Capital Q — illustrative high-growth scenario

Illustrative high-growth scenario — synthetic evidence. Not the company's actual performance. Every figure below is invented for illustration. The company's real Capital Q assessment is separate and is computed only from its own evidence.

Scenario illustrative-high-growth-v1 · Unicorn Potential method unicorn-potential.v1.0.0 (input rules unicorn-potential-inputs.v4) · Investability method investiq/v2+investability-inputs.v3 · engine unchanged · clock 2026-10-18T00:00:00.000Z

Result on synthetic evidence

Unicorn Potential: 75/100 · STRONG_SIGNALS · confidence LOW · coverage 96% · stage band PRE_SEED

Investability (reported separately): 58/100 · INVESTABLE · confidence LOW · provisional · 3/46 criteria, 0/8 areas.

Stage. Pre-seed. No owning legal entity, round or revenue is public (UNKNOWN, not zero); the scenario assumes a small pre-seed round and keeps the company at pre-seed.

Scenario assumptions

Capital Q is an AI-native investment intelligence operating system for private capital. The scenario assumes quarterly subscriptions for investor organisations (venture funds, angel networks and family offices) in Africa and the GCC, sold founder-led and through FDN Capital Partners' advisory network, with all figures in USD and measured to 30 September 2026. It is not a marketplace and the scenario takes no fee on capital raised.

Paying investor organisations (Sep 2026)	24 (19 Africa, 5 GCC) at USD 1,500 per month on average
MRR (Sep 2026)	USD 36,000
ARR run-rate (Sep 2026)	USD 432,000
Revenue Q2 2026 / Q3 2026	USD 72,000 / USD 99,000 (+37.5% QoQ)
Contribution margin Q3 2026	76% (USD 75,240 on USD 99,000)
Blended CAC / payback	USD 9,000 per organisation / 7.9 months
Net revenue retention (Sep 2026)	108% (9 of 10 launch-cohort renewals, 1.2x seats)
Cash / net burn / runway	USD 280,000 / USD 14,000 per month / 20 months
Bottom-up accessible market	2,400 active investors x USD 18,000 per year = about USD 43M per year

Why the score stops at 75

- Every synthetic source is USER_CLAIM with evidence status SELF_REPORTED, the most conservative status the rubric still grades (reliability 0.5).
- The engine caps any source at reliability 0.5 or below at grade 3, and grade 4 additionally needs reliability 0.85 or more (MULTI_SOURCE_SUPPORTED, EXTERNALLY_VERIFIED or PLATFORM_VERIFIED) plus sustained, dated execution. Structured metric rules never exceed 3.
- This scenario never claims verification or independent corroboration, so every graded criterion is at most 3 and the overall score is at most 25 × 3 = 75. A score of 90 or more is not legitimately reachable on synthetic evidence; reaching it would need corroborated or verified real evidence across most pillars.
- DOCUMENT_SUPPORTED (0.7) would not change the score, only confidence; it was not used because no supporting document exists for a synthetic figure.

- Confidence follows source reliability, not the score: with every source at 0.5 the confidence index equals 0.5 × coverage, so it reads MODERATE only when all 24 criteria are graded and LOW otherwise.

The 24 criteria

Criterion	Synthetic evidence (self-reported)	State	Grade
P1.A Relevant founder expertise	Founder team previously built and led a private-capital advisory practice and an aviation services business; the cofounders have 15 years of combined experience in private capital, venture advisory and operating companies.	OBSERVED	3
P1.B Adaptability and founder execution	The founders shipped the evidence-graded investor profile in April 2026 and changed the investor feed in response to customer feedback from 9 investor organisations.	OBSERVED	3
P2.A Accessible market demand	Bottom-up accessible market sized from customer spending of USD 18,000 per investor organisation per year (Q3 2026 average of 24 paying organisations) across about 2,400 active venture, angel and family-office investors in Africa and the GCC, or about USD 43 million per year.	OBSERVED	3
P2.B Credible expansion path	Expansion into the GCC: 5 Doha and Dubai family offices became paying customers between July 2026 and September 2026 through introductions from FDN's Doha office.	OBSERVED	3
P3.A Problem severity and willingness to pay	Paying customers cite one problem: analysts spend about 11 hours screening each inbound company before a first call; 24 paying investor organisations use evidence-graded profiles to cut that work.	OBSERVED	3
P3.B Repeated adoption or stage-appropriate tests	Retained customers: 9 of the 10 investor organisations in the January 2026 launch cohort renewed their quarterly terms through September 2026, at 1.2 times their original seat count.	OBSERVED	3
P4.A Dated growth velocity	Subscription revenue grew 37.5% quarter on quarter in 2026: USD 72,000 in Q2 (April 2026 to June 2026) to USD 99,000 in Q3 (July 2026 to September 2026).	OBSERVED	3
P4.B Retention-supported traction	Recurring revenue from 24 investor organisations reached USD 36,000 MRR in September 2026 (USD 432,000 annualised).	OBSERVED	3
P5.A Contribution economics and pricing	Positive contribution margin of 76% measured on Q3 2026 actual revenue of USD 99,000 after model inference, hosting, video delivery and onboarding costs of USD 23,760.	OBSERVED	3
P5.B Sustainable acquisition and monetization	Acquisition payback measured at 7.9 months for organisations won in Q2 2026 and Q3 2026: blended CAC of USD 9,000 against USD 1,140 monthly contribution per organisation.	OBSERVED	3
P6.A Differentiated assets	Proprietary technology deployed in production: evidence-graded company records with separate truth, evidence and lifecycle axes and a deterministic, versioned assessment, used by customers since April 2026.	OBSERVED	3
P6.B Independent defensibility test	(none: left ungraded)	UNKNOWN	—
P7.A Repeatable acquisition channels	Partner-led distribution channel through FDN Capital Partners' advisory network is repeatable: it sourced 15 of the 24 paying investor organisations across Q2 2026 and Q3 2026.	OBSERVED	3
P7.B Organic pull or channel efficiency	Sales conversion from guided demo to paid organisation measured at 31% for demos held between April 2026 and September 2026; referrals between investors sourced 6 new organisations in that period.	OBSERVED	3
P8.A Runway and capital access	Current runway is 20 months at September 2026 net burn of USD 14,000 per month, from cash of USD 280,000 held on 30 September 2026.	OBSERVED	3
P8.B Relevant investor or strategic support	Strategic support executed in April 2026: a USD 400,000 pre-seed round led by two GCC family offices, with an active agreement for FDN Capital Partners to deliver advisory execution to Capital Q customers.	OBSERVED	3

Criterion	Synthetic evidence (self-reported)	State	Grade
P9.A Critical function coverage	Technical, commercial and operational functions are covered: a 5-person engineering and data team, a commercial lead for investor organisations, and an operations lead appointed in May 2026 who runs onboarding and diligence support.	OBSERVED	3
P9.B Time-bound delivery	Product milestones for 2026 were delivered on time: investor profiles in April 2026, mandate intake in July 2026 and the comparison workspace in September 2026.	OBSERVED	3
P10.A Structural demand or technology shift	Structural demand documented: AVCA recorded US$3.9 billion of African venture funding across 506 deals in 2025, led by local funds that screen more companies per analyst.	OBSERVED	3
P10.B Ability to exploit the window	The market window is being used: Capital Q is deployed with 24 paying investor organisations in Nigeria, Kenya, Qatar and the UAE as of September 2026.	OBSERVED	3
P11.A Growth decoupled from costs	Revenue growth exceeds cost growth in actual 2026 results: Q3 2026 revenue rose 37.5% over Q2 2026 while total operating costs rose 10%.	OBSERVED	3
P11.B Repeatable deployment	Repeat deployments completed in 2026: one onboarding process took 24 investor organisations live in Lagos, Nairobi, Doha and Dubai within 5 working days each.	OBSERVED	3
P12.A Ecosystem access and partnerships	Ecosystem partnership executed in June 2026 with an African angel network federation, giving its member networks shared deal-flow access in Capital Q.	OBSERVED	3
P12.B Strategic adjacent opportunities	Strategic opportunity in founder readiness services has a signed customer: a Lagos accelerator licensed readiness diagnostics for its 2026 cohort in August 2026.	OBSERVED	3

Criteria left ungraded

- **P6.B**: Independent defensibility test: the rubric's demonstrated anchor requires an independent (third-party) benchmark. Asserting one would be a claim of independent corroboration, which this scenario never makes, so the criterion is left UNKNOWN. An internal screening-time comparison would grade only 2 (limited).

What real evidence would be needed

Real, current, investor-visible records for each criterion, at least document-supported, and corroborated or verified for a grade of 4. Company-specific gaps from public research:

- The owning legal entity and its relationship to FDN Capital Partners (not established).
- Published pricing and signed customer contracts; seeded demo accounts and access grants are not customers.
- A regulatory analysis of investment-advice, broker and crowdfunding rules in Nigeria, Qatar, the EU and the US.
- Confirmation of the cofounder's name and roles before publication.
