nobody is hidden because of it, and Discover says so.

Coming soon

- **Q Pitch for founders.** Today the tour is for investors only.
- **Q joining live meetings.** “Have Q join a call” is built but has not yet been proven in a live meeting.
- **More Q Pitch chapters**, including meetings, the company data room, readiness and the founder journey.
- **Guest document uploads** in GateQ applications.
- **Ongoing polish.** Small layout fixes ship often, so a screen may look slightly different from these pictures.

This guide is rebuilt from the live product with `scripts/handoff/docs/capture.mjs` and `build.mjs`.
